##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In thousands except share data)

#### 2. Summary of Significant Accounting Policies (in part)

**Fair value measurements**—Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, a three level hierarchy for inputs is used. These levels are:

- Level 1—quoted prices (unadjusted) for an identical asset or liability in an active market.
- Level 2—quoted prices for a similar asset or liability in an active market or model-derived valuations in which all significant inputs are observable for substantially the full term of the asset or liability.
- Level 3—unobservable and significant to the fair value measurement of the asset or liability.

The fair values of cash equivalents and deferred compensation plan assets (included in other assets) are based on quoted market prices. The fair values of accounts receivable and accounts payable at July 30, 2010 and July 31, 2009,

approximate their carrying amounts due to their short duration. The fair value of the Company's variable-rate term loans and revolving credit facility, based on quoted market prices, totaled approximately \$566,510 and \$619,200 on July 30, 2010 and July 31, 2009, respectively. The estimated fair value of the Company's interest rate swap is the present value of the expected cash flows, which is calculated by using the replacement fixed rate in the then-current market, and incorporates the Company's own non-performance risk. See Note 3 for additional information on the Company's fair value measurements.

*Derivative instruments and hedging activities (in part)*—The Company is exposed to market risk, such as changes in interest rates and commodity prices. The Company has interest rate risk relative to its outstanding borrowings under its Credit Facility (see Note 5). Loans under the Credit Facility bear interest, at the Company's election, either at the prime rate or LIBOR plus a percentage point spread based on certain specified financial ratios. The Company uses derivative instruments to mitigate its interest rate risk. The Company's policy has been to manage interest cost using a mix of fixed and variable rate debt (see Note 5). To manage this risk in a cost efficient manner, the Company entered into an interest rate swap on May 4, 2006 in which it agreed to exchange with a counterparty, at specified intervals effective August 3, 2006, the difference between fixed and variable interest amounts calculated by reference to an agreed-upon notional principal amount.

The swapped portion of the outstanding debt or notional amount of the interest rate swap is as follows:

|                                    |           |
|------------------------------------|-----------|
| From August 3, 2006 to May 2, 2007 | \$525,000 |
| From May 3, 2007 to May 5, 2008    | 650,000   |
| From May 6, 2008 to May 4, 2009    | 625,000   |
| From May 5, 2009 to May 3, 2010    | 600,000   |
| From May 4, 2010 to May 2, 2011    | 575,000   |
| From May 3, 2011 to May 2, 2012    | 550,000   |
| From May 3, 2012 to May 3, 2013    | 525,000   |

The interest rate swap was accounted for as a cash flow hedge. The swapped portion of the Company's outstanding debt is fixed at a rate of 5.57% plus the Company's credit spread over the 7-year life of the interest rate swap. The Company's weighted average credit spreads at July 30, 2010 and July 31, 2009 were 1.90% and 1.50%, respectively.

Additionally, the Company entered into an interest rate swap on August 10, 2010 in which it agreed to exchange with a counterparty, effective May 3, 2013, the difference between fixed and variable interest amounts calculated by reference to the notional principal amount of \$200,000. The interest rate swap was accounted for as a cash flow hedge. The swapped portion of the Company's outstanding debt will be fixed at a rate of 2.73% plus the Company's credit spread over the 2-year life of the interest rate swap.

The Company does not hold or use derivative instruments for trading purposes. The Company also does not have any derivatives not designated as hedging instruments and has not designated any non-derivatives as hedging instruments. See Note 6 for additional information on the Company's derivative and hedging activities.

### 3. Fair Value Measurements (in part)

The Company's assets and liabilities measured at fair value on a recurring basis at July 30, 2010 were as follows:

| (In thousands, except share data)                 | Quoted Prices in Active Markets for Identical Assets (Level 1) | Significant Other Observable Inputs (Level 2) | Significant Unobservable Inputs (Level 3) | Fair Value as of July 30, 2010 |
|---------------------------------------------------|----------------------------------------------------------------|-----------------------------------------------|-------------------------------------------|--------------------------------|
| Cash equivalents <sup>(*)</sup>                   | \$35,250                                                       | \$ —                                          | \$—                                       | \$35,250                       |
| Deferred compensation plan assets <sup>(**)</sup> | 25,935                                                         | —                                             | —                                         | 25,935                         |
| Total assets at fair value                        | \$61,185                                                       | \$ —                                          | \$—                                       | \$61,185                       |
| Interest rate swap liability (see Note 6)         | \$ —                                                           | \$66,281                                      | \$—                                       | \$66,281                       |
| Total liabilities at fair value                   | \$ —                                                           | \$66,281                                      | \$—                                       | \$66,281                       |

The Company's assets and liabilities measured at fair value on a recurring basis at July 31, 2009 were as follows:

| (In thousands, except share data)                 | Quoted Prices in Active Markets for Identical Assets (Level 1) | Significant Other Observable Inputs (Level 2) | Significant Unobservable Inputs (Level 3) | Fair Value as of July 31, 2009 |
|---------------------------------------------------|----------------------------------------------------------------|-----------------------------------------------|-------------------------------------------|--------------------------------|
| Cash equivalents <sup>(*)</sup>                   | \$ 48                                                          | \$ —                                          | \$—                                       | \$ 48                          |
| Deferred compensation plan assets <sup>(**)</sup> | 22,583                                                         | —                                             | —                                         | 22,583                         |
| Total assets at fair value                        | \$22,631                                                       | \$ —                                          | \$—                                       | \$22,631                       |
| Interest rate swap liability (see Note 6)         | \$ —                                                           | \$61,232                                      | \$—                                       | \$61,232                       |
| Total liabilities at fair value                   | \$ —                                                           | \$61,232                                      | \$—                                       | \$61,232                       |

<sup>(\*)</sup> Consists of money market fund investments.

<sup>(\*\*)</sup> Represents plan assets invested in mutual funds established under a Rabbi Trust for the Company's non-qualified savings plan and is included in the Consolidated Balance Sheet as other assets (see Note 13).

### 6. Derivative Instruments and Hedging Activities (in part)

The estimated fair values of the Company's derivative instrument were as follows:

| (In thousands, except share data) | Balance Sheet Location       | July 31, 2009 | July 30, 2010 |
|-----------------------------------|------------------------------|---------------|---------------|
|                                   |                              | Fair Value    | Fair Value    |
| Interest rate swap (See Note 3)   | Interest rate swap liability | \$61,232      | \$66,281      |

The estimated fair value of the Company's interest rate swap liability incorporates the Company's own non-performance risk. The adjustment related to the Company's non-performance risk at July 30, 2010 and July 31, 2009 resulted in reductions of \$3,915 and \$5,372, respectively, in the fair value of the interest rate swap liability. The offset to the interest rate swap liability is recorded in accumulated other comprehensive loss ("AOCL"), net of the deferred tax asset, and will be reclassified into earnings over the term of the underlying debt. As of July 30, 2010, the estimated pre-tax portion of AOCL that is expected to be reclassified into earnings over the next twelve months is \$29,270. Cash flows related to the interest rate swap are included in interest expense and in operating activities.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 13—Mall Sales

#### The Grand Canal Shoppes at The Venetian Las Vegas

In April 2004, the Company entered into an agreement to sell The Grand Canal Shoppes and lease certain restaurant and other retail space at the casino level of The Venetian Las Vegas (the "Master Lease") to GGP for approximately \$766.0 million (the "Mall Sale"). The Mall Sale closed in May 2004, and the Company realized a gain of \$417.6 million in connection with the Mall Sale. Under the Master Lease agreement, The Venetian Las Vegas leased nineteen spaces on its casino level currently occupied by various tenants to GGP for 89 years with annual rent of one dollar and GGP assumed the various leases. Under generally accepted accounting principles, the Master Lease agreement does not qualify as a sale of the real property assets, which real property was not separately legally demised. Accordingly, \$109.2 million of the transaction has been deferred as prepaid operating lease payments to The Venetian Las Vegas, which will amortize into income on a straight-line basis over the 89-year lease term. During each of the years ended December 31, 2010, 2009 and 2008, \$1.2 million of this deferred item was amortized and is included in convention, retail and other revenue. In addition, the Company agreed with GGP to: (i) continue to be obligated to fulfill certain lease termination and asset purchase agreements as further described in "Note 14—Commitments and Contingencies—Other Ventures and Commitments"; (ii) lease the Blue Man Group theater space located within The Grand Canal Shoppes from GGP for a period of 25 years with fixed minimum rent of \$3.3 million per year with cost of living adjustments; (iii) operate the Gondola ride under an operating agreement for a period of 25 years for an annual fee of \$3.5 million; and (iv) lease certain office space from GGP for a period of 10 years, subject to extension options for a period of up to 65 years, with annual rent of approximately \$0.9 million. The lease payments under clauses (ii) through (iv) above are subject to automatic increases beginning on the sixth lease year. The net present value of the lease payments under clauses (ii) through (iv) on the closing date of the sale was \$77.2 million. Under generally accepted accounting principles, a portion of the transaction must be deferred in an amount equal to the present value of the minimum lease payments set forth in the lease back agreements. This deferred gain will be amortized to reduce lease expense on a straight-line basis over the life of the leases. During each of the years ended December 31, 2010, 2009 and 2008, \$3.5 million of this deferred item was amortized as an offset to convention, retail and other expense.

As of December 31, 2010, the Company was obligated under (ii), (iii), and (iv) above to make future payments as follows (in thousands):

|            |                  |
|------------|------------------|
| 2011       | \$ 8,043         |
| 2012       | 8,043            |
| 2013       | 8,043            |
| 2014       | 7,725            |
| 2015       | 7,497            |
| Thereafter | 106,302          |
|            | <u>\$145,653</u> |

### *The Shoppes at The Palazzo*

The Shoppes at The Palazzo opened on January 18, 2008, with some tenants not yet open and with construction of certain portions of the mall not yet completed. Pursuant to the Amended Agreement, the Company contracted to sell The Shoppes at The Palazzo to GGP. The Final Purchase Price for The Shoppes at The Palazzo is determined by taking The Shoppes at The Palazzo's NOI, as defined in the Amended Agreement, for months 19 through 30 of its operations (assuming that the fixed rent and other fixed periodic payments due from all tenants in month 30 was actually due in each of months 19 through 30, provided that this 12-month period can be delayed if certain conditions are satisfied) divided by a capitalization rate. The capitalization rate is 0.06 for every dollar of NOI up to \$38.0 million and 0.08 for every dollar of NOI above \$38.0 million. On the closing date of the sale, February 29, 2008, GGP made its initial purchase price payment of \$290.8 million based on projected net operating income for the first 12 months of operations (only taking into account tenants open for business or paying rent as of February 29, 2008). Pursuant to the Amended Agreement, periodic adjustments to the purchase price (up or down, but never to less than \$250.0 million) were to be made based on projected NOI for the then upcoming 12 months. Pursuant to the Amended Agreement, the Company received an additional \$4.6 million in June 2008, representing the adjustment payment at the fourth month after closing. During the years ended December 31, 2010 and 2009, the Company and GGP agreed to suspend the scheduled purchase price adjustments, subsequent to the June 2008 payment, except for the Final Purchase Price payment. Subject to adjustments for certain audit and other issues, the final adjustment to the purchase price was to be made on the 30-month anniversary of the closing date (or later if certain conditions are satisfied) based on the previously described formula. For all purchase price and purchase price adjustment calculations, NOI will be calculated by using the "accrual" method of accounting. Additionally, given the economic and market conditions facing retailers on a national and local level, tenants are facing economic challenges that have had an effect on the calculation of NOI. During the year ended December 31, 2010, the Company and GGP deferred the time to reach agreement on the Final Purchase Price as both parties were continuing to work on various matters related to the calculation of NOI.

In April 2009, GGP and its subsidiary that owns The Shoppes at The Palazzo filed voluntary petitions under Chapter 11 of the U.S. Bankruptcy Code (the "Chapter 11 Cases"). The United States Bankruptcy Court for the Southern District of New York entered orders approving the plans of reorganization of GGP and the subsidiary that owns The Shoppes at The Palazzo on October 21 and April 29, 2010, respectively, and the effective date of such plans of reorganization occurred on November 9 and May 28, 2010, respectively. Under the confirmed plans of reorganization, the only impaired creditors were mortgage holders. The Company will continue to review the Chapter 11 Cases and will adjust the estimates of NOI and capitalization rates as additional information is received.

In the Amended Agreement, the Company agreed to lease certain restaurant and retail space on the casino level of The Palazzo to GGP pursuant to a master lease agreement ("The

Palazzo Master Lease"). Under The Palazzo Master Lease, which was executed concurrently with, and as a part of, the closing on the sale of The Shoppes at The Palazzo to GGP on February 29, 2008, The Palazzo leased nine restaurant and retail spaces on the casino level of The Palazzo, currently occupied by various tenants, to GGP for 89 years with annual rent of one dollar and GGP assumed the various tenant operating leases for those spaces. Under generally accepted accounting principles, The Palazzo Master Lease does not qualify as a sale of the real property, which real property was not separately legally demised. Accordingly, \$41.8 million of the mall sale transaction has been deferred as prepaid operating lease payments to The Palazzo, which is amortized into income on a straight-line basis over the 89-year lease term. An additional \$7.0 million of the total proceeds from the mall sale transaction has been deferred as unearned revenues as of December 31, 2010. This balance will be adjusted upon resolution of the Final Purchase Price.

In addition, the Company agreed with GGP to lease certain spaces located within The Shoppes at The Palazzo for a period of 10 years with total fixed minimum rents of \$0.7 million per year, subject to extension options for a period of up to 10 years and automatic increases beginning on the second lease year. As of December 31, 2009, the Company was obligated to make future payments of approximately \$0.8 million annually for the five years ended December 31, 2014, and \$3.2 million thereafter. Under generally accepted accounting principles, a gain on the sale has not been recorded as the Company has continuing involvement in the transaction related to the certain activities to be performed on behalf of GGP and the uncertainty of the final sales price, which will be determined as previously described. Therefore, \$243.9 million of the mall sale transaction has been recorded as deferred proceeds from the sale as of December 31, 2010, which accrued interest at an imputed interest rate offset by (i) imputed rental income and (ii) rent payments made to GGP related to those spaces leased back from GGP. The property sold to GGP will continue to be recorded in the Company's consolidated financial statements until the Final Purchase Price has been determined.

## **ACCUMULATED OTHER COMPREHENSIVE INCOME**

### **PRESENTATION**

**2.196** FASB ASC 220, *Comprehensive Income*, requires that a separate caption for accumulated other comprehensive income be presented in the "Equity" section of a balance sheet. An entity should disclose accumulated balances for each classification in that separate component of equity on the face of a balance sheet, in a statement of changes in equity, or in notes to the financial statements.

## Section 3: Income Statement

### INCOME STATEMENT FORMAT

#### PRESENTATION

**3.01** Either a single-step or multistep form is acceptable for preparing a statement of income. In a single-step format, income tax is shown as a separate last item. In a multistep format, either costs are deducted from sales to show the gross margin, or costs and expenses are deducted from sales to show operating income. Further, net income should reflect all items of profit and loss recognized during the period, except for certain entities (investment companies, insurance entities, and certain not-for-profit entities) and with the sole exception of error corrections, as discussed in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 250, *Accounting Changes and Error Corrections*.

**3.02** FASB ASC 220, *Comprehensive Income*, requires that comprehensive income and its components be reported in a financial statement. Comprehensive income and its components can be reported in an income statement, a separate statement of comprehensive income, or a statement of changes in stockholders' equity.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

*Note 2. Summary of Significant Accounting Policies (in part)*

##### *Reclassifications*

During the first quarter of 2010, we changed the definitions we use to classify expenses as cost of sales, selling expenses or general, administrative and other operating expenses and, as a result, certain expenses in our consolidated statements of operations for the prior year have been reclassified to conform to the current year presentation. Our new definitions of these expenses are as follows:

- *Cost of sales (exclusive of depreciation and amortization)* are expenses incurred in providing products and services to our customers. These expenses include: facilities expenses (which are third-party telecommunications expenses we incur for using other carriers' networks to provide services to our customers); employee-related expenses directly attributable to operating and maintaining our network (such as salaries, wages and certain benefits); equipment sales expenses (such as data integration and modem expenses); rents and utilities expenses incurred by our network operations and data centers; fleet expenses; and other expenses directly related to our network operations (such as professional fees and outsourced services).
- *Selling expenses* are expenses incurred in selling products and services to our customers. These expenses include: employee-related expenses directly attributable to selling products or services (such as salaries, wages, internal commissions and certain benefits); marketing and advertising; external commissions; bad debt expense; and other selling expenses (such as professional fees and outsourced services).
- *General, administrative and other operating expenses* are corporate overhead and other operating expenses. These expenses include: employee-related expenses for administrative functions (such as salaries, wages and certain benefits); taxes and fees (such as property and other taxes and universal service funds ("USF") charges); rents and utilities expenses incurred by our administrative offices; and other general, administrative and other operating expenses (such as professional fees). These expenses also include our combined net periodic pension and post-retirement benefits expenses for all eligible employees and retirees.

These definitions reflect changes primarily to reclassify expenses for: rent and utilities incurred by our network operations and data centers; fleet; network and supply chain

management; and insurance and risk management from general, administrative and other operating expenses to cost of sales, where these expenses are more aligned with how we now manage our segments. We believe these changes allow users of our financial statements to better understand our expense structure. These expense classifications may not be comparable to those of other companies. These changes had no impact on total operating expenses or net income for any period. These changes resulted in the reclassification of \$370 million and \$371 million from the general, administrative and other operating expenses and selling expenses categories to cost of sales for the years ended December 31, 2009 and 2008, respectively.

We have also reclassified certain other prior year amounts in our Annual Report on Form 10-K for the year ended December 31, 2009 to conform to the current year presentation.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 7. Financial Instruments (in part)

Below are the impacts of our commodity-based and interest rate derivatives to our income statement and statement of comprehensive income (loss) for the years ended December 31, 2010 and 2009:

| (In millions)                                                    | 2010               |                  |              |                                   | 2009               |                  |              |                                   |
|------------------------------------------------------------------|--------------------|------------------|--------------|-----------------------------------|--------------------|------------------|--------------|-----------------------------------|
|                                                                  | Operating Revenues | Interest Expense | Other Income | Other Comprehensive Income (Loss) | Operating Revenues | Interest Expense | Other Income | Other Comprehensive Income (Loss) |
| Production-related derivatives <sup>(1)</sup>                    | \$390              | \$—              | \$—          | \$ 11                             | \$687              | \$—              | \$ —         | \$(406)                           |
| Other natural gas and power derivatives not designated as hedges | (45)               | —                | —            | —                                 | 41                 | —                | —            | —                                 |
| Total interest rate derivatives <sup>(2)</sup>                   | —                  | 18               | —            | (52)                              | —                  | 14               | (26)         | 9                                 |
| Total <sup>(3)</sup>                                             | \$345              | \$18             | \$—          | \$(41)                            | \$728              | \$14             | \$(26)       | \$(397)                           |

<sup>(1)</sup> We reclassified \$11 million of accumulated other comprehensive loss and \$406 million of accumulated other comprehensive income for the years ended December 31, 2010 and 2009 into operating revenues related to derivatives for which we removed the cash-flow hedging designation in 2008. Approximately \$11 million of our accumulated other comprehensive loss will be reclassified to operating revenues over the next twelve months.

<sup>(2)</sup> Included in interest expense is \$7 million representing the amount of accumulated other comprehensive income that was reclassified into income related to these interest rate derivatives designated as cash flow hedges for each of the years ended December 31, 2010 and 2009. Also included in interest expense is \$11 million and \$7 million related to our fair value interest rate derivatives for the years ended December 31, 2010 and 2009. We anticipate that \$24 million of our accumulated other comprehensive income will be reclassified to interest expense during the next twelve months. No ineffectiveness was recognized on our interest rate hedges for the year ended December 31, 2010 and 2009.

<sup>(3)</sup> Excludes approximately \$3 million of losses and \$21 million of gains for the year ended December 31, 2010 and 2009 recognized in operating expenses related to other derivative instruments not associated with our price risk management activities.

## REVENUES AND GAINS

### RECOGNITION AND MEASUREMENT

**3.06** As explained by FASB ASC 605-10-25-1, the recognition of revenue and gains of an entity during a period involves consideration of the following two factors, with sometimes one and sometimes the other being the more important consideration:

- *Being realized or realizable.* Revenue and gains generally are not recognized until realized or realizable. Paragraph 83(a) of FASB Concepts Statement No. 5, *Recognition and Measurement in Financial Statements of Business Enterprises*, states that revenue and gains are realized when products (goods or services), merchandise, or other assets are exchanged for cash or claims to cash. That paragraph states that revenue and gains are realizable when related assets received or held are readily convertible to known amounts of cash or claims to cash.
- *Being earned.* Paragraph 83(b) of FASB Concepts Statement No. 5 states that revenue is not recognized until earned. That paragraph states that an entity's revenue-earning activities involve delivering or producing goods, rendering services, or other activities that constitute its ongoing major or central operations, and revenues are considered to have been earned when the entity has substantially accomplished what it must do to be entitled to the benefits represented by the revenues. That paragraph states that gains commonly result from transactions and other events that involve no earning process, and for recognizing gains, being earned is generally less significant than being realized or realizable.

### 3.07

**TABLE 3-2: FREQUENTLY DISCLOSED GAINS AND OTHER INCOME\***

Gains and other income most frequently shown on the face of the income statement or disclosed by the survey entities are listed in Table 3-2. Excluded from Table 3-2 are credits shown after the income tax caption, segment disposals, and extraordinary credits.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 1—Summary of Significant Accounting Policies (in part)

#### Revenue Recognition

Net sales consist primarily of revenue from the sale of hardware, software, digital content and applications, peripherals, and service and support contracts. The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable, and collection is probable. Product is considered delivered to the customer once it has been shipped and title and risk of loss have been transferred. For most of the Company's product sales, these criteria are met at the time the product is shipped. For online sales to individuals, for some sales to education customers in the U.S., and for certain other sales, the Company defers revenue until the customer receives the product because the Company legally retains a portion of the risk of loss on these sales during transit. The Company recognizes revenue from the sale of hardware products (e.g., Macs, iPhones, iPads, iPods and peripherals), software bundled with hardware that is essential to the functionality of the hardware, and third-party digital content sold on the iTunes Store in accordance with general revenue recognition accounting guidance. The Company recognizes revenue in accordance with industry specific software accounting guidance for the following types of sales transactions: (i) standalone sales of software products, (ii) sales of software upgrades and (iii) sales of software bundled with hardware not essential to the functionality of the hardware.

The Company sells software and peripheral products obtained from other companies. The Company generally establishes its own pricing and retains related inventory risk, is the primary obligor in sales transactions with its customers, and assumes the credit risk for amounts billed to its customers. Accordingly, the Company generally recognizes revenue for the sale of products obtained from other companies based on the gross amount billed. For certain sales made through the iTunes Store, including sales of third-party software applications for the Company's iOS devices, the Company is not the primary obligor to users of the software, and third-party developers determine the selling price of their software. Therefore, the Company accounts for such sales on a net basis by recognizing only the commission it retains from each sale and including that commission in net sales in the Consolidated Statements of Operations. The portion of the sales price paid by users that is remitted by the Company to third-party developers is not reflected in the Company's Consolidated Statement of Operations.

The Company records deferred revenue when it receives payments in advance of the delivery of products or the performance of services. This includes amounts that have been deferred related to embedded unspecified and specified software upgrades rights. The Company sells gift cards redeemable at its retail and online stores, and also sells gift cards redeemable on the iTunes Store for the purchase of content and software. The Company records deferred revenue upon the sale of the card, which is relieved upon redemption of the card by the customer. Revenue from AppleCare service and support contracts is deferred and recognized ratably over the service coverage periods. AppleCare service and support contracts typically include extended phone support, repair services, web-based support resources and diagnostic tools offered under the Company's standard limited warranty.

The Company records reductions to revenue for estimated commitments related to price protection and for customer incentive programs, including reseller and end-user rebates, and other sales programs and volume-based incentives. The estimated cost of these programs is recognized in the period the Company has sold the product and committed to a plan. The Company also records reductions to revenue for expected future product returns based on the Company's historical experience. Revenue is recorded net of taxes collected from customers that are remitted to governmental authorities, with the collected taxes recorded as current liabilities until remitted to the relevant government authority.

#### Revenue Recognition for Arrangements with Multiple Deliverables

For multi-element arrangements that include tangible products that contain software that is essential to the tangible product's functionality and undelivered software elements that relate to the tangible product's essential software, the Company allocates revenue to all deliverables based on their relative selling prices. In such circumstances, the Company uses a hierarchy to determine the selling price to be used for allocating revenue to deliverables: (i) vendor-specific objective evidence of fair value ("VSOE"), (ii) third-party evidence of selling price ("TPE"), and (iii) best estimate of the selling price ("ESP"). VSOE generally exists only when the Company sells the deliverable separately and is the price actually charged by the Company for that deliverable. ESPs reflect the Company's best estimates of what the selling prices of elements would be if they were sold regularly on a stand-alone basis.

As described in more detail below, for all past and current sales of iPhone, iPad, Apple TV and for sales of iPod touch beginning in June 2010, the Company has indicated it may from time-to-time provide future unspecified software upgrades and features free of charge to customers. The Company has identified two deliverables in arrangements involving the sale of these devices. The first deliverable is the hardware and software essential to the functionality of the hardware device delivered at the time of sale. The second deliverable is the embedded right included with the purchase of iPhone, iPad, iPod touch and Apple TV to receive on a when-and-if-available basis, future unspecified software upgrades and features relating to the product's essential software. The Company has allocated revenue between these two deliverables using the relative selling price method. Because the Company has neither VSOE nor TPE for the two deliverables, the allocation of revenue has been based on the Company's ESPs. Amounts allocated to the delivered hardware and the related essential software are recognized at the time of sale provided the other conditions for revenue recognition have been met. Amounts allocated to the embedded unspecified software upgrade rights are deferred and recognized on a straight-line basis over the 24-month estimated life of each of these devices. All product cost of sales, including estimated warranty costs, are recognized at the time of sale. Costs for engineering and sales and marketing are expensed as incurred.

The Company's process for determining its ESP for deliverables without VSOE or TPE considers multiple factors that may vary depending upon the unique facts and circumstances related to each deliverable. The Company believes its customers, particularly consumers, would be reluctant to buy unspecified software upgrade rights related to iPhone, iPad, iPod touch and Apple TV. This view is primarily based

on the fact that unspecified upgrade rights do not obligate the Company to provide upgrades at a particular time or at all, and do not specify to customers which upgrades or features will be delivered. Therefore, the Company has concluded that if it were to sell upgrade rights on a standalone basis, including those rights associated with iPhone, iPad, iPod touch and Apple TV, the selling price would be relatively low. Key factors considered by the Company in developing the ESPs for these upgrade rights include prices charged by the Company for similar offerings, the Company's historical pricing practices, the nature of the upgrade rights (e.g., unspecified and when-and-if-available), and the relative ESP of the upgrade rights as compared to the total selling price of the product. The Company may also consider, when appropriate, the impact of other products and services, including advertising services, on selling price assumptions when developing and reviewing its ESPs for software upgrade rights and related deliverables. The Company may also consider additional factors as appropriate, including the pricing of competitive alternatives if they exist, and product-specific business objectives.

Beginning in the third quarter of 2010 in conjunction with the announcement of iOS 4, the Company's ESPs for the embedded software upgrade rights included with iPhone, iPad and iPod touch reflect the positive financial impact expected by the Company as a result of its introduction of a mobile advertising platform for these devices and the expectation of customers regarding software that includes or supports an advertising component. iOS 4 supports iAd, the Company's new mobile advertising platform, which enables applications on iPhone, iPad and iPod touch to embed media-rich advertisements.

For all periods presented, the Company's ESP for the embedded software upgrade right included with each Apple TV sold is \$10. The Company's ESP for the software upgrade right included with each iPhone sold through the Company's second quarter of 2010 was \$25. Beginning in April 2010 in conjunction with the Company's announcement of iOS 4 for iPhone, the Company lowered its ESP for the software upgrade right included with each iPhone to \$10.

Beginning with initial sales of iPad in April 2010, the Company has also indicated it may from time-to-time provide

future unspecified software upgrades and features free of charge to iPad customers. The Company's ESP for the embedded software upgrade right included with the sale of each iPad is \$10. In June 2010, the Company announced that certain previously sold iPod touch models would receive an upgrade to iOS 4 free of charge and indicated iPod touch devices running on iOS 4 may from time-to-time receive future unspecified software upgrades and features free of charge. The Company's ESP for the embedded software upgrade right included with each iPod touch sold beginning in June 2010 is \$5.

The Company accounts for multiple element arrangements that consist only of software or software-related products, including the sale of upgrades to previously sold software, in accordance with industry specific accounting guidance for software and software-related transactions. For such transactions, revenue on arrangements that include multiple elements is allocated to each element based on the relative fair value of each element, and fair value is determined by VSOE. If the Company cannot objectively determine the fair value of any undelivered element included in such multiple-element arrangements, the Company defers revenue until all elements are delivered and services have been performed, or until fair value can objectively be determined for any remaining undelivered elements. When the fair value of a delivered element has not been established, but fair value exists for the undelivered elements, the Company uses the residual method to recognize revenue. Under the residual method, the fair value of the undelivered elements is deferred and the remaining portion of the arrangement fee is allocated to the delivered elements and is recognized as revenue.

Except as described for iPhone, iPad, iPod touch and Apple TV, the Company generally does not offer unspecified upgrade rights to its customers in connection with software sales or the sale of AppleCare extended warranty and support contracts. A limited number of the Company's software products are available with maintenance agreements that grant customers rights to unspecified future upgrades over the maintenance term on a when and if available basis. Revenue associated with such maintenance is recognized ratably over the maintenance term.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

*1. Organization and Significant Accounting Policies (in part)*

*Revenue Recognition*

Our sources of revenues include: (1) software, which includes new software license revenues and software license updates and product support revenues; (2) hardware systems, which includes the sale of hardware systems products including computer servers and storage products, and hardware systems support revenues; and (3) services, which include software and hardware related services including consulting, On Demand and education revenues.

*Revenue Recognition for Software Products and Software Related Services (Software Elements)*

New software license revenues represent fees earned from granting customers licenses to use our database, middleware and applications software, and exclude revenues derived from software license updates, which are included in software license updates and product support revenues. While the basis for software license revenue recognition is substantially governed by the accounting guidance contained in ASC 985-605, *Software-Revenue Recognition*, we exercise judgment and use estimates in connection with the

determination of the amount of software and services revenues to be recognized in each accounting period.

For software license arrangements that do not require significant modification or customization of the underlying software, we recognize new software license revenues when: (1) we enter into a legally binding arrangement with a customer for the license of software; (2) we deliver the products; (3) customer payment is deemed fixed or determinable and free of contingencies or significant uncertainties; and (4) collection is probable. Substantially all of our new software license revenues are recognized in this manner.

Substantially all of our software license arrangements do not include acceptance provisions. However, if acceptance provisions exist as part of public policy, for example, in agreements with government entities where acceptance periods are required by law, or within previously executed terms and conditions that are referenced in the current agreement and are short-term in nature, we generally recognize revenues upon delivery provided the acceptance terms are perfunctory and all other revenue recognition criteria have been met. If acceptance provisions are not perfunctory (for example, acceptance provisions that are long-term in nature or are not included as standard terms of an arrangement), revenues are recognized upon the earlier of receipt of written customer acceptance or expiration of the acceptance period.

The vast majority of our software license arrangements include software license updates and product support contracts, which are entered into at the customer's option and are recognized ratably over the term of the arrangement, typically one year. Software license updates provide customers with rights to unspecified software product upgrades, maintenance releases and patches released during the term of the support period. Product support includes internet access to technical content, as well as internet and telephone access to technical support personnel. Software license updates and product support contracts are generally priced as a percentage of the net new software license fees. Substantially all of our customers renew their software license updates and product support contracts annually.

*Revenue Recognition for Multiple-Element Arrangements—Software Products and Software Related Services (Software Arrangements)*

We often enter into arrangements with customers that purchase both software related products and services from us at the same time, or within close proximity of one another (referred to as software related multiple-element arrangements). Such software related multiple-element arrangements include the sale of our software products, software license updates and product support contracts and other software related services whereby software license delivery is followed by the subsequent or contemporaneous delivery of the other elements. For those software related multiple-element arrangements, we have applied the residual method to determine the amount of license revenues to be recognized pursuant to ASC 985-605. Under the residual method, if fair value exists for undelivered elements in a multiple-element arrangement, such fair value of the undelivered elements is deferred with the remaining portion of the arrangement consideration recognized upon delivery of the software license or services arrangement. We allocate the fair value of each element of a software related multiple-element arrangement based upon its fair value as determined by our vendor specific objective evidence (VSOE—described further below), with any remaining amount allocated to the software license.

*Revenue Recognition for Hardware Systems Products and Hardware Systems Related Services (Nonsoftware Elements)*

Revenues from the sale of hardware systems products represent amounts earned primarily from the sale of computer servers and storage products. Our revenue recognition policy for these nonsoftware deliverables is based upon the accounting guidance contained in ASC 605, *Revenue Recognition*, and we exercise judgment and use estimates in connection with the determination of the amount of hardware systems products and hardware systems related services revenues to be recognized in each accounting period.

Revenues from the sales of hardware products are recognized when: (1) persuasive evidence of an arrangement exists; (2) we deliver the products and passage of the title to the buyer occurs; (3) the sale price is fixed or determinable; and (4) collection is reasonably assured. Revenues that are not recognized at the time of sale because the foregoing conditions are not met are recognized when those conditions are subsequently met. When applicable, we reduce revenues for estimated returns or certain other incentive programs where we have the ability to sufficiently estimate the effects of these

items. Where an arrangement is subject to acceptance criteria and the acceptance provisions are not perfunctory (for example, acceptance provisions that are long-term in nature or are not included as standard terms of an arrangement), revenues are recognized upon the earlier of receipt of written customer acceptance or expiration of the acceptance period.

Our hardware systems support offerings generally provide customers with software updates for the software components that are essential to the functionality of our systems and storage products and can also include product repairs, maintenance services, and technical support services. Hardware systems support contracts are entered into at the customer's option and are recognized ratably over the contractual term of the arrangements.

*Revenue Recognition for Multiple-Element Arrangements—Hardware Systems Products and Hardware Systems Related Services (Nonsoftware Arrangements)*

In the third quarter of fiscal 2010, we early adopted the provisions of Accounting Standards Update No. 2009-13, *Revenue Recognition (Topic 605) Multiple-Deliverable Revenue Arrangements* (ASU 2009-13) and Accounting Standards Update 2009-14, *Software (Topic 985)—Certain Revenue Arrangements that Include Software Elements* (ASU 2009-14). ASU 2009-13 amended existing accounting guidance for revenue recognition for multiple-element arrangements. To the extent a deliverable within a multiple-element arrangement is not accounted for pursuant to other accounting standards, including ASC 985-605, *Software-Revenue Recognition*, ASU 2009-13 establishes a selling price hierarchy that allows for the use of an estimated selling price (ESP) to determine the allocation of arrangement consideration to a deliverable in a multiple element arrangement where neither VSOE nor third-party evidence (TPE) is available for that deliverable. ASU 2009-14 modifies the scope of ASC 985-605 to exclude tangible products containing software components and nonsoftware components that function together to deliver the product's essential functionality. In addition, ASU 2009-14 provides guidance on how a vendor should allocate arrangement consideration to nonsoftware and software deliverables in an arrangement where the vendor sells tangible products containing software components that are essential in delivering the tangible product's functionality.

As a result of our early adoption of ASU 2009-13 and ASU 2009-14, we applied the provisions of these accounting standards updates as of the beginning of fiscal 2010. The impact of our adoption of ASU 2009-13 and ASU 2009-14 was not material to our results of operations for fiscal 2010.

We enter into arrangements with customers that purchase both nonsoftware related products and services from us at the same time, or within close proximity of one another (referred to as nonsoftware multiple-element arrangements). Each element within a nonsoftware multiple-element arrangement is accounted for as a separate unit of accounting provided the following criteria are met: the delivered products or services have value to the customer on a standalone basis; and for an arrangement that includes a general right of return relative to the delivered products or services, delivery or performance of the undelivered product or service is considered probable and is substantially controlled by us. We consider a deliverable to have standalone value if the product or service is sold separately by us or another vendor or could be resold by the customer. Further, our revenue arrangements generally do not include a general right of return

relative to the delivered products. Where the aforementioned criteria for a separate unit of accounting are not met, the deliverable is combined with the undelivered element(s) and treated as a single unit of accounting for the purposes of allocation of the arrangement consideration and revenue recognition. For those units of accounting that include more than one deliverable but are treated as a single unit of accounting, we generally recognize revenues over the delivery period. For the purposes of revenue classification of the elements that are accounted for as a single unit of accounting, we allocate revenue to hardware systems and services based on a rational and consistent methodology utilizing our best estimate of fair value of such elements.

For our nonsoftware multiple-element arrangements, we allocate revenue to each element based on a selling price hierarchy at the arrangement inception. The selling price for each element is based upon the following selling price hierarchy: VSOE if available, TPE if VSOE is not available, or ESP if neither VSOE nor TPE is available (a description as to how we determine VSOE, TPE and ESP is provided below). If a tangible hardware systems product includes software, we determine whether the tangible hardware systems product and the software work together to deliver the product's essential functionality and, if so, the entire product is treated as a nonsoftware deliverable. The total arrangement consideration is allocated to each separate unit of accounting for each of the nonsoftware deliverables using the relative selling prices of each unit based on the aforementioned selling price hierarchy. We limit the amount of revenue recognized for delivered elements to an amount that is not contingent upon future delivery of additional products or services or meeting of any specified performance conditions.

To determine the selling price in multiple-element arrangements, we establish VSOE of selling price using the price charged for a deliverable when sold separately and for software license updates and product support and hardware systems support, based on the renewal rates offered to customers. For nonsoftware multiple element arrangements, TPE is established by evaluating similar and interchangeable competitor products or services in standalone arrangements with similarly situated customers. If we are unable to determine the selling price because VSOE or TPE doesn't exist, we determine ESP for the purposes of allocating the arrangement by considering several external and internal factors including, but not limited to, pricing practices, margin objectives, competition, geographies in which we offer our products and services, internal costs and stage of the product lifecycle. The determination of ESP is made through consultation with and approval by our management, taking into consideration our go-to-market strategy. As our, or our competitors', pricing and go-to-market strategies evolve, we may modify our pricing practices in the future, which could result in changes to our determination of VSOE, TPE and ESP. As a result, our future revenue recognition for multiple-element arrangements could differ materially from our results in the current period. Selling prices are analyzed on an annual basis or more frequently if we experience significant changes in our selling prices.

#### *Revenue Recognition Policies Applicable to both Software and Nonsoftware Elements*

##### *Revenue Recognition for Multiple-Element Arrangements—Arrangements with Software and Nonsoftware Elements*

We also enter into multiple-element arrangements that may include a combination of our various software related and nonsoftware related products and services offerings including hardware systems products, hardware systems support, new software licenses, software license updates and product support, consulting, On Demand and education. In such arrangements, we first allocate the total arrangement consideration based on the relative selling prices of the software group of elements as a whole and to the nonsoftware elements. We then further allocate consideration within the software group to the respective elements within that group following the guidance in ASC 985-605 and our policies described above. After the arrangement consideration has been allocated to the elements, we account for each respective element in the arrangement as described above.

#### *Other Revenue Recognition Policies Applicable to Software and Nonsoftware Elements*

Many of our software arrangements include consulting implementation services sold separately under consulting engagement contracts and are included as a part of our services business. Consulting revenues from these arrangements are generally accounted for separately from new software license revenues because the arrangements qualify as services transactions as defined in ASC 985-605. The more significant factors considered in determining whether the revenues should be accounted for separately include the nature of services (i.e. consideration of whether the services are essential to the functionality of the licensed product), degree of risk, availability of services from other vendors, timing of payments and impact of milestones or acceptance criteria on the realizability of the software license fee. Revenues for consulting services are generally recognized as the services are performed. If there is a significant uncertainty about the project completion or receipt of payment for the consulting services, revenues are deferred until the uncertainty is sufficiently resolved. We estimate the proportional performance on contracts with fixed or "not to exceed" fees on a monthly basis utilizing hours incurred to date as a percentage of total estimated hours to complete the project. If we do not have a sufficient basis to measure progress towards completion, revenues are recognized when we receive final acceptance from the customer. When total cost estimates exceed revenues, we accrue for the estimated losses immediately using cost estimates that are based upon an average fully burdened daily rate applicable to the consulting organization delivering the services. The complexity of the estimation process and factors relating to the assumptions, risks and uncertainties inherent with the application of the proportional performance method of accounting affects the amounts of revenues and related expenses reported in our consolidated financial statements. A number of internal and external factors can affect our estimates, including labor rates, utilization and efficiency variances and specification and testing requirement changes.

On Demand is comprised of Oracle On Demand and Advanced Customer Services and is a part of our services business. Oracle On Demand services are offered as standalone

arrangements or as a part of arrangements to customers buying new software licenses or hardware systems products and services. Our On Demand services provide multi-featured software and hardware management and maintenance services for our software and hardware systems products delivered at our data center facilities, select partner data centers or customer facilities. Advanced Customer Services provide customers with services to architect, implement and manage customer IT environments including software and hardware systems product management services, industry-specific solution support centers and remote and on-site expert services. Depending upon the nature of the arrangement, revenues from On Demand services are recognized as services are performed or ratably over the term of the service period, which is generally one year or less.

Education revenues are a part of our services business and include instructor-led, media-based and internet-based training in the use of our software and hardware products. Education revenues are recognized as the classes or other education offerings are delivered.

If an arrangement contains multiple elements and does not qualify for separate accounting for the product and service transactions, then new software license revenues and/or hardware systems products revenues, including the costs of hardware systems products, are generally recognized together with the services based on contract accounting using either the percentage-of-completion or completed-contract method. Contract accounting is applied to any bundled software, hardware systems and services arrangements: (1) that include milestones or customer specific acceptance criteria that may affect collection of the software license or hardware systems product fees; (2) where consulting services include significant modification or customization of the software or hardware systems product; (3) where significant consulting services are provided for in the software license contract or hardware systems product contract without additional charge or are substantially discounted; or (4) where the software license or hardware systems product payment is tied to the performance of consulting services. For the purposes of revenue classification of the elements that are accounted for as a single unit of accounting, we allocate revenues to software and nonsoftware elements based on a rational and consistent methodology utilizing our best estimate of fair value of such elements.

We also evaluate arrangements with governmental entities containing “fiscal funding” or “termination for convenience” provisions, when such provisions are required by law, to determine the probability of possible cancellation. We consider multiple factors, including the history with the customer in similar transactions, the “essential use” of the software or hardware systems products and the planning, budgeting and approval processes undertaken by the governmental entity. If we determine upon execution of these arrangements that the likelihood of cancellation is remote, we then recognize revenues once all of the criteria described above have been met. If such a determination cannot be made, revenues are recognized upon the earlier of cash receipt or approval of the applicable funding provision by the governmental entity.

We assess whether fees are fixed or determinable at the time of sale and recognize revenues if all other revenue recognition requirements are met. Our standard payment terms are net 30 days. However, payment terms may vary based on the country in which the agreement is executed. Payments that are due within six months are generally deemed to be fixed or determinable based on our successful collection history on such arrangements, and thereby satisfy the required criteria for revenue recognition.

While most of our arrangements for sales within our software and hardware systems businesses include short-term payment terms, we have a standard practice of providing long-term financing to creditworthy customers through our financing division. Since fiscal 1989, when our financing division was formed, we have established a history of collection, without concessions, on these receivables with payment terms that generally extend up to five years from the contract date. Provided all other revenue recognition criteria have been met, we recognize new software license revenues and hardware systems products revenues for these arrangements upon delivery, net of any payment discounts from financing transactions. We have generally sold receivables financed through our financing division on a non-recourse basis to third party financing institutions and we classify the proceeds from these sales as cash flows from operating activities in our consolidated statements of cash flows. We account for the sales of these receivables as “true sales” as defined in ASC 860, *Transfers and Servicing*.

In addition, we sell hardware products to leasing companies that, in turn, lease these products to end-users. In transactions where the leasing companies have no recourse to us in the event of default by the end-user, we recognize revenue at point of shipment or point of delivery, depending on the shipping terms and if all the other revenue recognition criteria have been met. In arrangements where the leasing companies have more than insignificant recourse to us in the event of default by the end-user (defined as recourse leasing), we recognize both the product revenue and the related cost of the product as the payments are made to the leasing company by the end-user, generally ratably over the lease term.

Our customers include several of our suppliers and on rare occasion, we have purchased goods or services for our operations from these vendors at or about the same time that we have sold our products to these same companies (Concurrent Transactions). Software license agreements or sales of hardware systems that occur within a three-month time period from the date we have purchased goods or services from that same customer are reviewed for appropriate accounting treatment and disclosure. When we acquire goods or services from a customer, we negotiate the purchase separately from any sales transaction, at terms we consider to be at arm’s length, and settle the purchase in cash. We recognize new software license revenues or hardware systems product revenues from Concurrent Transactions if all of our revenue recognition criteria are met and the goods and services acquired are necessary for our current operations.

#### ALTRIA GROUP, INC. (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 1—Background and Basis of Presentation (in part)

*Background (in part):* At December 31, 2010, Altria Group, Inc.'s wholly-owned subsidiaries included Philip Morris USA Inc. ("PM USA"), which is engaged in the manufacture and sale of cigarettes and certain smokeless products in the United States; UST LLC ("UST"), which through its subsidiaries is engaged in the manufacture and sale of smokeless products and wine; and John Middleton Co. ("Middleton"), which is engaged in the manufacture and sale of machine-made large cigars and pipe tobacco. Philip Morris Capital Corporation ("PMCC"), another wholly-owned subsidiary of Altria Group, Inc., maintains a portfolio of leveraged and direct finance leases. In addition, Altria Group, Inc. held a 27.1% economic and voting interest in SABMiller plc ("SABMiller") at December 31, 2010. Altria Group, Inc.'s access to the operating cash flows of its wholly-owned subsidiaries consists of cash received from the payment of dividends and distributions, and the payment of interest on intercompany loans by its subsidiaries. In addition, Altria Group, Inc. receives cash dividends on its interest in SABMiller, if and when SABMiller pays cash dividends on their stock.

##### Note 8—Investment in SABMiller:

At December 31, 2010, Altria Group, Inc. held a 27.1% economic and voting interest in SABMiller. Altria Group, Inc.'s investment in SABMiller is being accounted for under the equity method.

Pre-tax earnings from Altria Group, Inc.'s equity investment in SABMiller consisted of the following:

| (In millions)                                               | For the Years Ended December 31 |              |              |

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### 5. Licensing Activities

Revenues from licensing, which are recorded within other revenues on the accompanying Consolidated Statements of Operations, amounted to \$46 million, \$43 million and \$40 million during 2010, 2009 and 2008, respectively. The Company renews licensee agreements in the normal course of business and occasionally terminates, purchases or sells licensee agreements. In connection with ongoing fees the Company receives from its licensees pursuant to the license agreements, the Company is required to provide certain services, such as training, marketing and the operation of reservation systems.

See accompanying Notes to Consolidated Financial Statements.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 2—Discontinued Operations

In June 2010, we announced plans to divest Pacific Architects and Engineers, Inc. (PAE) and most of our Enterprise Integration Group (EIG), two businesses within our Information Systems & Global Solutions (IS&GS) reporting segment. On November 22, 2010, we closed on the sale of EIG for \$815 million and recognized a gain, net of tax, of \$184 million (\$.50 per share) in the fourth quarter of 2010 which is included in discontinued operations. We received proceeds, net of \$17 million in transaction costs, of \$798 million related to the sale, which are included in investing activities on our Statement of Cash Flows. We made a \$260 million tax payment related to the sale which is included in operating activities on our Statement of Cash Flows. EIG's operating results are included in discontinued operations on our Statements of Earnings for all periods presented. Our decision to divest EIG was based on our analysis of the U.S. Government's increased concerns about perceived organizational conflicts of interest within the defense contracting community. EIG provides systems engineering, architecture, and integration services and support to a broad range of government customers.

As a result of our decision in 2010 to sell PAE, we recorded a \$182 million deferred tax asset which reflects the federal and state tax benefits that we expect to realize on the sale of the PAE business because our tax basis is higher than our book basis. We also recorded a \$109 million impairment charge which reduced the carrying value of PAE to equal the expected net proceeds from the transaction. The net result increased earnings from discontinued operations by \$73 million (\$.20 per share). PAE's operating results are included in discontinued operations on our Statements of Earnings for all periods presented, and its assets and liabilities are classified as held for sale on our 2010 Balance Sheet. On February 22, 2011, we announced that we entered into a definitive agreement to sell PAE. We expect the transaction will close in the second quarter of 2011, subject to satisfaction of closing conditions.

The plan to divest PAE is a result of changes in customer priorities. When we acquired the business, we envisioned it as an entry point to a new customer set that would need additional services, primarily in the areas of information technology and systems integration. Those customers, however, are seeking a different mix of services, such as the construction of facilities and provision of physical security, which does not fit with our long-term strategy.

In the following table of financial information, we have combined the results of operations of PAE and EIG as the amounts for the individual businesses are not material. Summary financial information related to discontinued operations is as follows:

| (In millions)                         | 2010    | 2009    | 2008    |
|---------------------------------------|---------|---------|---------|
| Net sales                             | \$1,087 | \$1,195 | \$1,359 |
| Earnings before income taxes          | 44      | 54      | 76      |
| Earnings after income taxes           | \$ 24   | \$ 25   | \$ 50   |
| Gain on sale of EIG                   | 184     | —       | —       |
| Adjustments from planned sale of PAE  | 73      | —       | —       |
| Earnings from discontinued operations | \$ 281  | \$ 25   | \$ 50   |

The major classes of assets and liabilities related to PAE and classified as held for sale on our Balance Sheet as of December 31, 2010 are listed in the table below.

| (In millions)                                       | December 31, 2010 |
|-----------------------------------------------------|-------------------|

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 2—Significant Accounting Policies (in part)

**Restructuring Reserves:** Restructuring reserves reflect estimates related to employee-related costs, lease termination costs and other exit costs. Lease termination costs include remaining payments due under existing lease agreements after the cease-use date, less estimated sublease income and any lease termination fees. Other costs include costs to move equipment and costs incurred to close a facility. Actual costs could differ from management estimates, resulting in additional expense or the reversal of previously recorded expenses.

*Note 3—Restructuring and Related Programs (in part)*

During 2009, NMHG's management approved a plan to close its facility in Modena, Italy and consolidate its activities into NMHG's facility in Masate, Italy. These actions are being taken to further reduce NMHG's manufacturing capacity to more appropriate levels. As a result, NMHG recognized a charge of approximately \$5.6 million during 2009, which is classified in the Consolidated Statement of Operations on the line "Restructuring charges (reversals)." Of this amount, \$5.3

million related to severance and \$0.3 million related to lease impairment. During 2010, \$1.9 million of the accrual was reversed as a result of a reduction in the expected amount to be paid to former employees due to the finalization of an agreement with the Italian government. Payments of \$1.4 million and \$0.3 million were made for severance and lease termination, respectively, during 2010. Severance payments of \$0.3 million were made during 2009. Payments related to this restructuring program are expected to continue through 2012. No further charges related to this plan are expected.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### 8. Gain from Litigation Settlement

On January 30, 2010, we announced that we had reached an agreement to settle our outstanding lawsuits against News America Incorporated, a/k/a News America Marketing Group, News America Marketing, FSI, Inc. a/k/a News America Marketing FSI, LLC and News America Marketing In-Store Services, Inc. a/k/a News America Marketing In-Store Services, LLC (collectively "News"). The operative complaint alleged violations of the Sherman Act and various state competitive statutes and the commission of torts by News in connection with the marketing and sale of FSI space and in-store promotion and advertising services.

On February 4, 2010, we executed a settlement agreement and release (the "Settlement Agreement") with News, and pursuant to the terms of the Settlement Agreement, News paid us \$500.0 million. News America, Inc. also entered into a 10-year shared mail distribution agreement with our subsidiary, Valassis Direct Mail, Inc., which provides for our sale of certain shared mail services to News on specified terms.

In connection with the settlement, the parties are working with the United States District Court for the Eastern District of Michigan (the "Court"), under the Honorable Arthur J. Tarnow, on a set of procedures to handle future disputes among the parties with respect to conduct at issue in the litigation. The precise timing and form of the relief rests with the Court.

The settlement resolves all outstanding claims between us and News as of February 4, 2010. As a result, the parties agreed to dismiss all outstanding litigation between them and release all existing and potential claims against each other that were or could have been asserted in the litigation as of the date of the Settlement Agreement.

During the first quarter of 2010, in connection with the successful settlement of these lawsuits, we made \$9.9 million in related payments, including special bonuses to certain of our employees (including our executive officers identified as the "named executive officers" in our proxy statement filed with the SEC on March 30, 2010) in an aggregate amount of \$8.1 million. These expenses were netted against the \$500.0 million of proceeds received, and the net proceeds of \$490.1 million have been recorded as a separate line item "Gain from litigation settlement" in our consolidated statement of income for the year ended December 31, 2010.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### Note 1—Summary of Significant Accounting Policies (in part)

**Non-operating Income and Expense:** Non-operating income and expense include the impact of such items as foreign currency rate movements and related derivative gain or loss, fair value adjustments on Supplemental Employee Retirement Plan (SERP) investments, non-production rent income, bank charges, and other miscellaneous non-operating income and expense items that are not directly related to operations.

###### Note 13—Short-Term Investments (in part)

###### Supplemental Employee Retirement Plan Investments:

The Company maintains a self-directed supplemental employee retirement plan (SERP) for executive employees. The SERP utilizes a rabbi trust, and therefore assets in the SERP portfolio are subject to creditor claims in the event of bankruptcy. The Company recognizes SERP investment assets on the balance sheet at current fair value. A SERP liability of the same amount is recorded on the balance sheet representing the Company's obligation to distribute SERP funds

to participants. The SERP investment assets are classified as trading, and accordingly, realized and unrealized gains and losses are recognized in income in the Other Income (Expense) category. Adjustments made to revalue the SERP liability are also recognized in income as selling and administrative expenses and exactly offset valuation adjustments on SERP investment assets. The change in net unrealized holding gains and (losses) for the fiscal years ended June 30, 2010, 2009, and 2008 was, in thousands, \$1,385, (\$2,739), and (\$2,385), respectively. SERP asset and liability balances were as follows:

| (Amounts in thousands)                    | June 30  |          |
|-------------------------------------------|----------|----------|

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### 9. Derivative Instruments

**Interest-Rate Derivatives**—In 2008 and 2009, Anadarko entered into interest-rate swap agreements to mitigate the risk of rising interest rates on up to \$3.0 billion of debt originally expected to be refinanced in 2011 and 2012, over a reference term of either 10 years or 30 years. The Company locked in a fixed interest rate in exchange for a floating interest rate indexed to the three-month LIBOR. The swap instruments include a provision that requires both the termination of the swaps and cash settlement in full at the start of the reference period.

(Gains) losses on other derivatives, net for 2010 and 2009 includes unrealized (gains) losses of \$284 million and \$(57) million, respectively, and realized (gains) losses of zero and \$(552) million, respectively, on these swap agreements. The realized gain in 2009 resulted from revising the contractual terms of this swap portfolio to increase the weighted-average interest rate from approximately 3.25% to approximately 4.80%.

A summary of the swaps outstanding at December 31, 2010, including the outstanding notional principal amounts and the associated reference periods, is presented below.

| Notional Principal Amount:<br>(Millions except percentages) | Reference Period |              | Weighted-Average<br>Interest<br>Rate |
|-------------------------------------------------------------|------------------|--------------|--------------------------------------|
|                                                             | Start            | End          |                                      |
| \$750                                                       | October 2011     | October 2021 | 4.72%                                |
| \$1,250                                                     | October 2011     | October 2041 | 4.83%                                |

| Total investments                      | \$28,215       |                      | \$19,108       |                      |

##### J-Devices Corporation

On October 30, 2009, Amkor and Toshiba Corporation ("Toshiba") invested in Nakaya Microdevices Corporation ("NMD") and formed a joint venture to provide semiconductor assembly and final testing services in Japan. As a result of the transaction, NMD is now owned 60% by the existing shareholders of NMD, 30% by Amkor and 10% by Toshiba and has changed its name to J-Devices.

J-Devices purchased an assembly and test business from Toshiba. J-Devices has also entered into various other agreements with Toshiba including a supply agreement, license agreement, support services agreements and employee secondment agreements.

We invested 1.5 billion Japanese yen (approximately \$16.7 million at inception) for our 30% equity interest and call options to acquire additional equity interest. The call options were valued at \$1.7 million, and, at our discretion, permit us to subscribe to new or existing J-Devices' shares until our maximum ownership ratio is 60%, 66% and 80% beginning in 2012, 2014 and 2015, respectively. In 2014 and beyond, Toshiba has at its discretion, a put option which allows Toshiba to sell shares to us if we have exercised any of our call options. The exercise price for all options is determined using a contractual pricing formula based primarily upon the financial position of J-Devices at the time of exercise.

J-Devices is a separate business and is not integrated with our existing Japan-based businesses. We account for our investment in J-Devices using the equity method of accounting. J-Devices is a variable interest entity, but we are not the primary beneficiary as of December 31, 2010.

Under the equity method of accounting, we recognize our 30% share of J-Devices' net income or loss during each accounting period. J-Devices' financial information is converted to U.S. GAAP and translated into U.S. dollars using the Japanese yen as the functional currency. In addition to our proportionate share of J-Devices' income or loss, we record equity method adjustments for the amortization of a \$1.9 million difference as our carrying value exceeded our equity in the net assets of J-Devices at the date of investment and other adjustments required by the equity method. As of December 31, 2010 and 2009, our equity earnings in J-Devices were \$6.4 million and \$2.4 million, respectively, net of J-Devices' income taxes in Japan.

##### *NOTES TO CONSOLIDATED FINANCIAL STATEMENTS*

##### *(4) Recapitalization and Financing Arrangements (in part)*

##### *Repurchases of Long-Term Debt*

During 2009, the Company repurchased and retired approximately \$189.2 million in principal amount of its Class A-2 Notes for a total purchase price of approximately \$133.9 million, including approximately \$1.0 million of accrued interest that resulted in pre-tax gains of approximately \$56.3 million in 2009. The pre-tax gains were recorded in Other in the Company's consolidated statements of income. In connection with the aforementioned transactions, the Company wrote-off deferred financing fees of approximately \$2.3 million in 2009, which were recorded in interest expense in the Company's consolidated statements of income.

During 2010, the Company repurchased and retired \$100.0 million in principal amount of its Class A-2 Notes and approximately \$23.9 million in principal amount of its Class M-1 Notes for a total purchase price of approximately \$116.6 million, including approximately \$0.5 million of accrued interest that resulted in pre-tax gains of approximately \$7.8 million. The net pre-tax gains were recorded in Other in the Company's consolidated statements of income. In connection with the aforementioned transactions, the Company wrote-off deferred financing fees and prepaid insurance fees totaling approximately \$1.7 million in 2010, which were recorded in interest expense in the Company's consolidated statements of income.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(All amounts presented in thousands except share and per share data)

##### R. Fire at Bus Production Facility

On February 14, 2010, a fire occurred at the northern production facility (the "Facility") at the Company's manufacturing site located near Imlay City, Michigan. The Facility is one of the Company's principal manufacturing locations for its Champion and General Coach America bus lines. The fire resulted in the destruction of a significant portion of the work in process, raw materials and equipment contained in the Facility. There were no reported injuries and the origin of the fire is undetermined. The southern production plant, paint facility and other buildings at the site were not affected by the fire and remain intact. The Company resumed limited production activities for its Champion and General Coach America buses in the southern manufacturing facility. In addition, the Company addressed equipment and staffing reallocation. Many employees continued to work out of the southern manufacturing facility and an office building on this site on a temporary basis.

The Company maintains a property and business interruption insurance policy that it believes will provide substantial coverage for the currently foreseeable losses arising from this

incident, less up to the first \$5,000 representing the Company's deductible per the policy.

The Company received \$13,313 of insurance proceeds as of July 31, 2010. Of these proceeds, \$13,079 represents recognized insurance recoveries, net of the deductible, and \$234 represents advances recorded as deferred revenue in other liabilities. Through July 31, 2010, the cost incurred and insurance recoveries recognized, including \$6,087 for business interruption (\$4,121 net of applied deductible), are reflected in the Company's consolidated statements of income as follows:

Gain on Involuntary Conversion:

|                                  |          |
|----------------------------------|----------|
| Insurance recoveries recognized  | \$18,079 |
| Deductible                       | (5,000)  |
| WIP and raw material destroyed   | (4,305)  |
| Property and equipment destroyed | (578)    |
| Clean up and other costs         | (603)    |
| Gain on involuntary conversion   | \$ 7,593 |

The costs incurred to date of reconstructing the Facility and replacing inventory have been accounted for in the normal course of business. The costs incurred as of July 31, 2010 to reconstruct the Facility totaled \$1,483, and the Facility is substantially completed and operational as of September 28, 2010. The Company expects that a.) the replacement cost of the property and equipment will substantially exceed the current carrying costs, and b.) lost profits covered under business interruption and future clean-up and related costs will be reimbursed under the policy, however, an accurate estimate of the remaining potential gain resulting from the involuntary conversion cannot be made at this time.

## EXPENSES AND LOSSES

### PRESENTATION

**3.24** Paragraphs 80 and 83 of FASB Concepts Statement No. 6, *Elements of Financial Statements—a replacement of FASB Concepts Statement No. 3 (incorporating an amendment of FASB Concepts Statement No. 2)*, define expenses and losses as follows:

80. Expenses are outflows or other using up of assets or incurrences of liabilities (or a combination of both) from delivering or producing goods, rendering services, or carrying out other activities that constitute the entity's ongoing major or central operations.
83. Losses are decreases in equity (net assets) from peripheral or incidental transactions of an entity and from all other transactions and other events and circumstances affecting the entity except those that result from expenses or distributions to owners.

## 3.25

**TABLE 3-3: EXPENSES AND LOSSES—OTHER THAN COST OF GOODS SOLD\***

Table 3-3 summarizes the nature of expenses and losses most frequently disclosed by the survey entities, other than cost of goods sold. Excluded from Table 3-3 are rent, employee benefits, depreciation, income taxes, losses shown after the caption for income taxes, segment disposals, and extraordinary losses.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Columnar Amounts in Millions Except Per Share Amounts

## 1. Summary of Significant Accounting Policies (in part)

**Marketing Costs**—We promote our products with advertising, consumer incentives, and trade promotions. Such programs include, but are not limited to, discounts, coupons, rebates, and volume-based incentives. Advertising costs are expensed as incurred. Consumer incentives and trade promotion activities are recorded as a reduction of revenue or as a component of cost of goods sold based on amounts estimated as being due to customers and consumers at the end of the period, based principally on historical utilization and redemption rates. Advertising and promotion expenses totaled \$409.3 million, \$380.7 million, and \$376.7 million in fiscal 2010, 2009, and 2008, respectively, and are included in selling, general and administrative expenses.

**Foreign Currency Transaction Gains and Losses**—We recognized net foreign currency transaction gains (losses) from continuing operations of \$(6.2) million, \$0.7 million, and \$(8.1) million in fiscal 2010, 2009, and 2008, respectively, in selling, general and administrative expenses.

## 2. Discontinued Operations and Divestitures (in part)

### Other Divestitures

In February 2010, we completed the sale of our *Luck's*® brand for proceeds of approximately \$22.0 million, resulting in a pre-tax gain of approximately \$14.3 million (\$9.0 million after-tax), reflected in selling, general and administrative expenses.

In July 2008, we completed the sale of our *Pemmican*® beef jerky business for proceeds of approximately \$29.4 million in cash, resulting in a pre-tax gain of approximately \$19.4 million (\$10.6 million after-tax), reflected in selling, general and administrative expenses. Due to our continuing involvement with the business, the results of operations of the *Pemmican*® business have not been reclassified as discontinued operations.

### 5. Garner, North Carolina Accident

On June 9, 2009, an accidental explosion occurred at our manufacturing facility in Garner, North Carolina. This facility was the primary production facility for our *Slim Jim*® branded meat snacks. On June 13, 2009, the U.S. Bureau of Alcohol, Tobacco, Firearms and Explosives announced its determination that the explosion was the result of an accidental natural gas release, and not a deliberate act.

We maintain comprehensive property (including business interruption), workers' compensation, and general liability insurance policies with very significant loss limits that we believe will provide substantial and broad coverage for the anticipated losses arising from this accident.

The costs incurred and insurance recoveries recognized, to date, are reflected in our consolidated financial statements, as follows:

| (In millions)                                      | Fiscal Year Ended May 30, 2010 |           |          |
|----------------------------------------------------|--------------------------------|-----------|----------|
|                                                    | Consumer Foods                 | Corporate | Total    |
| Cost of goods sold:                                |                                |           |          |
| Inventory write-downs and other costs              | \$ 11.9                        | \$ —      | \$ 11.9  |
| Selling, general and administrative expenses:      |                                |           |          |
| Fixed asset impairments, clean-up costs, etc.      | \$ 47.5                        | \$ 2.6    | \$ 50.1  |
| Insurance recoveries recognized                    | (58.1)                         | —         | (58.1)   |
| Total selling, general and administrative expenses | \$(10.6)                       | \$ 2.6    | \$ (8.0) |
| Net loss                                           | \$ 1.3                         | \$ 2.6    | \$ 3.9   |

The amounts in the table, above, exclude lost profits due to the interruption of the business, as well as any related business interruption insurance recoveries.

Through May 30, 2010, we had received payment advances from the insurers of approximately \$85.0 million for our initial insurance claims for this matter, \$58.1 million of which has been recognized as a reduction to selling, general and administrative expenses. We anticipate final settlement of the claim will occur in fiscal 2011. Based on management's current assessment of production options, the expected level of insurance proceeds, and the estimated potential amount of losses and impact on the *Slim Jim*® brand, we do not believe that the accident will have a material adverse effect on our results of operations, financial condition, or liquidity.

In the fourth quarter of fiscal 2010, we determined that certain additional equipment located in the facility, with a book value of approximately \$12 million, was impaired (included in the table above). We expect to be reimbursed by our insurers for the cost of replacing these assets, and we have recognized a \$12 million insurance recovery in fiscal 2010 (included in the table above), representing the carrying value of these destroyed assets.

## 6. Restructuring Activities (in part)

### 2010 Restructuring Plan

During the fourth quarter of fiscal 2010, our board of directors approved a plan recommended by executive management related to the long-term production of our meat snack products. The plan provides for the closure of our meat snacks production facility in Garner, North Carolina, and the movement of production to our existing facility in Troy, Ohio. Since the accident at Garner, in June 2009, the Troy facility has been producing a portion of our meat snack products. Upon completion of the plan's implementation, which is expected to be in the second quarter of fiscal 2012, the Troy facility will be our primary meat snacks production facility. The plan is expected to result in the termination of approximately 500 employee positions in Garner and the creation of approximately 200 employee positions in Troy.

In May 2010, we made a decision to move certain administrative functions from Edina, Minnesota, to Naperville, Illinois. We expect to complete the transition of these functions in the first half of fiscal 2011. This plan, together with the plan to move production of our meat snacks from Garner, North Carolina to Troy, Ohio, are collectively referred to as the 2010 restructuring plan ("2010 plan").

In connection with the 2010 plan, we expect to incur pre-tax cash and non-cash charges for asset impairments, accelerated depreciation, severance, relocation, and site closure costs estimated to be approximately \$67.5 million, of which \$39.2 million was recognized in fiscal 2010. We have recorded expenses associated with this restructuring plan, including but not limited to, impairments of property, plant and equipment, accelerated depreciation, severance and related costs, and plan implementation costs (e.g., consulting, employee relocation, etc.). We anticipate that we will recognize the following pre-tax expenses associated with the 2010 plan in the fiscal 2010 to 2012 timeframe (amounts include charges recognized in fiscal 2010):

|                                                    | Consumer |           |        |
|----------------------------------------------------|----------|-----------|--------|
|                                                    | Foods    | Corporate | Total  |
| Accelerated depreciation                           | \$20.6   | \$ —      | \$20.6 |
| Total cost of goods sold                           | 20.6     | —         | 20.6   |
| Asset impairment                                   | 16.5     | —         | 16.5   |
| Severance and related costs                        | 16.2     | —         | 16.2   |
| Other, net                                         | 10.7     | 3.5       | 14.2   |
| Total selling, general and administrative expenses | 43.4     | 3.5       | 46.9   |
| Consolidated total                                 | \$64.0   | \$3.5     | \$67.5 |

Included in the above estimates are \$25.5 million of charges which have resulted or will result in cash outflows and \$42.0 million of non-cash charges.

During fiscal 2010, the Company recognized the following pre-tax charges in its consolidated statement of earnings for the fiscal 2010 plan:

|                                                    | Consumer Foods | Corporate | Total  |
|----------------------------------------------------|----------------|-----------|--------|
| Accelerated depreciation                           | \$ 3.4         | \$ —      | \$ 3.4 |
| Total cost of goods sold                           | 3.4            | —         | 3.4    |
| Asset impairment                                   | 16.5           | —         | 16.5   |
| Severance and related costs                        | 14.2           | —         | 14.2   |
| Other, net                                         | 1.6            | 3.5       | 5.1    |
| Total selling, general and administrative expenses | 32.3           | 3.5       | 35.8   |
| Consolidated total                                 | \$35.7         | \$3.5     | \$39.2 |

We also recognized income tax expense of \$1.2 million related to tax credits we will no longer be able to realize related to the 2010 plan.

Liabilities recorded for the various initiatives and changes therein for fiscal 2010 under the 2010 plan were as follows:

|                             | Balance at May 31, 2009 | Costs Incurred and Charged to Expense | Costs Paid or Otherwise Settled | Changes in Estimates | Balance at May 30, 2010 |
|-----------------------------|-------------------------|---------------------------------------|---------------------------------|----------------------|-------------------------|
| Severance and related costs | \$—                     | \$14.2                                | \$ —                            | \$—                  | \$14.2                  |
| Plan implementation costs   | —                       | 1.1                                   | (0.1)                           | —                    | 1.0                     |
| Other costs                 | —                       | 3.5                                   | —                               | —                    | 3.5                     |
| Total                       | \$—                     | \$18.8                                | \$(0.1)                         | \$—                  | \$18.7                  |

#### 2008–2009 Restructuring Plan

During fiscal 2008, our board of directors approved a plan (“2008-2009 plan”) recommended by executive management to improve the efficiency of our Consumer Foods operations and related functional organizations and to streamline our international operations to reduce our manufacturing and selling, general, and administrative costs. This plan includes the reorganization of the Consumer Foods operations, the integration of the international headquarters functions into our domestic business, and exiting a number of international markets. These plans were substantially completed by the end of fiscal 2009. The total cost of the 2008-2009 plan was \$36.3 million, of which \$8.5 million was recorded in fiscal 2009 and \$27.8 million was recorded in fiscal 2008. We have recorded expenses associated with the 2008-2009 plan, including but not limited to, inventory write-downs, severance and related costs, and plan implementation costs (e.g., consulting, employee relocation, etc.).

During fiscal 2009, we recognized the following pre-tax charges in our consolidated statement of earnings for the 2008-2009 plan:

|                                                    | Consumer Foods | Corporate | Total |
|----------------------------------------------------|----------------|-----------|-------|
| Severance and related costs                        | \$(0.4)        | \$0.4     | \$ —  |
| Contract termination                               | (1.3)          | —         | (1.3) |
| Plan implementation costs                          | 1.9            | 1.5       | 3.4   |
| Other, net                                         | 6.4            | —         | 6.4   |
| Total selling, general and administrative expenses | 6.6            | 1.9       | 8.5   |
| Consolidated total                                 | \$ 6.6         | \$1.9     | \$8.5 |

We recognized the following cumulative (plan inception to May 31, 2009) pre-tax charges related to the 2008-2009 plan in our consolidated statements of earnings:

|                                                    | Consumer Foods | Corporate | Total  |
|----------------------------------------------------|----------------|-----------|--------|
| Inventory write-downs                              | \$ 2.4         | \$ —      | \$ 2.4 |
| Total cost of goods sold                           | 2.4            | —         | 2.4    |
| Asset impairment                                   | 0.8            | —         | 0.8    |
| Severance and related costs                        | 16.4           | 3.5       | 19.9   |
| Contract termination                               | 1.0            | —         | 1.0    |
| Plan implementation costs                          | 2.2            | 2.8       | 5.0    |
| Goodwill/brand impairment                          | 0.2            | —         | 0.2    |
| Other, net                                         | 7.0            | —         | 7.0    |
| Total selling, general and administrative expenses | 27.6           | 6.3       | 33.9   |
| Consolidated total                                 | \$30.0         | \$6.3     | \$36.3 |

Included in the above amounts are \$26.4 million of charges which have resulted in cash outflows and \$9.9 million of non-cash charges.

No material liabilities remain in connection with the 2008-2009 plan at May 30, 2010.

#### 2006–2008 Restructuring Plan

In February 2006, our board of directors approved a plan recommended by executive management to simplify our operating structure and reduce our manufacturing and selling, general, and administrative costs (“2006–2008 plan”). The plan included supply chain rationalization initiatives, the relocation of a divisional headquarters from Irvine, California to Naperville, Illinois, the centralization of shared services,

salaried headcount reductions, and other cost-reduction initiatives. The plan was completed during fiscal 2009. No material expenses were recognized in fiscal 2009 or 2008 in connection with this plan.

As part of the 2006-2008 restructuring plan, we began construction of a new production facility in fiscal 2007. We determined that we will divest this facility. Accordingly, in the fourth quarter of fiscal 2010, we recognized an impairment charge of \$33.3 million to write-down the asset to its expected sales value. This charge is reflected in selling, general and administrative expenses within the Consumer Foods segment.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### 3. Cost of Sales and Selling, General and Administrative Expenses

The following table illustrates the primary costs classified in each major expense category:

| Cost of Sales                                                                                                                                                              | Selling, General and Administrative Expenses                                                                 |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|
| Total cost of products sold including                                                                                                                                      | Compensation and benefit costs including                                                                     |
| • Freight expenses associated with moving merchandise from our vendors to our distribution centers and our retail stores, and among our distribution and retail facilities | • Stores                                                                                                     |
| • Vendor income that is not reimbursement of specific, incremental and identifiable costs                                                                                  | • Headquarters                                                                                               |
| Inventory shrink                                                                                                                                                           | Occupancy and operating costs of retail and headquarters facilities                                          |
| Markdowns                                                                                                                                                                  | Advertising, offset by vendor income that is a reimbursement of specific, incremental and identifiable costs |
| Outbound shipping and handling expenses associated with sales to our guests                                                                                                | Preopening costs of stores and other facilities                                                              |
| Terms cash discount                                                                                                                                                        | Other administrative costs                                                                                   |
| Distribution center costs, including compensation and benefits costs                                                                                                       |                                                                                                              |

The classification of these expenses varies across the retail industry.

#### *NOTES TO CONSOLIDATED FINANCIAL STATEMENTS*

##### *1. Summary of Significant Accounting Policies (in part)*

##### *Research and Development*

Research and development expenses are expensed as incurred. Upfront and milestone payments made to third-parties in connection with research and development collaborations are expensed as incurred up to the point of regulatory approval. Payments made to third parties subsequent to regulatory approval are capitalized and amortized over the remaining useful life of the related product. Amounts capitalized for such payments are included in other intangibles, net of accumulated amortization.

The Company enters into collaborative arrangements, typically with other pharmaceutical or biotechnology companies, to develop and commercialize drug candidates or intellectual property. These arrangements typically involve two (or more) parties who are active participants in the collaboration and are exposed to significant risks and rewards dependent on the commercial success of the activities. These collaborations usually involve various activities by one or more parties, including research and development, marketing and selling and distribution. Often, these collaborations require upfront, milestone and royalty or profit share payments, contingent upon the occurrence of certain future events linked to the success of the asset in development. Amounts due from collaborative partners related to development activities are generally reflected as a reduction of research and development expense because the performance of contract development services is not central to the Company's operations. In general, the income statement presentation for these collaborations is as follows:

| Nature/Type of Collaboration                                                                 | Statement of Earnings Presentation            |
|----------------------------------------------------------------------------------------------|-----------------------------------------------|
| Third-party sale of product                                                                  | Sales to customers                            |
| Royalties/milestones paid to collaborative partner (post-regulatory approval) <sup>(*)</sup> | Cost of goods sold                            |
| Royalties received from collaborative partner                                                | Other income (expense), net                   |
| Upfront payments & milestones paid to collaborative partner (pre-regulatory approval)        | Research and development expense              |
| Research and development payments to collaborative partner                                   | Research and development expense              |
| Research and development payments received from collaborative partner                        | Reduction of research and development expense |

<sup>(\*)</sup> Milestones are capitalized as intangible assets and amortized to cost of goods sold over the useful life.

## 3.29

## STRYKER CORPORATION (DEC)

*Item 1. Business (in part)**Product Development*

Most of the Company's products and product improvements have been developed internally. The Company maintains close working relationships with physicians and medical personnel in hospitals and universities who assist in product research and development. New and improved products play a critical role in the Company's sales growth. The Company continues to place emphasis on the development of proprietary products and product improvements to complement and expand its existing product lines. The Company has a decentralized research and development focus, with manufacturing locations responsible for new product development and product improvements. Research, development and engineering personnel at the various manufacturing locations maintain relationships with staff at distribution locations and with customers to understand changes in the market and product needs.

Total expenditures for product research, development and engineering were \$393.9 million in 2010, \$336.2 million in 2009 and \$367.8 million in 2008. Research, development and engineering expenses represented 5.4% of sales in 2010, compared to 5.0% in 2009 and 5.5% in 2008. The spending level in 2010 increased due to the Company's increased focus on new product development for anticipated future product launches and investments in new technologies. Recent new product introductions in the Orthopaedic Implants and MedSurg Equipment segments are more fully described under the caption *Product Sales*.

In addition to internally developed products, the Company invests in technologies developed by third parties that have the potential to expand the markets in which the Company operates. In 2010 the Company acquired the Sonopet Ultrasonic Aspirator control consoles, handpieces and accessories from Mutoh Co., Ltd. and Synergetics USA, Inc., Gaymar Industries, a manufacturer of specialized support surface and pressure ulcer management solutions, and the bioimplantable porous polyethylene (PPE) product line from Porex Surgical, Inc. for use primarily in reconstructive surgery of the head and face. In December 2009 the Company acquired Ascent, the market leader in the reprocessing and remanufacturing of medical devices in the U.S. During 2010 and 2009, the Company acquired certain additional companies all of which are expected to enhance the Company's product offerings to its customers within its Orthopaedic Implants and MedSurg Equipment business segments.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 1. Summary of Significant Accounting Policies (in part)

**Property, Plant and Equipment (in part)**—Significant accounting policies for our property, plant and equipment are as follows:

**Successful Efforts Method**—We account for crude oil and natural gas properties under the successful efforts method of accounting. Under this method, costs to acquire mineral interests in crude oil and natural gas properties, drill and equip exploratory wells that find proved reserves, and drill and equip development wells are capitalized. Capitalized costs of producing crude oil and natural gas properties, along with support equipment and facilities, are amortized to expense by the unit-of-production method based on proved crude oil and natural gas reserves on a field-by-field basis as estimated by our qualified petroleum engineers. Our policy is to use quarter-end reserves and add back current period production to compute quarterly DD&A expense. Costs of certain gathering facilities or processing plants serving a number of properties or used for third-party processing are depreciated using the straight-line method over the useful lives of the assets ranging from five to 14 years. Upon sale or retirement of depreciable or depletable property, the cost and related accumulated DD&A are eliminated from the accounts and the resulting gain or loss is recognized. Repairs and maintenance are expensed as incurred.

**Proved Property Impairment**—We review proved oil and gas properties and other long-lived assets for impairment when events and circumstances indicate a decline in the recoverability of the carrying values of such properties, such as a negative revision of reserves estimates or sustained decrease in commodity prices. We estimate future cash flows expected in connection with the properties and compare such future cash flows to the carrying amount of the properties to determine if the carrying amount is recoverable. When the carrying amount of a property exceeds its estimated undiscounted future cash flows, the carrying amount is reduced to estimated fair value. Fair value may be estimated using comparable market data, a discounted cash flow method, or a combination of the two. In the discounted cash flow method, estimated future cash flows are based on management's expectations for the future and include estimates of future oil and gas production, commodity prices based on published forward commodity price curves as of the date of the estimate, operating and development costs, and a risk-adjusted discount rate.

We recorded proved property impairment charges in 2010, 2009, and 2008. It is reasonably possible that other proved oil and gas properties could become impaired in the future if commodity prices decline. See Note 4. Asset Impairments.

**Unproved Property Impairment**—We assess individually significant unproved properties for impairment of value on a quarterly basis and recognize a loss at the time of impairment by providing an impairment allowance. In determining whether a significant unproved property is impaired we consider numerous factors including, but not limited to, current exploration plans, favorable or unfavorable exploration activity on the property being evaluated and/or adjacent properties, our geologists' evaluation of the property, and the remaining months in the lease term for the property.

When we have allocated significant fair value to an unproved property as the result of a transaction accounted for as a business combination, we use a future cash flow analysis to assess the unproved property for impairment. Cash flows used in the impairment analysis are determined based on management's estimates of crude oil and natural gas reserves, future commodity prices and future costs to extract the reserves. Cash flow estimates related to probable and possible reserves are reduced by additional risk-weighting factors. Other individually insignificant unproved properties are amortized on a composite method based on our experience of successful drilling and average holding period.

We recorded unproved property impairment charges in 2008. It is reasonably possible that other unproved oil and gas properties could become impaired in the future if commodity prices decline. See Note 4. Asset Impairments.

**Properties Acquired in Business Combinations**—If sufficient market data is not available, we determine the fair values of proved and unproved properties acquired in transactions accounted for as business combinations by preparing our own estimates of crude oil and natural gas reserves. We estimate future prices to apply to the estimated reserves quantities acquired, and estimate future operating and development costs, to arrive at estimates of future net cash flows. For the fair value assigned to proved reserves, future net cash flows are discounted using a market-based weighted average cost of capital rate determined appropriate at the time of the business combination. To compensate for the inherent risk of estimating and valuing unproved reserves, discounted future net cash flows of probable and possible reserves are reduced by additional risk-weighting factors. See Note 3. Acquisitions and Divestitures.

**Exploration Costs**—Geological and geophysical costs, delay rentals, amortization of unproved leasehold costs, and costs to drill exploratory wells that do not find proved reserves are expensed as oil and gas exploration. We carry the costs of an exploratory well as an asset if the well finds a sufficient quantity of reserves to justify its capitalization as a producing well and as long as we are making sufficient progress assessing the reserves and the economic and operating viability of the project. For certain capital-intensive deepwater Gulf of Mexico or international projects, it may take us more than one year to evaluate the future potential of the exploration well and make a determination of its economic viability. Our ability to move forward on a project may be dependent on gaining access to transportation or processing facilities or obtaining permits and government or partner approval, the timing of which is beyond our control. In such cases, exploratory well costs remain suspended as long as we are actively pursuing access to necessary facilities and access to such permits and approvals and believe they will be obtained. We assess the status of suspended exploratory well costs on a quarterly basis. See Note 7. Capitalized Exploratory Well Costs.

### Note 7. Capitalized Exploratory Well Costs

We capitalize exploratory well costs until a determination is made that the well has found proved reserves or is deemed noncommercial. If a well is deemed to be noncommercial, the well costs are immediately charged to exploration expense.

Changes in capitalized exploratory well costs are as follows and exclude amounts that were capitalized and subsequently expensed in the same period:

| (Millions)                                                                               | Year Ended December 31 |        |       |
|------------------------------------------------------------------------------------------|------------------------|--------|-------|
|                                                                                          | 2010                   | 2009   | 2008  |
| Capitalized Exploratory Well Costs, Beginning of Period                                  | \$ 432                 | \$ 501 | \$249 |
| Additions to Capitalized Exploratory Well Costs Pending Determination of Proved Reserves | 143                    | 136    | 253   |
| Reclassified to Proved Oil and Gas Properties Based on Determination of Proved Reserves  | (146)                  | (198)  | —     |
| Capitalized Exploratory Well Costs Charged to Expense                                    | (3)                    | (7)    | (1)   |
| Capitalized Exploratory Well Costs, End of Period                                        | \$ 426                 | \$ 432 | \$501 |

The following table provides an aging of capitalized exploratory well costs (suspended well costs) based on the date the drilling was completed and the number of projects for which exploratory well costs have been capitalized for a period greater than one year since the completion of drilling:

| (Millions)                                                                                                                                | December 31 |       |       |
|-------------------------------------------------------------------------------------------------------------------------------------------|-------------|-------|-------|
|                                                                                                                                           | 2010        | 2009  | 2008  |
| Exploratory Well Costs Capitalized for a Period of One Year or Less                                                                       | \$148       | \$158 | \$256 |
| Exploratory Well Costs Capitalized for a Period Greater Than One Year After Completion of Drilling                                        | 278         | 274   | 245   |
| Balance at End of Period                                                                                                                  | \$426       | \$432 | \$501 |
| Number of Projects with Exploratory Well Costs That Have Been Capitalized for a Period Greater Than One Year After Completion of Drilling | 8           | 5     | 6     |

The following table provides a further aging of those exploratory well costs that have been capitalized for a period greater than one year since the completion of drilling as of December 31, 2010:

| (Millions)                                                                                               | Suspended Since |      |      |              |
|----------------------------------------------------------------------------------------------------------|-----------------|------|------|--------------|
|                                                                                                          | Total           | 2009 | 2008 | 2007 & Prior |
| Project                                                                                                  |                 |      |      |              |
| Blocks O and I (West Africa)                                                                             | \$133           | \$14 | \$ 9 | \$110        |
| Dalit (Israel)                                                                                           | 20              | 20   | —    | —            |

| Redrock (Deepwater Gulf of Mexico)                                                                       | 17              | —    | —    | 17           |
| Deep Blue (Deepwater Gulf of Mexico)                                                                     | 19              | 19   | —    | —            |
| Flyndre (North Sea)                                                                                      | 13              | —    | —    | 13           |
| Selkirk (North Sea)                                                                                      | 20              | —    | —    | 20           |
| Other                                                                                                    | 4               | 1    | 3    | —            |
| Total Exploratory Well Costs Capitalized for a Period Greater Than One Year After Completion of Drilling | \$278           | \$57 | \$61 | \$160        |

**Blocks O and I (West Africa)**—The West Africa project includes Blocks O and I offshore Equatorial Guinea and the YoYo mining concession and Tilapia PSC offshore Cameroon. In December 2010, we and our partners sanctioned the development plan for Alen, which was subsequently approved by the government of Equatorial Guinea in January 2011. Approximately \$61 million of capitalized costs were reclassified to proved oil and gas properties. In 2009, we sanctioned the Aseng development project and reclassified \$76 million of capitalized costs to proved oil and gas properties. We are evaluating future oil projects and planning to drill an appraisal well at Diega/Carmen, offshore Equatorial Guinea. In Cameroon, we recently completed a 3-D seismic acquisition, and results are being processed for future drilling potential.

**Dalit (Israel)**—Dalit is a 2009 natural gas discovery located offshore Israel. We are currently working with our partners on a cost-effective development plan. In 2010, we sanctioned the Tamar development project and reclassified \$77 million of capitalized costs to proved oil and gas properties.

**Gunflint (Deepwater Gulf of Mexico)**—Gunflint (Mississippi Canyon Block 948) is a 2008 crude oil discovery. Our plans to drill one or two appraisal wells in 2010 were delayed by the Deepwater Moratorium. Once a drilling permit is approved, we plan to drill one or two appraisal wells. We are also reviewing host platform options including: subsea tieback to an existing third-party host, procurement and modification of an existing platform, and new construction. If we are able to connect to an existing third-party host, the project could have an accelerated completion schedule, thereby potentially absorbing time lost due to the drilling delay caused by the Deepwater Moratorium.

**Redrock (Deepwater Gulf of Mexico)**—Redrock (Mississippi Canyon Block 204) was a 2006 natural gas/condensate discovery and is currently considered a co-development candidate with Raton South (Mississippi Canyon Block 292). We are in the process of tying back Raton South to a host platform at Viosca Knoll Block 900. We plan to tie back Redrock after Raton South commences production, which is currently expected to occur by the end of 2011.

**Deep Blue (Deepwater Gulf of Mexico)**—Deep Blue (Green Canyon Block 723) was a significant test well, which began drilling during 2009. When the Deepwater Moratorium was announced in May 2010, we were required to suspend side-track drilling activities at the Deep Blue prospect. Once a drilling permit is approved, we plan to resume exploration activities at Deep Blue.

**Flyndre (North Sea)**—The Flyndre project is located in the UK sector of the North Sea and we successfully completed an exploratory appraisal well in 2007. We are currently working with the project operator and other partners to finalize the field development plan and relevant operating agreements.

**Selkirk (North Sea)**—The Selkirk project is also located in the UK sector of the North Sea. Capitalized costs to date primarily consist of the cost of drilling an exploratory well. We are currently working with our partners on a cost-effective development plan, including selection of a host facility.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 1. Business and Summary of Accounting Policies (in part)

##### Cost of Merchandise Sold and Selling, General and Administrative Expenses

The following table illustrates the primary costs classified in Cost of Merchandise Sold and Selling, General and Administrative Expenses:

##### Cost of Merchandise Sold

- Total cost of products sold including product development costs, net of vendor payments other than reimbursement of specific, incremental and identifiable costs
- Inventory shrink
- Markdowns
- Freight expenses associated with moving merchandise from our vendors to our distribution centers
- Shipping and handling expenses of e-commerce sales
- Terms cash discount

##### Selling, General and Administrative Expenses

- Compensation and benefit costs including:
  - Stores
  - Corporate headquarters, including buying and merchandising
  - Distribution centers
- Occupancy and operating costs of our retail, distribution and corporate facilities
- Net revenues from the Kohl's credit card agreement with JPMorgan Chase
- Freight expenses associated with moving merchandise from our distribution centers to our retail stores, and among distribution and retail facilities
- Advertising expenses, offset by vendor payments for reimbursement of specific, incremental and identifiable costs
- Other administrative costs

The classification of these expenses varies across the retail industry.

##### Advertising

Advertising costs, which include primarily television and radio broadcast, direct mail, and newspaper circulars, are expensed when the advertisement is first seen. Advertising costs, net of related vendor allowances, were as follows:

| (In millions)           | 2009  | 2008    | 2007  |
|-------------------------|-------|---------|-------|
| Gross advertising costs | \$988 | \$1,037 | \$981 |
| Vendor allowances       | 142   | 147     | 142   |
| Net advertising costs   | \$846 | \$ 890  | \$839 |

##### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

###### Note 1—Summary of Significant Accounting Policies (in part)

**Revenue Recognition**—Revenues associated with sales of crude oil, natural gas, coal, petroleum and chemicals products, and all other sources are recorded when title passes to the customer, net of royalties, discounts and allowances, as applicable. Revenues from natural gas production from properties in which Chevron has an interest with other producers are generally recognized on the entitlement method. Excise, value-added and similar taxes assessed by a governmental authority on a revenue-producing transaction between a seller and a customer are presented on a gross basis. The associated amounts are shown as a footnote to the Consolidated Statement of Income on page FS-27. Purchases and sales of inventory with the same counterparty that are entered into in contemplation of one another (including buy/sell arrangements) are combined and recorded on a net basis and reported in "Purchased crude oil and products" on the Consolidated Statement of Income.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### (5) Accounts Receivable

The components of accounts receivable, net at December 31, 2010 and 2009 are as follows:

| (\$ in thousands)                     | 2010      | 2009      |
|---------------------------------------|-----------|-----------|
| End user                              | \$627,573 | \$205,384 |
| Other                                 | 14,306    | 15,532    |
| Less: Allowance for doubtful accounts | (73,571)  | (30,171)  |
| Accounts receivable, net              | \$568,308 | \$190,745 |

An analysis of the activity in the allowance for doubtful accounts for the years ended December 31, 2010, 2009 and 2008 is as follows (\$ in thousands):

| Allowance for Doubtful Accounts | Balance at Beginning of Period | Additions                                  |                                   | Deductions | Balance at End of Period |
|---------------------------------|--------------------------------|--------------------------------------------|-----------------------------------|------------|--------------------------|
|                                 |                                | Charged to Bad Debt Expense <sup>(*)</sup> | Charged to Other Accounts—Revenue |            |                          |
| 2008                            | \$32,748                       | \$31,700                                   | \$ 2,352                          | \$(26,675) | \$40,125                 |
| 2009                            | 40,125                         | 33,682                                     | (6,181)                           | (37,455)   | 30,171                   |
| 2010                            | 30,171                         | 55,161                                     | 14,873                            | (26,634)   | 73,571                   |

(\*) Such amounts are included in bad debt expense and for financial reporting purposes are classified as a reduction to other revenue.

We maintain an allowance for estimated bad debts based on our estimate of our ability to collect accounts receivable. Bad debt expense is recorded as a reduction to revenue.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 1. Significant Accounting Policies (in part)

**Warranties**—On development and production contract sales in our Government Communications Systems and RF Communications segments, the value or price of our warranty is generally included in the contract and funded by the customer. A provision for warranties is built into the estimated program costs when determining the profit rate to accrue when applying the cost-to-cost percentage-of-completion revenue recognition method. Warranty costs, as incurred, are charged to the specific program's cost, and both revenue and cost are recognized at that time. Factors that affect the estimated program cost for warranties include terms of the contract, complexity of the delivered product or service, number of installed units, historical experience and management's judgment regarding anticipated rates of warranty claims and cost per claim.

On product sales in our RF Communications, Broadcast Communications and Government Communications Systems segments, we provide for future warranty costs upon product delivery. The specific terms and conditions of those warranties vary depending upon the product sold, customer and country in which we do business. In the case of products sold by us, our warranties start from the shipment, delivery or customer acceptance date and continue as follows:

| Segment                           | Warranty Periods                 |
|-----------------------------------|----------------------------------|
| RF Communications                 | One to twelve years              |
| Broadcast Communications          | Less than one year to five years |
| Government Communications Systems | One to two years                 |

Because our products are manufactured, in many cases, to customer specifications and their acceptance is based on meeting those specifications, we historically have experienced minimal warranty costs. Factors that affect our warranty liability include the number of installed units, historical experience and management's judgment regarding anticipated rates of warranty claims and cost per claim. We assess the adequacy of our recorded warranty liabilities every quarter and make adjustments to the liability as necessary.

Automation software products sold by our Broadcast Communications segment generally carry a 90-day warranty from the date of shipment. Our liability under these warranties is either to provide a corrected copy of any portion of the software found not to be in substantial compliance with the specifications or, if we are unable to do so, to provide a full refund.

Software license agreements and sales contracts for products in our Broadcast Communications segment generally include provisions for indemnifying customers against certain specified liabilities should that segment's products infringe certain intellectual property rights of third parties. Certain of our Broadcast Communications transmission systems customers have notified us of potential claims against us based on these standard indemnification provisions included in sales contracts between us and these customers. These indemnification claims arise from litigation brought by a third-party patent licensing company asserting alleged technology rights against these customers. We are cooperating with these customers in efforts to mitigate their litigation exposure. To date, we have not incurred material costs as a result of such indemnification and have not accrued any liabilities related to such obligations in our Consolidated Financial Statements. See *Note 10: Accrued Warranties* for additional information regarding warranties.

### Note 10. Accrued Warranties

Changes in our warranty liability, which is included as a component of the "Other accrued items" line item in our Consolidated Balance Sheet, during fiscal 2010 and 2009, are as follows:

| (In millions)                                                                                                                   | 2010    | 2009    |
|---------------------------------------------------------------------------------------------------------------------------------|---------|---------|
| Balance at beginning of the fiscal year                                                                                         | \$ 65.5 | \$ 41.6 |
| Warranty provision for sales made during the year                                                                               | 28.4    | 26.4    |
| Settlements made during the year                                                                                                | (43.4)  | (19.4)  |
| Other adjustments to the warranty liability, including those for acquisitions and foreign currency translation, during the year | 22.6    | 16.9    |
| Balance at end of the fiscal year                                                                                               | \$ 73.1 | \$ 65.5 |

| Less: Current portion of long-term debt              | 289               | 291            | 296        | —                 | —              | —          |
| Total long-term debt                                 | \$14,473          | \$12,722       | \$13,462   | \$14,508          | \$12,748       | \$13,732   |

Carrying values in the table above include net unamortized debt discount of \$1.7 billion and \$1.8 billion at December 31, 2010 and 2009, respectively, which is amortized to interest expense over the terms of the related debt.

In a 2006 private offering, Anadarko received \$500 million of loan proceeds upon issuing Zero-Coupon Senior Notes (the Zero Coupons) maturing October 2036. The Zero Coupons have an aggregate principal amount due at maturity of \$2.4 billion, reflecting a yield to maturity of 5.24%. The holder has the right to cause the Company to repay up to 100% of the then-accreted value of the Zero Coupons in October of each year starting in 2012.

All of the Company's outstanding debt is senior unsecured. WES's borrowings under its senior unsecured revolving credit facility (the RCF) and its senior unsecured term loan (the Term Loan) are not guaranteed by Anadarko or any of its wholly owned subsidiaries.

**Midstream Subsidiary Note Payable to a Related Party**—In 2007, Anadarko, and an entity formed by a group of unrelated third-party investors (the Investor), formed Trinity Associates LLC (Trinity), a variable interest entity. Trinity was initially capitalized with a \$100 million cash contribution by Anadarko in exchange for Class A member and managing member interests in Trinity, and a \$2.2 billion cash contribution by the Investor in exchange for a Class B member cu-

mulative preferred interest. Trinity invested \$100 million in a United States Government securities money market fund (the Fund) and loaned \$2.2 billion to a wholly owned midstream subsidiary of Anadarko (Midstream Holding). The outstanding balance, described in the accompanying Consolidated Balance Sheets as Midstream Subsidiary Note Payable to a Related Party (Midstream Subsidiary Note), was repaid in full in 2010.

Proceeds from repayment of the Midstream Subsidiary Note were distributed by Trinity to the Investor. Proceeds from Trinity's liquidation of its investment in the Fund were distributed to Anadarko. Anadarko accounted for its investment in Trinity using the equity method of accounting, and the \$100 million distribution received reduced the carrying amount of that investment to zero.

**Anadarko Revolving Credit Facility**—In September 2010, the Company entered into the \$5.0 billion Facility, and terminated its \$1.3 billion revolving credit agreement, scheduled to mature in 2013. At December 31, 2010, the \$5.0 billion Facility was undrawn with available capacity of \$4.6 billion (\$5.0 billion undrawn capacity less \$377 million in outstanding letters of credit).

Borrowings under the \$5.0 billion Facility will bear interest, at the Company's election, at (i) LIBOR plus a margin ranging from 2.75% to 3.75%, based on the Company's credit rating,

or (ii) the greatest of (a) the JPMorgan Chase Bank prime rate, (b) the federal funds rate plus 0.50%, or (c) one-month LIBOR plus 1%, plus in each case, an applicable margin.

Obligations incurred under the \$5.0 billion Facility, as well as obligations Anadarko has to lenders or their affiliates pursuant to certain derivative instruments (as discussed in Note 9), are guaranteed by certain of the Company's wholly owned domestic subsidiaries, and are secured by a perfected first-priority security interest in certain exploration and production assets located in the United States and 65% of the capital stock of certain wholly owned foreign subsidiaries. The \$5.0 billion Facility contains various customary covenants with which Anadarko must comply, including, but not limited to, limitations on incurrence of indebtedness, liens on assets, and asset sales. Anadarko is also required to maintain, at the end of each quarter, (i) a Consolidated Leverage Ratio of no more than 4.5 to 1.0 (relative to Consolidated EBITDAX for the most recent period of four calendar quarters), (ii) a ratio of Current Assets to Current Liabilities of no less than 1.0 to 1.0, and (iii) a Collateral Coverage Ratio of no less than 1.75 to 1.0, in each case, as defined in the \$5.0 billion Facility. The Collateral Coverage Ratio is the ratio of an annually redetermined value of pledged assets to outstanding loans under the \$5.0 billion Facility. Additionally, to borrow from the \$5.0 billion Facility, the Collateral Coverage Ratio must be no less than 1.75 to 1.0 after giving pro forma effect to the requested borrowing. The Company was in compliance with all applicable covenants at December 31, 2010, and there were no restrictions on its ability to utilize the available capacity of the \$5.0 billion Facility.

**WES Revolving Credit Facility**—At December 31, 2010, the WES RCF had outstanding borrowings of \$49 million, with

\$401 million of available borrowing capacity. The RCF matures in October 2012 and bears interest at LIBOR plus an applicable margin ranging from 2.375% to 3.250%, for a rate of 3.26% at December 31, 2010.

**WES Term Loan**—In August 2010, WES borrowed \$250 million under the Term Loan, which matures in 2013, from a group of banks. The Term Loan bears interest at LIBOR plus an applicable margin ranging from 2.50% to 3.50% (for a rate of 3.26% at December 31, 2010) depending on WES's Consolidated Leverage Ratio, as defined in the agreement governing the Term Loan.

**Interest Expense**—The following table summarizes the amounts included in interest expense.

| (Millions)                                                       | Years Ended December 31 |       |        |

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 1. Summary of Significant Accounting Policies (in part)

**Change in Accounting Policy:** During the third quarter of fiscal year 2010, the Company changed its classification of interest and penalties related to unrecognized tax benefits, reflected in the Consolidated Statements of Income. Interest related to unrecognized tax benefits was previously classified on either the Interest income line or the Interest expense line. Penalties related to unrecognized tax benefits were previously classified as Non-operating expense. In accordance with the guidance for accounting for uncertainty in income taxes, based on an accounting policy election, interest related to unrecognized tax benefits may either be classified as income taxes or interest, and penalties related to unrecognized tax benefits may either be classified as income taxes or another expense classification. Beginning January 1, 2010, the Company revised its accounting policy and now classifies interest and penalties related to unrecognized tax benefits in the Provision (Benefit) for Income Taxes line of the Consolidated Statements of Income. The Company believes that the classification of interest and penalties in the Provision (Benefit) for Income Taxes line is preferable because it is management's belief that interest and penalties related to unrecognized tax benefits are costs of managing taxes payable (as opposed to, for example, interest as a cost of debt). Also, this presentation is more consistent with the practice followed by most of the Company's competitors. As a result of reclassifying interest related to unrecognized tax benefits, the Company's interest coverage ratio, which is a debt covenant in its revolving credit facility, will change. This change does not impact the Company's compliance with this debt covenant. Interest and penalties related to unrecognized tax benefits were not material during the period subsequent to the change in ac-

counting policy. Prior periods were not adjusted retrospectively due to immateriality. This change had no impact on Operating Income, Income from Continuing Operations, Net Income, or Earnings Per Share. This change had an impact on Income from Continuing Operations Before Taxes on Income, however the impact was not material.

### Note 9. Income Taxes (in part)

Beginning January 1, 2010, the Company recognizes interest and penalties related to unrecognized tax benefits in the Provision (Benefit) for Income Taxes line of the Consolidated Statements of Income. See *Note 1—Summary of Significant Accounting Policies* of Notes to Consolidated Financial Statements, under the caption Change in Accounting Policy, regarding the change in accounting policy for the classification of interest and penalties. Amounts accrued for interest and penalties were as follows:

| (Amounts in thousands)          | As of June 30, 2010 | As of June 30, 2009 | As of June 30, 2008 |
|---------------------------------|---------------------|---------------------|---------------------|
| Accrued Interest and Penalties: |                     |                     |                     |
| Interest                        | \$311               | \$344               | \$341               |
| Penalties                       | 117                 | 146                 | 159                 |

Accrued interest and penalties are not included in the tabular roll forward of unrecognized tax benefits above. Interest and penalties recognized for fiscal years 2010, 2009, and 2008 were, in thousands, income of \$72, \$10, and \$325, respectively.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## Note 4. Income Taxes (in part)

Polaris' Income before income taxes was generated from its United States and foreign operations as follows:

|                            | For the Years Ended December 31 |           |           |
|----------------------------|---------------------------------|-----------|-----------|
| (In thousands)             | 2010                            | 2009      | 2008      |
| United States              | \$210,155                       | \$143,483 | \$163,322 |
| Foreign                    | 8,386                           | 7,691     | 13,740    |
| Income before income taxes | \$218,541                       | \$151,174 | \$177,062 |

Components of Polaris' Provision for income taxes are as follows:

|                | For the Years Ended December 31 |          |          |
|----------------|---------------------------------|----------|----------|
| (In thousands) | 2010                            | 2009     | 2008     |
| Current:       |                                 |          |          |
| Federal        | \$ 73,597                       | \$27,104 | \$48,370 |
| State          | 7,381                           | 3,723    | 5,520    |
| Foreign        | 6,783                           | 5,757    | 6,744    |
| Deferred       | (16,358)                        | 13,573   | (967)    |
| Total          | \$ 71,403                       | \$50,157 | \$59,667 |

Polaris had liabilities recorded related to unrecognized tax benefits totaling \$5,509,000 and \$4,988,000 at December 31, 2010 and 2009, respectively. The liabilities were classified as Long-term income taxes payable in the accompanying consolidated balance sheets in accordance with ASC Topic 740. Polaris recognizes potential interest and penalties related to income tax positions as a component of the Provision for income taxes on the consolidated statements of income. Polaris had reserves related to potential interest of \$331,000 and \$612,000 recorded as a component of the liabilities at December 31, 2010 and 2009, respectively. The entire balance of unrecognized tax benefits at December 31, 2010, if recognized, would affect the Company's effective tax rate. The Company does not anticipate that total unrecognized tax benefits will materially change in the next twelve months. Tax years 2006 through 2009 remain open to examination by certain tax jurisdictions to which the Company is subject. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

|                                                   | For the Years Ended December 31 |         |
|---------------------------------------------------|---------------------------------|---------|

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## 1. Summary of Significant Accounting Policies (in part)

## Asset Retirement Obligation

The initial estimated asset retirement obligation (ARO) related to properties is recognized as a liability, with an associated increase in property and equipment for the asset retirement cost. Accretion expense is recognized over the estimated productive life of the related assets. If the fair value of the estimated ARO changes, an adjustment is recorded to both the ARO and the asset retirement cost. Revisions in estimated liabilities can result from changes in estimated inflation rates, changes in service and equipment costs and changes in the estimated timing of settling ARO.

#### 4. Asset Retirement Obligation

The following table describes changes to the Company's ARO liability for the years ended December 31, 2010 and 2009:

| (In millions)                                    | 2010    | 2009    |
|--------------------------------------------------|---------|---------|
| Asset retirement obligation at beginning of year | \$1,784 | \$1,895 |
| Liabilities incurred                             | 270     | 213     |
| Liabilities acquired                             | 847     | 5       |
| Liabilities settled                              | (329)   | (508)   |
| Accretion expense                                | 111     | 105     |
| Revisions in estimated liabilities               | 189     | 74      |
| Asset retirement obligation at end of year       | 2,872   | 1,784   |
| Less current portion                             | (407)   | (147)   |
| Asset retirement obligation, long-term           | \$2,465 | \$1,637 |

The ARO liability reflects the estimated present value of the amount of dismantlement, removal, site reclamation and similar activities associated with Apache's oil and gas properties. The Company utilizes current retirement costs to estimate the expected cash outflows for retirement obligations. The Company estimates the ultimate productive life of the properties, a risk-adjusted discount rate and an inflation factor in order

to determine the current present value of this obligation. To the extent future revisions to these assumptions impact the present value of the existing ARO liability, a corresponding adjustment is made to the oil and gas property balance.

During 2010, the Company recorded additional abandonment liabilities of \$847 million related to the properties acquired in the BP, Devon and Mariner transactions. Apache also recorded additional abandonment liabilities of \$270 million associated with its drilling and development program during the year.

Liabilities settled in 2010 relate to individual properties, platforms and facilities plugged and abandoned during the period. The Company has an active abandonment program with a majority of the activity in the Gulf of Mexico and Canada. In September 2010 the Bureau of Ocean Management, Regulation and Enforcement (BOEMRE, formerly known as the Minerals Management Service), a division of the U.S. Department of the Interior, issued Notice to Lessees (NTL) No. 2010-G05, which includes guidelines for decommissioning idle infrastructure on active leases in the Gulf of Mexico within a specified period of time. The Company has reviewed its Gulf of Mexico abandonment program in light of these new regulations and adjusted the timing of its abandonment program accordingly.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 3. Investments in Unconsolidated Companies and Miami Land

The following is the Company's ownership interest and investment in unconsolidated companies and joint ventures as of December 26, 2010, and December 27, 2009, (dollars in thousands):

| Company                                     | %<br>Ownership<br>Interest | December 26,<br>2010 | December 27,<br>2009 |
|---------------------------------------------|----------------------------|----------------------|----------------------|
| CareerBuilder, LLC                          | 14.4                       | \$220,777            | \$218,736            |
| Classified<br>Ventures, LLC                 | 25.6                       | 66,976               | 81,538               |
| HomeFinder, LLC                             | 33.3                       | 3,061                | 5,048                |
| Seattle Times<br>Company<br>(C-Corporation) | 49.5                       | —                    | —                    |
| Ponderay (general<br>partnership)           | 27.0                       | 13,320               | 13,754               |
| Other                                       | Various                    | 2,747                | 3,033                |
|                                             |                            | \$306,881            | \$322,109            |

The Company uses the equity method of accounting for a majority of investments.

HomeFinder, LLC, formerly a division of Classified Ventures, LLC (CV), operates the real estate website HomeFinder.com. It was spun off in the first quarter of 2009 into a separate limited liability corporation in which the Company has a one-third ownership interest. The initial carrying value of the Company's investment in HomeFinder primarily represented its proportionate ownership of HomeFinder which was previously reflected in the Company's value of CV.

In fiscal 2010 CV paid the Company a dividend totaling \$24.3 million that was recorded as a return of capital and reduced the carrying value of the Company's investment in CV.

Also in 2010, a less-than-50% owned company identified goodwill impairment at a reporting unit and as a result, the Company recognized \$3.0 million as its portion of the charge related to this write-down in fiscal 2010. In fiscal 2008, a less-than-50% owned company identified goodwill impairment at a reporting unit and as a result, the Company recognized its portion of the charge related to this write-down. The total non-cash pre-tax charges related to impairments of internet investments recorded in fiscal 2008 were \$26.5 million.

On March 31, 2008, McClatchy and its partners, affiliates of Cox Enterprises, Inc. and Media General, Inc., completed the sale of SP Newsprint Company (SP), of which McClatchy was a one-third owner. The Company recorded a gain on the transaction of approximately \$34.4 million. The Company used the \$55.0 million of sales proceeds it received in the second fiscal quarter of 2008 and an additional \$5.0 million it received in 2009 to reduce debt.

The Company has an annual purchase commitment for 109,730 metric tons of newsprint from SP. The Company is required to purchase 56,800 metric tons of newsprint of annual production from Ponderay on a "take-if-tendered" basis at prevailing market prices.

At the end of 2008, the Seattle Times Company (STC) recorded a comprehensive loss related to its retirement plan liabilities. The Company recorded its share of the compre-

hensive loss in the Company's comprehensive income (loss) in stockholders' equity to the extent that it had a carrying value in its investment in STC. As a result, the Company's investment in STC at December 27, 2008, was zero, and no future income or losses from STC will be recorded until the Company's carrying value on its balance sheet is restored through future earnings by STC.

The Company also incurred expense related to the purchase of products and services provided by these companies, for the uploading and hosting of online advertising on behalf of the Company's newspapers' advertisers.

The following table summarizes expenses incurred for products provided by its less-than 50% owned companies and is recorded in operating expenses in fiscal 2010, 2009 and 2008 (in thousands):

|      | Career-<br>Builder | Classified<br>Ventures | Ponderay | Other |
|------|--------------------|------------------------|----------|-------|
| 2010 | \$1,272            | \$11,073               | \$23,048 | NA    |
| 2009 | 1,241              | 10,250                 | 27,413   | NA    |
| 2008 | 2,670              | 11,561                 | 15,703   | \$353 |

As of December 26, 2010, and December 27, 2009, the Company had approximately \$3.6 million and \$3.9 million, respectively, included in amounts payable to CareerBuilder, CV and Ponderay.

The table below presents the summarized financial information for the Company's investments in unconsolidated companies on a combined basis (dollars in thousands):

|                        | 2010      | 2009      |
|------------------------|-----------|-----------|
| Current assets         | \$473,765 | \$393,914 |
| Noncurrent assets      | 603,216   | 664,876   |
| Current liabilities    | 298,229   | 269,501   |
| Noncurrent liabilities | 280,184   | 269,546   |
| Equity                 | 498,568   | 519,743   |

|                         | 2010        | 2009        | 2008        |
|-------------------------|-------------|-------------|-------------|
| Net revenues            | \$1,195,755 | \$1,142,551 | \$1,334,372 |
| Operating income (loss) | 102,863     | 67,442      | (52,579)    |
| Net income (loss)       | 95,855      | 66,524      | (50,722)    |

On January 31, 2011, the contract to sell certain land in Miami terminated because the buyer did not consummate the transaction by the closing deadline in the contract. Under the terms of an agreement with the developer, McClatchy is now entitled to receive a \$7.0 million termination fee. McClatchy previously received approximately \$16.5 million in nonrefundable deposits, which it used to repay debt.

The Company obtained an independent appraisal to determine the fair value of the land at December 26, 2010. The valuation process incorporated the income capitalization valuation technique and the market data or direct sales comparison approach. Based on the appraisal, the carrying value was written down by \$21.4 million to \$116.0 million in 2010 (net of the \$16.5 million of nonrefundable deposits received) and is included in other assets on the Company's Balance Sheet.

The Company wrote down the value of the land by \$26.3 million in the fourth quarter of 2009 after extending the deadline on the contract to January 31, 2011, and receipt of an additional \$6.0 million nonrefundable deposit from the buyer.

The fair value analysis performed in 2009 incorporated an independent appraisal and consideration of the existing contract to sell the land.

Fair value measurement requires three classifications of investments based on the nature of available fair value inputs and the valuation methodologies used to measure these investments at fair value. Under the fair value guidance, the Company classified the land as a Level 3 classification. Level 3 classifications are based on input to the valuation methodology that are unobservable inputs in situations where there is little or no market activity for the asset or liability and the reporting entity makes estimates and assumptions related to the pricing of the asset or liability.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### 3. Restructuring and Employee Severance

#### Restructuring Policy

We consider restructuring activities as programs whereby we fundamentally change our operations such as closing facilities, moving manufacturing of a product to another location or outsourcing the production of a product. Restructuring activities may also involve substantial re-alignment of the management structure of a business unit in response to changing

market conditions. A liability for a cost associated with an exit or disposal activity is recognized and measured initially at its fair value in the period in which it is incurred except for a liability for a one-time termination benefit, which is recognized over its future service period.

#### Restructuring and Employee Severance

The following table summarizes activity related to our restructuring and employee severance costs during fiscal 2010, 2009 and 2008:

| (In millions)                                | Fiscal Year Ended June 30 |         |        |
|----------------------------------------------|---------------------------|---------|--------|
|                                              | 2010                      | 2009    | 2008   |
| Employee related costs <sup>(1)</sup>        | \$32.9                    | \$ 33.8 | \$30.0 |
| Facility exit and other costs <sup>(2)</sup> | 57.8                      | 70.9    | 25.3   |
| Total restructuring and employee severance   | \$90.7                    | \$104.7 | \$55.3 |

<sup>(1)</sup> *Employee-Related Costs.* These costs primarily consist of one-time termination benefits provided to employees who have been involuntarily terminated and duplicate payroll costs during transition periods.

<sup>(2)</sup> *Facility Exit and Other Costs.* Facility exit and other costs consist of accelerated depreciation, equipment relocation costs, project consulting fees and costs associated with restructuring our delivery of information technology infrastructure services.

Restructuring and employee severance for fiscal 2010, 2009 and 2008 included costs related to the following significant projects:

| (In millions)                                  | Fiscal Year Ended June 30 |        |        |
|------------------------------------------------|---------------------------|--------|--------|
|                                                | 2010                      | 2009   | 2008   |
| Spin-off <sup>(1)</sup>                        | \$64.5                    | \$73.8 | \$ 0.0 |
| Segment Realignment <sup>(2)</sup>             | 2.0                       | 15.7   | 0.2    |
| Medical Headquarters Relocation <sup>(3)</sup> | 0.1                       | 1.0    | 28.3   |

<sup>(1)</sup> During fiscal 2009 and fiscal 2010, we incurred restructuring expenses related to the Spin-Off consisting of employee-related costs, share-based compensation, costs to evaluate and execute the transaction, costs to separate certain functions and information technology systems and other one-time transaction related costs. See Note 17 for further information regarding share-based compensation incurred in connection with the Spin-Off. Also included within these costs is \$18.6 million of costs related to the retirement of our former Chairman and Chief Executive Officer upon completion of the Spin-Off.

<sup>(2)</sup> During fiscal 2009, we consolidated our businesses into two primary operating and reportable segments to reduce costs and align resources with the needs of each segment ("Segment Realignment"). In connection with the Spin-Off, these reportable segments have since been reorganized. Refer to Notes 1 and 16 for additional information regarding our current reportable segments.

<sup>(3)</sup> In April 2007, we announced a plan to move our medical products distribution headquarters and certain corporate functions from Waukegan, Illinois to our corporate headquarters in Dublin, Ohio.

In addition to the significant restructuring programs discussed above, from time to time we incur costs to implement smaller restructuring efforts for specific operations within our segments. These restructuring plans focus on various aspects of operations, including closing and consolidating certain manufacturing and distribution operations, rationalizing

headcount and aligning operations in the most strategic and cost-efficient structure.

We estimate that we will incur additional costs in future periods associated with currently anticipated restructuring activities totaling \$14.5 million. These additional costs are primarily associated with the Spin-Off.

#### *Restructuring and Employee Severance Accrual Rollforward*

The following table summarizes activity related to liabilities associated with our restructuring and employee severance activities during fiscal 2010, 2009 and 2008:

| (In millions)                  | Employee Related Costs | Facility Exit and Other Costs | Total   |
|--------------------------------|------------------------|-------------------------------|---------|
| Balance at June 30, 2007       | \$ 14.1                | \$ 1.8                        | \$ 15.9 |
| Additions                      | 30.0                   | 25.3                          | 55.3    |
| Payments and other adjustments | (21.6)                 | (26.7)                        | (48.3)  |
| Balance at June 30, 2008       | 22.5                   | 0.4                           | 22.9    |

|                                                     | <b>\$186</b> | <b>\$ 40</b> | <b>\$ 59</b> |

Net foreign currency exchange losses in 2010 were \$159 million, compared to \$7 million and \$57 million of losses in 2009 and 2008, respectively. Losses in 2010 included a first quarter loss of \$110 million resulting from the January 8, 2010 devaluation of the Venezuelan bolivar fuerte against the U.S. dollar and the establishment of a two-tier exchange rate structure, and a fourth quarter foreign currency exchange loss of \$24 million in connection with the January 1, 2011 elimination of the two-tier exchange rate structure. Foreign currency exchange also reflected net gains and losses resulting from the effect of exchange rate changes on various foreign currency transactions worldwide.

Effective January 1, 2010, Venezuela's economy was considered to be highly inflationary under U.S. generally accepted accounting principles since it experienced a rate of general inflation in excess of 100% over the latest three year period, based upon the blended Consumer Price Index and National Consumer Price Index. Accordingly, the U.S. dollar was determined to be the functional currency of our Venezuelan subsidiary. All gains and losses resulting from the remeasurement of its financial statements since January 1, 2010 were determined using official exchange rates.

On January 8, 2010, Venezuela established a two-tier exchange rate structure for essential and non-essential goods.

For essential goods the official exchange rate was 2.6 bolivares fuertes to the U.S. dollar and for non-essential goods the official exchange rate was 4.3 bolivares fuertes to the U.S. dollar. As announced by the Venezuelan government in December 2010, on January 1, 2011, the two-tier exchange rate structure was eliminated and the exchange rate for essential goods cannot be used for our unsettled amounts at December 31, 2010. Effective January 1, 2011, the official exchange rate of 4.3 bolivares fuertes to the U.S. dollar was established for substantially all goods.

The \$110 million foreign currency exchange loss in the first quarter of 2010 primarily consisted of a \$157 million remeasurement loss on bolivar-denominated net monetary assets and liabilities, including deferred taxes, at the time of the January 2010 devaluation. The loss was primarily related to cash deposits in Venezuela that were remeasured at the official exchange rate of 4.3 bolivares fuertes applicable to non-essential goods, and was partially offset by \$47 million subsidy receivable related to U.S. dollar-denominated payables that were expected to be settled at the official subsidy exchange rate of 2.6 bolivares fuertes applicable to essential goods. Since we expected these payables to be settled at the subsidy essential goods rate, we established a subsidy receivable to reflect the expected benefit to be received in the form of the difference between the essential and non-essential goods exchange rates. Throughout 2010, we periodically assessed our ability to realize the benefit of the subsidy receivable, and a substantial portion of purchases by our Venezuelan subsidiary had qualified and settled at the official exchange rate for essential goods.

As a result of the elimination of the official subsidy exchange rate for essential goods, we no longer expect our Venezuelan subsidiary to settle payables at that exchange rate. Accordingly, we recorded a foreign exchange loss of \$24 million in the fourth quarter of 2010 related to the reversal of the subsidy receivable at December 31, 2010.

Net foreign currency exchange losses decreased in 2009 compared to 2008, due primarily to the weakening of various currencies against the U.S. dollar in 2008.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note O—Transfers of Financial Assets

On January 1, 2010, the Company adopted ASU 2009-16, "Transfers and Servicing (Topic 860): Accounting for Transfers of Financial Assets." This ASU is intended to improve the information provided in financial statements concerning transfers of financial assets, including the effects of transfers on financial position, financial performance and cash flows, and any continuing involvement of the transferor with the transferred financial assets. The Company evaluated the impact of adopting the guidance and the terms and conditions in place at January 1, 2010 and determined that certain sales of accounts receivable would be classified as secured borrowings. Under the Company's sale of accounts receivable arrangements, \$915 million was outstanding at January 1, 2010. The maximum amount of receivables available for participation in these programs was \$1,939 million at January 1, 2010.

In January 2010, the Company terminated the North American arrangement and replaced it with a new arrangement that qualified for treatment as a sale under ASU 2009-16. The arrangement related to \$294 million of the \$915 million outstanding at January 1, 2010 and \$1,100 million of the \$1,939 million maximum participation.

In June 2010, the Company terminated the European arrangement and replaced it with a new arrangement that qualified for treatment as a sale under ASU 2009-16. The arrangement related to \$584 million of the \$915 million outstanding at January 1, 2010 and \$721 million of the \$1,939 million maximum participation.

##### Sale of Trade Accounts Receivable in North America

In January 2010, the Company terminated its previous facilities used in North America for the transfers of trade accounts receivable by entering into an agreement to repurchase the outstanding receivables for \$264 million and replacing it with a new arrangement. During the year ended December 31, 2010, under the new arrangement, the Company sold the trade accounts receivable of select North America entities on a revolving basis to certain multi-seller commercial paper conduit entities. The Company maintains servicing responsibilities and the related costs are insignificant. The proceeds received are comprised of cash and interests in specified assets (the receivables sold by the Company) of the conduits that entitle the Company to the residual cash flows of such specified assets in the conduits after the commercial paper has been repaid. Neither the conduits nor the investors in those entities have recourse to other assets of the Company in the event of nonpayment by the debtors.

During the year ended December 31, 2010, the Company recognized a loss of \$19 million on the sale of these receivables, which is classified as "Interest expense and amortization of debt discount" in the consolidated statements of income. The Company classifies its interests in the conduits as "Accounts and notes receivable—Other" on the consolidated balance sheets and those interests are carried at fair value. Fair value of the interests is determined by calculating the expected amount of cash to be received and is based on unobservable inputs (a Level 3 measurement). The key input in the valuation is percentage of anticipated credit losses, which was 1.42 percent, in the portfolio of receivables sold that have not yet been collected. Given the short-term nature of the underlying receivables, discount rates and prepayments are not factors in determining the fair value of the

interests. At December 31, 2010, the carrying value of the interests held was \$1,110 million, which is the Company's maximum exposure to loss related to the receivables sold.

The sensitivity of the fair value of the interests held to hypothetical adverse changes in the anticipated credit losses are as follows (amounts shown are the corresponding hypothetical decreases in the carrying value of the interests):

#### Impact to Carrying Value

| (In millions)      |     |
|--------------------|-----|
| 10% adverse change | \$2 |
| 20% adverse change | \$5 |

Following is an analysis of certain cash flows between the Company and the North American conduits:

#### Cash Proceeds

| (In millions)                                   | 2010     |
|-------------------------------------------------|----------|
| Sale of receivables                             | \$ 264   |
| Collections reinvested in revolving receivables | \$18,952 |
| Interests in conduits <sup>(1)</sup>            | \$ 974   |

<sup>(1)</sup> Presented in operating activities in the consolidated statements of cash flows.

Delinquencies on the sold receivables that were still outstanding at December 31, 2010 were \$127 million. Trade accounts receivable outstanding and derecognized from the Company's consolidated balance sheet at December 31, 2010 were \$1,930 million. Credit losses, net of any recoveries, on receivables sold during the year ended December 31, 2010 were \$2 million. During 2010, the Company repurchased \$13 million of previously sold receivables related to a divestiture.

#### Sale of Trade Accounts Receivable in Europe

In June 2010, the Company terminated its previous facility used in Europe for the transfers of trade accounts receivable by entering into an agreement to repurchase the outstanding receivables for \$11 million and replacing it with a new arrangement. Since June 2010, under the new arrangement, the Company sold qualifying trade accounts receivable of select European entities on a revolving basis to certain multi-seller commercial paper conduit entities. The Company maintains servicing responsibilities and the related costs are insignificant. The proceeds received are comprised of cash and interests in specified assets (the receivables sold by the Company) of the conduits that entitle the Company to the residual cash flows of such specified assets in the conduits after the commercial paper has been repaid. Neither the conduits nor the investors in those entities have recourse to other assets of the Company in the event of nonpayment by the debtors.

During the period from the June 2010 inception of the new arrangement through December 31, 2010, the Company recognized a loss of \$7 million on the sale of these receivables, which is classified as "Interest expense and amortization of debt discount" in the consolidated statements of income. The Company classifies its interests in the conduits as "Accounts and notes receivable—Other" on the consolidated balance sheets and those interests are carried at fair value. Fair value of the interests is determined by calculating the expected amount of cash to be received and is based on unobserv-

able inputs (a Level 3 measurement). The key input in the valuation is percentage of anticipated credit losses, which was zero, in the portfolio of receivables sold that have not yet been collected. Given the short-term nature of the underlying receivables, discount rates and prepayments are not factors in determining the fair value of the interests. At December 31, 2010, the carrying value of the interests held was \$157 million, which is the Company's maximum exposure to loss related to the receivables sold.

Following is an analysis of certain cash flows between the Company and the European conduits:

#### Cash Proceeds

| (In millions)                                   | 2010    |
|-------------------------------------------------|---------|
| Sale of receivables                             | \$ 554  |
| Collections reinvested in revolving receivables | \$3,914 |
| Interests in conduits <sup>(1)</sup>            | \$ 64   |

<sup>(1)</sup> Presented in operating activities in the consolidated statements of cash flows.

Delinquencies on the sold receivables still outstanding at December 31, 2010 were \$42 million. Trade accounts receivable outstanding and derecognized from the Company's consolidated balance sheet at December 31, 2010 were \$405 million. There were no credit losses on receivables sold since June 2010.

#### Sale of Trade Accounts Receivable in Asia Pacific

During the year ended December 31, 2010, the Company sold participating interests in trade accounts receivable of select Asia Pacific entities for which the Company received cash. The Company maintains servicing responsibilities for the participating interests sold and the related costs are insignificant. The third-party holders of the participating interests do not have recourse to the Company's assets in the event of nonpayment by the debtors.

During the year ended December 31, 2010, the Company recognized a loss of less than \$1 million on the sale of the participating interests in the receivables, which is classified as "Interest expense and amortization of debt discount" in the consolidated statements of income.

Following is an analysis of certain cash flows between the Company and the third-party holders of the participating interests:

#### Cash Proceeds

| (In millions)                                   | 2010  |
|-------------------------------------------------|-------|
| Sale of participating interests                 | \$218 |
| Collections reinvested in revolving receivables | \$195 |

Following is additional information related to the sale of participating interests in the receivables under this facility:

#### Trade Accounts Receivable

| (In millions)                                             | Dec. 31, 2010 |
|-----------------------------------------------------------|---------------|
| Derecognized from the consolidated balance sheet          | \$ 25         |
| Outstanding in the consolidated balance sheet             | 281           |
| Total accounts receivable in select Asia Pacific entities | \$306         |

There were no credit losses on receivables relating to the participating interests sold during the year ended December

31, 2010. There were no delinquencies on the outstanding receivables related to the participating interests sold at December 31, 2010.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### (2) Summary of Significant Accounting Policies (in part)

##### (o) Cost of Revenue and Selling, General and Administrative Expenses

Cost of revenue includes payroll, employee benefits, occupancy costs and other costs associated with personnel employed in customer service roles, including program design and development and professional services. Cost of revenue also includes data processing costs, amortization of software, customer relationship intangible assets and depreciation on operating assets.

Selling, general and administrative expenses include payroll, employee benefits, occupancy and other costs associated with personnel employed in sales, marketing, human resources, finance and other administrative roles. Selling, general and administrative expenses also include depreciation on non-operating corporate assets, advertising costs and other marketing-related programs.

##### (10) Computer Software

Computer software as of December 31, 2010 and 2009 consisted of the following (in millions):

|                                                    | 2010     | 2009     |
|----------------------------------------------------|----------|----------|
| Software from business acquisitions                | \$ 653.7 | \$ 646.7 |
| Capitalized software development costs             | 690.9    | 662.6    |
| Purchased software                                 | 76.5     | 72.3     |
| Computer software                                  | 1,421.1  | 1,381.6  |
| Accumulated amortization                           | (512.1)  | (448.9)  |
| Computer software, net of accumulated amortization | \$ 909.0 | \$ 932.7 |

Amortization expense for computer software was \$180.5 million, \$149.8 million and \$149.9 million for the years ended December 31, 2010, 2009 and 2008, respectively. Included in discontinued operations in the Consolidated Statements of Earnings was amortization expense on computer software of \$3.3 million, \$0.7 million and \$15.3 million for the years

ended December 31, 2010, 2009 and 2008, respectively. During the year ended December 31, 2010, as a result of Banco Santander's exit from the Brazilian Venture, we recorded a \$14.6 million charge pertaining to capitalized software development costs incurred exclusively for use in processing Banco Santander's card activity. The write-off was included

in the ISG segment. During the year ended December 31, 2009, we recorded a \$12.9 million charge to write-off the carrying value of impaired software resulting from the rationalization of FIS and Metavante product lines. Of this total, \$6.8 million related to FSG and \$6.1 million related to PSG. The impairment was recorded in the Corporate and Other Segment.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 17—Litigation: (claims not in thousands)

##### Litigation

The Corporation and its subsidiaries are involved in various claims and lawsuits incidental to their businesses. In addition, it is also subject to asbestos litigation as described below.

##### Asbestos Litigation

Claims have been asserted alleging personal injury from exposure to asbestos-containing components historically used

in some products of predecessors of the Corporation's Air & Liquid Systems Corporation subsidiary ("Asbestos Liability") and of an inactive subsidiary in dissolution and another former division of the Corporation. Those subsidiaries, and in some cases the Corporation, are defendants (among a number of defendants, typically over 50) in cases filed in various state and federal courts.

##### Asbestos Claims

The following table reflects approximate information about the claims for Asbestos Liability against the subsidiaries and

the Corporation, along with certain asbestos claims asserted against the inactive subsidiary in dissolution and the former division, for the three years ended December 31, 2010, 2009 and 2008:

|                                               | 2010                 | 2009                 | 2008                 |
|-----------------------------------------------|----------------------|----------------------|----------------------|
| Open claims at end of period                  | 8,081 <sup>(1)</sup> | 8,168 <sup>(1)</sup> | 9,354 <sup>(1)</sup> |
| Gross settlement and defense costs (in 000's) | \$18,085             | \$28,744             | \$19,102             |
| Claims resolved                               | 1,377                | 3,336                | 1,015                |

<sup>(1)</sup> Included as "open claims" are approximately 1,791 claims in 2010, 1,938 claims in 2009 and 3,243 claims in 2008 classified in various jurisdictions as "inactive" or transferred to a state or federal judicial panel on multi-district litigation, commonly referred to as the MDL.

A substantial majority of the settlement and defense costs reflected in the above table were reported and paid by insurers. Because claims are often filed and can be settled or dismissed in large groups, the amount and timing of settlements, as well as the number of open claims, can fluctuate significantly from period to period. In 2006, for the first time, a claim for Asbestos Liability against one of the Corporation's subsidiaries was tried to a jury. The trial resulted in a defense verdict. Plaintiffs appealed that verdict and in 2008 the California Court of Appeals reversed the jury verdict and remanded the case back to the trial court.

#### *Asbestos Insurance*

Certain of the Corporation's subsidiaries and the Corporation have an arrangement (the "Coverage Arrangement") with insurers responsible for historical primary and some first-layer excess insurance coverage for Asbestos Liability (the "Paying Insurers"). Under the Coverage Arrangement, the Paying Insurers accept financial responsibility, subject to the limits of the policies and based on fixed defense percentages and specified indemnity allocation formulas, for pending and future claims for Asbestos Liability. The claims against the Corporation's inactive subsidiary that is in dissolution proceedings, numbering approximately 400 as of December 31, 2010, are not included within the Coverage Arrangement. The one claim filed against the former division also is not included within the Coverage Arrangement. The Corporation believes that the claims against the inactive subsidiary in dissolution and the former division are immaterial.

The Coverage Arrangement includes an acknowledgment that Howden North America, Inc. ("Howden") is entitled to coverage under policies covering Asbestos Liability for claims arising out of the historical products manufactured or distributed by Buffalo Forge, a former subsidiary of the Corporation (the "Products"). The Coverage Arrangement does not provide for any prioritization on access to the applicable policies or monetary cap other than the limits of the policies, and, accordingly, Howden may access the policies at any time for any covered claim arising out of a Product. In general, access by Howden to the policies covering the Products will erode the coverage under the policies available to the Corporation and the relevant subsidiaries for Asbestos Liability alleged to arise out of not only the Products but also other historical products of the Corporation and its subsidiaries covered by the applicable policies.

On August 4, 2009, Howden filed a lawsuit in the United States District Court for the Western District of Pennsylvania.

In the lawsuit, Howden raised claims against certain insurance companies that allegedly issued policies to Howden that do not cover the Corporation or its subsidiaries, and also raised claims against the Corporation and two other insurance companies that issued excess insurance policies covering certain subsidiaries of the Corporation (the "Excess Policies"), but that were not part of the Coverage Arrangement. In the lawsuit, Howden seeks, as respects the Corporation, a declaratory judgment from the court as to the respective rights and obligations of Howden, the Corporation and the insurance carriers under the Excess Policies. One of the excess carriers and the Corporation filed cross-claims against each other seeking declarations regarding their respective rights and obligations under Excess Policies issued by that carrier. The Corporation's cross-claim also sought damages for the carrier's failure to pay certain defense and indemnity costs. The Corporation and that carrier concluded a settlement generally consistent with the Coverage Arrangement, and all claims between that carrier and the Corporation were dismissed with prejudice on December 8, 2010. The litigation remains pending with respect to the other carrier that issued one of the Excess Policies.

On February 24, 2011, the Corporation and its Air & Liquid Systems Corporation subsidiary filed a lawsuit in the United States District Court for the Western District of Pennsylvania against thirteen domestic insurance companies, certain underwriters at Lloyd's, London and certain London market insurance companies, and Howden. The lawsuit seeks a declaratory judgment regarding the respective rights and obligations of the parties under excess insurance policies not included within the Coverage Arrangement that were issued to the Corporation from 1981 through 1984 as respects claims against the Corporation and its subsidiary for Asbestos Liability and as respects asbestos bodily-injury claims against Howden arising from the Products.

#### *Asbestos Valuations*

In 2006, the Corporation retained Hamilton, Rabinovitz & Associates, Inc. ("HR&A"), a nationally recognized expert in the valuation of asbestos liabilities, to assist the Corporation in estimating the potential liability for pending and unasserted future claims for Asbestos Liability. HR&A was not requested to estimate asbestos claims against the inactive subsidiary in dissolution or the former division, which the Corporation believes are immaterial. Based on this analysis, the Corporation recorded a reserve for Asbestos Liability claims pending or projected to be asserted through 2013 as at December 31, 2006. HR&A's analysis was updated in 2008, and additional reserves were established by the Corporation as at December 31, 2008 for Asbestos Liability claims pending or projected to be asserted through 2018. HR&A's analysis was most recently updated in 2010, and additional reserves were established by the Corporation as at December 31, 2010 for Asbestos Liability claims pending or projected to be asserted through 2020. The methodology used by HR&A in its projection in 2010 of the operating subsidiaries' liability for pending and unasserted potential future claims for Asbestos Liability, which is substantially the same as the methodology employed by HR&A in the 2006 and 2008 estimates, relied upon and included the following factors:

- HR&A's interpretation of a widely accepted forecast of the population likely to have been exposed to asbestos;
- Epidemiological studies estimating the number of people likely to develop asbestos-related diseases;

- HR&A's analysis of the number of people likely to file an asbestos-related injury claim against the subsidiaries and the Corporation based on such epidemiological data and relevant claims history from January 1, 2008 to August 30, 2010;
- An analysis of pending cases, by type of injury claimed and jurisdiction where the claim is filed;
- An analysis of claims resolution history from January 1, 2008 to August 30, 2010 to determine the average settlement value of claims, by type of injury claimed and jurisdiction of filing; and
- An adjustment for inflation in the future average settlement value of claims, at an annual inflation rate based on the Congressional Budget Office's ten year forecast of inflation.

Using this information, HR&A estimated in 2010 the number of future claims for Asbestos Liability that would be filed through the year 2020, as well as the settlement or indemnity costs that would be incurred to resolve both pending and future unasserted claims through 2020. This methodology has been accepted by numerous courts.

In conjunction with developing the aggregate liability estimate referenced above, the Corporation also developed an estimate of probable insurance recoveries for its Asbestos Liabilities. In developing the estimate, the Corporation considered HR&A's projection for settlement or indemnity costs for Asbestos Liability and management's projection of associated defense costs (based on the current defense to indemnity cost ratio), as well as a number of additional factors. These additional factors included the Coverage Arrangement, self-insured retentions, policy exclusions, policy limits, policy provisions regarding coverage for defense costs, attachment points, prior impairment of policies and gaps in the coverage, policy exhaustions, insolvencies among certain of the insurance carriers, the nature of the underlying claims for Asbestos Liability asserted against the subsidiaries and the Corporation as reflected in the Corporation's asbestos claims database, as well as estimated erosion of insurance limits on account of claims against Howden arising out of the Products. In addition to consulting with the Corporation's outside legal counsel on these insurance matters, the Corporation retained in 2010 a nationally-recognized insurance consulting firm to assist the Corporation with certain policy allocation matters that also are among the several factors considered by the Corporation when analyzing potential recoveries from relevant historical insurance for Asbestos Liabilities. Based upon all of the factors considered by the Corporation, and taking into account the Corporation's analysis of publicly available information regarding the creditworthiness of various insurers, the Corporation estimated the probable insurance recoveries for Asbestos Liability and defense costs through 2020. Although the Corporation believes that the assumptions employed in the insurance valuation were reasonable and previously consulted with its outside legal counsel and insurance consultant regarding those assumptions, there are other assumptions that could have been employed that would have resulted in materially lower insurance recovery projections.

Based on the analyses described above, the Corporation's reserve at December 31, 2010 for the total costs, including defense costs, for Asbestos Liability claims pending or projected to be asserted through 2020 was \$218,303 of which approximately 85% was attributable to settlement costs for unasserted claims projected to be filed through 2020 and future defense costs. While it is reasonably possible that the

Corporation will incur additional charges for Asbestos Liability and defense costs in excess of the amounts currently reserved, the Corporation believes that there is too much uncertainty to provide for reasonable estimation of the number of future claims, the nature of such claims and the cost to resolve them beyond 2020. Accordingly, no reserve has been recorded for any costs that may be incurred after 2020.

The Corporation's receivable at December 31, 2010 for insurance recoveries attributable to the claims for which the Corporation's Asbestos Liability reserve has been established, including the portion of incurred defense costs covered by the Coverage Arrangement, and the probable payments and reimbursements relating to the estimated indemnity and defense costs for pending and unasserted future Asbestos Liability claims, was \$141,839 (\$115,430 as of December 31, 2009). The insurance receivable recorded by the Corporation does not assume any recovery from insolvent carriers, and substantially all of the insurance recoveries deemed probable were from insurance companies rated A—(excellent) or better by A.M. Best Corporation. There can be no assurance, however, that there will not be further insolvencies among the relevant insurance carriers, or that the assumed percentage recoveries for certain carriers will prove correct. The \$76,464 million difference between insurance recoveries and projected costs at December 31, 2010 is not due to exhaustion of all insurance coverage for Asbestos Liability. The Corporation and the subsidiaries have substantial additional insurance coverage which the Corporation expects to be available for Asbestos Liability claims and defense costs the subsidiaries and it may incur after 2020. However, this insurance coverage also can be expected to have gaps creating significant shortfalls of insurance recoveries as against claims expense, which could be material in future years.

The amounts recorded by the Corporation for Asbestos Liabilities and insurance receivables rely on assumptions that are based on currently known facts and strategy. The Corporation's actual expenses or insurance recoveries could be significantly higher or lower than those recorded if assumptions used in the Corporation's or HR&A's calculations vary significantly from actual results. Key variables in these assumptions are identified above and include the number and type of new claims to be filed each year, the average cost of disposing of each such new claim, average annual defense costs, the resolution of coverage issues with insurance carriers, and the solvency risk with respect to the relevant insurance carriers. Other factors that may affect the Corporation's Asbestos Liability and ability to recover under its insurance policies include uncertainties surrounding the litigation process from jurisdiction to jurisdiction and from case to case, reforms that may be made by state and federal courts, and the passage of state or federal tort reform legislation.

The Corporation intends to evaluate its estimated Asbestos Liability and related insurance receivables as well as the underlying assumptions on a regular basis to determine whether any adjustments to the estimates are required. Due to the uncertainties surrounding asbestos litigation and insurance, these regular reviews may result in the Corporation incurring future charges; however, the Corporation is currently unable to estimate such future charges. Adjustments, if any, to the Corporation's estimate of its recorded Asbestos Liability and/or insurance receivables could be material to operating results for the periods in which the adjustments to the liability or receivable are recorded, and to the Corporation's liquidity and consolidated financial position.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 2. Summary of Significant Accounting Policies (in part)

###### Principles of Consolidation

The consolidated financial statements of the Company include the accounts of Viacom Inc., its subsidiaries and VIEs where the Company is considered the primary beneficiary, after elimination of intercompany accounts and transactions. Investments in business entities in which the Company lacks

control but does have the ability to exercise significant influence over operating and financial policies are accounted for using the equity method. The Company's proportionate share of net income or loss of the entity is recorded in *Equity in net losses of investee companies* in the Consolidated Statements of Earnings. Related party transactions between the Company and CBS Corporation ("CBS"), National Amusements Inc. ("NAI") and Midway Games, Inc. ("Midway"), which ceased to be a related party on November 28, 2008, have not been eliminated.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars and share amounts in millions, unless otherwise stated)

##### Note 1—Summary of Significant Accounting Policies (in part)

###### Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the reporting period. Estimates are revised as additional information becomes available. Estimates and assumptions are used for, but not limited to, asbestos-related liabilities and recoveries from insurers and other responsible parties, postretirement obligations and assets, revenue recognition, income tax contingency accruals and valuation allowances, goodwill impairment testing and contingent liabilities. Actual results could differ from these estimates.

##### Note 19—Commitments and Contingencies (in part)

###### 2010 Charge

In the third quarter of 2010, we conducted our annual detailed study with the assistance of outside consultants to

review and update the underlying assumptions used in our liability and asset estimates. During this study, the underlying assumptions were updated based on our actual experience since our last detailed review in the third quarter of 2009, a reassessment of the appropriate reference period of years of experience used in determining each assumption and our expectations regarding future conditions, including inflation. Based on the results of this study, we increased our estimated undiscounted asbestos liability, including legal fees, by \$691, reflecting costs that the Company is estimated to incur to resolve all pending claims, as well as unasserted claims estimated to be filed over the next 10 years. The increase in our estimated liability is a result of several developments, including higher settlement costs and significantly increased activity in several higher-cost jurisdictions, increasing the number of cases to be adjudicated and the expected legal costs.

Further, in the third quarter of 2010, the Company recorded a \$372 increase in its asbestos-related assets based on the results of this study. These assets comprise an insurance asset, as well as receivables from other responsible parties. See discontinued operations discussion below for further information about receivables from parties other than insurers.

For the full year 2010 and 2009, the net asbestos charge can be summarized as follows:

|                         | 2010    |           | 2009    |           |
|-------------------------|---------|-----------|---------|-----------|
|                         | Pre-Tax | After-Tax | Pre-Tax | After-Tax |
| Continuing operations   | \$385   | \$247     | \$238   | \$148     |
| Discontinued operations | (10)    | (6)       | 9       | 6         |
| Total                   | \$375   | \$241     | \$247   | \$154     |

### Environmental

In the ordinary course of business, we are subject to federal, state, local, and foreign environmental laws and regulations. We are responsible, or are alleged to be responsible, for ongoing environmental investigation and remediation of sites in various countries. These sites are in various stages of investigation and/or remediation and in many of these proceedings our liability is considered de minimis. We have received notification from the U.S. Environmental Protection Agency, and from similar state and foreign environmental agencies, that a number of sites formerly or currently owned and/or operated by ITT, and other properties or water supplies that may be or have been impacted from those operations, contain disposed or recycled materials or wastes and require environmental investigation and/or remediation. These sites include instances where we have been identified as a potentially responsible party under federal and state environmental laws and regulations.

Accruals for environmental matters are recorded on a site by site basis when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated, based on current law and existing technologies. Our accrued liabilities for these environmental matters represent the best estimates related to the investigation and remediation of environmental media such as water, soil, soil vapor, air and structures, as well as related legal fees. These estimates, and related accruals, are reviewed periodically and updated for progress of investigation and remediation efforts and changes in facts and legal circumstances. Liabilities for these environmental expenditures are recorded on an undiscounted basis.

It is difficult to estimate the final costs of investigation and remediation due to various factors, including incomplete information regarding particular sites and other potentially responsible parties, uncertainty regarding the extent of investigation or remediation and our share, if any, of liability for such conditions, the selection of alternative remedial approaches, and changes in environmental standards and regulatory requirements. In our opinion, the total amount accrued is appropriate based on existing facts and circumstances. We do not anticipate these liabilities will have a material adverse effect on our consolidated financial position, results of operations or cash flows.

The following table illustrates the activity related to our accrued liabilities for these environmental matters.

|                                               | 2010  | 2009  |
|-----------------------------------------------|-------|-------|
| Environmental liability—1/1                   | \$140 | \$135 |
| Accruals added during the period              | —     | 1     |
| Change in estimates for pre-existing accruals | 14    | 18    |
| Payments                                      | (15)  | (14)  |
| Environmental liability—12/31                 | \$139 | \$140 |

The following table illustrates the reasonably possible low- and high end range of estimated liability, and number of active sites for these environmental matters.

|                                                                    | 2010  | 2009  |
|--------------------------------------------------------------------|-------|-------|
| Low-end range                                                      | \$117 | \$113 |
| High end range                                                     | \$251 | \$249 |
| Number of active environmental investigation and remediation sites | 99    | 98    |

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In thousands)

#### Note A—Significant Accounting Policies (in part)

##### Other Income (Expense)

Other Income (Expense) consists primarily of gains on sales of property, plant and equipment and assets held for sale. This caption also includes expenses related to the Company's sale of receivables. See Note Q "Sale of Receivables" to the "Notes to Consolidated Financial Statements" for further information. In 2010, an estimate of a probable loss in connection with a Foreign Corrupt Practices Act ("FCPA") investigation has been recorded. See Note P "Contingencies and Other Information" to the "Notes to Consolidated Financial Statements" for further information. The following table summarizes the significant components of Other Income (Expense) (in thousands):

|                                         | Years Ending March 31 |         |           |
|-----------------------------------------|-----------------------|---------|-----------|

| Malawi factory and other property sales | \$ 1,677              | \$ —    | \$ 9,500  |
| Turkey storage and other property sales | 2,567                 | —       | —         |
| Greece factory and other property sales | 647                   | —       | 6,990     |
| Brazil factory and other property sales | 822                   | —       | 2,815     |
| Other sales of assets and expenses      | (573)                 | 3,762   | 4,182     |
| FCPA loss                               | (19,450)              | —       | —         |
| Losses on sale of receivables           | (2,950)               | (3,548) | (3,299)   |
|                                         | \$ (17,260)           | \$ 214  | \$ 20,188 |

### *Sale of Accounts Receivable*

The Company is engaged in a revolving trade accounts receivable securitization arrangement to sell receivables to a third party limited liability company. The Company records the transaction as a sale of receivables, removes such receivables from its financial statements and records a receivable for the retained interest in such receivables. The losses on the sale of receivables are recognized in Other Income (Expense). As of March 31, 2010 and 2009, respectively, accounts receivable sold and outstanding were \$105,579 and \$100,611. See Note Q "Sale of Receivables" and Note R "Fair Value Measurements" to the "Notes to Consolidated Financial Statements" for further information.

#### *Note Q—Sale of Receivables*

Alliance One International, A.G., a wholly owned subsidiary of the Company is engaged in a revolving trade accounts receivable securitization arrangement to sell receivables to a third party limited liability company ("LLC"). The agreement, which matures March 26, 2013, is funded through third-party loans to the LLC which is committed up to a maximum of \$100,000 in funding at any time. To the extent that the balance of the loan is less than \$100,000 the Company is subject to a 0.25% fee on the unused amount. The Company is currently

working on modifications to the agreements, including to add Alliance One International, Inc. as an additional seller.

Proceeds consist of 90% of the face value in cash, less contractual dilutions which limit the amount that may be outstanding from any one particular customer and insurance reserves that also have the effect of limiting the risk attributable to any one customer. Upon sale, the Company reduces the carrying value of the receivable sold and records the fair value of the retained interest in the receivable in accounts receivable. The fair value of the retained interest is calculated by applying the commercial paper rate and the servicing rate to the balance of the outstanding receivables in the facility. The Company receives a 0.5% per annum servicing fee on receivables sold and outstanding which is recorded as a reduction of selling, administrative and general expenses. This fee is compensatory and no servicing asset or liability has resulted from the sale. The receivables sold are non-interest bearing. This in conjunction with the short life of the receivables sold and outstanding causes the effects of any prepayments on the value of assets recorded to be inconsequential. Losses on sale of receivables are recorded as a component of other income (expense) in the statement of operations.

Receivables sold to the LLC are insured against loss. The Company provides no guarantee as to the value of the sold receivables and its retained interest in any receivable may also be recovered under the terms of the insurance.

The following table summarizes the Company's accounts receivable securitization information as of March 31 (*in thousands*):

|                                                                                | 2010       | 2009       |

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### Note 3—Restructuring, Impairment and Integration Charges

In 2010, we incurred merger and integration charges of \$799 million related to our acquisitions of PBG and PAS, as well as advisory fees in connection with our acquisition of WBD. \$467 million of these charges were recorded in the PAB segment, \$111 million recorded in the Europe segment, \$191 million recorded in corporate unallocated expenses and \$30 million recorded in interest expense. All of these charges, other than the interest expense portion, were recorded in selling, general and administrative expenses. The merger and integration charges related to our acquisitions of PBG and PAS are being incurred to help create a more fully integrated supply chain and go-to-market business model, to improve the effectiveness and efficiency of the distribution of our brands and to enhance our revenue growth. These charges also include closing costs, one-time financing costs and advisory fees related to our acquisitions of PBG and PAS. In addition, we recorded \$9 million of merger-related charges, representing our share of the respective merger costs of PBG and PAS,

in bottling equity income. Substantially all cash payments related to the above charges are expected to be paid by the end of 2011. In total, these charges had an after-tax impact of \$648 million or \$0.40 per share.

In 2009, we incurred \$50 million of charges related to the merger of PBG and PAS, of which substantially all was paid in 2009. In 2009, we also incurred charges of \$36 million (\$29 million after-tax or \$0.02 per share) in conjunction with our Productivity for Growth program that began in 2008. The program includes actions in all divisions of the business, including the closure of six plants that we believe will increase cost competitiveness across the supply chain, upgrade and streamline our product portfolio, and simplify the organization for more effective and timely decision-making. These charges were recorded in selling, general and administrative expenses. These initiatives were completed in the second quarter of 2009 and substantially all cash payments related to these charges were paid by the end of 2010.

In 2008, we incurred charges of \$543 million (\$408 million after-tax or \$0.25 per share) in conjunction with our Productivity for Growth program. Approximately \$455 million of the charge was recorded in selling, general and administrative expenses, with the remainder recorded in cost of sales.

A summary of our merger and integration activity in 2010 is as follows:

|                                     | Severance and<br>Other Employee<br>Costs <sup>(a)</sup> | Asset Impairment | Other Costs | Total  |

|           | \$212                                 | \$149             | \$182       | \$543 |

Severance and other employee costs primarily reflect termination costs for approximately 3,500 employees. Asset impairments relate to the closure of six plants and changes to our beverage product portfolio. Other costs include contract exit costs and third-party incremental costs associated with upgrading our product portfolio and our supply chain.

A summary of our Productivity for Growth program activity is as follows:

|                                           | Severance and<br>Other Employee<br>Costs | Asset Impairments | Other Costs | Total  |

The Company expects to reclassify into earnings during the next 12 months a net loss from Accumulated Other Comprehensive Loss of approximately \$10,171.

As disclosed in Note 9, in connection with the amendment and restatement of the 2006 Senior Secured Credit Facility

and repayment of the Second Lien Credit Facility in December 2009, all outstanding interest rate hedging instruments which were hedging these underlying debt instruments along with the interest rate hedge instrument related to the Floating Rate Senior Notes were settled for \$62,256, of which \$40,391

was paid in December 2009 and the remaining \$21,865 was included in the "Accounts Payable" line of the Consolidated Balance Sheet at January 2, 2010. The amounts deferred in Accumulated Other Comprehensive Loss associated with the 2006 Senior Secured Credit Facility and Second Lien Credit Facility were released to earnings as the underlying forecasted interest payments were no longer probable of occurring, which resulted in recognition of losses totaling \$26,029 that are included in the "Other Expense (Income)" line of the Consolidated Statement of Income. The amounts deferred in Accumulated Other Comprehensive Loss associated with the Floating Rate Senior Notes interest rate hedge were frozen at the termination date and will be amortized over the original remaining term of the interest rate hedge instrument. The unamortized balance in Accumulated Other Comprehensive Loss was \$17,043 as of January 1, 2011.

In the first quarter of 2010, the Company entered into two interest rate caps to hedge the risks associated with fluctuations in the 6-month LIBOR rate for the Floating Rate

Senior Notes. The terms of the interest rate caps include: a total notional amount of \$490,735, consisting of \$240,735 and \$250,000, respectively, an expiration date of December 2011, and a capped 6-month LIBOR interest rate of 4.26%.

The changes in fair value of derivatives excluded from the Company's effectiveness assessments and the ineffective portion of the changes in the fair value of derivatives used as cash flow hedges are reported in the "Selling, general and administrative expenses" line in the Consolidated Statements of Income. The Company recognized gains (losses) related to ineffectiveness of hedging relationships in 2010 of \$6 related to interest rate contracts. The Company recognized gains (losses) related to ineffectiveness of hedging relationships in 2009 of \$161, consisting of \$152 for interest rate contracts and \$9 for foreign exchange contracts. The Company recognized gains (losses) related to ineffectiveness of hedging relationships in 2008 of \$(323), consisting of \$(149) for interest rate contracts and \$(174) for foreign exchange contracts.

The effect of mark to market hedge derivative instruments on the Consolidated Statements of Income is as follows:

|                            | Location of Gain (Loss)<br>Recognized in Income<br>on Derivative | Amount of Gain (Loss) Recognized in Income<br>Year Ended |                 |                 |

*Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations (in part)*

*Equity in Net Loss of Investee*

During the time that we applied the equity method of accounting for our ownership interest in GF, our equity in net loss of investee primarily consisted of our proportionate share of GF's losses for the period based on our ownership percentage of GF's Class A Preferred Shares, our portion of the non-cash accretion on GF's Class B Preferred Shares, the elimination of intercompany profit, reflecting the mark-up on inventory that remained on our consolidated balance sheet at the end of the period, the amortization of basis differences identified from the purchase price allocation process, based on the fair value of GF upon deconsolidation and, to the extent applicable, the gain or loss on dilution of our ownership interest as a result of the capital infusion into GF by ATIC.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

*Note 3. Globalfoundries (in part)*

*Equity Method*

In applying the equity method of accounting for 2010, the equity in net loss of investee primarily consists of the Company's proportionate share of GF's losses for the period based on the Company's ownership percentage of GF's Class A Preferred Shares, the Company's portion of the non-cash accretion on GF's Class B Preferred Shares, the elimination of intercompany profit, reflecting the mark-up on inventory that remains

on the Company's consolidated balance sheet at the end of the period, the amortization of basis differences identified from the purchase price allocation process based on the fair value of GF upon deconsolidation, and, to the extent applicable, the gain or loss on dilution of the Company's ownership interest as a result of capital infusions into GF by ATIC.

GF consolidated Chartered in 2010 because it was deemed to be the primary beneficiary of Chartered (GLOBAL-FOUNDRIES Singapore Pte. Ltd. or GFS). For the purposes of the Company's application of the equity method of accounting, the Company recorded its share of the GF results excluding the results of Chartered because GF did not have an equity ownership interest in Chartered in 2010.

As of December 25, 2010, the Company's investment in GF is reflected as a liability in the consolidated balance sheet with a balance of \$7 million. This amount primarily reflects the accumulated loss that the Company has recognized in excess of the value of its investment in GF since the Company began accounting for GF under the equity method of accounting. Based on the current structure of the Company's Wafer Supply Agreement, its guarantee of certain GF indebtedness, its ownership interest in GF and governance relationship with GF, the Company concluded that it was required to continue to record its share of the equity loss in excess of the carrying amount of its investment balance throughout 2010.

| Ending balance                            | \$86,508                     | \$ 87,608                    |

Our trade names are tested for impairment annually, in the fourth fiscal quarter. Trade names, and long-lived assets, are also tested for impairment whenever events or changes in circumstances indicate that the asset may be impaired. Each quarter, we assess whether events or changes in circumstances indicate a potential impairment of these assets considering many factors, including significant changes in market capitalization, cash flow or projected cash flow, the condition of assets, and the manner in which assets are used.

Trade names are tested by comparing the carrying value and fair value of each trade name to determine the amount, if any, of impairment. The fair value of trade names is calculated using a "relief from royalty payments" methodology. This approach involves two steps: (i) estimating royalty rates for each trademark and (ii) applying these royalty rates to a net sales stream and discounting the resulting cash flows to determine fair value.

In the fourth quarter of 2010, we tested our trade names for impairment and recorded an impairment charge of \$1,100, resulting in the carrying value of one of our trade names being reduced, and thus equal, to the estimated fair value. The

decrease in the fair value of this trade name was primarily caused by a decrease in projected sales. In total, the fair value of our trade names exceed the carrying value by \$4,294 or 4.9% as of December 31, 2010. Any future decrease in the fair value of our trade names could result in a corresponding impairment charge. The estimated fair value of our trade names is highly contingent upon sales trends and assumptions including royalty rates, net sales streams, and a discount rate. Lower sales trends, decreases in projected net sales, decreases in royalty rates, or increases in the discount rate would cause additional impairment charges and a corresponding reduction in our earnings.

We determine royalty rates for each trademark considering contracted rates and industry benchmarks. Royalty rates generally are not volatile and do not fluctuate significantly with short term changes in economic conditions.

Weighted average net sales streams are calculated for each trademark based on a probability weighting assigned to each reasonably possible future net sales stream. The probability weightings are determined considering historical performance, management forecasts and other factors such as economic conditions and trends. Estimated net sales streams could fluctuate significantly based on changes in the economy, actual sales, or forecasted sales.

The discount rate is a calculated weighted average cost of capital determined by observing typical rates and proportions of interest-bearing debt, preferred equity, and common equity of publicly traded companies engaged in lines of business similar to our company. The discount rate could fluctuate significantly with changes in the risk profile of our industry or in the general economy.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In thousands, except per share data)

### Note 8—Notes Payable and Long-Term Debt (in part)

Notes payable is comprised of overdraft borrowings from a financial institution of \$39,728, and borrowings under various short-term unsecured credit facilities of \$344 as of July 31, 2010. The Company had available unsecured credit facilities which require no compensating balances, totaling approxi-

mately \$140,227. In addition to providing short-term liquidity and overdraft protection, these facilities also support various programs (such as guarantee, performance bond and warranty) mandated by customers. At July 31, 2010, borrowings under these facilities were included in notes payable and an additional \$46,702 was committed to various other programs. The weighted average interest rates on notes payable at the end of fiscal years 2010 and 2009 were 0.2% and 0.3%, respectively. The weighted average interest rates on the senior revolving credit facilities at the end of fiscal years 2010 and 2009 were 2.3% and 0.6%, respectively.

Long-term debt consists of:

|                                                                               | 2010      | 2009      |

| Long-term debt, net of current portion                                        | \$741,353 | \$577,666 |

<sup>(a)</sup> On July 13, 2010, the Company entered into a five-year \$500,000 unsecured senior revolving credit facility (the "New Facility") with a syndicate of banks, which expires on July 13, 2015. The Company terminated the existing \$500,000 senior revolving credit facility, which was due in fiscal year 2011 (the "Prior Facility"). Simultaneous with entry into the New Facility, the Company borrowed approximately \$295,000, principally to: (1) redeem all \$280,000 outstanding of the 6.00% Senior Notes due in fiscal year 2013 (the "Prior Notes") and, (2) pay a portion of the redemption premium on the Prior Notes of \$28,268 (other funds were used to pay the balance of approximately \$13,268). In connection with the New Facility, the Company incurred deferred financing costs of \$2,856, which will be amortized to interest expense over the term of the New Facility. In addition, the Company wrote-off approximately \$139 of unamortized deferred financing costs related to the Prior Facility, which has been reflected as a loss on the extinguishment of debt. Letters of credit outstanding against the New Facility as of July 31, 2010 were approximately \$12,606.

Borrowings under the new facility bear interest at either a variable rate based upon the London InterBank Offered Rate (U.S. dollar, British Pound, Euro, Swiss Franc and Japanese Yen borrowings) or the European Union Banking Federation Rate (Euro borrowings) or at the prime rate of the Facility Agent (U.S. dollar borrowing only). The New Facility contains customary affirmative and negative covenants, financial covenants, representations and warranties and events of defaults. The financial covenants are as follows:

- Minimum interest coverage ratio: The Ratio of Earnings Before Net Interest, Taxes, Depreciation, Amortization and the Non-Cash Portion of Non-Recurring Charges and Income ("EBITDA") to Net Interest Expense shall not be less than 3.50 to 1.00, computed on the basis of cumulative results for the most recently ended four consecutive quarters.
- Maximum funded debt ratio: The Ratio of Consolidated Funded Debt to EBITDA shall not exceed 3.50 to 1.00, EBITDA computed on the basis of cumulative results for the most recently ended four consecutive quarters.

In addition, the New Facility includes other covenants that under certain circumstances can restrict the Company's ability to incur additional indebtedness, make investments and other restricted payments, enter into sale and leaseback transactions, create liens and sell assets. As of July 31, 2010, the Company was in compliance with all related financial and other restrictive covenants, including limitations on indebtedness.

<sup>(b)</sup> On June 18, 2010, the Company issued \$375,000 of publicly traded notes with an aggregate principal amount of its 5.00% Senior Notes, due 2020 (the "New Notes"). After the closing of the New Notes, the Company received proceeds (net of the discount on the New Notes of \$2,006 and underwriting fees of \$2,438) of \$370,556. The Company used the net proceeds from this offering principally (1) to repay its then outstanding balance on the Prior Facility, and (2) for general corporate purposes. The Prior Notes, originally due August 1, 2012, were fully redeemed in July 2010 after the satisfaction of a 30-day notice period. In connection with this redemption, the Company recorded a loss on extinguishment of debt totaling \$31,374, primarily comprised of the aforementioned redemption premium and the recognition of previously deferred financing costs related to the Prior Notes. In connection with the New Notes, the Company incurred deferred financing costs of \$3,455, which will be amortized to interest expense over the term of the New Notes.

The notes are unsecured and unsubordinated obligations of the Company and rank pari passu to its other outstanding unsecured and unsubordinated indebtedness.

<sup>(c)</sup> On May 26, 2010, the Company refinanced its loan of JPY 9 billion (approximately \$104,166 as of July 31, 2010), which was due on June 20, 2010, to May 26, 2015. Under the new financing agreement, interest is fixed at a rate of 2.33%. Previously, the interest payments were at a variable rate based upon Yen LIBOR. The Company designated this borrowing as a non-derivative hedge of a portion of its net JPY investment in a Japanese subsidiary.

<sup>(d)</sup> Refer to Note 10, Financial Instruments and Risks & Uncertainties, for further discussion of the Company's derivative financial instruments and hedging activities.

The aggregate annual maturities of long-term debt during fiscal years 2011 through 2015 are approximately as follows:

|      |          |
|------|----------|
| 2011 | \$ 1,956 |
| 2012 | 1,568    |
| 2013 | 1,590    |
| 2014 | 1,639    |
| 2015 | 355,887  |

Adjustment or impairment of assets and obligations relates to impairment on assets that were acquired in business combinations, impairment of assets related to a transformation of our global information technology infrastructure or adjustments to certain liabilities of acquired companies due to changes in circumstances surrounding those liabilities subsequent to the related measurement period.

## PENSIONS AND OTHER POSTRETIREMENT BENEFITS

### RECOGNITION AND MEASUREMENT

**3.55** FASB ASC 715, *Compensation—Retirement Benefits*, requires that an entity recognize the overfunded or underfunded status of a single-employer defined benefit postretirement plan as an asset or a liability in its statement of financial position, recognize changes in that funded status in comprehensive income, and disclose in the notes to the financial statements additional information about net periodic benefit cost. FASB ASC 715 requires an entity to recognize as components of other comprehensive income the gains or losses and prior service costs or credits that arise during a period but are not recognized in the income statement as components of net periodic benefit cost of a period. Those amounts recognized in accumulated other comprehensive income are adjusted as they are subsequently recognized in the income statement as components of net periodic benefit cost. Additionally, FASB ASC 715 requires that an entity measure plan assets and benefit obligations as of the date of its fiscal year-end statement of financial position. An employer whose equity securities are publicly traded is required to initially recognize the funded status of a defined benefit postretirement plan.

## DISCLOSURE

**3.56** FASB ASC 715 states the disclosure requirements for pensions and other postretirement benefits, including disclosures about the assets, obligations, cash flows, investment strategy, and net periodic benefit cost of defined pension and postretirement plans. FASB ASC 715 also includes disclosures related to multiemployer plans. FASB ASC 715-20 calls for different disclosures about defined benefit plans for public and nonpublic entities.

**3.57** The disclosure requirements of FASB ASC 715 include, but are not limited to, the actuarial gains and losses, the assumed health care cost trend rate for other postretirement benefits, the allocation by major category of plan assets, the inputs and valuation techniques used to measure the fair value of plan assets, the effect of fair value measurements using significant unobservable inputs (level 3) on changes in plan assets for the period, and significant concentrations of risk within plan assets.

## PRESENTATION AND DISCLOSURE EXCERPTS

### Defined Benefit Plans

#### 3.58

#### INTERNATIONAL PAPER COMPANY (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 15. Retirement Plans

##### U.S. Defined Benefit Plans

International Paper sponsors and maintains the Retirement Plan of International Paper Company (the "Pension Plan"), a tax-qualified defined benefit pension plan that provides retirement benefits to substantially all U.S. salaried employees and hourly employees (receiving salaried benefits) hired prior to July 1, 2004, and substantially all other U.S. hourly and union employees who work at a participating business unit regardless of hire date. These employees generally are eligible to participate in the Pension Plan upon attaining 21 years of age and completing one year of eligibility service. U.S. salaried employees and hourly employees (receiving salaried benefits) hired after June 30, 2004, are not eligible to participate in the Pension Plan, but receive a company contribution to their individual savings plan accounts (see "Other U.S. Plans" on page 85). The Pension Plan provides defined pension benefits based on years of credited service and either final average earnings (salaried employees and hourly employees receiving salaried benefits), hourly job rates or specified benefit rates (hourly and union employees).

Former Weyerhaeuser Company salaried and hourly employees acquired by International Paper in the CBPR acquisition became participants in the Pension Plan if they were hired by Weyerhaeuser prior to July 1, 2004. Acquired salaried employees and hourly employees (receiving salaried benefits) hired by Weyerhaeuser after June 30, 2004 are not eligible to participate in the Pension Plan and instead receive a company contribution to their savings plan accounts.

In connection with the CBPR acquisition, International Paper assumed sponsorship in 2008 of the Western Kraft, Albany, Oregon, Hourly Employees' Retirement Plan, a defined benefit pension plan covering hourly employees at the Albany, Oregon mill. The assets and liabilities of that plan were merged into the Pension Plan as of December 31, 2009.

The Company's funding policy for the Pension Plan is to contribute amounts sufficient to meet legal funding requirements, plus any additional amounts that the Company may determine to be appropriate considering the funded status of the plans, tax deductibility, cash flow generated by the Company, and other factors. The Company continually reassesses the amount and timing of any discretionary contributions. Voluntary contributions totaling \$1.15 billion were made by the Company in 2010. No contributions were made in 2009 or 2008.

The Company also has two unfunded nonqualified defined benefit pension plans: a Pension Restoration Plan available to employees hired prior to July 1, 2004 that provides retirement benefits based on eligible compensation in excess of limits set by the Internal Revenue Service, and a supplemental retirement plan for senior managers (SERP), which is an alternative retirement plan for salaried employees who are senior vice presidents and above or who are designated by

the chief executive officer as participants. These nonqualified plans are only funded to the extent of benefits paid, which totaled \$37 million, \$35 million and \$24 million in 2010, 2009 and 2008, respectively, and which are expected to be \$36 million in 2011.

##### Net Periodic Pension Expense

Service cost is the actuarial present value of benefits attributed by the plans' benefit formula to services rendered by employees during the year. Interest cost represents the increase in the projected benefit obligation, which is a discounted amount, due to the passage of time. The expected return on plan assets reflects the computed amount of current-year earnings from the investment of plan assets using an estimated long-term rate of return.

Net periodic pension expense for qualified and nonqualified U.S. defined benefit plans comprised the following:

| (In millions)                               | 2010   | 2009   | 2008   |
|---------------------------------------------|--------|--------|--------|
| Service cost                                | \$ 116 | \$ 120 | \$ 105 |
| Interest cost                               | 541    | 537    | 540    |
| Expected return on plan assets              | (631)  | (634)  | (672)  |
| Actuarial loss                              | 174    | 160    | 121    |
| Amortization of prior service cost          | 31     | 30     | 29     |
| Net periodic pension expense <sup>(a)</sup> | \$ 231 | \$ 213 | \$ 123 |

<sup>(a)</sup> Excludes \$1.1 million in 2008 in curtailment losses, and \$83.2 million and \$13.9 million in 2009 and 2008, respectively, of termination benefits, in connection with cost reduction programs and facility rationalizations that were recorded in Restructuring and other charges in the consolidated statement of operations.

The increase in 2010 pension expense reflects a decrease in the assumed discount rate to 5.80% in 2010 from 6.00% in 2009 and higher amortization of unrecognized actuarial losses. International Paper evaluates its actuarial assumptions annually as of December 31 (the measurement date) and considers changes in these long-term factors based upon market conditions and the requirements for employers' accounting for pensions. These assumptions are used to calculate benefit obligations as of December 31 of the current year and pension expense to be recorded in the following year (i.e., the discount rate used to determine the benefit obligation as of December 31, 2010 was also the discount rate used to determine net pension expense for the 2011 year).

Weighted average assumptions used to determine net pension expense for 2010, 2009 and 2008 were as follows:

|                                                  | 2010  | 2009  | 2008  |
|--------------------------------------------------|-------|-------|-------|
| Discount rate                                    | 5.80% | 6.00% | 6.20% |
| Expected long-term rate of return on plan assets | 8.25% | 8.25% | 8.50% |
| Rate of compensation increase                    | 3.75% | 3.75% | 3.75% |

Weighted average assumptions used to determine benefit obligations as of December 31, 2010 and 2009, were as follows:

|                               | 2010  | 2009  |
|-------------------------------|-------|-------|
| Discount rate                 | 5.60% | 5.80% |
| Rate of compensation increase | 3.75% | 3.75% |

The expected long-term rate of return on plan assets is based on projected rates of return for current and planned asset classes in the plan's investment portfolio. Projected rates of return are developed through an asset/liability study in which projected returns for each of the plan's asset classes are determined after analyzing historical experience and future expectations of returns and volatility of the various asset classes. Based on the target asset allocation for each asset class, the overall expected rate of return for the portfolio is developed considering the effects of active portfolio management and expenses paid from plan assets. The discount rate assumption was determined based on a yield curve that incorporates approximately 500 Aa-graded bonds. The plan's projected cash flows were then matched to the yield curve to develop the discount rate. To calculate pension expense for 2011, the Company will use an expected long-term rate of return on plan assets of 8.25%, a discount rate of 5.60% and an assumed rate of compensation increase of 3.75%. The Company estimates that it will record net pension expense of approximately \$179 million for its U.S. defined benefit plans in 2011, with the decrease from expense of \$231 million in 2010 reflecting increased plan assets and higher than expected asset returns in 2010, partially offset by a decrease in the discount rate.

The following illustrates the effect on pension expense for 2011 of a 25 basis point decrease in the above assumptions:

| (In millions)                                    | 2011  |
|--------------------------------------------------|-------|
| Expense/(income):                                |       |
| Discount rate                                    | \$29  |
| Expected long-term rate of return on plan assets | 22    |
| Rate of compensation increase                    | \$(4) |

### Investment Policy/Strategy

International Paper's Board of Directors has appointed a Fiduciary Review Committee that is responsible for fiduciary oversight of the Pension Plan, approving investment policy and reviewing the management and control of plan assets. Pension Plan assets are invested to maximize returns within prudent levels of risk. The Pension Plan maintains a strategic asset allocation policy that designates target allocations by asset class. Investments are diversified across classes and within each class to minimize the risk of large losses. Derivatives, including swaps, forward and futures contracts, may be used as asset class substitutes or for hedging or other risk management purposes. Periodic reviews are made of investment policy objectives and investment manager performance.

International Paper's pension allocations by type of fund at December 31, and target allocations were as follows:

| Asset Class           | 2010 | 2009 | Target Allocations |
|-----------------------|------|------|--------------------|
| Equity accounts       | 49%  | 49%  | 40%–51%            |
| Fixed income accounts | 31%  | 32%  | 30%–40%            |
| Real estate accounts  | 8%   | 7%   | 7%–13%             |
| Other                 | 12%  | 12%  | 9%–18%             |
| Total                 | 100% | 100% |                    |

The fair values of International Paper's pension plan assets at December 31, 2010 by asset class are shown below. Plan assets included an immaterial amount of International Paper common stock at December 31, 2010. No International Paper shares were included in plan assets in 2009. Hedge funds disclosed in the following table are allocated equally between equity and fixed income accounts for target allocation purposes. Cash and cash equivalent portfolios are allocated to the types of account from which they originated. Mortgage backed securities were transferred from significant unobservable inputs (Level 3) in 2009 to significant observable inputs (Level 2) in 2010 as a result of identifying observable market data for the securities.

| Cash and cash equivalents            | 465     | 5                                                                       | 460                                              | 0                                               |
| Total investments                    | \$8,344 | \$1,880                                                                 | \$4,142                                          | \$2,322                                         |

Equity securities consist primarily of publicly traded U.S. companies and international companies and common collective funds. Publicly traded equities are valued at the closing prices reported in the active market in which the individual securities are traded. Common collective funds are valued at the net asset value per share multiplied by the number of shares held as of the measurement date.

Fixed income consists of corporate bonds, government securities, and common collective funds. Government securities are valued by third-party pricing sources. Corporate bonds are valued using either the yields currently available on comparable securities of issuers with similar credit ratings or using a discounted cash flows approach that utilizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks. Common collective funds are valued at the net asset value per share multiplied by the number of shares held as of the measurement date.

Commodities consist of commodity-linked notes and commodity-linked derivatives. Commodities are valued at closing prices determined by calculation agents for outstanding transactions.

Hedge funds are investment structures that pursue a diverse array of investment strategies with a wide range of different securities and derivative instruments. These investments are made through funds-of-funds (commingled, multi-manager fund structures) and through direct investments in

individual hedge funds. Hedge funds are primarily valued by each fund's third party administrator based upon the valuation of the underlying securities and instruments and primarily by applying a market or income valuation methodology as appropriate depending on the specific type of security or instrument held. Funds-of-funds are valued based upon the net asset values of the underlying investments in hedge funds.

Private equity consists of interests in partnerships that invest in U.S. and non-U.S. debt and equity securities. Partnership interests are valued using the most recent general partner statement of fair value, updated for any subsequent partnership interest cash flows.

Real estate includes commercial properties, land and timberland, and generally includes, but is not limited to, retail, office, industrial, multifamily and hotel properties. Real estate holdings, taken together, are intended to have characteristics similar to, but not necessarily equal to, the National Council of Real Estate Investment Fiduciaries (NCREIF) Property Index. Real estate fund values are primarily reported by the fund manager and are based on valuation of the underlying investments which include inputs such as cost, discounted cash flows, independent appraisals and market based comparable data.

Derivative investments such as futures, forward contracts, options, and swaps are used to help manage risks. Derivatives are generally employed as asset class substitutes (such as when employed within a portable alpha strategy), for managing asset/liability mismatches, or bona fide hedging or other appropriate risk management purposes. Derivative instruments are generally valued by the investment managers or in certain instances by third party pricing sources.

The fair value measurements using significant unobservable inputs (Level 3) at December 31, 2010 were as follows:

*Fair Value Measurements Using Significant Unobservable Inputs (Level 3)*

| (In millions)                                       | Equities-Domestic | Equities-International | Fixed Income Common Collective Funds | Corporate Bonds | Government Securities | Mortgage Backed Securities | Other Fixed Income | Commodities | Hedge Funds | Private Equity | Real Estate | Derivatives | Total   |

<sup>(a)</sup> Transferred out of Level 3 to Level 2 because market data for these securities was observable.

At December 31, 2010, projected future pension benefit payments, excluding any termination benefits, were as follows:

| (In millions) |        |
|---------------|--------|
| 2011          | \$ 628 |
| 2012          | 622    |
| 2013          | 624    |
| 2014          | 630    |
| 2015          | 639    |
| 2016–2020     | 3,348  |

#### *Pension Plan Asset/Liability*

As required by ASC 715, “Compensation—Retirement Benefits,” the pension plan funded status must be recorded on the consolidated balance sheet. Therefore, pension plan gains or losses and prior service costs not yet recognized in net periodic cost are recognized on a net-of-tax basis in OCI. These amounts will be subject to amortization in the future.

At December 31, 2010, the fair value of plan assets for the Pension Plan was less than the projected benefit obligation (PBO). However, the deficit was lower than at December 31, 2009, resulting in a decrease in the recorded minimum pension obligation of \$1.3 billion and an after-tax credit to OCI of \$92 million. An after-tax credit to OCI of \$318 million and an after-tax charge to OCI of \$1.8 billion had been recorded for 2009 and 2008, respectively. For the unfunded nonqualified plans, changes in the liabilities resulted in after-tax charges to OCI of \$19 million, \$9 million and \$5 million in 2010, 2009 and 2008, respectively. In 2008, in conjunction with the CBPR business acquisition, the Company acquired a small overfunded pension plan covering hourly employees at the Albany, Oregon mill. For this plan, the Company recorded an after-tax charge to OCI of \$13 million at December 31, 2008.

The accumulated benefit obligation for all defined benefit plans was \$9.6 billion and \$9.3 billion at December 31, 2010 and 2009, respectively.

The following table summarizes information for pension plans with an accumulated benefit obligation in excess of plan assets at December 31, 2010 and 2009.

| (In millions)                  | 2010    | 2009    |
|--------------------------------|---------|---------|
| Projected benefit obligation   | \$9,824 | \$9,544 |
| Accumulated benefit obligation | 9,594   | 9,312   |
| Fair value of plan assets      | 8,344   | 6,784   |

#### *Unrecognized Actuarial Losses*

ASC 715, “Compensation—Retirement Benefits” provides for delayed recognition of actuarial gains and losses, including amounts arising from changes in the estimated projected plan benefit obligation due to changes in the assumed discount rate, differences between the actual and expected return on plan assets and other assumption changes. These net gains and losses are recognized prospectively over a period that approximates the average remaining service period of active employees expected to receive benefits under the plans (approximately 9 years as of December 31, 2010) to the extent that they are not offset by gains in subsequent years. The estimated net loss and prior service cost that will be amortized from AOCI into net periodic pension cost dur-

ing the next fiscal year are expected to be \$204 million and \$31 million, respectively.

The following table shows the changes in the benefit obligation and plan assets for 2010 and 2009, and the plans’ funded status. The benefit obligation as of December 31, 2010 increased by \$281 million, principally as a result of a decrease in the discount rate assumption used in computing the estimated benefit obligation. Plan assets increased by \$1.6 billion, reflecting favorable investment results and the \$1.15 billion voluntary contribution.

| (In millions)                                  | 2010      | 2009      |

| Non-current liability                                        | (1,444)   | (2,719)   |
|                                                              | \$(1,480) | \$(2,760) |

|                                                                                              |          |          |
|----------------------------------------------------------------------------------------------|----------|----------|
| <b>Amounts Recognized in Accumulated Other Comprehensive Income Under ASC 715 (Pre-Tax):</b> |          |          |
| Net actuarial loss                                                                           | \$ 3,412 | \$ 3,712 |
| Prior service cost                                                                           | 183      | 206      |
|                                                                                              | \$ 3,595 | \$ 3,918 |

The components of the \$323 million decrease in the amounts recognized in OCI during 2010 consisted of:

| (In millions)                      |         |
|------------------------------------|---------|
| Curtailment effects                | \$ (2)  |
| Current year actuarial gain        | (123)   |
| Amortization of actuarial loss     | (174)   |
| Current year prior service cost    | 7       |
| Amortization of prior service cost | (31)    |
|                                    | \$(323) |

The portion of the change in the funded status that was recognized either in net periodic benefit costs or OCI was \$(92) million, \$(483) million and \$3 billion for 2010, 2009 and 2008, respectively.

### Non-U.S. Defined Benefit Plans

Generally, International Paper's non-U.S. pension plans are funded using the projected benefit as a target, except in certain countries where funding of benefit plans is not required. Net periodic pension expense for non-U.S. plans was as follows:

| (In millions)                  | 2010 | 2009 | 2008 |
|--------------------------------|------|------|------|
| Service cost                   | \$ 3 | \$ 4 | \$ 7 |
| Interest cost                  | 12   | 12   | 11   |
| Expected return on plan assets | (11) | (10) | (13) |
| Actuarial gain                 | 0    | (2)  | (1)  |
| Curtailment gain               | (2)  | (1)  | 0    |
| Settlement gain                | (2)  | 0    | 0    |
| Net periodic pension expense   | \$ 0 | \$ 3 | \$ 4 |

Weighted average assumptions used to determine net pension expense for 2010, 2009 and 2008 were as follows:

|                                                  | 2010  | 2009  | 2008  |
|--------------------------------------------------|-------|-------|-------|
| Discount rate                                    | 6.45% | 6.37% | 6.40% |
| Expected long-term rate of return on plan assets | 8.20% | 8.88% | 8.87% |
| Rate of compensation increase                    | 4.06% | 3.81% | 3.55% |

Weighted average assumptions used to determine benefit obligations as of December 31, 2010 and 2009, were as follows:

|                               | 2010  | 2009  |
|-------------------------------|-------|-------|
| Discount rate                 | 6.01% | 6.45% |
| Rate of compensation increase | 3.07% | 4.06% |

The following table shows the changes in the benefit obligation and plan assets for 2010 and 2009, and the plans' funded status as of December 31, 2010 and 2009.

| (In millions)                                                                  | 2010    | 2009    |
|--------------------------------------------------------------------------------|---------|---------|
| <b>Change in Projected Benefit Obligation:</b>                                 |         |         |
| Benefit obligation, January 1                                                  | \$186   | \$168   |
| Service cost                                                                   | 3       | 4       |
| Interest cost                                                                  | 12      | 12      |
| Curtailments                                                                   | (3)     | (5)     |
| Settlements                                                                    | (14)    | 0       |
| Actuarial loss                                                                 | 11      | 0       |
| Benefits paid                                                                  | (7)     | (12)    |

|                                                                                | \$ 1    | \$ (1)  |

The components of the \$2 million increase in the amounts recognized in OCI during 2010 consisted of:

| (In millions)               |      |
|-----------------------------|------|
| Current year actuarial loss | \$ 1 |
| Curtailment effects         | (1)  |
| Settlements                 | 2    |
|                             | \$ 2 |

The portion of the change in the funded status that was recognized in either net periodic benefit cost or OCI was \$1 million, \$(11) million and \$40 million for 2010, 2009 and 2008, respectively. For non-U.S. plans with accumulated benefit obligations in excess of plan assets, the projected benefit obligations, accumulated benefit obligations and fair values of plan assets totaled \$42 million, \$34 million and \$2 million, respectively, at December 31, 2010. Plan assets consist principally of common stock and fixed income securities.

#### DEAN FOODS COMPANY (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 14. Employee Retirement and Profit Sharing Plans (in part)

We sponsor various defined benefit and defined contribution retirement plans, including various employee savings and profit sharing plans, and contribute to various multi-employer pension plans on behalf of our employees. Substantially all full-time union and non-union employees who have completed one or more years of service and have met other requirements pursuant to the plans are eligible to participate in one or more of these plans. On July 2, 2009, we acquired Alpro, including its defined benefit pension plans. During 2010, 2009 and 2008, our retirement and profit sharing plan expenses were as follows:

| (In thousands)                                 | Year Ended December 31 |          |          |
|------------------------------------------------|------------------------|----------|----------|
|                                                | 2010                   | 2009     | 2008     |
| Defined benefit plans                          | \$12,975               | \$21,053 | \$ 4,398 |
| Defined contribution plans                     | 27,182                 | 28,300   | 23,331   |
| Multi-employer pension and certain union plans | 28,768                 | 29,604   | 28,295   |
| Total                                          | \$68,925               | \$78,957 | \$56,024 |

**Defined Benefit Plans**—The benefits under our defined benefit plans are based on years of service and employee compensation. Our funding policy is to contribute annually the minimum amount required under ERISA regulations plus additional amounts as we deem appropriate.

Included in accumulated other comprehensive income at December 31, 2010 and 2009 are the following amounts that have not yet been recognized in net periodic pension cost: unrecognized transition obligation of \$225,000 (\$138,000 net of tax) and \$337,000 (\$206,000 net of tax), unrecognized prior service costs of \$5.6 million (\$3.5 million net of tax) and \$7.1 million (\$4.4 million net of tax) and unrecognized actuarial losses of \$124.1 million (\$76.0 million net of tax) and \$120.4 million (\$73.7 million net of tax). The transition obligation, prior service costs, and actuarial losses included in accumulated other comprehensive income and expected to be recognized in net periodic pension cost during the year

ended December 31, 2011 are \$112,000 (\$69,000 net of tax), \$763,000 (\$467,000 net of tax), and \$9.0 million (\$5.5 million net of tax), respectively.

The reconciliation of the beginning and ending balances of the projected benefit obligation and the fair value of plans assets for the years ended December 31, 2010 and 2009 and the funded status of the plans at December 31, 2010 and 2009 is as follows:

| (In thousands)                                 | December 31 |             |
|------------------------------------------------|-------------|-------------|
|                                                | 2010        | 2009        |
| <b>Change in Benefit Obligation:</b>           |             |             |

| Plan settlements                               | (2,914)     | (1,769)     |
| Acquisition                                    | —           | 4,496       |
| Exchange rate changes                          | (394)       | (139)       |
| Fair value of plan assets at end of year       | 231,822     | 223,369     |
| Funded status at end of year                   | \$ (75,709) | \$ (71,200) |

The underfunded status of the plans of \$75.7 million at December 31, 2010 is recognized in our Consolidated Balance Sheet and includes \$845,000 classified as a current accrued pension liability. We do not expect any plan assets to be returned to us during the year ended December 31, 2011. We expect to contribute approximately \$12.1 million to the pension plans in 2011.

A summary of our key actuarial assumptions used to determine benefit obligations as of December 31, 2010 and 2009 follows:

|                                               | December 31 |       |
|-----------------------------------------------|-------------|-------|
|                                               | 2010        | 2009  |
| Weighted average discount rate <sup>(1)</sup> | 5.28%       | 6.00% |
| Rate of compensation increase <sup>(1)</sup>  | 4.00%       | 4.00% |

<sup>(1)</sup> Assumptions in this table represent the assumptions utilized for our domestic pension plans as they represented more than 90% of our total benefit obligation as of December 31, 2010 and 2009.

A summary of our key actuarial assumptions used to determine net periodic benefit cost for 2010, 2009 and 2008 follows:

|                                               | Year Ended December 31 |       |       |
|-----------------------------------------------|------------------------|-------|-------|
|                                               | 2010                   | 2009  | 2008  |
| Weighted average discount rate <sup>(1)</sup> | 6.00%                  | 6.32% | 6.40% |
| Expected return on plan assets <sup>(1)</sup> | 7.70%                  | 7.70% | 8.00% |
| Rate of compensation increase <sup>(1)</sup>  | 4.00%                  | 4.00% | 4.00% |

<sup>(1)</sup> Assumptions in this table represent the assumptions utilized for our domestic pension plans as they represented more than 90% of our total net periodic benefit cost during the years ended December 31, 2010, 2009 and 2008.

| (In thousands)                           | Year Ended December 31 |           |          |
|------------------------------------------|------------------------|-----------|----------|
|                                          | 2010                   | 2009      | 2008     |
| Components of net periodic benefit cost: |                        |           |          |
| Service cost                             | \$ 3,699               | \$ 3,147  | \$ 2,727 |
| Interest cost                            | 16,941                 | 16,947    | 16,160   |
| Expected return on plan assets           | (16,584)               | (14,017)  | (19,185) |
| Amortizations:                           |                        |           |          |
| Unrecognized transition obligation       | 112                    | 112       | 112      |
| Prior service cost                       | 716                    | 921       | 890      |
| Unrecognized net loss                    | 5,594                  | 12,093    | 2,038    |
| Effect of curtailment                    | 790                    | 945       | —        |
| Effect of settlement                     | 1,707                  | 905       | 1,656    |
| Net periodic benefit cost                | \$ 12,975              | \$ 21,053 | \$ 4,398 |

The overall expected long-term rate of return on plan assets is a weighted-average expectation based on the targeted and expected portfolio composition. We consider historical performance and current benchmarks to arrive at expected long-term rates of return in each asset category.

The amortization of unrecognized net loss represents the amortization of investment losses incurred. In 2010, we closed a plant in South Carolina and also carried out a broad-based workforce reduction plan within our Fresh Dairy Direct-Morningstar segment. The effect of curtailment cost in 2010 represents the recognition of net periodic pension service costs associated with these activities. In 2009, we closed a plant in Michigan. The effect of curtailment cost in 2009 represents the recognition of net periodic pension service costs associated with the closure of that plant. The effect of settlement costs in 2010, 2009 and 2008 represents the recognition of net periodic benefit cost related to pension settlements reached as a result of plant closures.

Pension plans with an accumulated benefit obligation in excess of plan assets follows:

| (In millions)                  | December 31 |         |
|--------------------------------|-------------|---------|
|                                | 2010        | 2009    |
| Projected benefit obligation   | \$299.6     | \$286.0 |
| Accumulated benefit obligation | 290.2       | 283.2   |
| Fair value of plan assets      | 226.3       | 217.0   |

The accumulated benefit obligation for all defined benefit plans was \$295.0 million and \$289.0 million at December 31, 2010 and 2009, respectively.

Almost 90% of our defined benefit plan obligations are frozen as to future participants or increases in accumulated benefits. Many of these obligations were acquired in prior strategic transactions. As an alternative to defined benefit plans, we offer defined contribution plans for eligible employees.

The weighted average discount rate reflects the rate at which our defined benefit plan obligations could be effectively settled. The rate, which is updated annually with the assistance of an independent actuary, uses a model that reflects rates of a hypothetical portfolio of zero-coupon, high quality corporate bonds that mirror our forecasted benefit plan payments in the future. The weighted average discount rate was decreased from 6.00% at December 31, 2009 to 5.28% at December 31, 2010, which will increase the net periodic benefit cost in 2011.

Substantially all of our qualified pension plans are consolidated into one master trust. The investments held in the master trust are managed by an established Investment Committee with assistance from independent investment advisors. On July 1, 2009, the Investment Committee adopted a new long-term investment policy for the master trust that decreases the expected relative holdings of equity securities that targets investments in equity securities at 59% of the portfolio, fixed income at 37%, cash equivalents at 3% and other investments of 1%. Policy objectives include maximizing long-term return at acceptable risk levels, diversifying among asset classes, if appropriate, and among investment managers, as well as establishing relevant risk parameters within each asset class. The investment policies permit variances from the targets within certain parameters. The investment policy prohibits investments in non-marketable or exotic securities, such as short-sale contracts; letter stock; commodities and private placements, without the Investment Committee's prior approval. At December 31, 2010, our master trust was invested as follows: investments in equity securities were at 62%; investments in fixed income were at 34%; cash equivalents were less than 1% and other investments were at 4%. Given meaningful equity returns in the fourth quarter of 2010, these investment percentages were slightly different from the Investment Committee targets noted above, and our master trust investments were rebalanced accordingly during the first quarter of 2011 in order to be consistent with those targets. Equity securities of the plan did not include any investment in our common stock at December 31, 2010 or 2009.

Estimated pension plan benefit payments to participants for the next ten years are as follows:

|                 |                 |
|-----------------|-----------------|
| 2011            | \$ 19.8 million |
| 2012            | 19.2 million    |
| 2013            | 19.7 million    |
| 2014            | 20.4 million    |
| 2015            | 19.8 million    |
| Next five years | 106.0 million   |

Fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability. As a basis for considering assumptions, we follow a three-tier fair value hierarchy,

which prioritizes the inputs used in measuring fair value of our defined benefit plans' consolidated assets as follows:

- Level 1—Quoted prices for identical instruments in active markets.
- Level 2—Quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-derived valuations, in which all significant inputs are observable in active market.
- Level 3—Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

The fair values by category of inputs as of December 31, 2010 were as follows (in thousands):

|                                            | Fair Value as of<br>December 31, 2010 | Level 1     | Level 2          | Level 3         |
|--------------------------------------------|---------------------------------------|-------------|------------------|-----------------|
| <b>Equity Securities:</b>                  |                                       |             |                  |                 |
| Common Stock                               | \$ 17                                 | \$17        | \$ —             | \$ —            |

(a) Represents a pooled/separate account that tracks the Dow Jones U.S. Total Stock Market Index.

(b) Represents a pooled/separate account that tracks the MSCI EAFE Index.

(c) Represents a pooled/separate account comprised of approximately 90% U.S. large-cap stocks and 10% in international stocks.

(d) Represents a pooled/separate account which tracks the overall performance of the Barclays Capital Long Term Government/Credit Index.

(e) Represents a pooled/separate account investment in the General Investment Accounts of two investment managers. The accounts primarily invest in fixed income debt securities, such as high grade corporate bonds, government bonds and asset-backed securities.

(f) Investment is comprised of high grade money market instruments with short-term maturities and high liquidity.

(g) Approximately 90% of the insurance contracts are financed by employer premiums with the insurer managing the reserves as calculated using an actuarial model. The remaining 10% of the insurance contracts are financed by employer and employee contributions with the insurer managing the reserves collectively with other pension plans.

(h) The majority of the total partnership balance is a partnership comprised of a portfolio of two limited partnership funds that invest in public and private equity.

The fair values by category of inputs as of December 31, 2009 were as follows (in thousands):

|                                            | Fair Value as of<br>December 31, 2009 | Level 1        | Level 2          | Level 3         |

<sup>(1)</sup> Represents the plan assets transferred in as part of the Alpro acquisition on July 2, 2009.

## Defined Contribution Plans

### 3.60

#### VULCAN MATERIALS COMPANY (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### Note 10. Benefit Plans (in part)

###### Pension Plans (in part)

We sponsor three funded, noncontributory defined benefit pension plans. These plans cover substantially all employees hired prior to July 15, 2007, other than those covered by union-administered plans. Normal retirement age is 65, but the plans contain provisions for earlier retirement. Benefits for the Salaried Plan and a plan we assumed from Florida Rock are generally based on salaries or wages and years of service; the Construction Materials Hourly Plan and the Chemicals Hourly Plan provide benefits equal to a flat dollar amount for each year of service. Effective July 15, 2007, we amended our defined benefit pension plans and our then existing defined contribution 401(k) plans to no longer accept new participants. Existing participants continue to accrue benefits under these plans. Salaried and non-union hourly employees hired on or after July 15, 2007 are eligible for a new single defined contribution 401(k)/Profit-Sharing plan established on that date.

###### Defined Contribution Plans

We sponsor three defined contribution plans. Substantially all salaried and nonunion hourly employees are eligible to be covered by one of these plans. As stated above, effective July 15, 2007, we amended our defined benefit pension plans and our defined contribution 401(k) plans to no longer accept new participants. Existing participants continue to accrue benefits under these plans. Salaried and nonunion hourly employees

hired on or after July 15, 2007 are eligible for a single defined contribution 401(k)/Profit-Sharing plan. Expense recognized in connection with these plans totaled \$15,273,000 in 2010, \$13,361,000 in 2009 and \$16,930,000 in 2008.

###### Note 13. Shareholders' Equity (in part)

We periodically issue shares of common stock to the trustee of our 401(k) savings and retirement plan to satisfy the plan participants' elections to invest in our common stock. The resulting cash proceeds provide a means of improving cash flow, increasing shareholders' equity and reducing leverage. Under this arrangement, the stock issuances and resulting cash proceeds for the years ended December 31 were as follows: 2010—issued 882,131 shares for cash proceeds of \$41,734,000; and 2009—issued 1,135,510 shares for cash proceeds of \$52,691,000.

## Supplemental Retirement Plans (SERP)

### 3.61

#### ARROW ELECTRONICS, INC. (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands except per share data)

###### 13. Employee Benefit Plans (in part)

###### Supplemental Executive Retirement Plans ("SERP")

The company maintains an unfunded Arrow SERP under which the company will pay supplemental pension benefits to certain employees upon retirement. There are 11 current and 14 former corporate officers participating in this plan.

The Board determines those employees who are eligible to participate in the Arrow SERP.

The Arrow SERP, as amended, provides for the pension benefits to be based on a percentage of average final compensation, based on years of participation in the Arrow SERP. The Arrow SERP permits early retirement, with payments at a reduced rate, based on age and years of service subject to a minimum retirement age of 55. Participants whose accrued rights under the Arrow SERP, prior to the 2002 amendment, which were adversely affected by the amendment, will continue to be entitled to such greater rights.

The company acquired Wyle Electronics ("Wyle") in 2000. Wyle also sponsored an unfunded SERP for certain of its executives. Benefit accruals for the Wyle SERP were frozen as of December 31, 2000. There are 19 participants in this plan.

The company uses a December 31 measurement date for the Arrow SERP and the Wyle SERP. Pension information for the years ended December 31 is as follows:

|                                                                                  | 2010       | 2009       |

| Rate of compensation increase (Arrow SERP)                                       | 5.00%      | 5.00%      |
| <b>Weighted Average Assumptions Used to Determine Net Periodic Pension Cost:</b> |            |            |
| Discount rate                                                                    | 5.50%      | 6.00%      |
| Rate of compensation increase (Arrow SERP)                                       | 5.00%      | 5.00%      |

The amounts reported for net periodic pension cost and the respective benefit obligation amounts are dependent upon the actuarial assumptions used. The company reviews historical trends, future expectations, current market conditions, and external data to determine the assumptions. The discount rate represents the market rate for a high-quality corporate bond. The rate of compensation increase is determined by the company, based upon its long-term plans for such increases. The actuarial assumptions used to determine the net periodic pension cost are based upon the prior year's assumptions used to determine the benefit obligation.

Benefit payments are expected to be paid as follows:

|           |          |
|-----------|----------|
| 2011      | \$ 3,638 |
| 2012      | 3,767    |
| 2013      | 3,798    |
| 2014      | 3,758    |
| 2015      | 3,712    |
| 2016-2020 | 23,761   |

## Multi-Employer Plans

### 3.62

#### SYSCO CORPORATION (JUN)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 12. Employee Benefit Plans (in part)

Sysco has defined benefit and defined contribution retirement plans for its employees. Also, the company contributes to various multi-employer plans under collective bargaining agreements and provides certain health care benefits to eligible retirees and their dependents.

Sysco maintains a qualified pension plan (Retirement Plan) that pays benefits to employees at retirement, using formulas based on a participant's years of service and compensation.

The company's defined contribution 401(k) plan provides that under certain circumstances the company may make matching contributions of up to 50% of the first 6% of a participant's compensation. Sysco's expense related to this plan was \$22.8 million in fiscal 2010, \$30.2 million in fiscal 2009, and \$36.2 million in fiscal 2008.

Sysco's contributions to multi-employer pension plans, which include payments for voluntary withdrawals, were \$51.5 million, \$48.0 million, and \$36.9 million in fiscal 2010, 2009 and 2008, respectively. Payments for voluntary withdrawals included in contributions were approximately \$17.4 million and \$15.0 million in fiscal 2010 and fiscal 2009, respectively. See further discussion of Sysco's participation in multi-employer pension plans in Note 18, "Commitments and Contingencies."

In addition to receiving benefits upon retirement under the company's Retirement Plan, participants in the Management Incentive Plan (see "Management Incentive Compensation" in Note 15, "Share-Based Compensation") will receive benefits under a Supplemental Executive Retirement Plan (SERP). This plan is a nonqualified, unfunded supplementary retirement plan.

##### Funded Status (in part)

The funded status of Sysco's company-sponsored defined benefit plans is presented in the table below. The caption "Pension Benefits" in the tables below includes both the Retirement Plan and the SERP.

| (In thousands)                                 | Pension Benefits |               | Other Postretirement Plans |               |
|------------------------------------------------|------------------|---------------|----------------------------|---------------|

| Employer contribution                          | 297,933          | 95,776        | 360                        | (214)         |
| Total disbursements                            | (49,315)         | (42,245)      | (360)                      | 214           |
| Fair value of plan assets at end of year       | 1,666,972        | 1,244,085     | —                          | —             |
| Funded status at end of year                   | \$ (545,332)     | \$ (307,859)  | \$(8,461)                  | \$(7,197)     |

In order to meet a portion of its obligations under the SERP, Sysco maintains life insurance policies on the lives of the participants with carrying values of \$149.5 million as of July 3, 2010 and \$130.2 million as of June 27, 2009. These policies are not included as plan assets or in the funded status amounts in the tables above and below. Sysco is the sole owner and beneficiary of such policies. The projected benefit obligation for the SERP of \$363.5 million and \$334.6 million as of July 3, 2010 and June 27, 2009, respectively, was included in Other long-term liabilities on the balance sheet.

During fiscal 2009, the company merged participants from an under-funded multi-employer pension plan into its Retirement Plan and assumed \$26.7 million of liabilities as part of its withdrawal agreement from this plan. These liabilities are due to the assumption of prior service costs related to the participants and their accrued benefits which were previously included in this multi-employer plan. This amount is reflected in the change in benefit obligation for Pension Benefits as of June 27, 2009 in the table above. See further discussion of this withdrawal under Multi-Employer Pension Plans in Note 18, "Commitments and Contingencies."

#### 18. Commitments and Contingencies (in part)

##### Multi-Employer Pension Plans

Sysco contributes to several multi-employer defined benefit pension plans based on obligations arising under collective bargaining agreements covering union-represented employees. Approximately 11% of Sysco's current employees are participants in such multi-employer plans. In fiscal 2010, total contributions to these plans were approximately \$51.5 million.

Sysco does not directly manage these multi-employer plans, which are generally managed by boards of trustees, half of whom are appointed by the unions and the other half by other employers contributing to the plan. Based upon the information available from plan administrators, management believes that several of these multi-employer plans are underfunded. In addition, the Pension Protection Act, enacted in August 2006, requires underfunded pension plans to improve their funding ratios within prescribed intervals based on the level of their underfunding. As a result, Sysco expects its contributions to these plans to increase in the future.

Under current law regarding multi-employer defined benefit plans, a plan's termination, Sysco's voluntary withdrawal, or the mass withdrawal of all contributing employers from any underfunded multi-employer defined benefit plan would require Sysco to make payments to the plan for Sysco's proportionate share of the multi-employer plan's unfunded vested liabilities. Generally, Sysco does not have the greatest share of liability among the participants in any of these plans. Based on the information available from plan administrators, which has valuation dates ranging from January 31, 2008 to June 30, 2009, Sysco estimates its share of withdrawal liability on most of the multi-employer plans in which it participates could have been as much as \$183.0 million as of July 3, 2010, based on a voluntary withdrawal. The majority of the plans we participate in have a valuation date of calendar year-end. As such, the majority of the estimated withdrawal liability results from plans for which the valuation date was December 31, 2008; therefore, the company's estimated liability reflects the asset losses incurred by the financial markets as of that date. In general, the financial markets have improved since December 31, 2008; therefore, management believes Sysco's current share of the withdrawal liability could differ from this estimate. In addition, if a multi-employer defined benefit plan fails to satisfy certain minimum funding requirements, the IRS may impose a nondeductible excise tax of 5% on the amount of the accumulated funding deficiency for those employers contributing to the fund. As of July 3, 2010, Sysco had approximately \$0.9 million in liabilities recorded in total related to certain multi-employer defined benefit plans for which Sysco's voluntary withdrawal had already occurred.

During fiscal 2008, the company obtained information that a multi-employer pension plan it participated in failed to satisfy minimum funding requirements for certain periods and concluded that it was probable that additional funding would be required as well as the payment of excise tax. As a result, during fiscal 2008, Sysco recorded a liability of approximately \$16.5 million related to its share of the minimum funding requirements and related excise tax for these periods. During the first quarter of fiscal 2009, Sysco effectively withdrew from this multi-employer pension plan in an effort to secure benefits for Sysco's employees that were participants in the plan and to manage the company's exposure to this under-funded plan. Sysco agreed to pay \$15.0 million to the plan, which included the minimum funding requirements.

In connection with this withdrawal agreement, Sysco merged participants from this plan into its company-sponsored Retirement Plan and assumed \$26.7 million in liabilities. The payment to the plan was made in the second quarter of fiscal 2009. If this plan were to undergo a mass withdrawal, as defined by the Pension Benefit Guaranty Corporation, prior to September 2010, the company could have additional liability. The company does not currently believe a mass withdrawal from this plan prior to September 2010 is probable.

Sysco has experienced other instances triggering voluntary withdrawal from multi-employer pension plans. Total withdrawal liability provisions recorded include \$2.9 million in fiscal 2010, \$9.6 million in fiscal 2009 and \$22.3 million in fiscal 2008.

## Plan Amendment and Termination

### 3.63

KIMBERLY-CLARK CORPORATION (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

*Note 11. Employee Postretirement Benefits (in part)*

##### *Pension Plans (in part)*

Substantially all regular employees in North America and the U.K. are covered by defined benefit pension plans (the "Principal Plans") and/or defined contribution retirement plans. Certain other subsidiaries have defined benefit pension plans or, in certain countries, termination pay plans covering substantially all regular employees. The funding policy for the qualified defined benefit plans in North America and the defined benefit plans in the U.K. is to contribute assets at least equal in amount to regulatory minimum requirements. Non-qualified U.S. plans providing pension benefits in excess of limitations imposed by the U.S. income tax code are not funded. Funding for the remaining defined benefit plans outside the U.S. is based on legal requirements, tax considerations, investment opportunities, and customary business practices in these countries.

In 2009, we took action with respect to our U.S. defined benefit pension and supplemental benefit plans to provide that no future compensation and benefit service will be accrued under these plans, other than for certain employees subject to collective bargaining agreements, for plan years after December 31, 2009 ("U.S. DB Pension Freeze").

The U.S. DB Pension Freeze resulted in a pension curtailment charge aggregating \$21 million in 2009 due to the write-off of applicable unamortized prior service costs. In addition, the average remaining life expectancy of inactive participants rather than the average remaining service lives of active employees must be used in the amortization of actuarial gains and losses as a result of the freeze.

## POSTEMPLOYMENT BENEFITS

### RECOGNITION AND MEASUREMENT

**3.64** FASB ASC 712, *Compensation—Nonretirement Postemployment Benefits*, requires that entities providing postemployment benefits to their employees accrue the cost of such benefits. FASB ASC 712 does not require that the amount of other postemployment benefits be disclosed.

## PRESENTATION AND DISCLOSURE EXCERPTS

### Postemployment Benefits

#### 3.65

AIR PRODUCTS AND CHEMICALS, INC. (SEP)

#### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Millions of dollars, except for share data)

##### *1. Major Accounting Policies (in part)*

##### *Postemployment Benefits*

The Company has substantive ongoing severance arrangements. Termination benefits provided to employees as part of the global cost reduction plan (discussed in Note 5, Global Cost Reduction Plan) are consistent with termination benefits in previous, similar arrangements. Because the Company's plan met the definition of an ongoing benefit arrangement, a liability was recognized for termination benefits when probable and estimable. These criteria are met when management, with the appropriate level of authority, approves and commits to its plan of action for termination; the plan identifies the employees to be terminated and their related benefits; and the plan is to be completed within one year. During periods of operations where terminations are made on an as-needed basis, absent a detailed committed plan, terminations are accounted for on an individual basis and a liability is recognized when probable and estimable.

##### *5. Global Cost Reduction Plan*

##### *2009 Plan*

The 2009 results from continuing operations included a total charge of \$298.2 (\$200.3 after-tax, or \$.94 per share) for the global cost reduction plan. In the first quarter of 2009, the Company announced the global cost reduction plan designed to lower its cost structure and better align its businesses to reflect rapidly declining economic conditions around the world. The 2009 first-quarter results included a charge of \$174.2 (\$116.1 after-tax, or \$.55 per share). In the third quarter 2009, due to the continuing slow economic recovery, the Company committed to additional actions associated with its global cost reduction plan that resulted in a charge of \$124.0 (\$84.2 after-tax, or \$.39 per share).

The total 2009 charge included \$210.0 for severance and other benefits, including pension-related costs, associated with the elimination of approximately 2,550 positions from the Company's global workforce. The reductions were targeted at reducing overhead and infrastructure costs, reducing and refocusing elements of the Company's technology and business development spending, lowering its plant operating costs, and the closure of certain manufacturing facilities. The remainder of this charge, \$88.2, was for business exits and asset management actions. Assets held for sale were written down to net realizable value, and an environmental liability of \$16.0 was recognized. This environmental liability resulted from a decision to sell a production facility.

#### Business Segments

The global cost reduction plan charge recorded in 2009 was excluded from segment operating profit. The table below displays how this charge related to the businesses at the segment level (*in millions*):

|                             | Severance<br>and Other<br>Benefits | Asset<br>Impairments/<br>Other Costs | Total   |
|-----------------------------|------------------------------------|--------------------------------------|---------|
| Merchant Gases              | \$127.5                            | \$ 7.2                               | \$134.7 |
| Tonnage Gases               | 14.2                               | —                                    | 14.2    |
| Electronics and Performance |                                    |                                      |         |
| Materials                   | 30.6                               | 58.9                                 | 89.5    |
| Equipment and Energy        | 37.7                               | 22.1                                 | 59.8    |
| 2009 Charge                 | \$210.0                            | \$88.2                               | \$298.2 |

During 2010, the Company revised its estimate of the costs associated with the 2009 global cost reduction plan. The unfavorable impact of additional severance and other benefits was primarily offset by favorable variances related to completed business exits and asset management actions. These adjustments to the charge were excluded from segment operating profit and did not have a material impact on any individual segment.

As of 30 September 2010, the planned actions associated with the global cost reduction plan were substantially completed with the exception of certain benefit payments associated with a small number of position eliminations. In addition, as part of the asset management actions included in the plan, the Company anticipates completing the sale of a facility by the end of calendar year 2010.

#### Accrual Balance

The following table summarizes changes to the carrying amount of the accrual for the global cost reduction plan (*in millions*):

|                                     | Severance<br>and Other<br>Benefits | Asset<br>Impairments/<br>Other Costs | Total    |
|-------------------------------------|------------------------------------|--------------------------------------|----------|
| First quarter 2009 charge           | \$ 120.0                           | \$ 54.2                              | \$ 174.2 |
| Third quarter 2009 charge           | 90.0                               | 34.0                                 | 124.0    |
| Environmental charge <sup>(A)</sup> | —                                  | (16.0)                               | (16.0)   |
| Noncash items                       | (33.8) <sup>(B)</sup>              | (66.1)                               | (99.9)   |
| Cash expenditures                   | (75.3)                             | (.9)                                 | (76.2)   |
| Currency translation<br>adjustment  | 4.3                                | —                                    | 4.3      |
| 30 September 2009                   | \$ 105.2                           | \$ 5.2                               | \$ 110.4 |
| Adjustment to charge                | 7.6                                | (6.6)                                | 1.0      |
| Environmental charge <sup>(A)</sup> | —                                  | 1.5                                  | 1.5      |
| Noncash items                       | (2.8) <sup>(B)</sup>               | .1                                   | (2.7)    |
| Cash expenditures                   | (102.8)                            | (.2)                                 | (103.0)  |
| Currency translation<br>adjustment  | (5.3)                              | —                                    | (5.3)    |
| 30 September 2010                   | \$ 1.9                             | \$ —                                 | \$ 1.9   |

(A) Reflected in accrual for environmental obligations. See Note 17, Commitments and Contingencies.

(B) Primarily pension-related costs, which are reflected in the accrual for pension benefits.

## EMPLOYEE COMPENSATORY PLANS

### RECOGNITION AND MEASUREMENT

**3.66** FASB ASC 718, *Compensation—Stock Compensation*, establishes accounting and reporting standards for share-based payment transactions with employees, including awards classified as equity, awards classified as liabilities, employee stock ownership plans, and employee stock purchase plans. FASB ASC 718 requires that share-based payment transactions be accounted for using a fair-value-based method. Thus, entities are required to recognize the cost of employee services received in exchange for award of equity instruments based on the grant-date fair value of those awards or the fair value of the liabilities incurred. FASB ASC 718 provides clarification and expanded guidance in several areas, including measuring fair value, classifying an award as equity or a liability, and attributing compensation cost to reporting periods.

## PRESENTATION AND DISCLOSURE EXCERPTS

### Stock Option Plans

#### 3.67

J. C. PENNEY COMPANY, INC. (JAN)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 14) Stock-Based Compensation (in part)

At our Annual Meeting of Stockholders on May 15, 2009, our stockholders approved the J. C Penney Company, Inc. 2009 Long-Term Incentive Plan (2009 Plan), reserving 13.1 million shares for future grants (8.5 million newly authorized shares, plus up to 4.6 million reserved but unissued shares from our prior 2005 Equity Compensation Plan (2005 Plan)). In addition, shares underlying any outstanding stock award or stock option grant canceled prior to vesting or exercise become available for use under the 2009 Plan. The 2005 Plan was terminated on May 15, 2009, except for outstanding awards. Subsequent awards have been and will be granted under the 2009 Plan.

The 2009 Plan allows for grants of stock options, stock appreciation rights and stock awards (collectively, Equity Awards) and cash incentive awards (together, Awards) to employees (associates) and Equity Awards to our non-employee members of the Board of Directors. Under the Plan, Awards to associates are subject to such conditions as continued employment, qualifying termination, passage of time and/or satisfaction of performance criteria as specified in the Plan or set by the Human Resources and Compensation Committee of the Board. As of January 30, 2010, 14.2 million shares of stock were available for future grant under the 2009 Plan,

which includes approximately 1.3 million shares from awards cancelled subsequent to May 15, 2009.

Associate stock options and restricted stock awards typically vest over periods ranging from one to three years. The exercise price of stock options and the market value of restricted stock awards are determined based on the closing market price of our common stock on the date of grant. The 2009 Plan does not permit awarding stock options below grant-date market value nor does it allow any repricing subsequent to the date of grant. Associate stock options have a maximum term of 10 years.

Over the past three years, our stock option and restricted stock award grants have averaged about 1.8% of total outstanding stock. We issue new shares upon the exercise of stock options, granting of restricted shares and vesting of restricted stock units.

##### Stock-Based Compensation Cost

| (\$ in millions)                                                              | 2009 | 2008 | 2007 |
|-------------------------------------------------------------------------------|------|------|------|
| Stock options                                                                 | \$28 | \$29 | \$23 |
| Stock awards (shares and units)                                               | 12   | 18   | 22   |
| Total stock-based compensation cost                                           | \$40 | \$47 | \$45 |
| Total income tax benefit recognized for stock-based compensation arrangements | \$15 | \$18 | \$18 |

##### Stock Options

On March 16, 2009, we made our annual grant of stock options covering approximately 3,873,000 shares to associates at an option price of \$16.09, with a fair value of \$6.27 per option.

As of January 30, 2010, options to purchase approximately 13.6 million shares of common stock were outstanding. If all options were exercised, common stock outstanding would increase by 5.7%. Additional information regarding options outstanding as of January 30, 2010 follows:

| (Shares in thousands; price is weighted-average exercise price) | Exercisable |      |       | Unexercisable |      |       | Total Outstanding |      |       |
|-----------------------------------------------------------------|-------------|------|-------|---------------|------|-------|-------------------|------|-------|
|                                                                 | Shares      | %    | Price | Shares        | %    | Price | Shares            | %    | Price |
| In-the-money                                                    | 588         | 8%   | \$19  | 4,244         | 65%  | \$16  | 4,832             | 36%  | \$16  |
| Out-of-the-money <sup>(1)</sup>                                 | 6,465       | 92%  | 49    | 2,264         | 35%  | 44    | 8,729             | 64%  | 48    |
| Total options outstanding                                       | 7,053       | 100% | 47    | 6,508         | 100% | 25    | 13,561            | 100% | 36    |

<sup>(1)</sup> Out-of-the-money options are those with an exercise price above the closing price of JCPenney common stock of \$24.83 as of January 30, 2010.

The following table summarizes stock options outstanding as of January 30, 2010, as well as activity during the year then ended:

|                                 | Shares<br>(In Thousands) | Weighted-<br>Average Exercise<br>Price<br>Per Share | Weighted-<br>Average<br>Remaining<br>Contractual Term<br>(In Years) | Aggregate Intrinsic<br>Value (\$ in Millions) <sup>(1)</sup> |
|---------------------------------|--------------------------|-----------------------------------------------------|---------------------------------------------------------------------|--------------------------------------------------------------|
| Outstanding at January 31, 2009 | 11,862                   | \$42                                                |                                                                     |                                                              |
| Granted                         | 3,882                    | 16                                                  |                                                                     |                                                              |
| Exercised                       | (199)                    | 24                                                  |                                                                     |                                                              |
| Forfeited/canceled              | (1,984)                  | 33                                                  |                                                                     |                                                              |
| Outstanding at January 30, 2010 | 13,561                   | 36                                                  | 6.9                                                                 | \$42                                                         |
| Exercisable at January 30, 2010 | 7,053                    | 47                                                  | 5.1                                                                 | 4                                                            |

<sup>(1)</sup> The intrinsic value of a stock option is the amount by which the market value of the underlying stock exceeds the exercise price of the option at year end.

Cash proceeds, tax benefits and intrinsic value related to total stock options exercised are provided in the following table:

| (\$ in millions)                                         | 2009 | 2008 | 2007 |
|----------------------------------------------------------|------|------|------|
| Proceeds from stock options exercised                    | \$ 4 | \$4  | \$45 |
| Intrinsic value of stock options exercised               | 1    | 2    | 47   |
| Tax benefit related to stock-based compensation          | 2    | 2    | 18   |
| Excess tax benefits realized on stock-based compensation | —    | 1    | 17   |

As of January 30, 2010, we had \$34 million of unrecognized and unearned compensation expense, net of estimated forfeitures, for stock options not yet vested, which will be recognized as expense over the remaining weighted-average vesting period of approximately one year.

#### Stock Option Valuation

**Valuation Method.** We estimate the fair value of stock option awards on the date of grant using a binomial lattice model. We believe that the binomial lattice model is a more accurate model for valuing employee stock options since it better reflects the impact of stock price changes on option exercise behavior.

**Expected Term.** Our expected option term represents the average period that we expect stock options to be outstanding and is determined based on our historical experience, giving consideration to contractual terms, vesting schedules, anticipated stock prices and expected future behavior of option holders.

**Expected Volatility.** Our expected volatility is based on a blend of the historical volatility of JCPenney stock combined with an estimate of the implied volatility derived from exchange traded options. Beginning in 2008, we increased the weighting of the historical volatility component of our expected volatility assumption due to historical volatility being more representative of our current business model. Our historical volatility no longer reflects the volatility associated with the Eckerd drugstore business, which was sold in mid-2004.

**Risk-Free Interest Rate.** Our risk-free interest rate is based on zero-coupon U.S. Treasury yields in effect at the date of grant with the same period as the expected option life.

**Expected Dividend Yield.** The dividend assumption is based on our current expectations about our dividend policy.

Our weighted-average fair value of stock options at grant date was \$6.29 in 2009, \$11.74 in 2008 and \$19.85 in 2007 using the binomial lattice valuation model and the following assumptions:

|                                          | 2009      | 2008      | 2007      |
|------------------------------------------|-----------|-----------|-----------|
| Weighted-average expected option term    | 4.5 years | 4.6 years | 4.5 years |
| Weighted-average expected volatility     | 57.0%     | 44.7%     | 25.0%     |
| Weighted-average risk-free interest rate | 1.8%      | 2.7%      | 4.5%      |
| Weighted-average expected dividend yield | 3.3%      | 2.0%      | 0.9%      |
| Expected dividend yield range            | 1.8%–5.0% | 1.2%–5.6% | —         |

### 3.68

#### JOHNSON CONTROLS, INC. (SEP)

(In millions, except per share data)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 12. Stock-Based Compensation (in part)

Effective October 1, 2005, the Company adopted ASC 718, "Stock Compensation," using the modified prospective method. The modified prospective method requires compensation cost to be recognized beginning on the effective date (a) for all share-based payments granted after the effective date and (b) for all awards granted to employees prior to the effective date of ASC 718 that remain unvested on the effective date. The cumulative impact of adopting ASC 718 was not significant to the Company's operating results since the Company had previously adopted certain provisions of this guidance.

The Company has three share-based compensation plans, which are described below. The compensation cost charged

against income for those plans was approximately \$52 million, \$27 million and \$29 million for the fiscal years ended September 30, 2010, 2009 and 2008, respectively. The total income tax benefit recognized in the consolidated statements of income for share-based compensation arrangements was approximately \$21 million, \$11 million and \$11 million for the fiscal years ended September 30, 2010, 2009 and 2008, respectively.

Prior to the adoption of ASC 718, the Company applied a nominal vesting approach for employee stock-based compensation awards with retirement eligible provisions. Under the nominal vesting approach, the Company recognized compensation cost over the vesting period and, if the employee retired before the end of the vesting period, the Company recognized any remaining unrecognized compensation cost at the date of retirement. For stock-based payments issued after the adoption of ASC 718, the Company applies a non-substantive vesting period approach whereby expense is accelerated for those employees that receive awards and are eligible to retire prior to the award vesting. Had the Company applied the non-substantive vesting period approach prior to the adoption of ASC 718, an approximate \$2 million reduction of pre-tax compensation cost would have been recognized for the year ended September 30, 2008. There

would have been no impact for the years ended September 30, 2010 and 2009.

### Stock Option Plan

The Company's 2007 Stock Option Plan, as amended (the Plan), which is shareholder-approved, permits the grant of stock options to its employees for up to approximately 41 million shares of new common stock as of September 30, 2010. Option awards are granted with an exercise price equal to the market price of the Company's stock at the date of grant; those option awards vest between two and three years after the grant date and expire ten years from the grant date (approximately 25 million shares of common stock remained available to be granted at September 30, 2010).

The fair value of each option award is estimated on the date of grant using a Black-Scholes option valuation model that uses the assumptions noted in the following table. Expected volatilities are based on the historical volatility of the Company's stock and other factors. The Company uses historical data to estimate option exercises and employee terminations within the valuation model. The expected term of options represents the period of time that options granted are expected to be outstanding. The risk-free rate for periods during the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

|                                                | Year Ended September 30 |             |             |
|------------------------------------------------|-------------------------|-------------|-------------|
|                                                | 2010                    | 2009        | 2008        |
| Expected life of option (years)                | 4.3–5.0                 | 4.2–4.5     | 4.5–5.25    |
| Risk-free interest rate                        | 1.91%–2.20%             | 2.57%–2.68% | 4.06%–4.23% |
| Expected volatility of the company's stock     | 40.00%                  | 28.00%      | 22.00%      |
| Expected dividend yield on the company's stock | 1.73%                   | 1.52%       | 1.55%       |

A summary of stock option activity at September 30, 2010, and changes for the year then ended, is presented below:

|                                 | Weighted<br>Average Option<br>Price | Shares Subject<br>to Option | Weighted<br>Average<br>Remaining<br>Contractual Life<br>(Years) | Aggregate<br>Intrinsic Value<br>(In Millions) |
|---------------------------------|-------------------------------------|-----------------------------|-----------------------------------------------------------------|-----------------------------------------------|
| Outstanding, September 30, 2009 | \$23.62                             | 33,244,637                  |                                                                 |                                               |
| Granted                         | 24.89                               | 5,382,100                   |                                                                 |                                               |
| Exercised                       | 18.97                               | (3,095,823)                 |                                                                 |                                               |
| Forfeited or expired            | 28.58                               | (372,805)                   |                                                                 |                                               |
| Outstanding, September 30, 2010 | \$24.17                             | 35,158,109                  | 5.8                                                             | \$253                                         |
| Exercisable, September 30, 2010 | \$22.23                             | 24,386,551                  | 4.6                                                             | \$217                                         |

The weighted-average grant-date fair value of options granted during the fiscal years ended September 30, 2010, 2009 and 2008 was \$7.70, \$6.68 and \$9.08, respectively.

The total intrinsic value of options exercised during the fiscal years ended September 30, 2010, 2009 and 2008 was approximately \$33 million, \$4 million and \$45 million, respectively.

In conjunction with the exercise of stock options granted, the Company received cash payments for the fiscal years ended September 30, 2010, 2009 and 2008 of approximately \$52 million, \$8 million and \$34 million, respectively.

The Company has elected to utilize the alternative transition method for calculating the tax effects of stock-based

compensation. The alternative transition method includes computational guidance to establish the beginning balance of the additional paid-in capital pool (APIC Pool) related to the tax effects of employee stock-based compensation, and a simplified method to determine the subsequent impact on the APIC Pool for employee stock-based compensation awards that are vested and outstanding upon adoption of ASC 718. The tax benefit from the exercise of stock options, which is recorded in capital in excess of par value, was \$7 million, \$1 million and \$19 million for the fiscal years ended September 30, 2010, 2009 and 2008. The Company does not settle equity instruments granted under share-based payment arrangements for cash.

At September 30, 2010, the Company had approximately \$26 million of total unrecognized compensation cost related to nonvested share-based compensation arrangements granted under the Plan. That cost is expected to be recognized over a weighted-average period of 0.8 years.

## Stock Award Plans

### 3.69

#### CATERPILLAR INC. (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 2. Stock-Based Compensation

Our stock-based compensation plans primarily provide for the granting of stock options, stock-settled stock appreciation rights (SARs) and restricted stock units (RSUs) to Officers and other key employees, as well as non-employee Directors. Stock options permit a holder to buy Caterpillar stock at the stock's price when the option was granted. SARs permit a holder the right to receive the value in shares of the appreciation in Caterpillar stock that occurred from the date the right was granted up to the date of exercise. A restricted stock unit (RSU) is an agreement to issue shares of Caterpillar stock at the time of vesting.

Our long-standing practices and policies specify all stock-based compensation awards are approved by the Compensation Committee (the Committee) of the Board of Directors on the date of grant. The stock-based award approval process specifies the number of awards granted, the terms of

the award and the grant date. The same terms and conditions are consistently applied to all employee grants, including Officers. The Committee approves all individual Officer grants. The number of stock-based compensation awards included in an individual's award is determined based on the methodology approved by the Committee. In 2007, under the terms of the Caterpillar Inc. 2006 Long-Term Incentive Plan (approved by stockholders in June of 2006), the Compensation Committee approved the exercise price methodology to be the closing price of the Company stock on the date of the grant.

Common stock issued from Treasury stock under the plans totaled 12,612,514 for 2010, 3,571,268 for 2009 and 4,807,533 for 2008.

The 2010, 2009 and 2008 awards generally vest three years after the date of grant. At grant, SARs and option awards have a term life of ten years. Upon separation from service, if the participant is 55 years of age or older with more than ten years of service, the participant meets the criteria for a "Long Service Separation." If the "Long Service Separation" criteria are met, the vested options/SARs will have a life that is the lesser of 10 years from the original grant date or five years from the separation date.

Our stock-based compensation plans allow for the immediate vesting upon separation for employees who meet the criteria for a "Long Service Separation" and who have fulfilled the requisite service period of six months. Compensation expense is recognized over the period from the grant date to the end date of the requisite service period for employees who meet the immediate vesting upon retirement requirements. For those employees who become eligible for immediate vesting upon retirement subsequent to the requisite service period and prior to the completion of the vesting period, compensation expense is recognized over the period from grant date to the date eligibility is achieved.

Accounting guidance on share-based payments requires companies to estimate the fair value of options/SARs on the date of grant using an option-pricing model. The fair value of the option/SAR grant was estimated using a lattice-based option-pricing model. The lattice-based option-pricing model considers a range of assumptions related to volatility, risk-free interest rate and historical employee behavior. Expected volatility was based on historical and current implied volatilities from traded options on our stock. The risk-free rate was based on U.S. Treasury security yields at the time of grant. The weighted-average dividend yield was based on historical information. The expected life was determined from the lattice-based model. The lattice-based model incorporated exercise and post vesting forfeiture assumptions based on analysis of historical data. The following table provides the assumptions used in determining the fair value of the stock-based awards for the years ended December 31, 2010, 2009 and 2008, respectively.

|                                   | Grant Year |            |            |
|-----------------------------------|------------|------------|------------|
|                                   | 2010       | 2009       | 2008       |
| Weighted-average dividend yield   | 2.3%       | 3.1%       | 1.9%       |
| Weighted-average volatility       | 36.4%      | 36.0%      | 27.1%      |
| Range of volatilities             | 35.2–51.8% | 35.8–61.0% | 27.1–29.0% |

The fair value of the RSU grant was determined by reducing the stock price on the day of grant by the present value of the estimated dividends to be paid during the vesting period. The estimated dividends are based on Caterpillar's weighted-average dividend yield.

The amount of stock-based compensation expense capitalized for the years ended December 31, 2010, 2009 and

2008 did not have a significant impact on our financial statements.

At December 31, 2010, there was \$134 million of total unrecognized compensation cost from stock-based compensation arrangements granted under the plans, which is related to non-vested stock-based awards. The compensation expense is expected to be recognized over a weighted-average period of approximately 1.9 years.

Please refer to Tables I and II below for additional information on our stock-based awards.

<sup>(1)</sup> Of the 7,556,481 awards granted during the year ended December 31, 2010, 7,125,210 were SARs. Of the 6,823,227 awards granted during the year ended December 31, 2009, 6,260,647 were SARs. Of the 4,886,601 awards granted during the year ended December 31, 2008, 4,476,095 were SARs.

<sup>(2)</sup> The difference between a stock award's exercise price and the underlying stock's market price at December 31, 2010, for awards with market price greater than the exercise price. Amounts are in millions of dollars.

The computations of weighted-average exercise prices and aggregate intrinsic values are not applicable to RSUs since an RSU represents an agreement to issue shares of stock at the time of vesting. At December 31, 2010, there were 4,650,241 outstanding RSUs with a weighted average remaining contractual life of 1.2 years.

*Table II—Additional Stock-based Award Information*

| (Dollars in millions except per share data)                   | 2010    | 2009    | 2008    |
|---------------------------------------------------------------|---------|---------|---------|
| Stock Options/SARs Activity:                                  |         |         |         |
| Weighted-average fair value per share of stock awards granted | \$22.31 | \$ 7.10 | \$22.32 |
| Intrinsic value of stock awards exercised                     | \$ 518  | \$ 77   | \$ 232  |
| Fair value of stock awards vested                             | \$ 119  | \$ 213  | \$ 18   |
| Cash received from stock awards exercised                     | \$ 325  | \$ 89   | \$ 130  |
| RSUs activity:                                                |         |         |         |
| Weighted-average fair value per share of stock awards granted | \$53.35 | \$20.22 | \$69.17 |
| Fair value of stock awards vested                             | \$ 99   | \$ 10   | \$ 4    |

Before tax, stock-based compensation expense for 2010, 2009 and 2008 was \$226 million, \$132 million and \$194 million, respectively, with a corresponding income tax benefit of \$73 million, \$42 million and \$62 million, respectively. Included in the 2010 pre-tax stock-based compensation expense was \$19 million relating to the modification of awards resulting from separations due to the streamlining of our corporate structure as announced in the second quarter.

In accordance with guidance on share-based payments, we classify stock-based compensation within cost of goods sold, selling, general and administrative expenses and research and development expenses corresponding to the same line item as the cash compensation paid to respective employees, officers and non-employee directors.

We currently use shares in treasury stock to satisfy share award exercises.

The cash tax benefits realized from stock awards exercised for December 31, 2010, 2009 and 2008 were \$188 million, \$26 million and \$60 million, respectively. We use the direct only method and tax law ordering approach to calculate the tax effects of stock-based compensation. In certain jurisdictions, tax deductions for exercises of stock-based awards did not generate a cash benefit. A tax benefit of approximately \$30 million will be recorded in APIC when these deductions reduce our future income taxes payable.

## Savings and Investment Plans

### 3.70

DELL INC. (JAN)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

*Note 13—Stock-Based Compensation and Benefit Plans (in part)*

##### *Employee Benefits*

**401(k) Plan**—Dell has a defined contribution retirement plan (the “401(k) Plan”) that complies with Section 401(k) of the Internal Revenue Code. Substantially all employees in the U.S.

are eligible to participate in the 401(k) Plan. Effective January 1, 2008, Dell matches 100% of each participant’s voluntary contributions, subject to a maximum contribution of 5% of the participant’s compensation, and participants vest immediately in all Dell contributions to the 401(k) Plan. Dell’s contributions during Fiscal 2010, 2009, and 2008 were \$91 million, \$93 million, and \$76 million, respectively. Dell’s contributions are invested according to each participant’s elections in the investment options provided under the Plan. Investment options include Dell common stock, but neither participant nor Dell contributions are required to be invested in Dell common stock. During Fiscal 2010, Dell also contributed \$4.2 million to Perot Systems’ 401(k) Plan after the acquisition of the company on November 3, 2009.

## Employee Stock Purchase Plans (ESPP)

### 3.71

COMCAST CORPORATION (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

*Note 15. Share-Based Compensation (in part)*

Our approach to long-term incentive compensation includes the awarding of stock options and RSUs to certain employees and directors. We grant these awards under various plans. Additionally, through our employee stock purchase plan, employees are able to purchase shares of Comcast Class A common stock at a discount through payroll deductions.

##### *Recognized Share-Based Compensation Expense (in part)*

|                              | Year Ended December 31 |       |       |
|------------------------------|------------------------|-------|-------|
| (In millions)                | 2010                   | 2009  | 2008  |
| Stock options                | \$103                  | \$103 | \$ 99 |
| Restricted share units       | 136                    | 93    | 96    |
| Employee stock purchase plan | 12                     | 13    | 13    |
| Total                        | \$251                  | \$209 | \$208 |
| Tax benefit                  | \$ 89                  | \$ 73 | \$ 71 |

##### *Employee Stock Purchase Plan*

We maintain an employee stock purchase plan that offers employees the opportunity to purchase shares of Class A common stock at a 15% discount. We recognize the fair value of the discount associated with shares purchased under the plan as share-based compensation expense. The employee cost associated with participation in the plan was satisfied with payroll deductions of approximately \$50 million, \$48 million and \$50 million in 2010, 2009 and 2008, respectively.

## Deferred Compensation Plans

### 3.72

#### GENERAL CABLE CORPORATION (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### 13. Total Equity (in part)

The Company maintains a deferred compensation plan ("Deferred Compensation Plan"). This plan is available to directors and certain officers and managers of the Company. The plan allows participants to defer all or a portion of their directors' fees and/or salary and annual bonuses, as applicable, and it permits participants to elect to contribute and defer all or any portion of their nonvested stock, restricted stock and stock awards. All deferrals to the participants' accounts vest immediately; Company contributions vest according to the vesting schedules in the qualified plan and nonvested stock and restricted stock vests according to the schedule designated by the award. The Company makes matching and retirement contributions (currently equal to 6%) of compensation paid over the maximum allowed for qualified pension benefits, whether or not the employee elects to defer any compensation. The Deferred Compensation Plan does not have dollar limits on tax-deferred contributions. The assets of the Deferred Compensation Plan are held in a Rabbi Trust ("Trust") and, therefore, are available to satisfy the claims of the Company's creditors in the event of bankruptcy or insolvency of the Company. Participants have the right to request that their account balance be determined by reference to specified investment alternatives (with the exception of the portion of the account which consists of deferred nonvested and subsequently vested stock and restricted stock). With certain exceptions, these investment alternatives are the same alternatives offered to participants in the General Cable Retirement and Savings Plan for Salaried Associates. In addition, participants have the right to request that the Plan Administrator re-allocate the deferral among available investment alternatives; provided, however that the Plan Administrator is not required to honor such requests. Distributions from the plan are generally made upon the participants' termination as a director and/or employee, as applicable, of the Company. Participants receive payments from the plan in cash, either as a lump sum payment or through equal annual installments from between one and ten years, except for the nonvested and subsequently vested stock and restricted stock, which the participants receive in shares of General Cable stock.

The Company accounts for its Deferred Compensation Plan in accordance with ASC 710 *Compensation—General*, as it relates to arrangements where amounts earned are held in rabbi trusts. Assets of the Trust, other than the nonvested and subsequently vested stock and restricted stock of the Company, are invested in funds covering a variety of securities and investment strategies, approximately 87% are invested in mutual funds and the remaining 13% are invested in a General Cable stock fund. Mutual funds available to participants are publicly quoted and reported at market value. The Company accounts for these investments as trading securities in accordance with ASC 320 *Investments—Debt and Equity Securities*. The Trust also holds nonvested and subsequently vested stock and restricted stock shares of the Company. The Company's nonvested and subsequently

vested and restricted stock that are held by the Trust are accounted for in additional paid-in capital as discussed in ASC 718 *Compensation—Stock Compensation*.

The market value of mutual fund investments, nonvested and subsequently vested stock and restricted stock in the Trust was \$39.3 million and \$33.6 million as of December 31, 2010 and 2009, respectively. The market value of the assets held by the Trust, exclusive of the market value of the shares of the Company's nonvested and subsequently vested restricted stock, restricted stock units held in the deferred compensation plan and Company stock investments by participants' elections, at December 31, 2010 and December 31, 2009 was \$16.0 million and \$14.2 million, respectively, and is classified as "other non-current assets" in the consolidated balance sheets. Amounts payable to the plan participants at December 31, 2010 and 2009, excluding the market value of the shares of the Company's nonvested and subsequently vested restricted stock and restricted stock units held, was \$18.3 million and \$16.0 million, respectively, and is classified as "other liabilities" in the consolidated balance sheets.

In accordance with ASC 710, all market value fluctuations of the Trust assets, exclusive of the shares of nonvested and subsequently vested stock and restricted stock of the Company, are effectively offset by changes in the market value of the deferred compensation liability held by the Trust, which are included as compensation expense in the consolidated statements of operations. Prior to 2009, management had classified the mutual fund assets as available for sale; as such, changes in the value of these investments were recorded in accumulated other comprehensive income. The total aggregate net gain in other comprehensive income was \$7.3 million for the year ended December 31, 2009.

## Incentive Compensation Plans

#### QUANTUM CORPORATION (MAR)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 2. Financial Statement Presentation and Summary of Significant Accounting Policies (in part)

##### Share-Based Compensation

We account for share-based compensation using the Black-Scholes option pricing model to estimate the fair value of share-based awards at the date of grant. The Black-Scholes model requires the use of highly subjective assumptions, including expected life, expected volatility and expected risk-free rate of return. Other reasonable assumptions could provide differing results. We calculate a forfeiture rate to estimate the share-based awards that will ultimately vest based on types of awards and historical experience. Additionally, for awards which are performance based, we make estimates as to the probability of the underlying performance being achieved.

*Note 10. Stock Incentive Plans and Share-Based Compensation (in part)*

*Description of Stock Incentive Plans*

*Long-Term Incentive Plan*

We have a Long-Term Incentive Plan (the “Plan”) that provides for the issuance of stock options, stock appreciation rights, stock purchase rights and long-term performance awards to our employees, officers and affiliates. The Plan has authorized 76.5 million shares of stock of which 13.3 million shares of stock were available for grant as of March 31, 2010. There are 29.7 million options and restricted shares outstanding under the Long-Term Incentive Plan.

Beginning in the first quarter of fiscal 2007, under the Plan we began granting restricted stock units with a zero purchase price in place of stock options in most cases to our existing employees. We continued to grant stock options to our existing employees in certain circumstances. Newly hired employees are typically granted stock options under the Plan. In fiscal 2010, due to a combination of factors including our share price at the beginning of the fiscal year, we primarily granted stock options to our existing employees. Stock options granted to existing employees in fiscal 2010 and fiscal 2009 generally vest annually over three years and have contractual terms of seven years. Stock options granted to newly hired employees in fiscal 2010 and fiscal 2009 generally vest 25% on the first anniversary of the grant date with the remainder vesting monthly at the rate of 1/48th over the following three years and have contractual terms of seven years. Grants in prior fiscal years typically had four year vesting terms and contractual terms of seven years while grants prior to fiscal 2004 had contractual terms of ten years. Options under the Plan are granted at prices determined by the Board of Directors, but at not less than the fair market value. The majority of restricted stock units granted in fiscal 2010 and 2009 vest over two years and restricted stock awards and units (“restricted stock”) granted prior to fiscal 2009 generally vest over two to four years. Both options and restricted stock granted under the Plan are subject to forfeiture if employment terminates. In fiscal 2007, we granted restricted stock with both market and service vesting conditions that, upon meeting certain market conditions over one and two year periods from initial grant, vested over the two years following the grant date.

*Supplemental Stock Plan*

We have a Supplemental Stock Plan (the “SSOP”), which was not approved by our stockholders, that provided for the issuance of stock options and stock purchase rights to our employees and consultants. The SSOP was terminated effective April 1, 2003, from which time no new stock options or stock purchase rights have been or will be granted under the SSOP. Outstanding stock options and stock purchase rights granted under the SSOP prior to April 1, 2003 remained outstanding and continue to be governed by the terms and conditions of the SSOP. Options under the SSOP generally vested over two to four years and expire ten years after the grant date. Options granted under the SSOP are subject to forfeiture if employment terminates. There are 0.9 million options outstanding under the SSOP as of March 31, 2010, which expire at various times through January 2013.

*Assumed Stock Option Plans*

During the second quarter of fiscal 2007, in connection with our acquisition of ADIC, we assumed 14.7 million outstanding stock options granted under the four stock option plans of ADIC (“assumed option plans”). Outstanding options are governed by the Agreement and Plan of Merger (“Merger Agreement”) and generally vest over four years from initial ADIC grant. No additional options will be granted under these assumed option plans. There are 4.3 million options outstanding under the assumed stock option plans as of March 31, 2010 which expire at various times through May 2015.

*Other Stock Option Plans*

We have other stock option plans (the “Other Plans”) under which stock options, stock appreciation rights, stock purchase rights, restricted stock awards and long-term performance awards to our employees, consultants, officers and affiliates have been authorized. Restricted stock granted under the Other Plans generally vests over two to three years. Options granted under the Other Plans generally vest over one to four years and expire seven years after the grant date. Many of the Other Plans have been terminated. Outstanding stock options and stock purchase rights granted under those certain Other Plans that have been terminated remain outstanding and continue to be governed by the terms and conditions of the respective other stock option plan. Terminated plans included in Other Plans typically granted options which generally expire ten years from grant date. Options and restricted stock granted under all of the Other Plans are subject to forfeiture if employment terminates. Options under the Other Plans are granted at prices determined by the Board of Directors, but at not less than the fair market value. We have 6.1 million shares authorized under the Other Plans, of which 1.5 million options and restricted shares are outstanding, and 1.1 million shares were available for grant.

*Stock Purchase Plan*

We have an employee stock purchase plan (the “Purchase Plan”) that allows for the purchase of stock at 85% of fair market value at the date of grant or the exercise date, whichever value is less. The Purchase Plan is qualified under Section 423 of the Internal Revenue Code. Under the Purchase Plan, rights to purchase shares are granted during the second and fourth quarter of each fiscal year. There were 9.2 million shares available for issuance as of March 31, 2010.

During fiscal 2009, our Board of Directors cancelled rights to purchase shares under our Purchase Plan for the fourth quarter of fiscal 2009 and for fiscal 2010. On January 1, 2010, the Purchase Plan was reinstated and amended to set the maximum number of shares available in any one offering period to no more than two million shares. Employees purchased 1.9 million shares and 2.6 million shares of common stock under the Purchase Plan in fiscal 2009 and 2008, respectively. The weighted-average price of stock purchased under the Purchase Plan was \$1.37 and \$2.08 in fiscal 2009 and 2008, respectively.

*Determining Fair Value*

*Stock Options*

We use the Black-Scholes option valuation model for estimating fair value of stock options granted under our plans and rights to acquire stock granted under our Purchase Plan.

We amortize the fair value of stock options on a ratable basis over the requisite service periods, which are generally the vesting periods. The expected life of awards granted represents the period of time that they are expected to be outstanding. We determine the expected life based on historical experience with similar awards, giving consideration to the contractual terms, exercise patterns and post-vesting forfeitures. We estimate volatility based on the historical volatility of our common stock over the most recent period corresponding with the estimated expected life of the award. We base the risk-free interest rate used in the Black-Scholes option valuation model on the implied yield currently available on U.S. Treasury zero-coupon issues with an equivalent term equal to the expected life of the award. We have not paid any cash dividends on our common stock and do not anticipate paying any cash dividends in the foreseeable future. Consequently, we use an expected dividend yield of zero. We use historical data to estimate pre-vesting option forfeitures and record share-based compensation for those awards that are expected to vest. We adjust share-based compensation for changes to the estimate of expected equity award forfeitures based on actual forfeiture experience. The effect of adjusting the forfeiture rate is recognized in the period the forfeiture estimate is changed.

The weighted-average estimated fair values and the assumptions used in calculating such values for stock options during each fiscal period are as follows:

|                                        | For the Year Ended March 31 |         |         |
|----------------------------------------|-----------------------------|---------|---------|
|                                        | 2010                        | 2009    | 2008    |
| Option life (in years)                 | 3.9                         | 4.0     | 3.8     |
| Risk-free interest rate                | 2.05%                       | 2.54%   | 4.51%   |
| Stock price volatility                 | 107.67%                     | 56.59%  | 44.54%  |
| Dividend yield                         | —                           | —       | —       |
| Weighted-average grant date fair value | \$ 0.73                     | \$ 0.66 | \$ 1.24 |

The above assumptions were used to calculate the fair value of options granted under the Long-Term Incentive Plan and Other Plans.

#### *Restricted Stock*

The fair value of our restricted stock is the intrinsic value as of the grant date.

#### *Stock Purchase Plan*

Under the Purchase Plan, rights to purchase shares are granted during the second and fourth quarter of each fiscal year. Due to reinstatement of the Purchase Plan on January 1, 2010, rights to purchase shares were granted in February 2010 and such shares will be purchased in August 2010, or the second quarter of fiscal 2011. The weighted-average fair values and the assumptions used in calculating fair values during each fiscal period are as follows:

|                                        | For the Year Ended March 31 |         |         |
|----------------------------------------|-----------------------------|---------|---------|
|                                        | 2010                        | 2009    | 2008    |
| Option life (in years)                 | 0.50                        | 0.50    | 0.50    |
| Risk-free interest rate                | 0.15%                       | 2.84%   | 3.93%   |
| Stock price volatility                 | 69.14%                      | 60.98%  | 48.49%  |
| Dividend yield                         | —                           | —       | —       |
| Weighted-average grant date fair value | \$ 0.82                     | \$ 0.81 | \$ 0.79 |

#### *Share-Based Compensation Expense*

The following tables summarize share-based compensation expense (in thousands):

|                                                          | For the Year Ended March 31 |          |          |
|----------------------------------------------------------|-----------------------------|----------|----------|
|                                                          | 2010                        | 2009     | 2008     |
| Share-based compensation expense included in operations: |                             |          |          |
| Cost of revenue                                          | \$1,366                     | \$ 1,419 | \$ 1,929 |
| Research and development                                 | 2,373                       | 2,722    | 3,778    |
| Sales and marketing                                      | 2,581                       | 2,695    | 3,269    |
| General and administrative                               | 3,469                       | 3,756    | 5,022    |
| Total share-based compensation expense                   | \$9,789                     | \$10,592 | \$13,998 |

|                                            | For the Year Ended March 31 |          |          |
|--------------------------------------------|-----------------------------|----------|----------|
|                                            | 2010                        | 2009     | 2008     |
| Share-based compensation by type of award: |                             |          |          |
| Stock options                              | \$3,633                     | \$ 3,450 | \$ 5,911 |
| Restricted stock                           | 5,878                       | 6,447    | 6,318    |
| Stock purchase plan                        | 278                         | 695      | 1,769    |
| Total share-based compensation expense     | \$9,789                     | \$10,592 | \$13,998 |

The total share-based compensation cost capitalized as part of inventory as of March 31, 2010 and 2009 was not material. During fiscal 2010, 2009 and 2008, no tax benefit was realized for the tax deduction from option exercises and other awards due to our net operating losses and tax benefit carryforwards.

As of March 31, 2010, there was \$6.9 million of total unrecognized compensation cost related to stock options granted under our plans. This unrecognized compensation cost is expected to be recognized over a weighted-average period of 2.0 years. Total intrinsic value of options exercised for the years ended March 31, 2010, 2009 and 2008 was \$1.9 million, \$26,000 and \$5.4 million, respectively. We settle stock option exercises by issuing additional common shares.

As of March 31, 2010, there was \$4.3 million of total unrecognized compensation cost related to nonvested restricted stock granted under our plans. The unrecognized compensation cost for restricted stock is expected to be recognized over a weighted-average period of 1.0 years. Total fair value of awards released during the years ended March 31, 2010, 2009 and 2008 was \$3.1 million, \$2.6 million and \$4.3 million, respectively, based on the fair value of our common stock on the date of award release. We issue additional common shares upon vesting of restricted stock units.

*Stock Activity**Stock Options*

A summary of activity relating to all of our stock option plans is as follows (options and intrinsic value in thousands):

|                                               | Options | Weighted-Average Exercise Price | Weighted-Average Remaining Contractual Term | Aggregate Intrinsic Value |
|-----------------------------------------------|---------|---------------------------------|---------------------------------------------|---------------------------|
| Outstanding as of March 31, 2007              | 36,259  | \$ 3.62                         |                                             |                           |
| Granted                                       | 4,985   | 3.15                            |                                             |                           |
| Exercised                                     | (5,847) | 2.21                            |                                             |                           |
| Forfeited                                     | (6,947) | 5.54                            |                                             |                           |
| Expired                                       | (283)   | 11.42                           |                                             |                           |
| Outstanding as of March 31, 2008              | 28,167  | 3.27                            |                                             |                           |
| Granted                                       | 2,597   | 1.60                            |                                             |                           |
| Exercised                                     | (61)    | 1.41                            |                                             |                           |
| Forfeited                                     | (4,159) | 3.28                            |                                             |                           |
| Expired                                       | (918)   | 5.64                            |                                             |                           |
| Outstanding as of March 31, 2009              | 25,626  | 3.02                            |                                             |                           |
| Granted                                       | 9,655   | 1.01                            |                                             |                           |
| Exercised                                     | (1,883) | 1.51                            |                                             |                           |
| Forfeited                                     | (1,778) | 3.32                            |                                             |                           |
| Expired                                       | (291)   | 11.08                           |                                             |                           |

## Employee Stock Ownership Plans (ESOP)

### 3.74

#### THE DOW CHEMICAL COMPANY (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note D—Acquisitions (in part)

Pursuant to the terms and conditions of the Merger Agreement, each outstanding share of Rohm and Haas common stock was converted into the right to receive cash of \$78 per share, plus additional cash consideration of \$0.97 per share. The additional cash consideration represented 8 percent per annum on the \$78 per share consideration from January 10, 2009 to the closing of the Merger, less dividends declared by Rohm and Haas with a dividend record date between January 10, 2009 and the closing of the Merger. All options to purchase shares of common stock of Rohm and Haas granted under the Rohm and Haas stock option plans and all other Rohm and Haas equity-based compensation awards, whether vested or unvested as of April 1, 2009, became fully vested and converted into the right to receive cash of \$78.97 per share, less any applicable exercise price. Total cash consideration paid to Rohm and Haas shareholders was \$15,681 million. As part of the purchase price, \$552 million in cash was paid to the Rohm and Haas Company Employee Stock Ownership Plan ("Rohm and Haas ESOP") on April 1, 2009 for 7.0 million shares of Rohm and Haas common stock held by the Rohm and Haas ESOP.

##### Note X—Stockholders' Equity (in part)

##### Employee Stock Ownership Plan

The Company has the Dow Employee Stock Ownership Plan (the "ESOP"), which is an integral part of The Dow Chemical Company Employees' Savings Plan (the "Plan"). A significant majority of full-time employees in the United States are eligi-

ble to participate in the Plan. The Company uses the ESOP to provide the Company's matching contribution in the form of the Company's stock to Plan participants.

In connection with the acquisition of Rohm and Haas (see Note D), \$552 million in cash was paid to the Rohm and Haas Company Employee Stock Ownership Plan (the "Rohm and Haas ESOP") for 7.0 million shares of Rohm and Haas common stock held by the Rohm and Haas ESOP on April 1, 2009. On the date of the acquisition, the Rohm and Haas ESOP was merged into the Plan, and the Company assumed the \$78 million balance of debt at 9.8 percent interest with final maturity in 2020 that was used to finance share purchases by the Rohm and Haas ESOP in 1990. The outstanding balance of the debt was \$64 million at December 31, 2010.

On May 11, 2009, the Company sold 36.7 million shares of common stock (from treasury stock) to the ESOP at a price of \$15.0561 per share for a total of \$553 million. The treasury stock was carried at an aggregate historical cost of \$1,529 million.

Dividends on unallocated shares held by the ESOP are used by the ESOP to make debt service payments. Dividends on allocated shares are used by the ESOP to make debt service payments to the extent needed; otherwise, they are paid to the Plan participants. Shares are released for allocation to participants based on the ratio of the current year's debt service to the sum of the principal and interest payments over the life of the loan. The shares are allocated to Plan participants in accordance with the terms of the Plan.

Compensation expense for allocated shares is recorded at the fair value of the shares on the date of allocation. ESOP shares that have not been released or committed to be released are not considered outstanding for purposes of computing basic and diluted earnings per share.

Compensation expense for ESOP shares allocated to plan participants was \$81 million for the year ended December 31, 2010 (\$48 million for the year ended December 31, 2009); no shares were allocated to plan participants in 2008. At December 31, 2010, 14.4 million shares out of a total 46.0 million shares held by the ESOP had been allocated to participants' accounts; 0.9 million shares were released but unallocated; and 30.7 million shares, at a fair value of \$1,050 million, were considered unearned.

## Profit Sharing Plans

### 3.75

#### TIFFANY & CO. (JAN)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### P. Employee Benefit Plans (in part)

Effective February 1, 2006, the Qualified Plan was amended to exclude all employees hired on or after January 1, 2006. Instead, employees hired on or after January 1, 2006 will be eligible to receive a defined contribution retirement benefit under the Employee Profit Sharing and Retirement Savings ("EPSRS") Plan (see "Employee Profit Sharing and Retirement Savings Plan" below). Employees hired before January 1, 2006 will continue to be eligible for and accrue benefits under the Qualified Plan.

### *Employee Profit Sharing and Retirement Savings Plan*

The Company maintains an EPSRS Plan that covers substantially all U.S.-based employees. Under the profit-sharing feature of the EPSRS Plan, the Company makes contributions, in the form of newly-issued Company Common Stock, to the employees' accounts based on the achievement of certain targeted earnings objectives established by, or as otherwise determined by, the Company's Board of Directors. The Company recorded expense of \$5,000,000 and \$4,750,000 in 2009 and 2007. The Company did not meet its targeted earnings objectives in 2008 and, therefore, did not record any expense. Under the retirement savings feature of the EPSRS Plan, employees who meet certain eligibility requirements may participate by contributing up to 15% of their annual compensation, and the Company may provide up to a 50% matching cash contribution up to 6% of each participant's total compensation. The Company recorded expense of \$5,506,000, \$7,440,000 and \$6,940,000 in 2009, 2008 and 2007. Contributions to both features of the EPSRS Plan are made in the following year.

Under the profit-sharing feature of the EPSRS Plan, the Company's stock contribution is required to be maintained in such stock until the employee has two or more years of service, at which time the employee may diversify his or her Company stock account into other investment options provided under the plan. Under the retirement savings portion of the EPSRS Plan, the employees have the ability to elect to invest their contribution and the matching contribution in Company stock. At January 31, 2010, investments in Company stock represented 26% of total EPSRS Plan assets.

Effective as of February 1, 2006, the EPSRS Plan was amended to provide a defined contribution retirement benefit ("DCRB") to eligible employees hired on or after January 1, 2006 (see "Pensions and Other Postretirement Benefits" above). Under the DCRB, the Company makes contributions each year to each employee's account at a rate based upon age and years of service. These contributions are deposited into individual accounts set up in each employee's name to be invested in a manner similar to the retirement savings portion of the EPSRS Plan. The Company recorded expense of \$1,685,000, \$1,606,000 and \$1,032,000 in 2009, 2008 and 2007.

## **Multi-Employer Pension Plan (MEPP)**

### **3.76**

SARA LEE CORPORATION (JUN)

### *NOTES TO FINANCIAL STATEMENTS*

#### *Note 14—Contingencies and Commitments (in part)*

##### *Multi-Employer Pension Plans*

The corporation participates in various multi-employer pension plans that provide retirement benefits to certain employees covered by collective bargaining agreements (MEPP). Participating employers in a MEPP are jointly responsible for any plan underfunding. MEPP contributions are established by the applicable collective bargaining agreements; however, the MEPPs may impose increased contribution rates and sur-

charges based on the funded status of the plan and the provisions of the Pension Protection Act, which requires substantially underfunded MEPPs to implement rehabilitation plans to improve funded status. Factors that could impact funded status of a MEPP include investment performance, changes in the participant demographics, financial stability of contributing employers and changes in actuarial assumptions.

In addition to regular contributions, the corporation could be obligated to pay additional contributions (known as a complete or partial withdrawal liability) if a MEPP has unfunded vested benefits. These withdrawal liabilities, which would be triggered if the corporation ceases to make contributions to a MEPP with respect to one or more collective bargaining units, would equal the corporation's proportionate share of the unfunded vested benefits based on the year in which the liability is triggered. The corporation believes that certain of the MEPPs in which it participates have unfunded vested benefits, and some are significantly underfunded. Withdrawal liability triggers could include the corporation's decision to close a plant or the dissolution of a collective bargaining unit. Due to uncertainty regarding future withdrawal liability triggers, we are unable to determine the amount and timing of the corporation's future withdrawal liability, if any, or whether the corporation's participation in these MEPPs could have any material adverse impact on its financial condition, results of operations or liquidity. Disagreements over potential withdrawal liability may lead to legal disputes. The corporation currently is involved in litigation with one MEPP and it is probable that the outcome of this litigation may result in a partial withdrawal liability of approximately \$22 million.

The corporation's regular scheduled contributions to MEPPs totaled \$50 million in 2010, \$49 million in 2009 and \$48 million in 2008. The corporation recognized charges for partial withdrawal liabilities of approximately \$23 million in 2010, \$31 million in 2009, and an immaterial amount in 2008.

#### *Note 16—Defined Benefit Pension Plans (in part)*

##### *Multi-Employer Plans*

The corporation participates in multi-employer plans that provide defined benefits to certain employees covered by collective bargaining agreements. Such plans are usually administered by a board of trustees composed of the management of the participating companies and labor representatives. The net pension cost of these plans is equal to the annual contribution determined in accordance with the provisions of negotiated labor contracts. These contributions were \$50 million in 2010, \$49 million in 2009 and \$48 million in 2008. Assets contributed to such plans are not segregated or otherwise restricted to provide benefits only to the employees of the corporation. The future cost of these plans is dependent on a number of factors including the funded status of the plans and the ability of the other participating companies to meet ongoing funding obligations.

In addition to regular contributions, the corporation could be obligated to pay additional contributions (known as complete or partial withdrawal liabilities) if a multi-employer pension plan (MEPP) has unfunded vested benefits. The corporation recognized a partial withdrawal liability in 2010 of \$22 million related to one collective bargaining agreement, all of which was recognized in Selling, general and administrative expenses in the Consolidated Statements of Income. The corporation also recognized a partial withdrawal liability of \$31 million in 2009 as a result of the cessation of

contributions to a MEPP with respect to one collective bargaining unit. Of the total charge to income in 2009, \$13 million was recognized in Cost of sales and \$18 million was recognized in Selling, general and administrative expenses in the Consolidated Statements of Income. The charges for both years was recognized in the results of the North American Fresh Bakery segment.

## DEPRECIATION EXPENSE

### RECOGNITION AND MEASUREMENT

**3.77** FASB ASC 360, *Property, Plant, and Equipment*, defines *depreciation accounting* (the process of allocating the cost of productive facilities over the expected useful lives of the facilities) as a system of accounting that aims to distribute the cost or other basic value of tangible capital assets, less salvage (if any), over the estimated useful life of the unit, which may be a group of assets, in a systematic and rational manner. It is a process of allocation, not valuation.

**3.78** FASB ASC 250 requires that a change in depreciation, amortization, or depletion method for long-lived, nonfinancial assets be accounted for as a change in accounting estimate effected by a change in accounting principle. Changes in accounting estimate are accounted for prospectively, not retrospectively as is required for changes in accounting principle.

## DISCLOSURE

**3.79** FASB ASC 360 stipulates that both the amount of depreciation expense and method(s) of depreciation should be disclosed in the financial statements or notes thereto.

### 3.80

**TABLE 3-4: DEPRECIATION METHODS**

Table 3-4 summarizes the methods of depreciation used to allocate the cost of depreciable assets.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### 1. Accounting Policies (in part)

#### Property and Equipment

Property and equipment are recorded at cost and are depreciated over the estimated useful lives of the related assets using the straight-line method. The estimated useful lives of property and equipment for purposes of computing depreciation are as follows:

|                                                              |            |
|--------------------------------------------------------------|------------|
| Buildings and improvements                                   | 5–30 years |
| Computer hardware and software, and<br>acquired technologies | 1–5 years  |
| Software development costs                                   | 3 years    |
| Furniture and fixtures                                       | 5–7 years  |
| Aircraft                                                     | 20 years   |

Software development costs relate primarily to software coding, system interfaces and testing of the Company's proprietary professional employer information systems and are accounted for in accordance with ASC 350-40, *Internal Use Software*. Capitalized software development costs are amortized using the straight-line method over the estimated useful lives of the software, generally three years.

The Company accounts for its software products in accordance with ASC 985-20, *Costs of Software to be Sold*. This Topic establishes standards of financial accounting and reporting for the costs of computer software to be sold, leased, or otherwise marketed as a separate product or as part of a product or process, whether internally developed and produced or purchased.

The Company periodically evaluates its long-lived assets for impairment in accordance with ASC 360-10, *Property, Plant, and Equipment*. ASC 360-10 requires that an impairment loss be recognized for assets to be disposed of or held-for-use when the carrying amount of an asset is deemed to not be recoverable. If events or circumstances were to indicate that any of the Company's long-lived assets might be impaired, the Company would assess recoverability based

on the estimated undiscounted future cash flows to be generated from the applicable asset. In addition, the Company may record an impairment loss to the extent that the carrying value of the asset exceeded the fair value of the asset. Fair value is generally determined using an estimate of discounted future net cash flows from operating activities or upon disposal of the asset.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions except per share data)

### Note 1. Summary of Significant Accounting Policies (in part)

#### Property, Plant and Equipment

Property, plant and equipment is recorded at cost and depreciated over the estimated useful life of the assets using principally the straight-line method. Ranges of estimated useful lives are as follows:

|                                  | Useful Life |
|----------------------------------|-------------|
| Land improvements                | 6–25 years  |
| Buildings and building equipment | 20–40 years |
| Machinery and equipment          | 3–10 years  |
| Equipment leased to others       | 2–10 years  |

When property, plant and equipment is retired from service or otherwise disposed of, the cost and related amount of depreciation or amortization are eliminated from the asset and accumulated depreciation accounts. The difference, if any, between the net asset value and the proceeds on sale are charged or credited to income. Total depreciation expense included within continuing operations on the Statements of Consolidated Income (Loss) for fiscal years 2010, 2009 and 2008 was \$72.8 million, \$74.3 million and \$81.0 million. The major components of property and the related accumulated depreciation at September 30, were as follows:

|                                  | September 30, 2010 |                             | September 30, 2009 |                             |
|----------------------------------|--------------------|-----------------------------|--------------------|-----------------------------|
|                                  | Cost               | Accumulated<br>Depreciation | Cost               | Accumulated<br>Depreciation |
| Land and land improvements       | \$ 12.5            | \$ 3.7                      | \$ 12.0            | \$ 3.5                      |
| Buildings and building equipment | 112.8              | 75.7                        | 112.7              | 74.5                        |
| Machinery and equipment          | 257.1              | 192.2                       | 269.9              | 199.0                       |
| Equipment leased to others       | 422.6              | 289.7                       | 426.6              | 271.8                       |
| Total                            | \$805.0            | \$561.3                     | \$821.2            | \$548.8                     |

##### I. Property, Plant and Equipment, Net

Property, plant and equipment are carried at historical cost, net of accumulated depreciation. The major classes of property, plant and equipment were as follows:

| December 31                                        | 2009     | 2010     |
|----------------------------------------------------|----------|----------|
| Machinery and equipment                            | \$ 3,195 | \$ 3,388 |
| Buildings and improvements                         | 2,069    | 2,084    |
| Land and improvements                              | 270      | 283      |
| Construction in process                            | 143      | 204      |
| Total property, plant and equipment <sup>(*)</sup> | 5,677    | 5,959    |
| Accumulated depreciation                           | (2,765)  | (2,988)  |
| Property, plant and equipment, net                 | \$ 2,912 | \$ 2,971 |

(\*) Our government customers provide certain facilities; we do not include these facilities above.

We depreciate most of our assets using the straight-line method and the remainder using accelerated methods. Buildings and improvements are depreciated over periods up to 50 years. Machinery and equipment are depreciated over periods up to 30 years.

| Total net charges associated with business realignment initiatives and impairment | \$98,570                        | \$99,131 | \$180,670 |

### Next Century Program

The charge of \$13.6 million recorded in cost of sales during 2010 related primarily to accelerated depreciation of fixed assets over a reduced estimated remaining useful life associated with the Next Century program. A charge of \$1.5 million was recorded in selling, marketing and administrative expenses during 2010 for project administration. Fixed asset impairment charges of \$5.5 million were recorded during 2010. In determining the costs related to fixed asset impairments, fair value was estimated based on the expected sales proceeds. Employee separation costs of \$33.2 million during 2010 were related to expected voluntary and involuntary terminations at the two manufacturing facilities.

### Global Supply Chain Transformation Program

The charge of \$10.1 million recorded in cost of sales during 2009 related to start-up costs and the accelerated depreciation of fixed assets over the estimated remaining useful life. The \$6.1 million recorded in selling, marketing and administrative expenses was associated with project administration. The \$3.4 million net gain on sale of fixed assets resulted from higher proceeds received from the sale of equipment. The \$22.2 million of plant closure expenses for 2009 pertained to the preparation of plants for sale and equipment removal costs. The global supply chain transformation program had

identified six manufacturing facilities which would be closed. As of December 31, 2009, manufacturing facilities located in Dartmouth, Nova Scotia; Oakdale, California; and Montreal, Quebec had been closed and sold. The facilities located in Naugatuck, Connecticut; Reading, Pennsylvania; and Smiths Falls, Ontario had been closed and were being held for sale. The global supply chain transformation program employee separation costs were primarily related to involuntary terminations at the manufacturing facilities of Artisan Confections Company which have been closed. The higher pension settlement loss in 2009 compared to 2008 resulted from an increase in actuarial losses associated with the significant decline in the fair value of pension assets in 2008, along with the increased level of lump sum withdrawals from a defined benefit pension plan related to employee departures.

The 2008 charge of \$77.8 million recorded in cost of sales related primarily to the accelerated depreciation of fixed assets over a reduced estimated remaining useful life and start-up costs. The \$8.1 million recorded in selling, marketing and administrative expenses was associated with project administration. The \$4.9 million of gains on sale of fixed assets resulted from the receipt of proceeds in excess of the carrying value primarily from the sale of a warehousing and distribution facility. The \$23.4 million of plant closure expenses for 2008 resulted from the preparation of plants for sale and production line removal costs. Employee separation costs were related to involuntary terminations at the North American manufacturing facilities which were being closed.

<sup>(1)</sup> Sales and other operating revenue includes sales-based taxes of \$28,547 million, \$25,936 million for 2009 and \$34,508 million for 2008.

<sup>(2)</sup> Other income for 2008 includes a \$62 million gain from the sale of a non-U.S. investment and a related \$143 million foreign exchange loss.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### 1. Summary of Accounting Policies (in part)

**Property, Plant and Equipment.** Depreciation, depletion and amortization, based on cost less estimated salvage value of the asset, are primarily determined under either the unit-of-production method or the straight-line method, which is based on estimated asset service life taking obsolescence into consideration. Maintenance and repairs, including planned major maintenance, are expensed as incurred. Major renewals and improvements are capitalized and the assets replaced are retired.

Interest costs incurred to finance expenditures during the construction phase of multiyear projects are capitalized as part of the historical cost of acquiring the constructed assets. The project construction phase commences with the development of the detailed engineering design and ends when the constructed assets are ready for their intended use. Capitalized interest costs are included in property, plant and equipment and are depreciated over the service life of the related assets.

The Corporation uses the "successful efforts" method to account for its exploration and production activities. Under this method, costs are accumulated on a field-by-field basis with certain exploratory expenditures and exploratory dry holes being expensed as incurred. Costs of productive wells and development dry holes are capitalized and amortized on the unit-of-production method.

The Corporation carries as an asset exploratory well costs when the well has found a sufficient quantity of reserves to justify its completion as a producing well and where the Corporation is making sufficient progress assessing the reserves and the economic and operating viability of the project. Exploratory well costs not meeting these criteria are charged to expense.

Acquisition costs of proved properties are amortized using a unit-of-production method, computed on the basis of total proved oil and gas reserves. Significant unproved properties are assessed for impairment individually and valuation allowances against the capitalized costs are recorded based on the estimated economic chance of success and the length of time that the Corporation expects to hold the properties. Properties that are not individually significant are aggregated by groups and amortized based on development risk and average holding period. The valuation allowances are reviewed at least annually. Other exploratory expenditures, including geophysical costs, other dry hole costs and annual lease rentals, are expensed as incurred.

Unit-of-production depreciation is applied to property, plant and equipment, including capitalized exploratory drilling and development costs, associated with productive depletable extractive properties in the Upstream segment. Unit-of-production rates are based on the amount of proved developed reserves of oil, gas and other minerals that are estimated to be recoverable from existing facilities using current operating methods.

Under the unit-of-production method, oil and gas volumes are considered produced once they have been measured through meters at custody transfer or sales transaction points at the outlet valve on the lease or field storage tank.

Production costs are expensed as incurred. Production involves lifting the oil and gas to the surface and gathering, treating, field processing and field storage of the oil and gas. The production function normally terminates at the outlet

valve on the lease or field production storage tank. Production costs are those incurred to operate and maintain the Corporation's wells and related equipment and facilities. They become part of the cost of oil and gas produced. These costs, sometimes referred to as lifting costs, include such items as labor costs to operate the wells and related equipment; repair and maintenance costs on the wells and equipment; materials, supplies and energy costs required to operate the wells and related equipment; and administrative expenses related to the production activity.

Gains on sales of proved and unproved properties are only recognized when there is no uncertainty about the recovery of costs applicable to any interest retained or where there is no substantial obligation for future performance by the Corporation. Losses on properties sold are recognized when incurred or when the properties are held for sale and the fair value of the properties is less than the carrying value.

Proved oil and gas properties held and used by the Corporation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. Assets are grouped at the lowest level for which there are identifiable cash flows that are largely independent of the cash flows of other groups of assets.

The Corporation estimates the future undiscounted cash flows of the affected properties to judge the recoverability of carrying amounts. Cash flows used in impairment evaluations are developed using annually updated corporate plan investment evaluation assumptions for crude oil commodity prices and foreign currency exchange rates. Annual volumes are based on individual field production profiles, which are also updated annually. Prices for natural gas and other products are based on corporate plan assumptions developed annually by major region and also for investment evaluation purposes. Cash flow estimates for impairment testing exclude derivative instruments.

Impairment analyses are generally based on proved reserves. Where probable reserves exist, an appropriately risk-adjusted amount of these reserves may be included in the impairment evaluation. Impairments are measured by the amount the carrying value exceeds the fair value.

### 8. Property, Plant and Equipment and Asset Retirement Obligations (in part)

| Property, Plant and Equipment<br>(Millions of dollars) | Dec. 31, 2010 |           | Dec. 31, 2009 |           |
|--------------------------------------------------------|---------------|-----------|---------------|-----------|
|                                                        | Cost          | Net       | Cost          | Net       |
| Upstream                                               | \$264,136     | \$148,152 | \$198,036     | \$ 88,319 |
| Downstream                                             | 68,652        | 30,095    | 68,092        | 30,499    |
| Chemical                                               | 29,524        | 14,255    | 28,464        | 13,511    |
| Other                                                  | 11,626        | 7,046     | 11,314        | 6,787     |
| Total                                                  | \$373,938     | \$199,548 | \$305,906     | \$139,116 |

In the Upstream segment, depreciation is generally on a unit-of production basis, so depreciable life will vary by field. In the Downstream segment, investments in refinery and lubes basestock manufacturing facilities are generally depreciated on a straight-line basis over a 25-year life and service station buildings and fixed improvements over a 20-year life. In the Chemical segment, investments in process equipment are generally depreciated on a straight-line basis over a 20-year life.

Accumulated depreciation and depletion totaled \$174,390 million at the end of 2010 and \$166,790 million at the end of 2009. Interest capitalized in 2010, 2009 and 2008 was \$532 million, \$425 million and \$510 million, respectively.

## INCOME TAXES

### RECOGNITION AND MEASUREMENT

**3.86** FASB ASC 740, *Income Taxes*, clarifies the accounting for tax positions in an entity's financial statements. FASB ASC 740 prescribes a more-likely-than-not recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken. Under FASB ASC 740, tax positions will be evaluated for recognition, derecognition, and measurement using consistent criteria. In addition, FASB ASC 740 provides guidance on classification and disclosure. FASB ASC 740 requires, except in certain specified situations, that undistributed earnings of a subsidiary included in consolidated income be accounted for as a temporary difference. Finally, the provisions of FASB ASC 740 provide more information about the uncertainty in income tax assets and liabilities.

## DISCLOSURE

**3.87** FASB ASC 740 sets forth standards for financial presentation and disclosure of income tax liabilities or assets and expense. These requirements vary for public and nonpublic entities. FASB ASC 740 states that amounts and expiration dates of operating loss and tax credit carryforwards for tax purposes should be disclosed. Any portion of the valuation allowance for deferred tax assets for which subsequently recognized tax benefits will be credited directly to contributed capital should also be disclosed. An entity's temporary difference and carryforward information requires additional disclosure, which differs for public and nonpublic entities.

| Nondeductible goodwill                                                                          | 170,644                 | —         | —         |
| Tax restructuring                                                                               | —                       | (25,583)  | (43,361)  |
| Other                                                                                           | (2,878)                 | (2,446)   | (3,438)   |
| Provision for income taxes                                                                      | \$259,006               | \$219,321 | \$221,523 |

The 2010 differences above are further explained as follows:

- State taxes are higher in 2010 than in prior years due to a reduction of deferred tax assets associated with an effective tax rate reduction in California starting in 2011.
- Stock-based compensation increases the Company's effective tax rate to the extent that stock-based com-

pensation expense recorded in the Company's financial statements is non-deductible for tax purposes. This primarily occurs with regard to options granted outside the U.S. The 2010 effective tax rate increase is lower than in prior years due to recently granted stock-based compensation awards having a lower grant date fair value than stock-based compensation awards from

prior years. That effect results in a lower non-deductible expense for financial statement purposes and a lower increase to the Company's effective tax rate. Additionally, in 2010 there is a lower effective tax rate impact associated with non-deductible stock-based compensation awards related to prior year acquisitions to the extent such awards became vested or forfeited in 2010.

- The Company's effective tax rate in all periods is the result of the mix of income earned in various tax jurisdictions that apply a broad range of income tax rates. Operating losses in some non-U.S. jurisdictions cannot be used to offset profits and thus increase the overall effective tax rate. The impact of those losses in 2010 was lower than in prior years. Additionally, in 2010, the Company benefited from increased profit in lower tax jurisdictions, primarily in Asia.
- In 2010, the Company had a favorable resolution of certain issues in an IRS examination of its 2005 and 2006 U.S. federal income tax returns resulting in a reduction of reserves for tax uncertainties and the availability of capital loss carryforwards to offset the tax on the gain from the sales of Zimbra, Inc. and HotJobs.
- During 2010, in connection with tax restructuring activities, the Company reached a formal agreement with the IRS through a pre-filing agreement to treat certain inter-company bad debts as deductible business expenses on the 2009 federal income tax return.

The 2008 provision for income taxes reflects a \$488 million goodwill impairment charge, the majority of which was non-deductible for tax purposes. In addition, the 2008 effective tax rate also included the cumulative tax benefit of a favorable state tax ruling granted in 2008 and retroactive to 2007.

Deferred income taxes reflect the tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The components of deferred income tax assets and liabilities are as follows (in thousands):

|                                                 | December 31 |             |
|-------------------------------------------------|-------------|-------------|
|                                                 | 2009        | 2010        |
| <b>Deferred Income Tax Assets:</b>              |             |             |
| Net operating loss and tax credit carryforwards | \$ 171,883  | \$ 152,138  |
| Stock-based compensation expense                | 234,108     | 178,294     |
| Non-deductible reserves and expenses            | 268,015     | 166,015     |
| Intangible assets                               | 14,336      | 9,283       |
| Gross deferred income tax assets                | 688,342     | 505,730     |
| Valuation allowance                             | (63,364)    | (60,176)    |
| Deferred income tax assets                      | \$ 624,978  | \$ 445,554  |
| <b>Deferred Income Tax Liabilities:</b>         |             |             |
| Unrealized investment gains                     | \$ 4,404    | \$ 3,192    |
| Purchased intangible assets                     | (9,684)     | (11,050)    |
| Investments in equity interests                 | (405,880)   | (447,022)   |
| Deferred income tax liabilities                 | \$(411,160) | \$(454,880) |
| Net deferred income tax assets (liabilities)    | \$ 213,818  | \$ (9,326)  |

As of December 31, 2010, the Company's federal and state net operating loss carryforwards for income tax purposes

were approximately \$211 million and \$26 million, respectively. If not utilized, the federal and state net operating loss carryforwards will begin to expire in 2021. The Company's federal and state research tax credit carryforwards for income tax purposes are approximately \$115 million and \$183 million, respectively. If not utilized, the federal research tax credit carryforwards will begin to expire in 2019. The state research tax credit carryforwards will not expire. Federal and state net operating loss and tax credit carryforwards that result from the exercise of employee stock options are not recorded on the Company's consolidated balance sheets. Federal and state net operating loss and tax credit carryforwards that result from the exercise of employee stock options are accounted for as a credit to additional paid-in capital if and when realized through a reduction in income taxes payable.

The Company has a valuation allowance of approximately \$60 million as of December 31, 2010 against certain deferred income tax assets that are not more likely than not to be realized in future periods. In evaluating the Company's ability to realize its deferred income tax assets, the Company considers all available positive and negative evidence, including operating results, ongoing tax planning, and forecasts of future taxable income on a jurisdiction by jurisdiction basis. The valuation allowance as of December 31, 2010 relates primarily to foreign net operating loss and credit carryforwards that will reduce the provision for income taxes if and when recognized.

The Company provides U.S. income taxes on the earnings of foreign subsidiaries unless the subsidiaries' earnings are considered indefinitely reinvested outside the U.S. As of December 31, 2010, U.S. income taxes were not provided for on a cumulative total of \$2.6 billion of undistributed earnings for certain foreign subsidiaries and a corporate joint venture. If these earnings were to be repatriated, the Company would be subject to additional U.S. income taxes (subject to an adjustment for foreign tax credits). It is not practicable to determine the income tax liability that might be incurred if these earnings were to be repatriated.

The total amount of gross unrecognized tax benefits was \$597 million as of December 31, 2010, of which up to \$437 million would affect the Company's effective tax rate if realized. A reconciliation of the beginning and ending amount of unrecognized tax benefits in 2009 and 2010 is as follows (in thousands):

|                                                  | 2009      | 2010       |
|--------------------------------------------------|-----------|------------|
| Unrecognized tax benefits balance at January 1   | \$798,057 | \$ 893,475 |
| Gross increase for tax positions of prior years  | 18,027    | 44,978     |
| Gross decrease for tax positions of prior years  | (16,044)  | (370,363)  |
| Gross increase for tax positions of current year | 102,855   | 48,570     |
| Gross decrease for tax positions of current year | —         | —          |
| Settlements                                      | (9,420)   | (19,293)   |
| Lapse of statute of limitations                  | —         | (312)      |
| Unrecognized tax benefits balance at December 31 | \$893,475 | \$597,055  |

The total unrecognized tax benefits as of December 31, 2009 and 2010 include approximately \$420 million and \$193 million, respectively, of unrecognized tax benefits that have been netted against the related deferred tax assets. The remaining

balances are recorded on the Company's consolidated balance sheets as follows (in thousands):

|                                                                         | December 31 |            |
|-------------------------------------------------------------------------|-------------|------------|
|                                                                         | 2009        | 2010       |
| Total unrecognized tax benefits balance                                 | \$ 893,475  | \$ 597,055 |
| Amounts netted against related deferred tax assets                      | (419,782)   | (193,275)  |
| Unrecognized tax benefits recorded on consolidated balance sheets       | \$ 473,693  | \$ 403,780 |
| Amounts classified as accrued expenses and other current liabilities    | \$ 53,858   | \$ 111,997 |
| Amounts classified as deferred and other long-term tax liabilities, net | 419,835     | 291,783    |
| Unrecognized tax benefits recorded on consolidated balance sheets       | \$ 473,693  | \$ 403,780 |

The Company recognizes interest and/or penalties related to uncertain tax positions in income tax expense. To the extent accrued interest and penalties do not ultimately become payable, amounts accrued will be reduced and reflected as a reduction of the overall income tax provision in the period that such determination is made. During 2009 and 2010, interest and penalties recorded in the consolidated statements of income were \$3 million and \$4 million, respectively. The amounts of accrued interest and penalties recorded on the consolidated balance sheets as of December 31, 2009 and 2010 were approximately \$15 million and \$16 million, respectively.

The Company's gross amount of unrecognized tax benefits as of December 31, 2010 is \$597 million, of which \$420 million is recorded on the consolidated balance sheets. The agreements reached in 2010 with the IRS resulted in a reduction to the Company's gross unrecognized tax benefits of \$357 million. Of this \$357 million reduction in unrecognized tax benefits, \$202 million resulted in an effective tax rate benefit. The reduction to the gross unrecognized tax benefits has been partially offset by increases from current year tax positions. In total, the gross unrecognized tax benefits as of December 31, 2010 decreased by \$296 million from the recorded balance as of December 31, 2009.

The Company files income tax returns in the U.S. federal jurisdiction and in many U.S. states and foreign jurisdictions. The tax years 1995 to 2009 remain open to examination by the major taxing jurisdictions in which the Company is subject to tax.

During the year ended December 31, 2010, the IRS completed its field examination of the Company's 2005 and 2006 tax returns and issued notices of proposed adjustment. The Company reached an agreement with the IRS in connection with several of the adjustments and adjusted its reserves accordingly. There are other proposed adjustments, including an intercompany transfer pricing matter which could have a significant impact on its tax liability in future years if not resolved favorably. The Company has not agreed to these other proposed adjustments and is contesting them through the administrative process. In the third quarter of 2010, the Company completed a Fast Track Settlement process with the IRS related to certain capital losses that became available for use. In the fourth quarter of 2010, the Company reached a formal agreement through a pre-filing agreement with the IRS to treat certain bad debt expense as a deductible business

expense on the 2009 federal income tax return. The Company has recognized a benefit in 2010 for both capital loss and bad debt expense as a result of the resolution with the IRS.

During the year ended December 31, 2010, the IRS commenced an examination of the Company's 2007 and 2008 tax returns. The Company is also under audit by the California Franchise Tax Board for its 2005 and 2006 tax returns. The Company believes its existing reserves for all tax matters are adequate. The Company also filed with the IRS amended federal tax returns for its fiscal years 2000 to 2008, to elect foreign tax credits for foreign taxes paid versus the previous election to deduct foreign taxes from taxable income, reducing income taxes payable by \$102 million. The Company's tax provisions for all years had been computed on the basis of foreign tax credits, and differences between book and tax treatment were charged to additional paid-in capital due to the interaction of stock option deductions and the foreign tax credit computations. Accordingly, the \$102 million was recorded as a credit to additional paid-in capital with a corresponding reduction of \$49 million in current year income taxes payable and a \$53 million receivable from the IRS for taxes paid in prior years.

The Company is in various stages of the examination and appeals process in connection with all of its tax audits worldwide and it is difficult to determine when these examinations will be settled. It is reasonably possible that over the next twelve-month period the Company may experience an increase or decrease in its unrecognized tax benefits. It is not possible to determine either the magnitude or the range of any increase or decrease at this time.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Amounts in millions of dollars except per share amounts or as otherwise specified.

### Note 9—Income Taxes

Income taxes are recognized for the amount of taxes payable for the current year and for the impact of deferred tax liabilities and assets, which represent future tax consequences of events that have been recognized differently in the financial statements than for tax purposes. Deferred tax assets and liabilities are established using the enacted statutory tax rates and are adjusted for any changes in such rates in the period of change.

Earnings from continuing operations before income taxes consisted of the following:

| Years ended June 30 | 2010     | 2009     | 2008     |
|---------------------|----------|----------|----------|
| United States       | \$ 8,368 | \$ 8,409 | \$ 8,167 |
| International       | 6,679    | 6,004    | 6,718    |
| Total               | 15,047   | 14,413   | 14,885   |

Income taxes on continuing operations consisted of the following:

| Years ended June 30         | 2010    | 2009    | 2008   |
|-----------------------------|---------|---------|--------|
| <b>Current Tax Expense</b>  |         |         |        |
| U.S. federal                | \$2,154 | \$1,619 | \$ 670 |
| International               | 1,616   | 1,268   | 1,515  |
| U.S. state and local        | 295     | 229     | 188    |
|                             | 4,065   | 3,116   | 2,373  |
| <b>Deferred Tax Expense</b> |         |         |        |
| U.S. federal                | 253     | 595     | 1,272  |
| International and other     | (217)   | 22      | (51)   |
|                             | 36      | 617     | 1,221  |
| Total tax expense           | 4,101   | 3,733   | 3,594  |

A reconciliation of the U.S. federal statutory income tax rate to our actual income tax rate on continuing operations is provided below:

| Years ended June 30                        | 2010  | 2009  | 2008  |
|--------------------------------------------|-------|-------|-------|
| U.S. federal statutory income tax rate     | 35.0% | 35.0% | 35.0% |
| Country mix impacts of foreign operations  | −7.5% | −7.1% | −6.8% |
| Income tax reserve adjustments             | −0.4% | −1.3% | −3.4% |
| Patient Protection and Affordable Care Act | 1.0%  | 0.0%  | 0.0%  |
| Other                                      | −0.8% | −0.7% | −0.7% |
| Effective income tax rate                  | 27.3% | 25.9% | 24.1% |

Income tax reserve adjustments represent changes in our net liability for uncertain tax positions related to prior year tax positions.

In March 2010, the Patient Protection and Affordable Care Act (PPACA) was signed into law. One of the provisions of the PPACA changed the taxability of federal subsidies received by plan sponsors that provide retiree prescription drug benefits at least equivalent to Medicare Part D coverage. As a result of the change in taxability of the federal subsidy, we were required to make adjustments to deferred tax asset balances, resulting in a \$152 charge to income tax expense.

Tax benefits credited to shareholders' equity totaled \$5 and \$556 for the years ended June 30, 2010 and 2009, respectively. These primarily relate to the tax effects of net investment hedges, excess tax benefits from the exercise of stock options and the impacts of certain adjustments to pension and other retiree benefit obligations recorded in shareholders' equity.

We have undistributed earnings of foreign subsidiaries of approximately \$30 billion at June 30, 2010, for which deferred taxes have not been provided. Such earnings are considered indefinitely invested in the foreign subsidiaries. If such earnings were repatriated, additional tax expense may result, although the calculation of such additional taxes is not practicable.

On July 1, 2007, we adopted accounting guidance on the accounting for uncertainty in income taxes. The adoption of the guidance resulted in a decrease to retained earnings as of July 1, 2007 of \$232, which was reflected as a cumulative effect of a change in accounting principle with a corresponding increase to the net liability for uncertain tax positions. The impact primarily reflects the accrual of additional statutory interest and penalties as required by accounting guidance, partially offset by adjustments to existing balances for uncertain tax positions to comply with measurement principles. The implementation of the guidance also resulted in a reduction in our net tax liabilities for uncertain tax positions related to prior acquisitions accounted for under purchase accounting, resulting in an \$80 decrease to goodwill.

A reconciliation of the beginning and ending liability for uncertain tax positions is as follows:

|                                             | 2010    | 2009    | 2008    |
|---------------------------------------------|---------|---------|---------|
| Beginning of year                           | \$2,003 | \$2,582 | \$2,971 |
| Increases in tax positions for prior years  | 128     | 116     | 164     |
| Decreases in tax positions for prior years  | (146)   | (485)   | (576)   |
| Increases in tax positions for current year | 193     | 225     | 375     |
| Settlements with taxing authorities         | (216)   | (172)   | (260)   |
| Lapse in statute of limitations             | (45)    | (68)    | (200)   |
| Currency translation                        | (120)   | (195)   | 108     |
| End of year                                 | 1,797   | 2,003   | 2,582   |

The Company is present in over 150 taxable jurisdictions and, at any point in time, has 50–60 audits underway at various stages of completion. We evaluate our tax positions and establish liabilities for uncertain tax positions that may be challenged by local authorities and may not be fully sustained, despite our belief that the underlying tax positions are fully supportable. Uncertain tax positions are reviewed on an ongoing basis and are adjusted in light of changing facts and circumstances, including progress of tax audits, developments in case law and closing of statute of limitations. Such adjustments are reflected in the tax provision as appropriate. The Company is making a concerted effort to bring its audit inventory to a more current position. We have done this by working with tax authorities to conduct audits for several

open years at once. We have tax years open ranging from 1997 and forward. We are generally not able to reliably estimate the ultimate settlement amounts until the close of the audit. While we do not expect material changes, it is possible that the amount of unrecognized benefit with respect to our uncertain tax positions will significantly increase or decrease within the next 12 months related to the audits described above. At this time, we are not able to make a reasonable estimate of the range of impact on the balance of uncertain tax positions or the impact on the effective tax rate related to these items.

Included in the total liability for uncertain tax positions at June 30, 2010 is \$1,318 that, depending on the ultimate resolution, could impact the effective tax rate in future periods.

We recognize accrued interest and penalties related to uncertain tax positions in income tax expense. As of June 30, 2010 and 2009, we had accrued interest of \$622 and \$636 and penalties of \$89 and \$100, respectively, that are not included in the above table. During the fiscal years ended June 30, 2010 and 2009, we recognized \$38 and \$119 in interest and \$(8) and \$(4) in penalties, respectively.

Deferred income tax assets and liabilities were comprised of the following:

| June 30                                                        | 2010          | 2009          |
|----------------------------------------------------------------|---------------|---------------|
| <b>Deferred Tax Assets</b>                                     |               |               |
| Pension and postretirement benefits                            | \$ 1,717      | \$ 1,395      |
| Stock-based compensation                                       | 1,257         | 1,182         |
| Loss and other carryforwards                                   | 595           | 439           |
| Goodwill and other intangible assets                           | 312           | 331           |
| Accrued marketing and promotion                                | 216           | 167           |
| Fixed assets                                                   | 102           | 114           |
| Unrealized loss on financial and foreign exchange transactions | 88            | 577           |
| Accrued interest and taxes                                     | 88            | 120           |
| Advance payments                                               | 16            | 15            |

<sup>(1)</sup> Fiscal year ended August 30, 2008 contained 53 weeks; all other fiscal years contained 52 weeks.

##### Current Benefit

Of the current federal benefit of \$7.7 million for Fiscal 2010 reflected in the table above, \$5.8 million relates to the carryback of our Fiscal 2009 losses and the remaining benefit relates to settlements of uncertain tax positions as a result of our federal audit. On November 6, 2009, the President of the United States signed into law the Worker, Homeownership, and Business Assistance Act of 2009, which expanded the NOL carryback period from two to five years, allowing us

to carryback all Fiscal 2009 NOLs. We filed our original tax return and carryback claim in December 2009 and received our federal refund of \$21.9 million during our second quarter of Fiscal 2010. During the third quarter of Fiscal 2010, we filed a superseding federal tax return and amended our original carryback request, recording an additional benefit of approximately \$1.0 million. As a result, we recorded a total tax benefit of \$5.8 million in Fiscal 2010 related to the portion of the 2009 NOL that was previously not able to be carried back and reduced the associated valuation allowance. The current federal benefit recorded in Fiscal 2009 was primarily the amount of tax benefit that we were able to carryback under the then current legislation for taxable losses incurred during Fiscal 2009. The federal benefit recorded in Fiscal 2008 was primarily a result of tax planning initiatives recorded during the year.

The state benefit recorded in Fiscal 2010 and Fiscal 2009 is primarily a result of tax planning initiatives recorded during those years. The state benefit recorded during Fiscal 2008 is primarily a result of settlements of uncertain tax positions with various jurisdictions occurring during the year.

#### *Deferred Provision (Benefit)*

The deferred federal tax expense recorded during Fiscal 2010 is primarily the result of tax planning initiatives and changes in the valuation allowance recorded during the year. The deferred federal tax expense reported during Fiscal 2009 is primarily a result of establishing a full valuation allowance on all deferred tax assets during the year.

The deferred state tax expense reported during Fiscal 2009 is primarily a result of recording a full valuation allowance on all deferred tax assets during the year.

The following is a reconciliation of the U.S. statutory income tax rate to our effective tax rate:

| (A percentage)                                    | Year Ended <sup>(1)</sup> |                 |                 |

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. At August 28, 2010, our deferred tax assets included \$1.8 million of unused tax credits, of which \$365,000 can be carried forward 20 years and \$1.4 million will expire in Fiscal 2014. In addition, at August 28, 2010, our deferred tax assets also included \$1.5 million of NOL carryforwards, \$115,000 of which is Federal NOLs that can be carried forward 20 years, and state NOLs in the amount of \$1.3 million that will begin to expire in Fiscal 2013, if not otherwise used by us. A valuation allowance of \$(41.8) million has been recognized to offset the related deferred tax assets due to the uncertainty of realizing the deferred tax assets.

### Unrecognized Tax Benefits

At the beginning of Fiscal 2008, we adopted ASC 740 *Income Taxes*. ASC 740 prescribes criteria for the financial statement recognition and measurement of tax positions taken or expected to be taken in a tax return, among other items. In addition, ASC 740 provides guidance on classification of tax liabilities, interest and penalties, accounting interim periods, disclosure and transition with respect to the application of the new accounting standard. As a result of this adoption, we recognized a cumulative effect adjustment of \$8.5 million as a reduction to the balance of retained earnings, an increase of \$7.1 million in deferred tax assets, and an increase of \$15.6 million in tax liabilities. The amount of unrecognized tax benefits totaled \$21.8 million, of which \$8.3 million was accrued for interest and penalties. It is our policy to recognize interest and penalties accrued relative to unrecognized tax benefits into tax expense.

Changes in the unrecognized tax benefits are as follows:

| (In thousands)                                  | Fiscal 2010          | Fiscal 2009 | Fiscal 2008          |
|-------------------------------------------------|----------------------|-------------|----------------------|
| Unrecognized tax benefits—beginning balance     | \$(9,012)            | \$(9,469)   | \$(21,807)           |
| Gross increases—tax positions in a prior period | (254)                | (57)        | (979)                |
| Gross decreases—tax positions in a prior period | 2,900 <sup>(1)</sup> | 677         | 7,218 <sup>(3)</sup> |
| Gross increases—current period tax positions    | (57)                 | (163)       | (1,862)              |
| Settlements                                     | 546 <sup>(1)</sup>   | —           | 7,961 <sup>(3)</sup> |
| Unrecognized tax benefits—ending balance        | \$(5,877)            | \$(9,012)   | \$(9,469)            |

<sup>(1)</sup> The \$2.9 million decrease in unrecognized benefit reserves is primarily a reduction of reserves associated with positive settlements of uncertain tax positions related to the finalization of the IRS examination of our federal income tax returns for Fiscal 2006 through Fiscal 2008.

<sup>(2)</sup> The \$546,000 reduction in reserves is actual cash payments as result of settlements of uncertain tax positions in various taxing jurisdictions.

<sup>(3)</sup> During Fiscal 2008, there were favorable settlements of uncertain tax positions with various taxing jurisdictions. The original unrecognized tax benefit associated with these positions was \$14.6 million, of which \$8.0 million was paid in cash and included in "Settlements." The \$6.6 million balance of this reserve, inclusive of related deferred taxes, is included in "Gross decreases-tax positions in a prior period."

If the remaining uncertain positions are ultimately resolved, all of the \$5.9 million could have a positive impact on our effective tax rate, as the deferred tax assets associated with these positions have a full valuation allowance established against them. Currently, \$2.5 million is accrued for interest and penalties.

We file tax returns in the U.S. federal jurisdiction, as well as various international and state jurisdictions. Our federal income tax returns for Fiscal 2006 through Fiscal 2008 were under examination by the IRS and finalized during the third quarter of Fiscal 2010. Although certain years are no longer subject to examinations by the IRS and various state taxing authorities, NOL carryforwards generated in those years may still be adjusted upon examination by the IRS or state taxing authorities if they either have been or will be used in a future period. A number of years may elapse before an uncertain tax position is audited and finally resolved, and it is often very difficult to predict the outcome of such audits. Periodically, various state and local jurisdictions conduct audits, therefore, a variety of years are subject to state and local jurisdiction review.

We do not believe within the next twelve months there will be a significant change in the total amount of unrecognized tax benefits as of August 28, 2010.

## Operating Loss and Tax Credit Carryforwards

### 3.91

SPECTRUM BRANDS HOLDINGS, INC. (SEP)

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(In thousands, except per share amounts)

#### (8) Income Taxes (in part)

The Company, as of September 30, 2010, has U.S. federal and state net operating loss carryforwards of approximately \$1,087,489 and \$936,208, respectively. These net operating loss carryforwards expire through years ending in 2031. The Company has foreign loss carryforwards of approximately \$195,456 which will expire beginning in 2011. Certain of the foreign net operating losses have indefinite carryforward periods. The Company is subject to an annual limitation on the use of its net operating losses that arose prior to its emergence from bankruptcy. The Company has had multiple changes of ownership, as defined under IRC Section 382, that subject the Company's U.S. federal and state net

operating losses and other tax attributes to certain limitations. The annual limitation is based on a number of factors including the value of the Company's stock (as defined for tax purposes) on the date of the ownership change, its net unrealized built in gain position on that date, the occurrence of realized built in gains in years subsequent to the ownership change, and the effects of subsequent ownership changes (as defined for tax purposes) if any. Based on these factors, the Company projects that \$296,160 of the total U.S. federal and \$462,837 of the state net operating loss carryforwards will expire unused. In addition, separate return year limitations apply to limit the Company's utilization of the acquired Russell Hobbs U.S. federal and state net operating losses to future income of the Russell Hobbs subgroup. The Company also projects that \$37,542 of the total foreign loss carryforwards will expire unused. The Company has provided a full valuation allowance against those deferred tax assets.

The Predecessor Company recognized income tax expense of approximately \$124,054 related to the gain on the settlement of liabilities subject to compromise and the modification of the senior secured credit facility in the period from October 1, 2008 through August 30, 2009. The Company, has, in accordance with the IRC Section 108 reduced its net operating loss carryforwards for cancellation of debt income that arose from its emergence from Chapter 11 of the Bankruptcy Code, under IRC Section 382(1)(6).

##### Note 10—Income and Other Taxes

Income before income taxes included approximately \$1.8 billion, \$2.7 billion, and \$3.3 billion related to foreign operations in Fiscal 2010, 2009, and 2008, respectively.

The provision for income taxes consisted of the following:

| (In millions)              | Fiscal Year Ended |                  |                  |
|----------------------------|-------------------|------------------|------------------|
|                            | January 29, 2010  | January 30, 2009 | February 1, 2008 |
| Current:                   |                   |                  |                  |
| Domestic                   | \$527             | \$465            | \$ 901           |
| Foreign                    | 116               | 295              | 287              |
| Current                    | 643               | 760              | 1,188            |
| Deferred:                  |                   |                  |                  |
| Domestic                   | (12)              | 15               | (230)            |
| Foreign                    | (40)              | 71               | (78)             |
| Deferred                   | (52)              | 86               | (308)            |
| Provision for income taxes | \$591             | \$846            | \$ 880           |

Deferred tax assets and liabilities for the estimated tax impact of temporary differences between the tax and book basis of assets and liabilities are recognized based on the enacted statutory tax rates for the year in which Dell expects the differences to reverse. A valuation allowance is established against

a deferred tax asset when it is more likely than not that the asset or any portion thereof will not be realized. Based upon all the available evidence including expectation of future taxable income, Dell has provided a valuation allowance of \$41 million and \$31 million for Fiscal 2010 and 2009, respectively, related to state income credit carryforwards, and \$22 million related to net operating losses for Fiscal 2010. Dell has determined that it will be able to realize the remainder of its deferred tax assets.

The components of Dell's net deferred tax asset are as follows:

| (In millions)                                              | January 29, 2010 | January 30, 2009 |

| Unrealized gains                                           | —                | (14)             |
| Other                                                      | (65)             | (59)             |
| Deferred tax liabilities                                   | (685)            | (400)            |
| Net deferred tax asset                                     | \$ 681           | \$1,067          |
| Current portion (included in other current assets)         | \$ 444           | \$ 499           |
| Non-current portion (included in other non-current assets) | 237              | 568              |
| Net deferred tax asset                                     | \$ 681           | \$1,067          |

During Fiscal 2010, Dell recorded \$26 million of deferred tax assets related to acquired net operating loss and credit carryforwards, net of valuation allowances of \$17 million. The offset for recording the acquired net operating loss and credit carryforwards was \$9 million to goodwill. During Fiscal 2009, Dell recorded \$76 million of deferred tax assets related to net operating loss and credit carryforwards acquired during the year. The offset for recording the acquired net operating loss and credit carryforwards was \$56 million to goodwill and \$20 million to additional paid in capital. Utilization of the acquired carryforwards is subject to limitations due to ownership changes that may delay the utilization of a portion of the acquired carryforwards. No additional valuation allowances have been placed on the acquired net operating loss and

credit carryforwards. The carryforwards for significant taxing jurisdictions expire beginning in Fiscal 2017.

Deferred taxes have not been recorded on the excess book basis in the shares of certain foreign subsidiaries because these basis differences are not expected to reverse in the foreseeable future and are expected to be permanent in duration. These basis differences in the amount of approximately \$11.3 billion arose primarily from the undistributed book earnings of substantially all of the subsidiaries in which Dell intends to reinvest indefinitely. The basis differences could reverse through a sale of the subsidiaries or the receipt of dividends from the subsidiaries, as well as various other events. Net of available foreign tax credits, residual income tax of approximately \$3.7 billion would be due upon reversal of this excess book basis as of January 29, 2010.

A portion of Dell's operations is subject to a reduced tax rate or is free of tax under various tax holidays that expire in whole or in part during Fiscal 2011 through 2019. Many of these tax holidays and reduced tax rates may be extended when certain conditions are met or may be terminated early if certain conditions are not met. The income tax benefits attributable to the tax status of these subsidiaries were estimated to be approximately \$149 million (\$0.08 per share) in Fiscal 2010, \$338 million (\$0.17 per share) in Fiscal 2009, and \$502 million (\$0.23 per share) in Fiscal 2008.

The effective tax rate differed from the statutory U.S. federal income tax rate as follows:

|                                         | Fiscal Year Ended   |                     |                     |
|-----------------------------------------|---------------------|---------------------|---------------------|
|                                         | January 29,<br>2010 | January 30,<br>2009 | February 1,<br>2008 |
| U.S. federal statutory rate             | 35.0%               | 35.0%               | 35.0%               |
| Foreign income taxed at different rates | (7.5)               | (9.8)               | (12.5)              |
| In-process research and development     | —                   | —                   | 0.8                 |
| Other                                   | 1.7                 | 0.2                 | (0.3)               |
| Total                                   | 29.2%               | 25.4%               | 23.0%               |

At the beginning of Fiscal 2008, Dell adopted the accounting guidance for uncertain tax positions, which requires that a tax benefit from an uncertain tax position not be recognized in the financial statements unless it is more likely than not that the position will be sustained upon examination. The cumulative effect of adoption of this standard was a \$62 million increase in tax liabilities and a corresponding decrease in stockholders' equity.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

| (In millions)                                          | Total   |
|--------------------------------------------------------|---------|
| Balance at February 3, 2007 (adoption)                 | \$1,096 |
| Increases related to tax positions of the current year | 390     |
| Increases related to tax positions of prior years      | 34      |
| Reductions for tax positions of prior years            | (13)    |

| Balance at January 30, 2009                            | 1,538   |
| Increases related to tax positions of the current year | 298     |
| Increases related to tax positions of prior years      | 32      |
| Reductions for tax positions of prior years            | (69)    |
| Lapse of statute of limitations                        | (3)     |
| Settlements                                            | (3)     |
| Balance at January 29, 2010                            | \$1,793 |

Fiscal 2009 reductions for tax positions of prior years in the table above include \$163 million of items that did not impact Dell's effective tax rate for Fiscal 2009. These items include foreign currency translation, withdrawal of positions expected to be taken for prior year tax filings, and a reduction that is included in the deferred tax asset valuation allowance at January 30, 2009. There were no significant items of a similar nature in Fiscal 2010.

Associated with the unrecognized tax benefits of \$1.8 billion, \$1.5 billion, and \$1.5 billion at January 29, 2010, January 30, 2009, and February 1, 2008, respectively, are interest and penalties as well as \$209 million, \$166 million and \$171 million of offsetting tax benefits associated with estimated transfer pricing, the benefit of interest deductions, and state income tax benefits. The net amount of \$2.1 billion, if recognized, would favorably affect Dell's effective tax rate.

Interest and penalties related to income tax liabilities are included in income tax expense. The balance of gross accrued interest and penalties recorded in the Consolidated Statements of Financial Position at January 29, 2010, January 30, 2009, and February 1, 2008 was \$507 million, \$400 million, and \$288 million, respectively. During Fiscal 2010, 2009, and 2008, \$107 million, \$112 million, and \$88 million, respectively, related to interest and penalties were included in income tax expense.

Dell is currently under income tax audits in various jurisdictions, including the United States. The tax periods open to examination by the major taxing jurisdictions to which Dell is subject include fiscal years 1997 through 2010. As a result of these audits, Dell maintains ongoing discussions and negotiations relating to tax matters with the taxing authorities in these various jurisdictions. Dell's U.S. federal income tax returns for fiscal years 2007 through 2009 are currently under examination by the Internal Revenue Service ("IRS"). In April 2009, the IRS issued a Revenue Agent's Report ("RAR") for fiscal years 2004 through 2006 proposing certain assessments primarily related to transfer pricing matters. Dell disagrees with certain of the proposed assessments, primarily related to transfer pricing matters, contained in the RAR and

has contested them through the IRS administrative appeals procedures. The first meeting between Dell and the IRS Appeals Division is scheduled for early 2010. Dell anticipates the appeals process will involve multiple meetings and could take several years to complete. Dell believes that adequate reserves have been provided related to all matters contained in tax periods open to examination. However, should Dell experience an unfavorable outcome in this matter, such outcome could have a material impact on its results of operations, financial position, and cash flows. Although the timing of income tax audit resolutions and negotiations with taxing authorities are highly uncertain, Dell does not anticipate a significant change to the total amount of unrecognized income tax benefits within the next 12 months.

Dell takes certain non-income tax positions in the jurisdictions in which it operates and has received certain non-income tax assessments from various jurisdictions. Dell believes its positions in these non-income tax litigation matters are supportable, that a liability is not probable, and that it will ultimately prevail. In the normal course of business, Dell's positions and conclusions related to its non-income taxes could be challenged and assessments may be made. To the extent new information is obtained and Dell's views on its positions, probable outcomes of assessments, or litigation change, changes in estimates to Dell's accrued liabilities would be recorded in the period in which such determination is made.

## Taxes on Undistributed Earnings

### 3.93

GOOGLE INC. (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 15. Income Taxes (in part)

Income before income taxes included income from domestic operations of \$2,059 million, \$3,579 million, and \$4,948 million for 2008, 2009, and 2010, and income from foreign operations of \$3,794 million, \$4,802 million, and \$5,848 million for 2008, 2009, and 2010. Substantially all of the income from foreign operations was earned by an Irish subsidiary.

The provision for income taxes consists of the following (in millions):

|                            | Year Ended December 31 |         |         |
|----------------------------|------------------------|---------|---------|
|                            | 2008                   | 2009    | 2010    |
| Current:                   |                        |         |         |
| Federal                    | \$1,348                | \$1,531 | \$1,657 |
| State                      | 468                    | 450     | 458     |
| Foreign                    | 91                     | 148     | 167     |
| Total                      | 1,907                  | 2,129   | 2,282   |
| Deferred:                  |                        |         |         |
| Federal                    | (198)                  | (273)   | (25)    |
| State                      | (63)                   | 13      | 47      |
| Foreign                    | (20)                   | (8)     | (13)    |
| Total                      | (281)                  | (268)   | 9       |
| Provision for income taxes | \$1,626                | \$1,861 | \$2,291 |

The reconciliation of federal statutory income tax rate to our effective income tax rate is as follows (in millions):

|                                                        | Year Ended December 31 |          |          |
|--------------------------------------------------------|------------------------|----------|----------|
|                                                        | 2008                   | 2009     | 2010     |
| Expected provision at federal statutory tax rate (35%) | \$ 2,049               | \$ 2,933 | \$ 3,779 |
| State taxes, net of federal benefit                    | 263                    | 302      | 322      |
| Stock-based compensation expense                       | 91                     | 63       | 79       |
| Change in valuation allowance                          | 313                    | (41)     | (34)     |
| Foreign rate differential                              | (1,020)                | (1,339)  | (1,769)  |
| Federal research credit                                | (52)                   | (56)     | (84)     |
| Tax exempt interest                                    | (52)                   | (15)     | (12)     |
| Other permanent differences                            | 34                     | 14       | 10       |
| Provision for income taxes                             | \$ 1,626               | \$ 1,861 | \$ 2,291 |

We have not provided U.S. income taxes and foreign withholding taxes on the undistributed earnings of foreign subsidiaries as of December 31, 2010 because we intend to permanently reinvest such earnings outside the U.S. If these foreign earnings were to be repatriated in the future, the related U.S. tax liability may be reduced by any foreign income taxes previously paid on these earnings. As of December 31, 2010, the cumulative amount of earnings upon which U.S. income taxes have not been provided is approximately \$17.5 billion. Determination of the amount of unrecognized deferred tax liability related to these earnings is not practicable.

### 3.94

TUPPERWARE BRANDS CORPORATION (DEC)

#### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

##### Note 13. Income Taxes (in part)

As of December 25, 2010 and December 26, 2009, the Company's gross unrecognized tax benefit was \$27.3 million and \$53.1 million, respectively. The Company expects to settle one or more foreign audits in the next twelve months that will result in a decrease in the amount of accrual for uncertain tax positions of up to \$2.0 million. For the remaining balance as of December 25, 2010, the Company is not able to reliably estimate the timing or ultimate settlement amount. While the Company does not currently expect material changes, it is possible that the amount of unrecognized benefit with respect to the uncertain tax positions will significantly increase or decrease related to audits in various foreign jurisdictions that may conclude during that period or new developments that could also in turn impact the Company's assessment relative to the establishment of valuation allowances against certain existing deferred tax assets. At this time, the Company is not able to make a reasonable estimate of the range of impact on the balance of unrecognized tax benefits or the impact on the effective tax rate related to these items.

As of December 25, 2010, the Company had \$845.8 million of undistributed earnings of international subsidiaries. The Company has not provided for U.S. deferred income taxes on these undistributed earnings because of its intention to

indefinitely reinvest these earnings. The determination of the amount of unrecognized deferred U.S. income tax liability is not practicable because of the complexities associated with its hypothetical calculation.

## CONSTRUCTION-TYPE AND PRODUCTION-TYPE CONTRACTS

### RECOGNITION AND MEASUREMENT

**3.95** Accounting and disclosure requirements for construction-type and production-type contracts are discussed in FASB ASC 605-35. In accounting for contracts, the basic accounting policy decision is the choice between the percentage-of-completion method and the completed-contract method. The determination of which is preferable is based on an evaluation of the circumstances.

#### 3.96

**TABLE 3-5: METHOD OF ACCOUNTING FOR CONSTRUCTION-TYPE AND PRODUCTION-TYPE CONTRACTS**

Table 3-5 shows that usually the percentage of completion method or a modification of this method is used to recognize revenue on long-term contracts.

|                                             | Number of Entities |      |      |
|---------------------------------------------|--------------------|------|------|
|                                             | 2010               | 2009 | 2008 |
| Percentage of completion: input based.....  | 43                 | 63   | 56   |
| Percentage of completion: output based..... | 32                 | 41   | 40   |
| Completed contract.....                     | 8                  | 20   | 17   |

### PRESENTATION AND DISCLOSURE EXCERPTS

#### Construction and Production Type Contracts

##### 3.97

CACI INTERNATIONAL INC (JUN)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 3. Summary of Significant Accounting Policies (in part)

##### Revenue Recognition

The Company generates almost all of its revenue from three different types of contractual arrangements: cost-plus-fee contracts, time-and-materials contracts, and fixed price contracts. Revenue on cost-plus-fee contracts is recognized to the extent of costs incurred plus an estimate of the applicable fees earned. The Company considers fixed fees under cost-plus-fee contracts to be earned in proportion to the allowable costs incurred in performance of the contract. For cost-plus-

fee contracts that include performance based fee incentives, and that are subject to the provisions of ASC 605-35, *Revenue Recognition—Construction-Type and Production-Type Contracts* (ASC 605-35), the Company recognizes the relevant portion of the expected fee to be awarded by the customer at the time such fee can be reasonably estimated, based on factors such as the Company's prior award experience and communications with the customer regarding performance. For such cost-plus-fee contracts subject to the provisions of ASC 605-10-S99, *Revenue Recognition—SEC Materials* (ASC 605-10-S99), the Company recognizes the relevant portion of the fee upon customer approval. Revenue on time-and-material contracts is recognized to the extent of billable rates times hours delivered for services provided, to the extent of material cost for products delivered to customers, and to the extent of expenses incurred on behalf of the customers. Shipping and handling fees charged to the customers are recognized as revenue at the time products are delivered to the customers.

The Company has four basic categories of fixed price contracts: fixed unit price, fixed price-level of effort, fixed price-completion, and fixed price-license. Revenue on fixed unit price contracts, where specified units of output under service arrangements are delivered, is recognized as units are delivered based on the specified price per unit. Revenue on fixed unit price maintenance contracts is recognized ratably over the length of the service period. Revenue for fixed price-level of effort contracts is recognized based upon the number of units of labor actually delivered multiplied by the agreed rate for each unit of labor.

A significant portion of the Company's fixed price-completion contracts involve the design and development of complex client systems. For these contracts that are within the scope of ASC 605-35, revenue is recognized on the percentage-of-completion method using costs incurred in relation to total estimated costs. For fixed price-completion contracts that are not within the scope of ASC 605-35, revenue is generally recognized ratably over the service period. The Company's fixed price-license agreements and related services contracts are primarily executed in its international operations. As the agreements to deliver software require significant production, modification or customization of software, revenue is recognized using the contract accounting guidance of ASC 605-35. For agreements to deliver data under license and related services, revenue is recognized as the data is delivered and services are performed. Except for losses on contracts accounted for under ASC 605-10-S99, provisions for estimated losses on uncompleted contracts are recorded in the period such losses are determined. Losses on contracts accounted for under ASC 605-10-S99 are recognized as the services and materials are provided.

The Company's contracts may include the provision of more than one of its services. In these situations, and for applicable arrangements, revenue recognition includes the proper identification of separate units of accounting and the allocation of revenue across all elements based on relative fair values, with proper consideration given to the guidance provided by other authoritative literature.

Contract accounting requires judgment relative to assessing risks, estimating contract revenue and costs, and making assumptions for schedule and technical issues. Due to the size and nature of many of the Company's contracts, the estimation of total revenue and cost at completion is complicated and subject to many variables. Contract costs include material, labor, subcontracting costs, and other direct costs, as

well as an allocation of allowable indirect costs. Assumptions have to be made regarding the length of time to complete the contract because costs also include expected increases in wages and prices for materials. For contract change orders, claims or similar items, the Company applies judgment in estimating the amounts and assessing the potential for realization. These amounts are only included in contract value when they can be reliably estimated and realization is considered probable. Incentives or penalties related to performance on contracts are considered in estimating sales and profit rates, and are recorded when there is sufficient information for the Company to assess anticipated performance. Estimates of award fees for certain contracts are also a factor in estimating revenue and profit rates based on actual and anticipated awards.

Long-term development and production contracts make up a large portion of the Company's business, and therefore the amounts recorded in the Company's financial statements using contract accounting methods are material. For federal government contracts, the Company follows U.S. government procurement and accounting standards in assessing the allowability and the allocability of costs to contracts. Due to the significance of the judgments and estimation processes, it is likely that materially different amounts could be recorded if the Company used different assumptions or if the underlying circumstances were to change. The Company closely monitors compliance with, and the consistent application of, its critical accounting policies related to contract accounting. Business operations personnel conduct thorough periodic contract status and performance reviews. When adjustments in estimated contract revenue or costs are required, any changes from prior estimates are generally included in earnings in the current period. Also, regular and recurring evaluations of contract cost, scheduling and technical matters are performed by management personnel who are independent from the business operations personnel performing work under the contract. Costs incurred and allocated to contracts with the U.S. government are scrutinized for compliance with regulatory standards by Company personnel, and are subject to audit by the Defense Contract Audit Agency (DCAA).

From time to time, the Company may proceed with work based on client direction prior to the completion and signing of formal contract documents. The Company has a formal review process for approving any such work. Revenue associated with such work is recognized only when it can be reliably estimated and realization is probable. The Company bases its estimates on previous experiences with the client, communications with the client regarding funding status, and its knowledge of available funding for the contract or program.

The Company's U.S. government contracts (94.8 percent of total revenue in the year ended June 30, 2010) are subject to subsequent government audit of direct and indirect costs. Incurred cost audits have been completed through June 30, 2005. Management does not anticipate any material adjustment to the consolidated financial statements in subsequent periods for audits not yet completed.

### 3.98

#### LOCKHEED MARTIN CORPORATION (DEC)

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

###### *Note 1—Significant Accounting Policies (in part)*

**Sales and earnings**—We record net sales and estimated profits on a percentage-of-completion (POC) basis for cost-reimbursable and fixed-price design, development, and production (DD&P) contracts. Revenue is recorded on time-and-materials contracts as the work is performed based on agreed-upon hourly rates and allowable costs. The POC method for DD&P contracts depends on the nature of the products provided under the contract. For example, for contracts that require us to perform a significant level of development effort in comparison to the total value of the contract and/or to deliver less than substantial quantities of similar items, sales are recorded using the cost-to-cost method to measure progress toward completion. Under the cost-to-cost method of accounting, we recognize sales and an estimated profit as costs are incurred based on the proportion that the incurred costs bear to total estimated costs. For contracts that require us to provide a substantial number of similar items without a significant level of development effort, we record sales and profit on a percentage-of-completion basis using units-of-delivery as the basis to measure progress toward completing the contract.

When adjustments in estimated contract revenues or estimated costs at completion are required on DD&P contracts, any changes from prior estimates are recognized in the current period for the inception-to-date effect of the changes. When estimates of total costs to be incurred on a contract exceed total estimates of revenue to be earned, a provision for the entire loss on the contract is recorded in the period in which the loss is determined.

Award fees and incentives, as well as penalties related to contract performance, are considered in estimating sales and profit rates on DD&P contracts. We consider estimates of award fees in estimating sales and profit rates based on past experience and anticipated performance. We record incentives or penalties when there is sufficient information to assess anticipated contract performance. We do not recognize incentive provisions that increase or decrease earnings based solely on a single significant event until the event occurs. We only include amounts representing contract change orders, claims, or other items in contract value when they can be reliably estimated and realization is probable.

For cost-reimbursable contracts for services that provide for award and incentive fees, we record net sales as services are performed, except for the award and incentive fees. Award and incentive fees are recorded when they are fixed or determinable, generally at the date the amount is communicated to us by the customer. This approach results in the recognition of such fees at contractual intervals (typically every six months) throughout the contract and is dependent on the customer's processes for notification of awards and issuance of formal notifications. Under a fixed-price service contract, we get paid a predetermined fixed amount for a specified scope of work and generally have full responsibility for the costs associated with the contract and the resulting profit or loss. We record net sales under fixed-price service contracts on a straight-line basis over the period of contract performance, unless evidence suggests that net sales are

earned or the obligations are fulfilled in a different pattern. Costs for all service contracts are expensed as incurred.

*Change in Accounting Principle*—Effective January 1, 2011, we changed our methodology for recognizing net sales for service contracts with the U.S. Government. We will recognize sales on those contracts using the POC method similar to our DD&P contracts as described above. As such, we expect that approximately 95% of our consolidated net sales will be recognized using the POC method. We believe the POC method is preferable, as consistent revenue recognition application across all contracts with the U.S. Government better reflects the underlying economics of those contracts and aligns our financial reporting with others in our industry. Beginning with our first quarter 2011 financial statements, all prior periods presented will be retrospectively adjusted to apply the new method of accounting. The effect of this change is expected to be less than one percent of net sales and segment operating profit in 2011, and was not material to prior periods.

### 3.99

#### TEXTRON INC. (DEC)

##### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

###### *Note 1. Summary of Significant Accounting Policies (in part)*

###### *Revenue Recognition (in part)*

We generally recognize revenue for the sale of products, which are not under long-term contracts, upon delivery. For commercial aircraft, delivery is upon completion of manufacturing, customer acceptance, and the transfer of the risk and rewards of ownership. Taxes collected from customers and remitted to government authorities are recorded on a net basis.

When a sale arrangement involves multiple deliverables, such as sales of products that include customization and other services, we evaluate the arrangement to determine whether there are separate items that are required to be delivered under the arrangement that qualify as separate units of accounting. These arrangements typically involve the customization services we offer to customers who purchase Bell helicopters, and the services generally are provided within the first six months after the customer accepts the aircraft and assumes risk of loss. We consider the aircraft and the customization services to be separate units of accounting and allocate contract price between the two on a relative selling price basis using the best evidence of selling price for each of the arrangement deliverables, typically by reference to the price charged when the same or similar items are sold separately by us, taking into consideration any performance, cancellation, termination or refund-type provisions. We recognize revenue when the recognition criteria for each unit of accounting are met.

*Long-Term Contracts*—Revenues under long-term contracts are accounted for under the percentage-of-completion method of accounting. Under this method, we estimate profit as the difference between the total estimated revenues and cost of a contract. We then recognize that estimated profit over the contract term based on either the units-of-delivery method or the cost-to-cost method (which typically is used for development effort as costs are incurred), as appropriate under the circumstances. Revenues under fixed-price contracts generally are recorded using the units-of-delivery method. Revenues under cost-reimbursement contracts are recorded using the cost-to-cost method.

Our long-term contract profits are based on estimates of total contract cost and revenues utilizing current contract specifications, expected engineering requirements and the achievement of contract milestones, including product deliveries. Certain contracts are awarded with fixed-price incentive fees that also are considered when estimating revenues and profit rates. Contract costs typically are incurred over a period of several years, and the estimation of these costs requires substantial judgment. We review and revise these estimates periodically throughout the contract term. Revisions to contract profits are recorded when the revisions to estimated revenues or costs are made. Anticipated losses on contracts are recognized in full in the period in which the losses become probable and estimable.

*Collaborative Arrangements*—Our Bell segment has a strategic alliance agreement with The Boeing Company (Boeing) to provide engineering, development and test services related to the V-22 aircraft, as well as to produce the V-22 aircraft, under a number of separate contracts with the U.S. Government (V-22 Contracts). The alliance created by this agreement is not a legal entity and has no employees, no assets and no true operations. This agreement creates contractual rights and does not represent an entity in which we have an equity interest. We account for this alliance as a collaborative arrangement with Bell and Boeing reporting costs incurred and revenue generated from transactions with the U.S. Government in each company's respective income statement. Neither Bell nor Boeing is considered to be the principal participant for the transactions recorded under this agreement. Profits on cost-plus contracts are allocated between Bell and Boeing on a 50%-50% basis. Negotiated profits on fixed-price contracts are also allocated 50%-50%; however, Bell and Boeing are each responsible for their own cost overruns and are entitled to retain any cost underruns. Based on the contractual arrangement established under the alliance, Bell accounts for its rights and obligations under the specific requirements of the V-22 Contracts allocated to Bell under the work breakdown structure. We account for all of our rights and obligations, including warranty, product and any contingent liabilities, under the specific requirements of the V-22 Contracts allocated to us under the agreement. Revenues and cost of sales reflect our performance under the V-22 Contracts with revenues recognized using the units-of-delivery method. We include all assets used in performance of the V-22 Contracts that we own, including inventory and unpaid receivables and all liabilities arising from our obligations under the V-22 Contracts in our Consolidated Balance Sheets.

## DISCONTINUED OPERATIONS

### RECOGNITION AND MEASUREMENT

**3.100** FASB ASC 205-20 sets forth the financial accounting and reporting requirements for discontinued operations of a component of an entity. A *component of an entity* comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the entity. A component of an entity may be a reportable or an operating segment, a reporting unit, a subsidiary, or an asset group.

**3.101** FASB ASC 205-20 uses a single accounting model to account for all long-lived assets to be disposed of (by sale, abandonment, or distribution to owners). This includes asset disposal groups meeting the criteria for presentation as a discontinued operation, as specified in FASB ASC 205-20. A long-lived asset group classified as held for sale should be measured at the lower of its carrying amount or fair value less cost to sell. Additionally, in accordance with FASB ASC 360, a loss shall be recognized for any write-down to fair value less cost to sell. A gain shall be recognized for any subsequent recovery of cost. Lastly, a gain or loss not previously recognized that results from the sale of the asset disposal group should be recognized at the date of sale.

### PRESENTATION

**3.102** The conditions for determining whether discontinued operations treatment is appropriate and the required income statement presentation are stated in FASB ASC 205-20-45-1, as follows:

The results of operations of a component of an entity that either has been disposed of or is classified as held for sale . . . [should] be reported in discontinued operations . . . if both of the following conditions are met:

- The operations and cash flow of the component have been (or will be) eliminated from the ongoing operations of the entity as a result of the disposal transaction.
- The entity will not have any significant continuing involvement in the operations of the component after the disposal transaction.

**3.103** In a period in which a component of an entity either has been disposed of or is classified as held for sale, the income statement of a business entity or statement of activities of a not-for-profit entity for current and prior periods should report the results of operations of the component, including any gain or loss recognized from the sale or write-down, in discontinued operations. The results of operations of a component classified as held for sale should be reported in discontinued operations in the period(s) in which they occur. The results of discontinued operations, less applicable income taxes (benefit), should be reported as a separate component of income before extraordinary items (if applicable). For example, the results of discontinued operations may be reported in the income statement of a business entity as follows:

|                                                                                        |        |        |
|----------------------------------------------------------------------------------------|--------|--------|

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### 2. Discontinued Operations, Divestitures and Acquisitions (in part)

#### Discontinued Operations

During the second quarter of 2010, we committed to a plan to sell the business operations of Rachel's, which provides organic branded dairy-based chilled yogurt, milk and related dairy products primarily in the United Kingdom. We completed the sale of our Rachel's business on August 4, 2010 and recognized a gain of \$5.7 million, net of tax. Our Rachel's operations, previously reported within the WhiteWave-Alpro segment, have been reclassified as discontinued operations in our Consolidated Financial Statements for the twelve-month periods ended December 31, 2010, 2009 and 2008 and as of December 31, 2009.

The following is a summary of Rachel's assets and liabilities held for sale as of December 31, 2009:

| (In thousands)                                       | December 31,<br>2009 |
|------------------------------------------------------|----------------------|
| <b>Assets</b>                                        |                      |
| Current assets                                       | \$11,514             |
| Property, plant and equipment, net                   | 6,626                |
| Goodwill, identifiable intangibles and other assets  | 11,948               |
| Assets of discontinued operations held for sale      | \$30,088             |
| <b>Liabilities</b>                                   |                      |
| Accounts payable and accrued expenses                | \$ 5,156             |
| Other liabilities                                    | 3,889                |
| Liabilities of discontinued operations held for sale | \$ 9,045             |

The following is a summary of Rachel's operating results, which are included in discontinued operations:

| (In thousands)                    | Year Ended December 31 |          |          |
|-----------------------------------|------------------------|----------|----------|
|                                   | 2010                   | 2009     | 2008     |
| Operations:                       |                        |          |          |
| Net sales                         | \$26,319               | \$44,606 | \$93,302 |
| Income (loss) before income taxes | (3,783)                | (642)    | 3,460    |
| Income tax                        | 1,399                  | (220)    | (507)    |
| Net income (loss)                 | \$ (2,384)             | \$ (862) | \$ 2,953 |

In 2010 and 2008, we recognized expense of \$121,000 and income of \$205,000, respectively, related to prior discontinued operations. In 2010, 2009 and 2008, we recognized a gain of \$1.8 million, a gain of \$89,000 and a loss of \$1.3 million, respectively, on the sale of prior discontinued operations.

#### Divestitures

In the fourth quarter of 2010, we entered into two separate agreements to sell our Mountain High and private label yogurt operations, which are part of our Fresh Dairy Direct-Morningstar segment. We expect to record a gain related to the sale of both of these operations. On February 1, 2011, we completed the sale of our Mountain High yogurt operations. We expect our private label operations sale to close in the first half of 2011. These operations did not meet the requirement to be accounted for as discounted operations. We intend to use the proceeds from the sale of our yogurt operations to pay down outstanding debt under our senior secured credit facility. See Note 9.

The following is a summary of our Mountain High and private label yogurt operations' assets and liabilities held for sale as of December 31, 2010:

| (In thousands)                                      | December 31, 2010 |
|-----------------------------------------------------|-------------------|
| <b>Assets</b>                                       |                   |
| Current assets                                      | \$ 8,329          |
| Property, plant and equipment, net                  | 26,346            |
| Goodwill, identifiable intangibles and other assets | 82,439            |
| Assets held for sale                                | \$117,114         |
| <b>Liabilities</b>                                  |                   |
| Accounts payable and accrued expenses               | \$ 3,839          |

The accompanying Notes to Consolidated Financial Statements are an integral part of these statements.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 2. Discontinued Operations

In 2005, we sold substantially all the assets of our Chemicals business to Basic Chemicals, a subsidiary of Occidental Chemical Corporation. In addition to the initial cash proceeds, Basic Chemicals was required to make payments under two earn-out agreements subject to certain conditions. During 2007, we received the final payment under the ECU (electrochemical unit) earn-out, bringing cumulative cash receipts to its \$150,000,000 cap.

Proceeds under the second earn-out agreement are based on the performance of the hydrochlorocarbon product HCC-240fa (commonly referred to as 5CP) from the closing of the transaction through December 31, 2012 (5CP earn-out). The primary determinant of the value for this earn-out is the level of growth in 5CP sales volume. At the June 7, 2005 closing date, the value assigned to the 5CP earn-out was limited to an amount that resulted in no gain on the sale of the business, as the gain was contingent in nature. A gain on disposal of the Chemicals business is recognized to the extent cumulative cash receipts under the 5CP earn-out exceed the initial value recorded.

During 2010, we received a payment of \$8,794,000 (recorded as gain on disposal of discontinued operations) under the 5CP earn-out related to performance during the year ended December 31, 2009. Any future payments received pursuant to the 5CP earn-out will be recorded as additional gain on disposal of discontinued operations. During 2009 and 2008, we received payments of \$11,625,000 and \$10,014,000, respectively, under the 5CP earn-out related to the respective years ended December 31, 2008 and December 31, 2007. Through December 31, 2010, we have received a total of \$42,707,000 under the 5CP earn-out, a total of \$9,606,000 in excess of the receivable recorded on the date of disposition.

We are liable for a cash transaction bonus payable to certain former key Chemicals employees. This transaction bonus is payable if cash receipts realized from the two earn-out agreements described above exceed an established minimum threshold. The bonus is payable annually based on the prior year's results. Payments for the transaction bonus were \$882,000 during 2010, \$521,000 during 2009 and \$0 during 2008.

The financial results of the Chemicals business are classified as discontinued operations in the accompanying Consolidated Statements of Earnings and Comprehensive Income for all periods presented. There were no net sales or revenues from discontinued operations for the years presented. Results from discontinued operations are as follows:

| (In thousands)                                                  | 2010     | 2009     | 2008      |
|-----------------------------------------------------------------|----------|----------|-----------|
| Discontinued Operations                                         |          |          |           |
| Pretax earnings (loss) from results                             | \$ 2,103 | \$18,872 | \$(4,059) |
| Gain on disposal, net of transaction bonus                      | 7,912    | 584      | 0         |
| Income tax (provision) benefit                                  | (3,962)  | (7,790)  | 1,610     |
| Earnings (loss) on discontinued operations, net of income taxes | \$ 6,053 | \$11,666 | \$(2,449) |

The 2010 pretax earnings from results of discontinued operations of \$2,103,000 are due primarily to a \$6,000,000 pretax gain recognized on recovery from an insurer in lawsuits involving perchloroethylene. This gain was offset in part by general and product liability costs, including legal defense

costs, and environmental remediation costs associated with our former Chemicals business. The 2009 pretax earnings from results of discontinued operations relate primarily to settlements with two of our insurers in lawsuits involving perchloroethylene. These settlements resulted in pretax gains of \$23,500,000. The insurance proceeds and associated gains represent a partial recovery of legal and settlement costs recognized in prior years. The 2008 pretax loss from discontinued operations and the remaining results from 2009 reflect charges primarily related to general and product liability costs, including legal defense costs and environmental remediation costs associated with our former Chemicals business.

In January 2011, we recovered an additional \$7,500,000 from an insurer in lawsuits involving perchlorethylene. This recovery will be recorded as earnings from results of discontinued operations in the first quarter of 2011.

| Provision (credit) for income taxes                            | (3.4)                  | 2.3    | 45.8    |
| Income from discontinued operations, net of tax                | \$ 0.3                 | \$ 4.5 | \$ 51.5 |

<sup>(a)</sup> Revenues of BHS were \$442.4 million in 2008 (partial year).

### Federal Black Lung Excise Tax ("FBLET") Refunds

The Energy Improvement and Extension Act of 2008 enabled taxpayers to file claims for FBLET refunds for periods prior to those open under the previously applicable statute of limitations. In 2009, we received FBLET refunds and recognized a pre-tax gain of \$19.7 million.

### BAX Global

BAX Global, a former business unit, had been defending a claim related to the apparent diversion by a third party of goods being transported for a customer. On April 23, 2010, the Dutch Supreme Court denied the final appeal of BAX Global, letting stand the lower court ruling that BAX Global

is liable for this claim. We had contractually indemnified the purchaser of BAX Global for this contingency. We recognized €9 million (\$13.2 million) related to this matter in discontinued operations in 2009 and made an \$11.5 million payment in 2010 in satisfaction of the judgment. We have insurance coverage applicable to this matter and we have collected \$1.6 million from insurance companies in 2010.

### BHS Spin-Off

On October 31, 2008, we distributed all of our interest in BHS to our shareholders of record as of the close of business on October 21, 2008, in a tax-free distribution. We distributed one share of BHS common stock for every share of our common stock outstanding. We contributed \$50 million in cash to BHS at the time of the spin-off. We also forgave all the existing intercompany debt owed by BHS to us as of the distribution date.

BHS offered monitored security services in North America primarily for owner-occupied, single-family residences. To a lesser extent, BHS offered security services for commercial and multi-family properties. BHS typically installed and owned the on-site security systems and charged fees to monitor and service the systems.

In connection with the spin-off, we entered into a Tax Matters Agreement with BHS which provided a basis for the preparation and filing of tax returns for pre-spin and post-spin operations of BHS in 2008. As authorized by the Tax Matters Agreement, we made certain elections related to BHS' operations for our U.S. federal and state 2008 consolidated tax returns in 2009. These elections have the effect of decreasing the net deferred tax assets allocated to BHS at the time of the spin-off. As a result, we increased the amount of our current income tax receivable during 2009 by \$26.8 million, with an offsetting increase in retained earnings to adjust the amount of the spin-off distribution.

After the spin-off, we reclassified BHS' results of operations, including previously reported results and non-segment income (expense) directly related to the spin-off, within discontinued operations.

### Interest Expense

Interest expense included in discontinued operations was \$0.3 million in 2008. Interest expense recorded in discontinued operations includes only interest on third-party borrowings made directly by BHS.

## EXTRAORDINARY ITEMS

### RECOGNITION AND MEASUREMENT

**3.108** FASB ASC 225-20 defines *extraordinary items* as events and transactions that are distinguished by their unusual nature and the infrequency of their occurrence. Both of the following criteria should be met to classify an event or a transaction as an extraordinary item:

- *Unusual nature.* The underlying event or transaction should possess a high degree of abnormality and be of a type clearly unrelated to or only incidentally related to the ordinary and typical activities of the entity, taking into account the environment in which the entity operates.

- *Infrequency of occurrence.* The underlying event or transaction should be of a type that would not reasonably be expected to recur in the foreseeable future, taking into account the environment in which the entity operates.

## PRESENTATION

**3.109** FASB ASC 225-20 also addresses the presentation and disclosure of unusual and infrequently occurring items that do not meet the extraordinary criteria. Such items are reported as a separate component of continuing operations either on the face of the income statement or in the notes. FASB ASC 225-20-55 illustrates events and transactions that should and should not be classified as extraordinary items.

See accompanying notes to consolidated financial statements.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## 3. Business Combinations (in part)

## Textile Effects Acquisition

On June 30, 2006, we acquired Ciba's textile effects business and accounted for the Textile Effects Acquisition using the purchase method. As such, we analyzed the fair value of tangible and intangible assets acquired and liabilities assumed and we determined the excess of fair value of net assets over cost. Because the fair value of the acquired assets and liabilities assumed exceeded the purchase price, the valuation of the long-lived assets acquired was reduced to zero. Accordingly, no basis was assigned to property, plant and equipment or any other non-current nonfinancial assets and the remaining excess was recorded as an extraordinary gain, net of taxes (which were not applicable because the gain was recorded in purchase accounting). During 2010, 2009 and 2008, we recorded an additional extraordinary (loss) gain on the acquisition of \$(1) million, \$6 million and \$14 million, respectively, related to settlement of contingent purchase price consideration, the reversal of accruals for certain restructuring and employee termination costs recorded in connection with the Textile Effects Acquisition and a reimbursement by Ciba of certain costs pursuant to the acquisition agreements.

## THE COCA-COLA COMPANY (DEC)

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## Note 17. Significant Operating and Nonoperating Items (in part)

## Other Nonoperating Items (in part)

## Equity Income (Loss)—Net

In 2010, the Company recorded a net charge of \$66 million in equity income (loss)—net. This net charge primarily represents the Company's proportionate share of unusual tax charges, asset impairments, restructuring charges and transaction costs recorded by equity method investees. The unusual tax charges primarily relate to an additional tax liability recorded by Coca-Cola Hellenic Bottling Company S.A. as a result of the Extraordinary Social Contribution Tax levied by the Greek government. The transaction costs represent our proportionate share of certain costs incurred by CCE in connection with our acquisition of CCE's North American business and the sale of our Norwegian and Swedish bottling operations to New CCE. Refer to Note 2 for additional information related to these transactions. These charges were partially offset by our proportionate share of a foreign currency remeasurement gain recorded by an equity method investee. The components of the net charge were individually insignificant. Refer to Note 19 for the impact these charges had on our operating segments.

| Total unusual items                               | \$3.4      | \$4.6 | \$33.1 |

In fiscal 2010, the Company recorded \$1.4 million associated with executive severance. In addition, the Company recorded a charge of \$1.9 million related to the estimated unrecoverable costs of legal matters and \$0.9 million for realized losses and interest associated with the failure to register with the

SEC the issuance of certain of its common shares under the defined contribution 401(k) employee benefit plan. Further, the Company recorded a \$2.7 million gain related to a legal settlement.

In addition, during fiscal 2010, the Company recorded \$0.7 million of losses related to an amendment to the Senior Credit Facility.

A summary of the Company's losses on the 2 $\frac{1}{4}$ % Debentures repurchased during fiscal 2010 is as follows (in millions):

|                                                                                            |          |
|--------------------------------------------------------------------------------------------|----------|
| Principal amount repurchased                                                               | \$ 77.8  |
| Cash repurchase price                                                                      | (74.3)   |
|                                                                                            | 3.5      |
| Write-off of the associated debt discount                                                  | (6.3)    |
| Portion of the 2 $\frac{1}{4}$ % Debentures repurchased attributed to the equity component | 2.9      |
| Write-off of the deferred financing costs                                                  | (0.4)    |
| Loss on 2 $\frac{1}{4}$ % Debentures repurchased                                           | \$ (0.3) |

A summary of the Company's losses on the 9 $\frac{1}{2}$ % Notes repurchased during fiscal 2010 is as follows (in millions):

|                                             |          |
|---------------------------------------------|----------|
| Principal amount repurchased                | \$ 22.5  |
| Cash repurchase price                       | (23.0)   |
| Write-off of the deferred financing costs   | (0.4)    |
| Loss on 9 $\frac{1}{2}$ % Notes repurchased | \$ (0.9) |

In fiscal 2009, the Company recorded a charge of \$1.3 million for realized losses and interest associated with its failure to register with the SEC the issuance of certain of the Company's common shares under its defined contribution 401(k) employee benefit plan. During fiscal 2009, the Company also incurred a charge of \$3.1 million associated with executive severance agreements. Additionally, the Company recorded costs of \$0.2 million related to a bank amendment.

On November 25, 2008, the Company decided to amend the defined benefit pension and benefits restoration plans to freeze future accruals under such plans. Effective February 1, 2009 and July 31, 2009, future benefit accruals for all current salaried employees and collective bargaining unit employees were discontinued, respectively. No employees lost their previously earned pension benefits. As a result of the amendment and freeze, the Company incurred a curtailment charge of \$14.6 million in the fourth quarter of fiscal 2008 primarily due to the immediate recognition of unrecognized prior service costs.

On March 5, 2008, the Company entered the Shareholder Agreement which resulted in a charge of \$16.8 million in fiscal 2008 comprised of the following (in millions):

|                                                            |        |
|------------------------------------------------------------|--------|
| Increases in pension benefits                              | \$ 5.3 |
| Executive severance charges                                | 7.1    |
| Accelerated vesting of stock appreciation rights           | 1.1    |
| Accelerated vesting of restricted stock, service-based     | 0.6    |
| Accelerated vesting of restricted stock, performance-based | 0.7    |
| Professional fees and other                                | 2.0    |
|                                                            | \$16.8 |

As a result of the Shareholder Agreement, the executive severance agreements required the Company to fund into a grantor trust on March 12, 2008, an amount equal to \$34.8 million, which represents liabilities associated with the benefits restoration plans and amounts payable to certain officers of the Company party to executive severance agreements in the event of qualifying terminations of employment following a change in control (as defined in the benefits restoration plan and the executive severance agreements) of the Company. In addition, as a result of the resignation of three additional Board members on May 16, 2008, the Company was required to fund \$0.4 million into a grantor trust on May 22, 2008, which primarily represents the amount payable to an officer party to an executive severance agreement in the event of a qualifying termination of employment.

In fiscal 2008, the Company recorded a charge of \$2.9 million related to the estimated unrecoverable costs of legal matters, including \$1.7 million associated with the failure to register with the SEC the issuance of certain of its common shares under its defined contribution 401(k) employee benefit plan and \$1.2 million related to a legal settlement and other legal matters. The Company recorded a \$1.2 million gain related to an insurance settlement for an environmental claim.

## EARNINGS PER SHARE

### PRESENTATION

**3.115** The computation, presentation, and disclosure requirements for earnings per share (EPS) for entities with publicly held common stock or potential common stock are stated in FASB ASC 260, *Earnings Per Share*. The objective of basic EPS is to measure the performance of an entity over the reporting period. The objective of diluted EPS is to measure the performance of an entity over the reporting period while giving effect to all dilutive potential common shares that were outstanding during the period. FASB ASC 260 also discusses the application of EPS guidance to master limited partnerships.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## (17) Earnings per Share

The Company's restricted stock awards are considered participating securities. As such, the Company uses the two-

class method to compute basic and diluted EPS. The following illustrates the earnings allocation method utilized in the calculation of basic and diluted EPS. Diluted EPS includes any dilutive impact of share-based compensation and the Debentures.

| (In millions, except per share amounts)                                                                                                    | Year Ended December 31 |         |         |

*NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**Note 2. Net Income Per Share of Class A and Class B Common Stock*

We compute net income per share of Class A and Class B common stock using the two-class method. Basic net income per share is computed using the weighted-average number of common shares outstanding during the period except that it does not include unvested common shares subject to repurchase or cancellation. Diluted net income per share is computed using the weighted-average number of common shares and, if dilutive, potential common shares outstanding during the period. Potential common shares consist of the incremental common shares issuable upon the exercise of stock options, warrants, restricted shares, restricted stock units, and unvested common shares subject to repurchase or cancellation. The dilutive effect of outstanding stock options, restricted shares, restricted stock units, and warrants is reflected in diluted earnings per share by application of the treasury stock method. The computation of the diluted net income per share of Class A common stock assumes the conversion of Class B common stock, while the diluted net income per share of Class B common stock does not assume the conversion of those shares.

The rights, including the liquidation and dividend rights, of the holders of our Class A and Class B common stock are

identical, except with respect to voting. Further, there are a number of safeguards built into our certificate of incorporation, as well as Delaware law, which preclude our board of directors from declaring or paying unequal per share dividends on our Class A and Class B common stock. Specifically, Delaware law provides that amendments to our certificate of incorporation which would have the effect of adversely altering the rights, powers, or preferences of a given class of stock (in this case the right of our Class A common stock to receive an equal dividend to any declared on our Class B common stock) must be approved by the class of stock adversely affected by the proposed amendment. In addition, our certificate of incorporation provides that before any such amendment may be put to a stockholder vote, it must be approved by the unanimous consent of our Board of Directors. As a result, the undistributed earnings for each year are allocated based on the contractual participation rights of the Class A and Class B common shares as if the earnings for the year had been distributed. As the liquidation and dividend rights are identical, the undistributed earnings are allocated on a proportionate basis. Further, as we assume the conversion of Class B common stock in the computation of the diluted net income per share of Class A common stock, the undistributed earnings are equal to net income for that computation.

The following table sets forth the computation of basic and diluted net income per share of Class A and Class B common stock (in millions, except share amounts which are reflected in thousands and per share amounts):

|                                                                                               | Year Ended December 31 |          |          |          |          |          |

| Number of shares used in per share computation                                                | 317,514                | 75,837   | 319,416  | 74,765   | 323,251  | 72,605   |
| Diluted net income per share                                                                  | \$ 13.31               | \$ 13.31 | \$ 20.41 | \$ 20.41 | \$ 26.31 | \$ 26.31 |

The net income per share amounts are the same for Class A and Class B common stock because the holders of each class are legally entitled to equal per share distributions whether through dividends or in liquidation.

## Section 4: Comprehensive Income

### COMPREHENSIVE INCOME IN ANNUAL FILINGS

#### RECOGNITION AND MEASUREMENT

**4.01** Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 220, *Comprehensive Income*, requires that items included in other comprehensive income should be classified based on their nature. Other comprehensive income includes the following: foreign currency items, changes in the fair value of certain derivatives, unrealized gains and losses on certain securities, and certain pension or other postretirement benefit items.

#### PRESENTATION

**4.02** FASB ASC 220 requires entities that provide a full set of general-purpose financial statements (that is, financial position, results of operations, and cash flows) report comprehensive income and its components. The FASB ASC glossary defines *comprehensive income* as the change in equity (net assets) of a business entity during a period from transactions and other events and circumstances from nonowner sources. It includes all changes in equity during a period, except those resulting from investments by owners and distributions to owners. *Other comprehensive income* is defined as revenues, expenses, gains, and losses that under generally accepted accounting principles are included in comprehensive income but excluded from net income. If an entity has only net income, it is not required to report comprehensive income. All items that meet the definition of *components of comprehensive income* must be reported in a financial statement for the period in which they are recognized. Further, a total amount for comprehensive income should be displayed in the financial statement when the components of other comprehensive income are reported. No specific required format exists for displaying comprehensive income and its components. However, an entity is encouraged to display the components of other comprehensive income and total comprehensive income below the total for net income in a statement that reports results of operations or in a separate statement of comprehensive income that begins with net income.

**4.03** FASB ASC 220 also states that an entity should disclose the amount of income tax expense or benefit allocated to each component of other comprehensive income, including reclassification adjustments, either on the face of the statement in which those components are displayed or in the notes thereto. Also, FASB ASC 810, *Consolidation*, states that if an entity has an outstanding noncontrolling interest (minority interest), the components of other comprehensive income attributable to the parent and noncontrolling interest in a less-than-wholly-owned subsidiary are required to be reported on the face of the financial statement in which comprehensive income is presented, in addition to presenting consolidated comprehensive income.

**4.04** FASB ASC 220 also requires that adjustments should be made to avoid double counting in comprehensive income items that are displayed as part of net income for a period that also had been displayed as part of other comprehensive income in that period or earlier periods. For example, gains on investment securities that were realized and included in net income of the current period that also had been included in other comprehensive income as unrealized holding gains in the period in which they arose must be deducted through other comprehensive income of the period in which they are included in net income to avoid including them in comprehensive income twice. These adjustments are called *reclassification adjustments*. An entity may display reclassification adjustments on the face of the financial statement in which comprehensive income is reported, or it may disclose them in the notes to the financial statements (that is, either a gross display on the face of the financial statement or a net display on the face of the financial statement and disclosure of the gross change in the notes to the financial statements).

| Balance, January 2, 2011   | \$ 54,350                               | \$(102,457)                                             | \$(100)                                             | \$(5,284)                                                         | \$(53,491)                                    |

The tax effects on the foreign currency translation component of other comprehensive (loss) income are minimal due to the Company's previous position that undistributed earnings of foreign subsidiaries are permanently reinvested. As a result of the sale of the IDS and Photoflash businesses, the Company concluded that the remaining operations within those foreign subsidiaries previously containing IDS and Photoflash

operations did not require the same level of capital as previously required, and therefore the Company plans to repatriate \$250.0 million of cash and has provided for the taxes on the related previously unremitted earnings. Taxes have not been provided for unremitted earnings that the Company continues to consider permanently reinvested, which is based on

its future operational and capital requirements. The components of other comprehensive (loss) income were as follows:

| (In thousands)                                                                               | After-Tax Amount |

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 13: Shareholders' Equity (in part)

#### Comprehensive Income

Comprehensive income includes all changes in equity during the period, except those resulting from transactions with shareholders of the Company. It has two components: net

earnings and other comprehensive income. Accumulated other comprehensive income reported on our consolidated balance sheets consists of foreign currency translation adjustments and the unrealized gains and losses, net of applicable taxes, on available-for-sale securities and on derivative instruments designated and qualifying as cash flow and net investment hedges.

Comprehensive income, net of related tax effects (*in millions*):

| Fiscal Year Ended                                                                                                                                    | Oct 3, 2010 | Sep 27, 2009 | Sep 28, 2008 |
|------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|--------------|--------------|
| Net earnings attributable to Starbucks                                                                                                               | \$945.6     | \$390.8      | \$315.5      |
| Unrealized holding gains/(losses) on available-for-sale securities, net of tax (provision)/benefit of \$0.1, \$(1.9) and \$2.4, respectively         | (0.2)       | 3.3          | (4.0)        |
| Unrealized holding gains/(losses) on cash flow hedging instruments, net of tax (provision)/benefit of \$6.6, \$(2.4) and \$(0.4), respectively       | (11.3)      | 4.0          | 0.7          |
| Unrealized holding losses on net investment hedging instruments, net of tax benefit of \$4.0, \$4.0 and \$0.6, respectively                          | (6.8)       | (6.8)        | (0.9)        |
| Reclassification adjustment for net losses realized in net earnings for cash flow hedges, net of tax benefit of \$0.8, \$0.8 and \$3.0, respectively | 1.3         | 1.3          | 5.0          |
| Net unrealized gain/(loss)                                                                                                                           | (17.0)      | 1.8          | 0.8          |
| Translation adjustment, net of tax (provision)/benefit of \$(3.2), \$6.0 and \$0.3, respectively                                                     | 8.8         | 15.2         | (7.0)        |
| Total comprehensive income                                                                                                                           | \$937.4     | \$407.8      | \$309.3      |

The favorable translation adjustment change during fiscal 2010 was primarily due to the weakening of the US dollar against several currencies including the Japanese yen and Canadian dollar, partially offset by the strengthening of the US dollar against the euro. The favorable translation adjustment change during fiscal 2009 was primarily due to the weakening of the US dollar against the Japanese yen, Australian dollar and the euro. The unfavorable translation adjustment change during fiscal 2008 was primarily due to the strengthening of the US dollar against several currencies including the Australian dollar, Korean won and Canadian dollar.

Components of accumulated other comprehensive income, net of tax (*in millions*):

| <b>Fiscal Year Ended</b>                                       | <b>Oct 3,<br/>2010</b> | <b>Sep 27,<br/>2009</b> |
|----------------------------------------------------------------|------------------------|-------------------------|
| Net unrealized gains/(losses) on available-for-sale securities | \$ (0.9)               | \$ (0.8)                |
| Net unrealized gains/(losses) on hedging instruments           | (40.5)                 | (23.7)                  |
| Translation adjustment                                         | 98.6                   | 89.9                    |
| Accumulated other comprehensive income                         | \$ 57.2                | \$ 65.4                 |

As of October 3, 2010, the translation adjustment was net of tax provisions of \$4.2 million. As of September 27, 2009, the translation adjustment was net of tax provisions of \$1.0 million.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### Note 1—Description of Business and Summary of Significant Accounting Policies (in part)

#### Other Comprehensive Income

ASC 220, Comprehensive Income, establishes standards for reporting and displaying comprehensive income and its components in the consolidated financial statements. We report, net of tax, foreign currency translation adjustments, unrealized gains and losses on derivative instruments accounted for as cash flow hedges, changes in our net pension liabilities, our equity in Westinghouse's pre-tax other comprehensive income, and unrealized gains and losses on securities as components of other comprehensive income.

#### Foreign Currency Translation

Our significant foreign subsidiaries maintain their accounting records in their local currency (primarily British pounds, Mexican pesos, and Canadian dollars). All of the assets and liabilities of these subsidiaries (including long-term assets,

such as goodwill) are converted to U.S. dollars at the exchange rate in effect at the balance sheet date, income and expense accounts are translated at average rates for the period, and shareholders' equity accounts are translated at historical rates. The net effect of foreign currency translation adjustments is included in stockholders' equity as a component of accumulated other comprehensive income in the accompanying Consolidated Balance Sheets. See Note 19—Other Comprehensive Income (Loss) for additional information.

Foreign currency transaction gains or losses are credited or charged to income as incurred. Transaction gains reflected in income were \$3.3 million, \$1.0 million, and \$6.6 million for the fiscal years 2010, 2009, and 2008, respectively. Additionally, during fiscal years 2010, 2009 and 2008, we incurred foreign currency translation losses on the Westinghouse Bonds associated with our investment in Westinghouse of \$131.6 million, \$198.1 million, and \$69.7 million, respectively.

See Notes to Consolidated Financial Statements.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****Note 1. Summary of Significant Accounting Policies (in part)**

**Foreign Currency Translation.** Viad conducts its foreign operations primarily in Canada and the United Kingdom, and to a lesser extent in certain other countries. The functional currency of Viad's foreign subsidiaries is their local currency. Accordingly, for purposes of consolidation, Viad translates the assets and liabilities of its foreign subsidiaries into U.S. dollars at the foreign exchange rates in effect at the balance sheet date. The unrealized gains or losses resulting from the translation of these foreign denominated assets and liabilities are included as a component of accumulated other comprehensive income in Viad's consolidated balance sheets. In addition, for purposes of consolidation, the revenues, expenses and gains and losses related to Viad's foreign operations are translated into U.S. dollars at the average foreign exchange rates for the period.

**Pension and Postretirement Adjustments****4.18****CHURCH & DWIGHT CO., INC. (DEC)****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****13. Benefit Plans (in part)****U.S. Pension Plan Termination (in part)**

On January 27, 2010, the Company's Board of Directors approved the termination, effective April 15, 2010, of The Church & Dwight Co., Inc. Retirement Plan for Hourly Employees (the "U.S. Pension Plan"), under which approxi-

mately 766 participants, including 46 active employees, have accrued benefits. On December 1, 2010, the Company as plan sponsor of the U.S. Pension Plan, purchased a non-participating group annuity contract from the Principal Life Insurance Company for the benefit of certain former and current employees with vested benefits in, and retired participants currently receiving benefits from, the U.S. Pension Plan. In addition, effective December 1, 2010, an existing participating annuity contract with Aetna Insurance Company was changed to a non-participating annuity contract.

The purchase price of the contracts was approximately \$63 million, which was funded from the assets of the U.S. Pension Plan on December 1, 2010 (considered the measurement date for accounting purposes) and a one-time payment by the Company of approximately \$14 million (\$9 million after taxes). The transactions resulted in the transfer and settlement of the U.S. pension benefit obligation, thus relieving the Company of any responsibility for the U.S. Pension Plan obligations.

As a result of the transfer of the U.S. Pension Plan obligations and assets described above, the Company recorded a charge to earnings in the fourth quarter of 2010 of approximately \$24 million pre-tax or \$0.21 per share. This charge is included in selling, general and administrative expenses.

**15. Comprehensive Income**

Comprehensive income is defined as net income and other changes in stockholders' equity from transactions and other events from sources other than stockholders.

*Consolidated Statement of Comprehensive Income*

The following table provides information related to the Company's comprehensive income for the three years ended December 31, 2010:

| Comprehensive income                                                                  |         | \$194,738 |          | \$ 63,925  |           | \$ 266,827 |

## 15. Employee Benefit Plans and Other Postretirement Benefits (in part)

The Company has several defined benefit pension plans and several postretirement healthcare benefit plans, which cover substantially all employees of the Motorcycles segment. The Company also has unfunded supplemental employee retirement plan agreements (SERPA) with certain employees which were instituted to replace benefits lost under the Tax Revenue Reconciliation Act of 1993.

Pension benefits are based primarily on years of service and, for certain plans, levels of compensation. Employees are eligible to receive postretirement healthcare benefits upon attaining age 55 after rendering at least 10 years of service to the Company. Some of the plans require employee contributions to partially offset benefit costs.

### Obligations and Funded Status

The following table provides the changes in the benefit obligations, fair value of plan assets and funded status of the Company's pension, SERPA and postretirement healthcare plans as of the Company's December 31, 2010 and 2009 measurement dates (in thousands):

|                                                                            | Pension and<br>SERPA Benefits |              | Postretirement<br>Healthcare Benefits |              |
|----------------------------------------------------------------------------|-------------------------------|--------------|---------------------------------------|--------------|
|                                                                            | 2010                          | 2009         | 2010                                  | 2009         |
| <b>Change in Benefit Obligation</b>                                        |                               |              |                                       |              |
| Benefit obligation, beginning of period                                    | \$1,284,722                   | \$1,178,283  | \$ 377,283                            | \$ 372,631   |
| Service cost                                                               | 42,889                        | 47,308       | 9,957                                 | 11,390       |

| Net curtailment loss           | 15,508                     | 29,390    | —         | 11,643                             | 7,014     | —         |
| Settlement loss                | 4,673                      | 1,411     | —         | —                                  | —         | —         |
| Special retiree benefits       | —                          | —         | —         | —                                  | —         | 4,881     |
| Net periodic benefit cost      | \$ 71,945                  | \$ 84,770 | \$ 44,466 | \$39,073                           | \$ 34,303 | \$ 32,745 |

As discussed in Note 4, the Company recorded restructuring expense of \$163.5 million during 2010. The restructuring actions resulted in a pension and postretirement healthcare plan net curtailment loss of \$27.1 million, which is included in the \$163.5 million restructuring expense. The net curtailment loss of \$27.1 million consists of a \$28.2 million curtailment loss related to the 2010 Restructuring Plan and a \$1.1 million curtailment gain related to the 2009 Restructuring Plan.

During 2009, the Company recorded a curtailment charge of \$36.4 million on its pension and post-retirement healthcare plans in connection with the 2009 Restructuring Plan. During 2010, the Company incurred a \$4.7 million settlement loss on its SERPA plans compared to a \$1.4 million settlement loss on its SERPA plans during 2009. The settlement losses were the result of benefit payments made to former executives who departed the Company during 2009 and 2010.

As discussed in Note 4, the Company recorded a restructuring reserve of \$4.8 million in 2008 related to postretirement healthcare benefits which is included as special retiree benefits in the table above.

Amounts included in accumulated other comprehensive income, net of tax, at December 31, 2010 which have not yet been recognized in net periodic benefit cost are as follows (in thousands):

|                             | Pension<br>and SERPA<br>Benefits | Postretirement<br>Healthcare<br>Benefits | Total       |
|-----------------------------|----------------------------------|------------------------------------------|-------------|
| Prior service cost (credit) | \$ 7,229                         | \$(20,789)                               | \$ (13,560) |
| Net actuarial loss          | 339,251                          | 84,037                                   | 423,288     |
|                             | \$346,480                        | \$ 63,248                                | \$409,728   |

Amounts expected to be recognized in net periodic benefit cost, net of tax, during the year ended December 31, 2011 are as follows (in thousands):

|                             | Pension<br>and SERPA<br>Benefits | Postretirement<br>Healthcare<br>Benefits | Total    |

| Prior service cost (credit) | \$ 1,877                         | \$(2,442)                                | \$ (565) |
| Net actuarial loss          | 19,050                           | 4,528                                    | 23,578   |
|                             | \$20,927                         | \$ 2,086                                 | \$23,013 |

## Net Change in Unrealized Gains and Losses on Available-for-Sale Securities

### 4.20

#### THE COCA-COLA COMPANY (DEC)

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

##### Note 3. Investments (in part)

Investments in debt and marketable securities, other than investments accounted for under the equity method, are classified as trading, available-for-sale or held-to-maturity. Our marketable equity investments are classified as either trading or available-for-sale with their cost basis determined by the specific identification method. Realized and unrealized gains and losses on trading securities and realized gains and losses on available-for-sale securities are included in net income. Unrealized gains and losses, net of deferred taxes, on available-for-sale securities are included in our consolidated balance sheets as a component of AOCI.

Our investments in debt securities are carried at either amortized cost or fair value. Investments in debt securities that the Company has the positive intent and ability to hold to maturity are carried at amortized cost and classified as held-to-maturity. Investments in debt securities that are not classified as held-to-maturity are carried at fair value and classified as either trading or available-for-sale.

##### Available-for-Sale and Held-to-Maturity Securities

As of December 31, 2010 and 2009, available-for-sale and held-to-maturity securities consisted of the following (in millions):

|                                               | Cost  | Gross Unrealized |        | Estimated Fair Value |
|-----------------------------------------------|-------|------------------|--------|----------------------|
|                                               |       | Gains            | Losses |                      |
| <b>2010</b>                                   |       |                  |        |                      |
| Available-for-sale securities: <sup>(1)</sup> |       |                  |        |                      |
| Equity securities                             | \$209 | \$267            | \$ (5) | \$471                |
| Other securities                              | 14    | —                | —      | 14                   |
|                                               | \$223 | \$267            | \$ (5) | \$485                |
| Held-to-maturity securities:                  |       |                  |        |                      |

| <b>2009</b>                                   |       |                  |        |                      |
| Available-for-sale securities: <sup>(1)</sup> |       |                  |        |                      |
| Equity securities                             | \$231 | \$176            | \$(18) | \$389                |
| Other securities                              | 12    | —                | (3)    | 9                    |
|                                               | \$243 | \$176            | \$(21) | \$398                |
| Held-to-maturity securities:                  |       |                  |        |                      |
| Bank and corporate debt                       | \$199 | \$ —             | \$ —   | \$199                |

<sup>(1)</sup> Refer to Note 16 for additional information related to the estimated fair value.

In 2010, the Company had several investments classified as available-for-sale securities in which our cost basis exceeded the fair value of the investment. Management assessed each of these investments on an individual basis to determine if the decline in fair value was other than temporary. Based on these assessments, management determined that the decline in fair value of each investment was other

than temporary. As a result, the Company recognized other-than-temporary impairment charges of \$26 million. These impairment charges were recorded in other income (loss)—net. Refer to Note 16 and Note 17. The Company did not sell any available-for-sale securities during 2010.

In 2009, the Company divested certain available-for-sale securities. These divestitures were the result of both sales and a charitable donation. The sales of available-for-sale securities resulted in cash proceeds of \$157 million, gross realized gains of \$44 million and gross realized losses of \$2 million. In addition to the sale of available-for-sale securities, the Company donated certain available-for-sale securities to

The Coca-Cola Foundation. The donated investments had a cost basis of \$7 million and a fair value of \$106 million at the date of donation. The net impact of this donation was an expense equal to our cost basis in the securities, which was recorded in other income (loss)—net.

In 2008, the Company realized losses of \$81 million due to other-than-temporary impairments of certain available-for-sale securities. These impairment charges were recorded in other income (loss)—net. Refer to Note 17. The Company did not sell any available-for-sale securities during 2008.

The Company's available-for-sale and held-to-maturity securities were included in the following captions in our consolidated balance sheets (in millions):

|                                                   | December 31, 2010             |                             | December 31, 2009             |                             |
|---------------------------------------------------|-------------------------------|-----------------------------|-------------------------------|-----------------------------|

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### 7. Investment in Carefusion

The following table provides a summary of our investment in CareFusion, which is classified as available-for-sale, as of June 30, 2010:

| (In millions)                    | Available-for-Sale Securities |                        |                         |                      |
|----------------------------------|-------------------------------|------------------------|-------------------------|----------------------|
|                                  | Cost <sup>(2)</sup>           | Gross Unrealized Gains | Gross Unrealized Losses | Estimated Fair Value |
| Equity securities <sup>(1)</sup> | \$630.3                       | \$61.2                 | \$0.0                   | \$691.5              |
| Total                            | \$630.3                       | \$61.2                 | \$0.0                   | \$691.5              |

<sup>(1)</sup> Equity securities consist of our remaining ownership of 30.5 million shares of the 41.4 million shares of CareFusion common stock that we held immediately after the Spin-Off. These securities are stated at fair value with unrealized gains and losses reported in other comprehensive income. Realized gains and losses and declines in fair value deemed to be other-than-temporary are recognized in net earnings immediately. During fiscal 2010, we disposed of 10.9 million shares of CareFusion common stock, resulting in cash proceeds of \$270.7 million and a pre-tax realized gain of \$44.6 million.

<sup>(2)</sup> Represents our cost investment in the net book value of CareFusion's assets immediately following the Spin-Off adjusted for the sale of securities during fiscal 2010.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### 1. Summary of Significant Accounting Policies (in part)

#### Derivative Instruments and Hedging Activities

Apache periodically enters into derivative contracts to manage its exposure to commodity price risk. These derivative contracts, which are generally placed with major financial institutions that the Company believes are minimal credit risks, may take the form of forward contracts, futures contracts, swaps or options. The oil and gas reference prices, upon which the commodity derivative contracts are based, reflect various market indices that have a high degree of historical correlation with actual prices received by the Company for its oil and gas production.

Apache accounts for its derivative instruments in accordance with ASC Topic 815, "Derivatives and Hedging," which requires that all derivative instruments, other than those that meet the normal purchases and sales exception, be recorded on the balance sheet as either an asset or liability measured at fair value. Changes in fair value are recognized currently in earnings unless specific hedge accounting criteria are met. Hedge accounting treatment allows unrealized gains and losses on cash flow hedges to be deferred in other comprehensive income. Realized gains and losses from the Company's oil and gas cash flow hedges, including terminated

contracts, are generally recognized in oil and gas production revenues when the forecasted transaction occurs. Gains and losses from the change in fair value of derivative instruments that do not qualify for hedge accounting are reported in current-period income as "Other" under Revenues and Other in the statement of consolidated operations. If at any time the likelihood of occurrence of a hedged forecasted transaction ceases to be "probable," hedge accounting treatment will cease on a prospective basis, and all future changes in the fair value of the derivative will be recognized directly in earnings. Amounts recorded in other comprehensive income prior to the change in the likelihood of occurrence of the forecasted transaction will remain in other comprehensive income until such time as the forecasted transaction impacts earnings. If it becomes probable that the original forecasted production will not occur, then the derivative gain or loss would be reclassified from accumulated other comprehensive income into earnings immediately. Hedge effectiveness is measured at least quarterly based on the relative changes in fair value between the derivative contract and the hedged item over time, and any ineffectiveness is immediately reported as "Other" under Revenues and Other in the statement of consolidated operations.

### 3. Derivative Instruments and Hedging Activities (in part)

#### Commodity Derivative Activity in Accumulated Other Comprehensive Income (Loss)

As of December 31, 2010, the Company's derivative instruments were designated as cash flow hedges in accordance with ASC Topic 815. A reconciliation of the components of accumulated other comprehensive income (loss) in the statement of consolidated shareholders' equity related to Apache's cash flow hedges is presented in the table below:

| (In millions)                                              | 2010       |           | 2009       |           | 2008       |           |
|------------------------------------------------------------|------------|-----------|------------|-----------|------------|-----------|
|                                                            | Before Tax | After Tax | Before Tax | After Tax | Before Tax | After Tax |
| Unrealized gain (loss) on derivatives at beginning of year | \$(267)    | \$(170)   | \$ 212     | \$ 138    | \$(639)    | \$(412)   |
| Realized (gain) loss reclassified into earnings            | (165)      | (106)     | (181)      | (123)     | 436        | 282       |
| Net change in derivative fair value                        | 376        | 256       | (297)      | (184)     | 415        | 268       |
| Ineffectiveness reclassified into earnings                 | 2          | 1         | (1)        | (1)       | —          | —         |
| Unrealized gain (loss) on derivatives at end of year       | \$ (54)    | \$ (19)   | \$(267)    | \$(170)   | \$ 212     | \$ 138    |

Gains and losses on existing hedges will be realized in future earnings through mid-2014, in the same period as the related sales of natural gas and crude oil production applicable to specific hedges. Included in accumulated other comprehensive loss as of December 31, 2010 is a net loss of approximately \$45 million (\$24 million after tax) that applies to the next 12 months; however, estimated and actual amounts are likely to vary materially as a result of changes in market conditions.

### 7. Capital Stock (in part)

#### Accumulated Other Comprehensive Income (Loss)

Components of accumulated other comprehensive income (loss) consist of the following:

| (In millions)                                    | For the Year Ended December 31 |         |         |
|--------------------------------------------------|--------------------------------|---------|---------|
|                                                  | 2010                           | 2009    | 2008    |
| Currency translation adjustment <sup>(1)</sup>   | \$(109)                        | \$(109) | \$(109) |
| Unrealized gain (loss) on derivatives (Note 3)   | (19)                           | (170)   | 138     |
| Unfunded pension and postretirement benefit plan | (13)                           | (11)    | (7)     |
| Accumulated other comprehensive income (loss)    | \$(141)                        | \$(290) | \$ 22   |

<sup>(1)</sup> Prior to October 1, 2002, the Company's Canadian subsidiaries' functional currency was the Canadian dollar. Translation adjustments resulting from translating the Canadian subsidiaries' financial statements into U.S. dollar equivalents were reported separately and accumulated in other comprehensive income (loss). Currency translation adjustments held in other comprehensive income (loss) on the balance sheet will remain there indefinitely unless there is a substantially complete liquidation of the Company's Canadian operations.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### L. Shareholders' Equity

**Authorized Stock.** Our authorized capital stock consists of 500 million shares of \$1 per share par value common stock and 50 million shares of \$1 per share par value preferred stock. The preferred stock is issuable in series, with the rights, preferences and limitations of each series to be determined by our board of directors.

**Shares Issued and Outstanding.** We had 481,880,634 shares of common stock issued on December 31, 2009 and 2010. We had 385,704,691 shares of common stock out-

standing on December 31, 2009 and 372,052,313 shares of common stock outstanding on December 31, 2010. No shares of our preferred stock were outstanding on either date. The only changes in our shares outstanding during 2010 resulted from shares issued under our equity compensation plans (see Note O for further discussion) and share repurchases in the open market. In 2010, we repurchased 18.9 million shares at an average price of \$67 per share. On February 2, 2011, our board of directors authorized our management to repurchase up to an additional 10 million shares, about 3 percent of our total shares outstanding.

**Dividends per Share.** Dividends declared per share were \$1.40 in 2008, \$1.52 in 2009 and \$1.68 in 2010.

**Accumulated Other Comprehensive Income.** Accumulated other comprehensive income (loss) (AOCI) consisted of the following:

| December 31, 2009                          |               |                               |             |
|--------------------------------------------|---------------|-------------------------------|-------------|
|                                            | Gross Balance | Deferred Taxes <sup>(a)</sup> | Net Balance |
| Unrealized gains on securities             | \$ 5          | \$ (2)                        | \$ 3        |
| Foreign currency translation adjustment    | 732           | (118)                         | 614         |
| Pension plans <sup>(b)</sup>               | (2,756)       | 936                           | (1,820)     |
| Other post-retirement plans <sup>(b)</sup> | (33)          | 11                            | (22)        |
| Gains on cash flow hedges                  | 23            | (5)                           | 18          |
| Total AOCI                                 | \$(2,029)     | \$ 822                        | \$(1,207)   |

| December 31, 2010                          |           |         |           |
|--------------------------------------------|-----------|---------|-----------|
|                                            |           |         |           |
| Unrealized gains on securities             | \$ 6      | \$ (2)  | \$ 4      |
| Foreign currency translation adjustment    | 1,040     | (147)   | 893       |
| Pension plans <sup>(b)</sup>               | (3,457)   | 1,178   | (2,279)   |
| Other post-retirement plans <sup>(b)</sup> | (210)     | 72      | (138)     |
| Gains on cash flow hedges                  | 112       | (28)    | 84        |
| Total AOCI                                 | \$(2,509) | \$1,073 | \$(1,436) |

<sup>(a)</sup> The amount of income tax expense (benefit) reported in other comprehensive income was (\$1,330) in 2008, \$244 in 2009 and (\$251) in 2010.

<sup>(b)</sup> We recognize an asset or liability on the balance sheet for the full funded status of our defined-benefit retirement plans. The difference between the cumulative benefit cost recognized and the full funded status of these plans is recorded directly to AOCI, net of tax. See Note P for further discussion.

### M. Derivative Instruments and Hedging Activities (in part)

#### Hedging Activities

We had \$1.8 billion in notional forward foreign exchange contracts outstanding on December 31, 2009, and \$4.2 billion on December 31, 2010. The increase in the amount of outstanding foreign currency forward contracts is due to significant international contract awards in 2010. We recognize derivative financial instruments on the Consolidated Balance Sheet at fair value (see Note D). The fair value of these derivative contracts consisted of the following:

| December 31                        | 2009  | 2010  |
|------------------------------------|-------|-------|
| <b>Other Current Assets:</b>       |       |       |
| Designated as cash flow hedges     | \$ 37 | \$128 |
| Not designated as cash flow hedges | 12    | 35    |
| <b>Other Current Liabilities:</b>  |       |       |
| Designated as cash flow hedges     | (14)  | (16)  |
| Not designated as cash flow hedges | (7)   | (17)  |
| Total                              | \$ 28 | \$130 |

We had no material derivative financial instruments designated as fair value or net investment hedges on December 31, 2009 or 2010.

We record changes in the fair value of derivative financial instruments in operating costs and expenses in the Consolidated Statement of Earnings or in AOCI within shareholders' equity on the Consolidated Balance Sheet depending on whether the derivative is designated and qualifies for hedge accounting. Gains and losses related to derivatives that qualify as cash flow hedges are deferred in AOCI until the underlying transaction is reflected in earnings. We adjust derivative financial instruments not designated as cash flow hedges to market value each period and record the gain or loss in the Consolidated Statement of Earnings. The gains and losses on these instruments generally offset losses and gains on the assets, liabilities and other transactions being hedged.

Gains and losses resulting from hedge ineffectiveness are recognized in the Consolidated Statement of Earnings for all derivative financial instruments, regardless of designation.

Net gains and losses recognized in earnings and AOCI, including gains and losses related to hedge ineffectiveness, were not material in 2010. We do not expect the amount of gains and losses in AOCI that will be reclassified to earnings in 2011 to be material.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### A. Summary of Significant Accounting Policies (in part)

**Derivatives and Hedging.** Derivatives are held for purposes other than trading and are part of a formally documented risk management program. For derivatives designated as fair value hedges, Alcoa measures hedge effectiveness by formally assessing, at least quarterly, the historical high correlation of changes in the fair value of the hedged item and the derivative hedging instrument. For derivatives designated as cash flow hedges, Alcoa measures hedge effectiveness by formally assessing, at least quarterly, the probable high correlation of the expected future cash flows of the hedged item and the derivative hedging instrument. The ineffective portions of both types of hedges are recorded in sales or other

mally assessing, at least quarterly, the historical high correlation of changes in the fair value of the hedged item and the derivative hedging instrument. For derivatives designated as cash flow hedges, Alcoa measures hedge effectiveness by formally assessing, at least quarterly, the probable high correlation of the expected future cash flows of the hedged item and the derivative hedging instrument. The ineffective portions of both types of hedges are recorded in sales or other

income or expense in the current period. If the hedging relationship ceases to be highly effective or it becomes probable that an expected transaction will no longer occur, future gains or losses on the derivative are recorded in other income or expense.

Alcoa accounts for interest rate swaps related to its existing long-term debt and hedges of firm customer commitments for aluminum as fair value hedges. As a result, the fair values of the derivatives and changes in the fair values of the underlying hedged items are reported in other current and noncurrent assets and liabilities in the Consolidated Balance Sheet. Changes in the fair values of these derivatives and underlying hedged items generally offset and are recorded each period in sales or interest expense, consistent with the underlying hedged item.

Alcoa accounts for hedges of foreign currency exposures and certain forecasted transactions as cash flow hedges. The fair values of the derivatives are recorded in other current and noncurrent assets and liabilities in the Consolidated Balance Sheet. The effective portions of the changes in the fair values of these derivatives are recorded in other comprehen-

sive income and are reclassified to sales, cost of goods sold, or other income or expense in the period in which earnings are impacted by the hedged items or in the period that the transaction no longer qualifies as a cash flow hedge. These contracts cover the same periods as known or expected exposures, generally not exceeding five years.

If no hedging relationship is designated, the derivative is marked to market through earnings.

Cash flows from derivatives are recognized in the Statement of Consolidated Cash Flows in a manner consistent with the underlying transactions.

#### X. Derivatives and Other Financial Instruments (in part)

##### Cash Flow Hedges (in part)

For derivative instruments that are designated and qualify as cash flow hedges, the effective portion of the gain or loss on the derivative is reported as a component of other comprehensive income (OCI) and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. Gains and losses on the derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in current earnings.

| Derivatives in Cash Flow Hedging Relationships | Amount of Gain or (Loss) Recognized in OCI on Derivatives (Effective Portion) |         |       | Location of Gain or (Loss) Reclassified from Accumulated OCI Into Earnings (Effective Portion) | Amount of Gain or (Loss) Reclassified from Accumulated OCI Into Earnings (Effective Portion) <sup>(*)</sup> |        |         | Location of Gain or (Loss) Recognized in Earnings on Derivatives (Ineffective Portion and Amount Excluded from Effectiveness Testing) | Amount of Gain or (Loss) Recognized in Earnings on Derivatives (Ineffective Portion and Amount Excluded from Effectiveness Testing) <sup>(**)</sup> |      |       |

<sup>(\*)</sup> Assuming market rates remain constant with the rates at December 31, 2010, a loss of \$86 is expected to be recognized in earnings over the next 12 months.

<sup>(\*\*)</sup> In 2010, 2009, and 2008, the amount of gain or (loss) recognized in earnings represents less than \$1, \$3, and \$(1), respectively, related to the ineffective portion of the hedging relationships. There was also (1) related to the amount excluded from the assessment of hedge effectiveness in 2008.

Aluminum and Energy. Alcoa anticipates the continued requirement to purchase aluminum and other commodities, such as electricity, natural gas, and fuel oil, for its operations. Alcoa enters into futures and forward contracts to reduce volatility in the price of these commodities. Alcoa has also entered into power supply and other contracts that contain pricing provisions related to the LME aluminum price. The LME-linked pricing features are considered embedded derivatives. A majority of these embedded derivatives have been designated as cash flow hedges of future sales of aluminum.

In 2010, Alcoa entered into contracts to hedge the anticipated power requirements at two smelters in Australia. These derivatives hedge forecasted power purchases through December 2036.

On March 31, 2009, Alcoa acquired an embedded derivative in a power contract, which is linked to the LME, in the Elkem transaction.

Interest Rates. Alcoa had no outstanding cash flow hedges of interest rate exposures as of December 31, 2010, 2009, or 2008. An investment accounted for on the equity method by Alcoa has entered into interest rate contracts, which are designated as cash flow hedges.

Foreign Exchange. Alcoa is subject to exposure from fluctuations in foreign currency exchange rates. These contracts may be used from time to time to hedge the variability in cash flows from the forecasted payment or receipt of currencies other than the functional currency. These contracts cover periods consistent with known or expected exposures through 2011. On March 31, 2009, Alcoa acquired foreign currency derivatives in the Elkem transaction which cover anticipated foreign currency exposures through 2011.

## Section 5: Stockholders' Equity

### FORMAT OF STOCKHOLDERS' EQUITY IN ANNUAL FILINGS

#### PRESENTATION

**5.01** *Equity* (sometimes referred to as net assets) is the residual interest in the assets of an entity that remains after deducting its liabilities. As discussed in Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 505, *Equity*, if both financial position and results of operations are presented, disclosure of changes in (a) the separate accounts comprising stockholders' equity (in addition to retained earnings) and (b) the number of shares of equity securities during at least the most recent annual fiscal period and any subsequent interim period presented is required in order to make the financial statements sufficiently informative. Disclosure of such changes may take the form of separate statements or may be made in the basic financial statements or notes thereto. Most public entities present a statement of stockholders' equity to conform with Rule 3-04 of Securities and Exchange Commission (SEC) Regulation S-X. As shown in Table 5-1, which summarizes the presentation formats used by the survey entities to present changes in retained earnings, changes in retained earnings are most frequently presented in a Statement of Stockholders' Equity.

**5.02** FASB ASC 505 explains that additional paid-in capital, however created, should not be used to relieve income of the current or future years of charges that would otherwise be made to the income statement. In accounting for a stock dividend, a corporation should transfer from retained earnings to the category of capital stock and additional paid-in capital an amount equal to the fair value of the additional shares issued.

**5.03** Rule 5-02 of Regulation S-X requires separate captions for additional paid-in capital, other additional capital, and retained earnings. If appropriate, additional paid-in capital and other additional capital may be combined with the stock caption to which it applies.

#### DISCLOSURE

**5.04** FASB ASC 505, *Equity*, states that an entity should explain the pertinent rights and privileges of the various securities outstanding. Examples are dividend and liquidation preferences; contractual rights of security holders to receive dividends or returns from the security issuer's profits, cash flows, or returns on investments; participation rights; call prices and dates; conversion or exercise prices or rates and pertinent dates; sinking-fund requirements; unusual voting rights; and significant terms of contracts to issue additional shares.

**5.05** FASB ASC 505 also requires disclosure of changes in the separate accounts comprising shareholders' equity (in addition to retained earnings) and of the changes in the number of shares of equity securities during at least the most recent annual fiscal period. Disclosure of such changes may take the form of separate statements or may be made in the basic financial statements or notes thereto.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### 14. Employee Stock Option and Benefit Plans

#### Deferred Compensation Plans

Under our deferred compensation plans ("plans"), eligible employees are permitted to make compensation deferrals up to established limits set under the plans and accrue income on these deferrals based on reference to changes in a limited number of investment options. While not required by the plan, the Company chooses to invest in insurance contracts and mutual funds in order to approximate the changes in the liability to the employees. These investments and the liability to the employees were as follows (in thousands):

|                                                  | Fiscal Year-End |          |
|--------------------------------------------------|-----------------|----------|
|                                                  | 2010            | 2009     |
| Cash surrender value of life insurance contracts | \$17,047        | \$16,758 |
| Fair value of mutual funds                       | 6,711           | 7,067    |
| Total assets                                     | \$23,758        | \$23,825 |
| Total assets, included in:                       |                 |          |
| Prepaid expenses and other assets                | \$ 2,340        | \$ 2,196 |
| Other assets                                     | 21,418          | 21,629   |
| Total assets                                     | \$23,758        | \$23,825 |

|                                                     | Fiscal Year-End |          |
|-----------------------------------------------------|-----------------|----------|
|                                                     | 2010            | 2009     |
| Total deferred compensation liability, included in: |                 |          |
| Other current liabilities                           | \$ 2,340        | \$ 2,196 |
| Other long-term liabilities                         | 21,927          | 22,723   |
| Total deferred compensation liability               | \$24,267        | \$24,919 |

Life insurance premiums loads, policy fees and cost of insurance that are paid from the asset investments and gains and losses from the asset investments for these plans are recorded as components of other income or expense; such amounts were a net gain of \$0.7 million in fiscal year 2010, a net loss of \$4.3 million in fiscal year 2009 and a net loss of \$1.1 million in fiscal year 2008. Changes in the obligation to plan participants are recorded as a component of operating expenses and cost of sales; such amounts were an expense of \$1.6 million in fiscal year 2010, a benefit of \$3.6 million in fiscal year 2009 and a benefit of \$1.4 million in fiscal year 2008. Liabilities associated with participant balances under our deferred compensation plans are affected by individual contributions and distributions made, as well as gains and losses on the participant's investment allocation election.

#### Coherent Employee Retirement and Investment Plan

Under the Coherent Employee Retirement and Investment Plan, we match employee contributions to the plan up to a maximum of 4% of the employee's individual earnings. Employees become eligible for participation on their first day of employment and for Company matching contributions after completing one year of service. The Company matching contribution percentage was decreased from 6% to 4% during fiscal 2009. Our contributions (net of forfeitures) during fiscal

2010, 2009, and 2008 were \$2.6 million, \$3.4 million and \$4.8 million, respectively.

#### Employee Stock Purchase Plan

We have an Employee Stock Purchase Plan ("ESPP") whereby eligible employees may authorize payroll deductions of up to 10% of their regular base salary to purchase shares at the lower of 85% of the fair market value of the common stock on the date of commencement of the offering or on the last day of the six-month offering period. During fiscal 2010, 2009 and 2008, a total of 229,172 shares, 224,226 shares and zero shares, respectively, were purchased by and distributed to employees at an average price of \$18.50, \$19.83 and zero per share, respectively. At fiscal 2010 year-end, we had 371,138 shares of our common stock reserved for future issuance under the plan.

In the second quarter of fiscal 2007, the ESPP was suspended and employee contributions made to the ESPP were returned while a voluntary review of our historical stock option practices was conducted. The ESPP was reopened on March 2, 2008 with an 8 month offering period ending October 31, 2008 and employees began making contributions during the second quarter of fiscal 2008.

#### Stock Option Plans

We have two Stock Option Plans for which employees and service providers are eligible participants and a non-employee Directors' Stock Option Plan for which only non-employee directors are eligible participants. The Directors' Stock Option Plan is designed to work automatically without administration, however to the extent administration is necessary, it will be performed by the Board of Directors (or an independent committee thereof). Under these plans, Coherent may grant options to purchase up to an aggregate of 5,500,000, 6,300,000 and 689,000 shares of common stock, respectively, of which zero, 2,388,066 and 132,000, respectively, remain available for grant at fiscal 2010 year-end. Employee options are generally exercisable between two and four years from the grant date at a price equal to the fair market value of the common stock on the date of the grant and generally vest 25% to 50% annually. The Company settles stock option exercises with newly issued shares of common stock. Grants under employee plans generally expire six years from the original grant date. Director options are automatically granted to our non-employee directors. Such directors initially receive a stock option for 24,000 shares exercisable over a three-year period and an award of restricted stock units of 2,000 shares. Currently, the non-employee directors receive an annual stock option grant of 6,000 shares exercisable as to 50% of the shares on the day prior to each of the next two annual stockholder meetings. Grants under director plans expire ten years from the original grant date. In addition, currently each non-employee director receives an annual grant of 2,000 shares of restricted stock units that vest on the day prior to the annual stockholder meeting held in the third calendar year following the date of grant. Beginning with our next annual meeting of stockholders in 2011, the annual grant for non-employee directors will be 3,500 shares of restricted stock units that will vest on February 15 of the calendar year following the grant.

In the second quarter of fiscal 2007, the Company stopped granting stock options while a voluntary review of our historical stock option practices was conducted. The Company

resumed granting stock options in the first quarter of fiscal 2008.

In April 2008, we initiated a tender offer for non-executive officer employees related to certain discount options discovered during our voluntary review of our historical stock option practices. Discount options are options with an exercise price that is less than the fair market value of the shares underlying the option at the time of grant. The discounted options included in this offer were certain options which vested after December 31, 2004. During the tender offer period, employees had the ability to amend the exercise price per share for eligible options to the fair market value of the underlying option as of the measurement date of that option, and receive a cash payment for the difference between the discounted share price and the amended share price. This amendment was designed to allow holders of discount options to avoid certain adverse tax consequences associated with discount options. The offer expired on May 9, 2008. The incremental stock compensation expense resulting from the offer was \$0.4 million which was recognized immediately as all eligible options were fully vested. During fiscal 2010, 2009 and 2008, we also recorded expense of \$0.2 million, \$0.5 million and \$2.5 million, respectively, for tax payments to be made to United States and United Kingdom tax authorities on behalf of employees in connection with these amended shares.

### Fair Value of Stock Compensation

We recognize compensation expense for all share-based payment awards based on the fair value of such awards. The expense is recognized on a straight-line basis over the respective requisite service period of the awards.

### Determining Fair Value

**Valuation and amortization method**—We estimate the fair value of stock options granted using the Black-Scholes-Merton option-pricing formula and a single option award approach. This fair value is then amortized on a straight-line basis over the requisite service periods of the awards, which is generally the vesting period.

**Expected Term**—The expected term represents the period that our stock-based awards are expected to be outstanding and was determined based on historical experience of similar awards, giving consideration to the contractual terms of the stock-based awards, vesting schedules and expectations of future employee behavior as influenced by changes to the terms of its stock-based awards.

**Expected Volatility**—Our process for computing expected volatility considers both historical volatility and market-based implied volatility; however our estimate of expected forfeitures is based on historical employee data and could differ from actual forfeitures.

**Risk-Free Interest Rate**—The risk-free interest rate used in the Black-Scholes-Merton valuation method is based on the implied yield currently available on U.S. Treasury zero-coupon issues with an equivalent remaining term.

**Expected Dividend**—The expected dividend assumption is based on our current expectations about our anticipated dividend policy.

The fair values of the Company's stock options granted to employees and shares purchased under the stock purchase plan for fiscal 2010, 2009 and 2008 were estimated using the following weighted-average assumptions:

|                                       | Employee Stock Option Plans |        |        | Employee Stock Purchase Plans |        |        |
|---------------------------------------|-----------------------------|--------|--------|-------------------------------|--------|--------|
|                                       | Fiscal                      |        |        | Fiscal                        |        |        |

### Stock Compensation Expense

The following table shows total stock-based compensation expense included in the Consolidated Statements of Operations for fiscal 2010, 2009 and 2008 (in thousands):

|                                     | Fiscal 2010 | Fiscal 2009 | Fiscal 2008 |
|-------------------------------------|-------------|-------------|-------------|
| Cost of sales                       | \$ 949      | \$ 753      | \$1,893     |
| Research and development            | 1,174       | 933         | 1,970       |
| Selling, general and administrative | 6,333       | 5,199       | 9,062       |
| Income tax benefit                  | (1,610)     | (1,084)     | (3,919)     |
|                                     | \$6,846     | \$5,801     | \$9,006     |

Total stock-based compensation cost capitalized as part of inventory during fiscal 2010 was \$0.9 million. \$0.9 million was amortized into income during fiscal 2010, which includes amounts capitalized in fiscal 2010 and amounts carried over from fiscal 2009. Total stock-based compensation cost capitalized as part of inventory during fiscal 2009 was \$0.8 million. \$0.9 million was amortized into income during fiscal 2009, which includes amounts capitalized in fiscal 2009 and amounts carried over from fiscal 2008. Management has made an estimate of expected forfeitures and is recognizing compensation costs only for those equity awards expected to vest.

At fiscal 2010 year-end, the total compensation cost related to unvested stock-based awards granted to employees under the Company's stock option and award plans but not yet recognized was approximately \$10.1 million, net of estimated forfeitures of \$1.4 million. This cost will be amortized on a straight-line basis over a weighted-average period of approximately 1.3 years and will be adjusted for subsequent changes in estimated forfeitures.

At fiscal 2010 year-end, the total compensation cost related to options to purchase common shares under the ESPP but not yet recognized was approximately \$0.1 million. This cost will be amortized on a straight-line basis over a weighted-average period of approximately one month.

The stock option exercise tax benefits reported in the statement of cash flows results from the excess tax benefits arising from tax deductions in excess of the stock-based compensation cost recognized, determined on a grant-by-grant basis. During fiscal 2010 and fiscal 2009, we recorded ap-

proximately \$0.9 million and \$0.0 million, respectively, of excess tax benefits as cash flows from financing activities.

During fiscal 2008, our Board of Directors approved an extension of the exercise period to August 25, 2009 for 397,500 fully vested stock options previously granted by the Company to employees. As a result, we recorded approximately \$0.5 million in compensation expense related to the stock option modification during fiscal 2008. There were no extensions granted during fiscal 2010 or 2009.

During fiscal 2010 and fiscal 2008, we recorded cash-based compensation expense of \$0.3 million and \$0.6 million, respectively for cash payments to employees for options that were not able to be exercised due to the internal stock option investigation. In addition, we recorded compensation expense of \$0.5 million and \$1.6 million, respectively, in fiscal 2009 and fiscal 2008 for tax payments to be made to United States and United Kingdom tax authorities on behalf of employees in connection with discounted options previously exercised, for the adverse tax consequences associated with these discount options. We also recorded \$0.4 million in fiscal 2008 for tax payments to be made to United States tax authorities on behalf of employees in connection with shares amended to allow the holders of unexercised discount options to avoid certain adverse tax consequences associated with those discount options.

#### *Stock Options & Awards Activity*

The following is a summary of option activity for our Stock Option Plans for fiscal 2010, 2009 and 2008 (in thousands, except per share amounts and remaining contractual term in years):

| Outstanding at October 2, 2010                    | 1,893               | \$28.96                                         | 4.0                                                           | \$21,279                        |
| Vested and expected to vest at October 2, 2010    | 1,862               | \$29.02                                         | 4.0                                                           | \$20,820                        |
| Exercisable at October 2, 2010                    | 1,118               | \$31.69                                         | 2.8                                                           | \$ 9,520                        |

The aggregate intrinsic value is calculated as the difference between the exercise price of the underlying options and the quoted price of our common stock for in-the-money options. During fiscal 2010, 2009 and 2008, the aggregate intrinsic value of options exercised under the Company's stock option plans were \$6.0 million, \$0.1 million and \$6.0 million, respectively, determined as of the date of option exercise.

Under our 2001 Stock Plan, employees and non-employee directors are eligible for grants of restricted stock awards and/or restricted stock units. Restricted stock awards and restricted stock units are independent of option grants and are typically subject to vesting restrictions—either time-based or performance-based conditions for vesting. Until restricted stock vests, shares (including those issuable upon vesting of the applicable restricted stock unit) are subject to forfeiture if employment terminates prior to the release of restrictions and cannot be transferred.

- The service based restricted stock awards generally vest three years from the date of grant.
- The service based restricted stock unit awards are generally subject to annual vesting over three years from the date of grant.
- The performance-based restricted stock unit award grants are generally subject to a single vest measurement three years from the date of grant, depending upon achievement of performance measurements ("Performance RSUs").

The Company granted Performance RSUs during the second quarter of fiscal 2008 which have a single vesting measurement date of November 14, 2010. These RSUs vest as to anywhere between 0% and 300% of the targeted amount based upon achievement by the Company of (a) an annual revenue threshold amount and (b) adjusted EBITDA percentage targets. The Company has determined that the performance target has not been met and these awards were cancelled in fiscal 2011 with no shares vesting. For the purposes of calculating potentially dilutive shares, performance RSUs have not been included.

The cost of the restricted stock awards and units, determined to be the fair market value of the shares at the date of grant, is expensed ratably over the period the restrictions lapse. We had 480,931 units of restricted stock outstanding at fiscal 2010 year-end and 356,528 shares and units of restricted stock outstanding at fiscal 2009 year-end.

The following table summarizes our restricted stock award and restricted stock unit activity for fiscal 2010, 2009 and 2008 (in thousands, except per share amounts):

|                                       | Number of Shares <sup>(2)</sup> | Weighted Average Grant Date Fair Value |
|---------------------------------------|---------------------------------|----------------------------------------|
| Nonvested stock at September 29, 2007 | 261                             | \$33.02                                |

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### Note 11. Employee Benefits (in part)

#### Other Benefit Plans (in part)

##### 401(k) Plan

We sponsor a qualified defined contribution benefit plan covering substantially all management and occupational employees. Under this plan, employees may contribute a percentage of their annual compensation to the plan up to certain maximums, as defined by the plan and by the Internal Revenue Service ("IRS"). Currently, we match a percentage of employee contributions in cash. As of December 31, 2010 and 2009, the assets of the plan included approximately 42 million and 44 million shares of our common stock, respectively, as a result of the combination of our employer match and participant directed contributions. We recognized \$56 million, \$59 million and \$64 million in expense related to this plan for the years ended December 31, 2010, 2009 and 2008, respectively.

#### Deferred Compensation Plans

We sponsor non-qualified unfunded deferred compensation plans for various groups that include certain of our current and former highly compensated employees. One of these plans is open to new participants. Participants in these plans may, at their discretion, invest their deferred compensation in various investment choices including our common stock. Shares of our common stock owned by rabbi trusts, such as those established for our deferred compensation plans, are treated as treasury stock and are included at cost on our consolidated balance sheets. The values of assets and liabilities related to these plans are not significant.

### Note 15. Stock-Based Compensation

#### Equity Incentive Plan

We adopted an Equity Incentive Plan ("EIP") on June 23, 1997. The EIP was most recently amended and restated on May 23, 2007. The EIP permits the grant of non-qualified stock options, incentive stock options, stock appreciation rights, restricted stock, stock units and other stock grants to selected eligible employees, consultants and non-employee members of our Board of Directors. The Compensation and Human Resources Committee of our Board of Directors, or its delegate, approves the granting and terms of all awards under the EIP (including the exercise prices for stock options). The maximum number of shares of our common stock that

may be issued under the EIP at any time pursuant to awards is equal to 10% of the aggregate number of our common shares issued and outstanding reduced by the aggregate number of options and other awards then outstanding under the EIP or otherwise. Issued and outstanding shares are determined as of the close of trading on the New York Stock Exchange on the preceding trading day. As of December 31, 2010, approximately 176 million shares of our common stock were authorized for grant under the EIP and approximately 122 million shares were available for future issuance under the EIP.

In general, the awards that we grant under our EIP include either service-based vesting terms (generally with ratable vesting over three to five years) or market- or performance-based vesting terms. Unless otherwise provided by the Compensation and Human Resources Committee of our Board of Directors, the EIP provides that, upon a "change in control," all awards granted under the EIP will vest immediately. From September 2002 to October 2008, awards granted to our employees at the vice president level and above typically provide for accelerated vesting and an extended exercise period upon a change in control, and awards granted to all other employees typically provide for accelerated vesting if the optionee is terminated without cause following a change in control. Since October 2008, awards granted to our employees at the executive vice president level and above typically provide for accelerated vesting and an extended exercise period if the optionee is terminated without cause following a change in control, awards granted to our employees at the vice president level provide for accelerated vesting and an extended exercise period upon a change in control, and awards granted to all other employees typically provide for accelerated vesting if the optionee is terminated without cause following a change in control.

On December 21, 2010, we accelerated the vesting of certain restricted stock and performance share awards issued under our EIP in order to preserve certain economic benefits to our stockholders that otherwise would have been lost in connection with our pending merger with CenturyLink. As a result, we recorded an increase to stock-based compensation expense of \$63 million. There was no incremental compensation cost for this modification. This modification affected approximately 80 employees.

#### Awards Without Market-Based Conditions

##### Stock Options

Options generally have an exercise price that is at least equal to the fair market value of the common stock on the date of grant, subject to certain restrictions. Options have ten-year terms.

Our stock option activity for the three-year period ended December 31, 2010 is summarized below:

|                                     | Number of Shares<br>(In Thousands) | Weighted Average<br>Exercise Price | Weighted Average<br>Grant Date Fair Value |

| \$7.51–\$50.00          | 5,727                                   | 4.23                                             | \$13.62                                  | 5,726                                   | \$13.62                                  |
| Total                   | 44,456                                  | 5.51                                             | \$ 5.84                                  | 30,077                                  | \$ 6.37                                  |

The aggregate intrinsic value for outstanding options that were in-the-money was approximately \$113 million as of December 31, 2010. The exercisable options as of December 31, 2010 had remaining contractual terms with a weighted average of 3.99 years. Options that were both exercisable and in-the-money on December 31, 2010 had an aggregate intrinsic value of approximately \$72 million on that date.

We use the Black-Scholes model to estimate the fair value of new stock option grants and establish that fair value at the date of grant. The Black-Scholes option valuation model was developed for use in estimating the fair value of traded options, which have no vesting restrictions and are fully transferable. Additionally, all option valuation models require the input of highly subjective assumptions including the expected life of the options and the expected stock price volatility. Because our stock options have characteristics significantly different from traded options, and changes in the input assumptions can materially affect the fair value estimate, estimates of the fair value of our stock options are subjective.

Following are the weighted-average assumptions used with the Black-Scholes option-pricing model to determine the fair value estimates of options granted in the years ended December 31, 2010, 2009 and 2008:

|                                 | Years Ended December 31 |      |      |
|---------------------------------|-------------------------|------|------|
|                                 | 2010                    | 2009 | 2008 |
| Black-Scholes assumptions:      |                         |      |      |
| Risk-free interest rate         | 2.3%                    | 1.8% | 2.7% |
| Expected dividend yield         | 6.6%                    | 8.9% | 6.4% |
| Expected option life (years)    | 4.8                     | 4.8  | 4.9  |
| Expected stock price volatility | 48%                     | 47%  | 38%  |

We believe the two most significant assumptions used in our estimates of fair value are the expected option life and the expected stock price volatility, both of which we estimate based on historical information.

*Restricted Stock*

Restricted stock activity as of and for the three-year period ended December 31, 2010 is summarized below:

|                                          | Number of<br>Shares (In<br>Thousands) | Weighted<br>Average<br>Grant<br>Date Fair<br>Value |
|------------------------------------------|---------------------------------------|----------------------------------------------------|
| Restricted stock:                        |                                       |                                                    |

| Unvested balance as of December 31, 2009 | 11,260                                | \$3.95                                             |
| Granted                                  | 9,020                                 | 5.78                                               |
| Vested                                   | (16,472)                              | 4.19                                               |
| Forfeited                                | (420)                                 | 3.89                                               |
| Unvested balance as of December 31, 2010 | 3,388                                 | \$7.65                                             |

Based on our stock price on the vesting dates, the fair value of restricted stock that vested during the years ended Decem-

ber 31, 2010, 2009 and 2008 totaled \$112 million, \$10 million and \$8 million, respectively. We use the closing price of our common stock on the date of grant as the fair value of our restricted stock awards for expense recognition purposes.

*Awards with Market-Based Conditions*

In 2007, we granted certain non-qualified options and restricted stock with vesting conditions tied in part to the market value of our common stock. Only one of these option awards and one of these restricted stock awards remain outstanding, and the option has a ten-year term.

In 2008, we began granting what we call "performance share awards." For performance share awards that were granted in 2008, all of which have either vested or been forfeited, a grantee could elect to receive payout in cash. All other performance share awards payout in shares of our common stock, and the number of shares that a grantee ultimately receives is based on a formula that utilizes our total shareholder return as compared to the total shareholder return of a basket of our peers. We value these awards using Monte-Carlo simulations because our standard valuation models do not accurately estimate their fair value. We believe the most significant assumption used in our estimate of fair value is the expected volatility, which we estimated based on historical information.

*Stock Options*

Stock options with market-based conditions activity as of and for the three-year period ended December 31, 2010 is summarized below:

|                                             | Number of Shares<br>(In Thousands) | Weighted Average<br>Exercise Price | Weighted Average<br>Grant Date Fair Value |

| Unvested balance as of December 31, 2009       | 896                                | \$5.65                                    |
| Forfeited                                      | —                                  | —                                         |
| Unvested balance as of December 31, 2010       | 896                                | \$5.65                                    |

### Performance Share Awards

The payout under performance share awards can range from 0% to 200% of the award and is based on our total shareholder return as compared to the total shareholder return of a basket of our peers over the service period of three years. As such, these awards are considered to have market-based conditions.

Performance share awards activity as of and for the three-year period ended December 31, 2010 is summarized below:

|                                        | Number of<br>Original Awards<br>(In Thousands) | Performance<br>Adjustment<br>(In Thousands) | Total Number of<br>Awards<br>(In Thousands) | Weighted<br>Average Grant<br>Date Fair Value |
|----------------------------------------|------------------------------------------------|---------------------------------------------|---------------------------------------------|----------------------------------------------|
| Performance share awards:              |                                                |                                             |                                             |                                              |
| Ending balance as of December 31, 2007 | —                                              |                                             |                                             | —                                            |

<sup>(1)</sup> Of the 31,732,000 shares, 1,312,000 shares vested to employees who selected a cash payout option. No actual shares of our common stock were issued for these performance share awards.

Based on our stock price on the vesting dates, the fair value of the performance share awards that vested during the year ended December 31, 2010 totaled \$244 million. We settled \$21 million of share-based liabilities for \$11 million of stock and \$10 million of cash during the year ended December 31, 2010.

If the service period had ended on December 31, 2010, we would have paid out 3,620,000 shares of our common stock for the unvested performance share awards. Our compensation expense relating to the unvested awards was approximately \$1 million for the year ended December 31, 2010 and \$1 million for the year ended December 31, 2009.

The weighted-average assumptions used to estimate the grant date fair values of the market-based condition awards granted during the years ended December 31, 2010, 2009 and 2008 are summarized below.

|                                     | For the Years Ended<br>December 31 |       |       |
|-------------------------------------|------------------------------------|-------|-------|
|                                     | 2010                               | 2009  | 2008  |
| Monte-Carlo simulation assumptions: |                                    |       |       |
| Risk-free interest rate             | 1.43%                              | 1.31% | 2.10% |
| Expected dividend yield             | 6.9%                               | 10.1% | 6.8%  |
| Expected stock price volatility     | 57%                                | 53%   | 32%   |

### Employee Stock Purchase Plan

We have an Employee Stock Purchase Plan ("ESPP") under which we are authorized to issue 50 million shares of our common stock to eligible employees. Under the terms of our ESPP, eligible employees may authorize payroll deduc-

tions of up to 15% of their base compensation, as defined, to purchase our common stock at a price of 85% of the fair market value of our common stock on the last trading day of the month in which our common stock is purchased. For the years ended December 31, 2010, 2009 and 2008, approximately 2.3 million, 3.5 million and 3.4 million shares, respectively, were purchased under this plan at weighted-average purchase prices of \$4.76, \$3.15 and \$3.50 per share, respectively.

### Stock-Based Compensation Expense

Stock-based compensation expense is included in cost of sales, selling expenses and general, administrative and other operating expenses in our consolidated statements of operations. We recognize compensation expense relating to our service-based and certain of our market-based awards under our EIP using the straight-line method over the applicable vesting periods. Some of our market-based performance share awards were accounted for as liability awards because the employees can choose to receive the award payout in stock or cash. We estimate the fair value of these liability awards throughout their vesting period and record an expense representing the cumulative portion of the award earned through that period. We recognize compensation expense related to employee purchases under our ESPP for the difference between the employees' purchase prices and the fair market values of the stock. While we have recorded deferred income tax benefits relative to our stock compensation expense, we have not realized any income tax benefits resulting from deductions on our tax returns for the year ended December 31, 2010 due to our NOL carryforwards.

As of December 31, 2010, there was \$39 million of total unrecognized compensation expense related to unvested stock options, restricted stock and performance shares under our EIP. We expect to recognize this amount over the remaining weighted average service period of 1.8 years. There is no unrecognized compensation expense related to the ESPP. Included in the stock-based compensation below, there was an immaterial amount of stock compensation awarded as a severance benefit to certain employees whose employment was terminated during the year.

Stock-based compensation capitalized during the year was not material.

The following table presents details of our stock-based compensation for the years ended December 31, 2010, 2009 and 2008:

| (Dollars in millions, except<br>per share amounts) | Years Ended December 31 |          |          |
|----------------------------------------------------|-------------------------|----------|----------|
|                                                    | 2010                    | 2009     | 2008     |
| Stock-based compensation expense:                  |                         |          |          |
| EIP awards (excluding market-based conditions):    |                         |          |          |
| Stock options                                      | \$ 9                    | \$ 12    | \$ 24    |
| Restricted stock                                   | 51                      | 22       | 18       |
| EIP awards with market-based conditions:           |                         |          |          |
| Stock options                                      | 2                       | 3        | 2        |
| Restricted stock                                   | 1                       | 1        | 2        |
| Performance share awards                           | 58                      | 9        | —        |
| ESPP                                               | 2                       | 2        | 2        |
| Total stock-based compensation expense             | \$ 123                  | \$ 49    | \$ 48    |
| Impact on (loss) earnings per common share:        |                         |          |          |
| Basic                                              | \$(0.07)                | \$(0.02) | \$(0.02) |
| Diluted                                            | \$(0.07)                | \$(0.02) | \$(0.02) |

We recognized an income tax benefit of \$31 million, \$19 million and \$17 million associated with our stock compensation expense during the years ended December 31, 2010, 2009 and 2008, respectively.

#### *Proceeds From EIP and Employee Stock Purchase Plan*

We issue new shares of our common stock upon: the exercise of stock options; grants of restricted stock; vesting and payout of performance share awards; and employee purchases of our stock under our ESPP. The cash received upon exercise of stock options and from employee purchases under our ESPP was \$61 million, \$15 million and \$15 million for the years ended December 31, 2010, 2009 and 2008, respectively.

#### *Deferred Compensation Plan for Non-Employee Directors*

We sponsor a deferred compensation plan for current and former non-employee members of our Board of Directors. Under this plan, participants may, at their discretion, elect to defer all or any portion of the directors' fees for the upcoming year for services they perform. Participants in the plan are fully vested in their plan accounts. Subject to the terms of the plan, participants can suspend or change their election to defer fees in future calendar years.

Quarterly, we credit each participant's account with a number of "phantom units" having a value equal to his or her deferred directors' fees. Each phantom unit has a value equal to one share of our common stock and is subject to adjustment for cash dividends payable to our stockholders as well as stock dividends and splits, consolidations and the like that affect shares of our common stock outstanding. Non-employee directors participating in the plan held approximately 860,000 and 937,000 phantom units as of December 31, 2010 and 2009, respectively. Subject to the terms of the plan, each participant's account will be distributed as a lump sum as soon as practicable following the end of his or her services as a director. Amounts deferred before 2005 and earnings on those amounts are subject to the distribution options elected in advance by the participant and may be in the form of: (i) a lump-sum payment; (ii) annual cash installments over periods up to 10 years; or (iii) some other form selected by our chief human resources officer (or his or her designee). A change in our stock price of one dollar would not result in a significant expense impact to our consolidated financial statements.

Investment earnings, administrative expenses and increases or decreases in the deferred compensation liability resulting from changes in the value of our common stock are recorded in our consolidated statements of operations. The deferred compensation liability is recorded in other long-term liabilities. The expense associated with this plan did not have a significant impact on our consolidated financial statements for the periods presented. However, depending on the extent of appreciation in the value of our common stock, expenses incurred under this plan could become significant in subsequent years.

**NOTES TO CONSOLIDATED FINANCIAL  
STATEMENTS (in part)**

**Note 15. Equity (in part)**

**Increase of Authorized Shares of Common Stock**

On August 26, 2009, our shareholders approved an amendment to our Articles of Incorporation to increase the number of authorized shares of our common stock from 200 million to 500 million.

**Common Stock Offering**

In September 2009 (fiscal 2010), we issued 21,660,649 shares of common stock in a registered public offering at \$13.85 per share. In October 2009 (fiscal 2010), we issued an additional 598,141 shares of common stock at \$13.85 per share to cover over-allotments from the offering. The net proceeds of \$294.8 million from the offering were used to repay our \$206.3 million senior unsecured notes, which matured in October 2009 (fiscal 2010), and for working capital and other general corporate purposes.

**Common Stock Issued for a Business  
Combination**

The accompanying notes are an integral part of the consolidated financial statements.

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

#### Note 2—Business Acquisitions (in part)

##### Mccann Color, Inc.

On March 1, 2010, the Company completed the purchase of McCann Color, Inc. ("McCann Color"), a producer of high-quality color concentrates, based in North Canton, Ohio, for \$8.8 million in cash. The business provides specially formulated color concentrates to match precise customer specifications. Its products are used in end markets such as packaging, lawn and garden, furniture, consumer products and appliances. The operations serve customers from its 48,000-square-foot, expandable North Canton facility, which

was built in 1998 exclusively to manufacture color concentrates. The facility complements the Company's existing North American masterbatch manufacturing and product development facilities in Akron, Ohio, San Luis Potosi, Mexico, and La Porte, Texas. The results of operations from the McCann Color acquisition are included in the accompanying consolidated financial statements for the period from the acquisition date, March 1, 2010, and are reported in the North America Masterbatch segment.

The acquisition was accounted for in accordance with the FASB revised accounting standard for business combinations. The accounting guidance for business combinations results in a new basis of accounting reflecting the estimated fair values for assets acquired and liabilities assumed. The transaction was financed with available cash. Tangible assets acquired and liabilities assumed were recorded at their estimated fair values of \$2.0 million and \$0.5 million, respectively. The estimated fair values of finite-lived intangible assets acquired of \$4.0 million related to intellectual property

and customer relationships are being amortized over their estimated useful lives of 15 years. Goodwill of \$3.4 million represents the excess of cost over the estimated fair value of net tangible and intangible assets acquired. The information included herein has been prepared based on the allocation of the purchase price using estimates of the fair value and useful lives of assets acquired and liabilities assumed which were determined with the assistance of independent valuations, quoted market prices and estimates made by management.

#### *Ico, Inc.*

On April 30, 2010, the Company acquired ICO, Inc. ("ICO") through a merger by and among the Company, ICO and Wildcat Spider, LLC, a wholly-owned subsidiary of the Company, and which is now known as ICO-Schulman, LLC, pursuant to the terms of the December 2, 2009 Agreement and Plan of Merger ("Merger Agreement"). The results of ICO's operations have been included in the consolidated financial statements since the date of acquisition, April 30, 2010.

The acquisition of ICO presents the Company with an opportunity to expand its presence substantially, especially in the global rotomolding and U.S. masterbatch markets. ICO's business is complementary to the Company's business across markets, product lines and geographies. The acquisition of ICO's operations increases the Company's presence in the U.S. masterbatch market, gains plants in the high-growth market of Brazil and expands the Company's presence in Asia with the addition of several ICO facilities in that region. In Europe, the acquisition allows the Company to add rotomold compounding and size reduction to the Company's capabilities. It also enables growth in countries where the Company currently has a limited presence, such as France, Italy and Holland, as well as leverages its existing facilities serving high-growth markets such as Poland, Hungary and Sweden.

Under the terms of the Merger Agreement, each share of ICO common stock outstanding immediately prior to the merger was converted into the right to receive a pro rata por-

tion of the total consideration of \$105.0 million in cash and 5.1 million shares of the Company's common stock. All unvested stock options and shares of restricted stock of ICO became fully vested immediately prior to the merger. Unexercised stock options were exchanged for cash equal to their "in the money" value, which reduced the cash pool available to ICO's stockholders. The following table summarizes the calculation of the estimated fair value of the total consideration transferred (in thousands, except share price):

| <b>Estimated fair value of consideration transferred:</b>                       |                  |
|---------------------------------------------------------------------------------|------------------|
| A. Schulman, Inc. common shares issued                                          | 5,100            |
| Closing price per share of A. Schulman, Inc. common stock, as of April 30, 2010 | \$ 26.01         |
| Consideration attributable to common stock                                      | \$132,651        |
| Cash paid, including cash paid to settle ICO, Inc.'s outstanding equity awards  | \$105,000        |
| <b>Total consideration transferred</b>                                          | <b>\$237,651</b> |

The merger was accounted for in accordance with the FASB revised accounting standard for business combinations. The accounting guidance for business combinations results in a new basis of accounting reflecting the estimated fair values for assets acquired and liabilities assumed. The information included herein has been prepared based on the preliminary allocation of the purchase price using estimates of the fair value and useful lives of assets acquired and liabilities assumed which were determined with the assistance of independent valuations, quoted market prices and estimates made by management. The purchase price allocations are subject to further adjustment until all pertinent information regarding the property, plant and equipment, intangible assets, other long-term assets, goodwill, contingent consideration liabilities, long-term debt, other long-term liabilities and deferred income tax assets and liabilities acquired are fully evaluated by the Company and independent valuations are complete.

The accompanying notes are an integral part of the financial statements.

*NOTES TO CONSOLIDATED FINANCIAL  
STATEMENTS (in part)*

*A. Summary of Accounting Policies (in part)*

*Common Stock and Equity (in part)*

Equity transactions consist primarily of the repurchase of our common stock under our stock repurchase programs and the amortization of expense and issuance of common stock under our stock incentive plan. In fiscal 2010, we also issued shares upon conversion of convertible notes called for redemption, discussed in Note D. Under our stock repurchase programs we repurchase our common stock on the open market. The par value of the shares repurchased is charged to common stock with the excess of the purchase price over par first charged against any available additional paid-in capital ("APIC") and the balance charged to retained earnings. Due to the high volume of repurchases over the past several years, we have no remaining balance in APIC in any of the years presented. All shares repurchased have been retired.

*D. Long-Term Debt and Credit Lines (in part)*

In February 2001, TJX issued \$517.5 million zero coupon convertible subordinated notes due in February 2021 and raised gross proceeds of \$347.6 million. The issue price of the notes represented a yield to maturity of 2% per year. During fiscal 2010, TJX called for the redemption of these notes at the original issue price plus accrued original issue discount, and 462,057 of such notes with a carrying value of \$365.1 million were converted into 15.1 million shares of TJX common stock at a rate of 32.667 shares per note. TJX paid \$2.3 million to redeem the remaining 2,886 notes outstanding that were not converted. Prior to fiscal 2010, a total of 52,557 notes were either converted into common shares of TJX or put back to the Company.

<sup>(1)</sup> Cumulative impact of adopting new accounting guidance relates to: 2008—uncertainty in income taxes; 2009—split-dollar life insurance arrangements.

See accompanying Notes to Consolidated Financial Statements.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### Note 6—Earnings Per Share

Net earnings less preferred dividends (net of related tax benefits) are divided by the weighted average number of common shares outstanding during the year to calculate basic net earnings per common share. Diluted net earnings per common share are calculated to give effect to stock options and other stock-based awards (see Note 7) and assume conversion of preferred stock (see Note 8).

Net earnings and common shares used to calculate basic and diluted net earnings per share were as follows (in millions):

| Years Ended June 30                                                      | 2010     | 2009     | 2008     |
|--------------------------------------------------------------------------|----------|----------|----------|
| Net earnings from continuing operations                                  | \$10,946 | \$10,680 | \$11,291 |
| Preferred dividends, net of tax benefit                                  | (219)    | (192)    | (176)    |
| Net earnings from continuing operations available to common shareholders | 10,727   | 10,488   | 11,115   |
| Preferred dividends, net of tax benefit                                  | 219      | 192      | 176      |
| Diluted net earnings from continuing operations                          | 10,946   | 10,680   | 11,291   |
| Net earnings from discontinued operations                                | 1,790    | 2,756    | 784      |
| Net earnings                                                             | 12,736   | 13,436   | 12,075   |

  

| Shares in Millions; Years Ended June 30                                   | 2010    | 2009    | 2008    |
|---------------------------------------------------------------------------|---------|---------|---------|
| Basic weighted average common shares outstanding                          | 2,900.8 | 2,952.2 | 3,080.8 |
| Effect of dilutive securities                                             |         |         |         |
| Conversion of preferred shares <sup>(1)</sup>                             | 134.0   | 139.2   | 144.2   |
| Exercise of stock options and other unvested equity awards <sup>(2)</sup> | 64.5    | 62.7    | 91.8    |
| Diluted weighted average common shares outstanding                        | 3,099.3 | 3,154.1 | 3,316.8 |

<sup>(1)</sup> Despite being included currently in diluted net earnings per common share, the actual conversion to common stock occurs pursuant to the repayment of the ESOPs' obligations through 2035.

<sup>(2)</sup> Approximately 101 million in 2010, 92 million in 2009 and 40 million in 2008 of the Company's outstanding stock options were not included in the diluted net earnings per share calculation because the options were out of the money or to do so would have been antidilutive (i.e., the total proceeds upon exercise would have exceeded the market value of the underlying common shares).

### Note 8—Postretirement Benefits and Employee Stock Ownership Plan (in part)

#### Defined Contribution Retirement Plans

We have defined contribution plans which cover the majority of our U.S. employees, as well as employees in certain other countries. These plans are fully funded. We generally make contributions to participants' accounts based on individual base salaries and years of service. Total global defined contribution expense was \$344, \$364 and \$290 in 2010, 2009 and 2008, respectively.

The primary U.S. defined contribution plan (the U.S. DC plan) comprises the majority of the balances and expense for the Company's defined contribution plans. For the U.S. DC plan, the contribution rate is set annually. Total contributions for this plan approximated 15% of total participants' annual wages and salaries in 2010, 2009 and 2008.

We maintain The Procter & Gamble Profit Sharing Trust (Trust) and Employee Stock Ownership Plan (ESOP) to provide a portion of the funding for the U.S. DC plan and other retiree benefits. Operating details of the ESOP are provided at the end of this Note. The fair value of the ESOP Series A shares allocated to participants reduces our cash contribution required to fund the U.S. DC plan.

#### Employee Stock Ownership Plan

We maintain the ESOP to provide funding for certain employee benefits discussed in the preceding paragraphs.

The ESOP borrowed \$1.0 billion in 1989 and the proceeds were used to purchase Series A ESOP Convertible Class A Preferred Stock to fund a portion of the U.S. DC plan. Principal and interest requirements of the borrowing were paid by the Trust from dividends on the preferred shares and from advances provided by the Company. The original borrowing of \$1.0 billion has been repaid in full, and advances from the Company of \$160 remain outstanding at June 30, 2010. Each share is convertible at the option of the holder into one share of the Company's common stock. The dividend for the current year was equal to the common stock dividend of \$1.80 per share. The liquidation value is \$6.82 per share.

In 1991, the ESOP borrowed an additional \$1.0 billion. The proceeds were used to purchase Series B ESOP Convertible Class A Preferred Stock to fund a portion of retiree health care benefits. These shares, net of the ESOP's debt, are considered plan assets of the other retiree benefits plan discussed above. Debt service requirements are funded by preferred stock dividends, cash contributions and advances provided by the Company, of which \$336 is outstanding at June 30, 2010. Each share is convertible at the option of the holder

into one share of the Company's common stock. The dividend for the current year was equal to the common stock dividend of \$1.80 per share. The liquidation value is \$12.96 per share.

Our ESOP accounting practices are consistent with current ESOP accounting guidance, including the permissible continuation of certain provisions from prior accounting guidance. ESOP debt, which is guaranteed by the Company, is recorded as debt (see Note 4) with an offset to the reserve for ESOP debt retirement, which is presented within shareholders' equity. Advances to the ESOP by the Company are recorded as an increase in the reserve for ESOP debt retirement. Interest incurred on the ESOP debt is recorded as interest expense. Dividends on all preferred shares, net of related tax benefits, are charged to retained earnings.

The series A and B preferred shares of the ESOP are allocated to employees based on debt service requirements, net of advances made by the Company to the Trust. The number of preferred shares outstanding at June 30 was as follows:

| (Shares in thousands) | 2010   | 2009   | 2008   |
|-----------------------|--------|--------|--------|
| Allocated             | 54,542 | 56,818 | 58,557 |
| Unallocated           | 14,762 | 16,651 | 18,665 |
| Total series A        | 69,304 | 73,469 | 77,222 |
| Allocated             | 20,752 | 20,991 | 21,134 |
| Unallocated           | 41,347 | 42,522 | 43,618 |
| Total series B        | 62,099 | 63,513 | 64,752 |

For purposes of calculating diluted net earnings per common share, the preferred shares held by the ESOP are considered converted from inception.

See Notes to Consolidated Financial Statements.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### Note A—Description of Business and Significant Accounting Policies (in part)

**Stock-based compensation costs:** All stock-based awards to employees, including grants of stock options, are recognized as compensation costs in the Consolidated Financial Statements based on their fair values measured as of the date of grant. The Company estimates the fair value of stock option grants using a Black-Scholes option pricing model. This model requires various assumptions as inputs including expected volatility of the Paychex stock price and expected option life. Volatility is estimated based on a combination of historical volatility using weekly stock prices over a period equal to the expected option life and implied market volatility. Expected option life is estimated based on historical exercise behavior.

The Company is required to estimate forfeitures and only record compensation costs for those awards that are expected to vest. The assumptions for forfeitures were determined based on type of award and historical experience. Forfeiture assumptions are adjusted at the point in time a significant change is identified with any adjustment recorded in the period of change, and the final adjustment at the end of the requisite service period to equal actual forfeitures.

The assumptions of volatility, expected option life, and forfeitures all require significant judgment and are subject to change in the future due to factors such as employee exercise behavior, stock price trends, and changes to type or provisions of stock-based awards. Any change in one or more of these assumptions could have a material impact on the estimated fair value of an award and on stock-based compensation costs recognized in the Company's results of operations.

The Company has determined that the Black-Scholes option pricing model, as well as the underlying assumptions used in its application, is appropriate in estimating the fair value of stock option grants. The Company periodically reassesses its assumptions as well as its choice of valuation model, and will reconsider use of this model if additional information becomes available in the future indicating that another model would provide a more accurate estimate of fair value, or if characteristics of future grants would warrant such a change.

Refer to Note B of the Notes to Consolidated Financial Statements for further discussion of the Company's stock-based compensation plans.

### Note B—Stock-Based Compensation Plans

The Paychex, Inc. 2002 Stock Incentive Plan, as amended and restated (the "2002 Plan"), effective on October 12, 2005 upon its approval by the Company's stockholders, authorizes grants of up to 29.1 million shares of the Company's common stock. As of May 31, 2010, there were 14.1 million shares available for future grants under the 2002 Plan. No future grants will be made pursuant to the Paychex, Inc. 1998 Stock Incentive Plan, which expired in August 2002; however, options to purchase an aggregate of 1.5 million shares under the plan remain outstanding as of May 31, 2010.

All stock-based awards to employees are recognized as compensation costs in the Consolidated Financial Statements based on their fair values measured as of the date of grant. These costs are recognized as an expense in the Consolidated Statements of Income on a straight-line basis over the requisite service period and increase additional paid-in capital. For grants prior to June 1, 2006, costs were recognized on an accelerated basis over the requisite service period.

Stock-based compensation expense was \$25.6 million, \$25.7 million, and \$25.4 million for fiscal 2010, fiscal 2009, and fiscal 2008, respectively. Related income tax benefits recognized were \$7.9 million, \$8.0 million, and \$7.4 million for the respective fiscal years. Capitalized stock-based compensation costs related to the development of internal use software for these same fiscal years were not significant.

As of May 31, 2010, the total unrecognized compensation cost related to all unvested stock-based awards was \$52.0 million and is expected to be recognized over a weighted-average period of 1.7 years.

**Stock option grants:** Stock option grants entitle the holder to purchase, at the end of the vesting term, a specified number of shares of Paychex common stock at an exercise price per share set equal to the closing market price of the common stock on the date of grant. All stock option grants have a contractual life of ten years from the date of the grant and a vesting schedule as established by the Board of Directors (the "Board"). The Company issues new shares of common stock to satisfy stock option exercises. Non-qualified stock option grants to officers, outside directors, and management are typically approved by the Board in July. Non-qualified stock option grants to officers and management vest 20% per annum while grants to the Board vest one-third per annum.

The Company has granted stock options to virtually all non-management employees with at least 90 days of service, and shares remain outstanding for the following broad-based stock option grants:

| Date of Broad-Based Grant | Shares Granted | Exercise Price Per Share | Shares Outstanding as of May 31, 2010 | Vesting Schedule                      |
|---------------------------|----------------|--------------------------|---------------------------------------|---------------------------------------|
| October 2001              | 1,295,000      | \$33.17                  | 350,000                               | 25% each October in 2002 through 2005 |
| April 2004                | 1,655,000      | \$37.72                  | 755,000                               | 25% each April in 2005 through 2008   |
| October 2006              | 2,033,000      | \$37.32                  | 1,294,000                             | 20% each October in 2007 through 2011 |

Historically, each April and October, the Company has granted options to newly hired employees who met certain criteria. Beginning with grants issued in October 2005, such grants of options vest 20% per annum. Any future grants

of stock-based awards are subject to the discretion of the Board.

The following table summarizes stock option activity for the three years ended May 31, 2010:

|                                | Shares Subject<br>to Options<br>(Thousands) | Weighted-<br>Average<br>Exercise Price<br>Per Share | Weighted-<br>Average<br>Remaining<br>Contractual<br>Term (Years) | Aggregate<br>Intrinsic<br>Value <sup>(1)</sup><br>(Thousands) |
|--------------------------------|---------------------------------------------|-----------------------------------------------------|------------------------------------------------------------------|---------------------------------------------------------------|
| Outstanding as of May 31, 2007 | 16,268                                      | \$34.12                                             |                                                                  |                                                               |

<sup>(1)</sup> Market price of the underlying stock as of May 28, 2010 less the exercise price.

Other information pertaining to stock option grants is as follows:

| In thousands, except per share amounts                                      | Year Ended May 31 |          |          |
|-----------------------------------------------------------------------------|-------------------|----------|----------|
|                                                                             | 2010              | 2009     | 2008     |
| Weighted-average grant-date fair value of stock options granted (per share) | \$ 4.37           | \$ 6.52  | \$ 9.84  |
| Total intrinsic value of stock options exercised                            | \$ 1,378          | \$ 2,576 | \$25,154 |
| Total fair value of stock options vested                                    | \$18,996          | \$25,842 | \$32,340 |

The fair value of stock option grants was estimated at the date of grant using a Black-Scholes option pricing model. The weighted-average assumptions used for valuation under the Black-Scholes model are as follows:

|                               | Year Ended May 31 |      |      |
|-------------------------------|-------------------|------|------|
|                               | 2010              | 2009 | 2008 |
| Risk-free interest rate       | 3.0%              | 3.2% | 4.3% |
| Dividend yield                | 4.5%              | 3.6% | 2.9% |
| Volatility factor             | .28               | .28  | .26  |
| Expected option life in years | 6.3               | 6.3  | 6.0  |

Risk-free interest rates are yields for zero coupon U.S. Treasury notes maturing approximately at the end of the expected option life. The estimated volatility factor is based on a combination of historical volatility using weekly stock prices over a period equal to the expected option life and implied market volatility. The expected option life is based on historical exercise behavior.

The Company has determined that the Black-Scholes option pricing model, as well as the underlying assumptions used in its application, are appropriate in estimating the fair value of its stock option grants. The Company periodically assesses its assumptions as well as its choice of valuation model, and will reconsider use of this model if additional information becomes available in the future indicating that another model would provide a more accurate estimate of fair value, or if characteristics of future grants would warrant such a change.

**Restricted stock awards:** The Board has approved grants of restricted stock awards to the Company's officers and outside directors in accordance with the 2002 Plan. All shares underlying awards of restricted stock are restricted in that they are not transferable until they vest. The recipients of the restricted stock have voting rights and earn dividends, which are paid to the recipient at the time of vesting of the awards. If the recipient leaves Paychex prior to the vesting date for any reason, the shares of restricted stock and the dividends accrued on those shares will be forfeited and returned to Paychex.

For restricted stock awards granted to officers, the shares vest upon the fifth anniversary of the grant date provided the recipient is still an employee of the Company on that date. These awards have a provision for the acceleration of vesting based on achievement of performance targets established by the Board. If the established targets are met for a fiscal year, up to one-third of the award may vest. If all the targets are met for three consecutive years, the award will be fully vested. For outside directors, the shares vest on the third anniversary of the grant date. The fair value of restricted stock awards is equal to the closing market price of the underlying

common stock as of the date of grant and is expensed over the requisite service period on a straight-line basis.

The following table summarizes restricted stock activity for the three years ended May 31, 2010:

| (In thousands, except per share amounts) | Restricted Shares | Weighted-Average Grant-Date Fair Value Per Share |
|------------------------------------------|-------------------|--------------------------------------------------|
| Nonvested as of May 31, 2007             | 105               | \$36.87                                          |
| Granted                                  | 134               | \$43.91                                          |
| Vested                                   | (33)              | \$36.87                                          |

| Vested                                   | (66)              | \$39.82                                          |
| Forfeited                                | (19)              | \$36.81                                          |
| Nonvested as of May 31, 2009             | 245               | \$36.74                                          |
| Granted                                  | 153               | \$24.60                                          |
| Vested                                   | (9)               | \$35.79                                          |
| Forfeited                                | (19)              | \$32.66                                          |
| Nonvested as of May 31, 2010             | 370               | \$31.95                                          |

**Restricted stock units:** Beginning in July 2007, the Board approved grants of restricted stock units ("RSUs") to non-officer management as a replacement of non-qualified stock options. RSUs do not have voting rights or earn dividend equivalents during the vesting period. These awards vest 20% per annum over five years with a small population of awards vesting on the fourth anniversary of the grant date. The fair value of RSUs is equal to the closing market price of the underlying common stock as of the date of grant, adjusted for the present value of expected dividends over the vesting period.

The following table summarizes RSU activity for the three years ended May 31, 2010:

| (In thousands, except per share amounts) | RSUs  | Weighted-Average Grant-Date Fair Value Per Share |
|------------------------------------------|-------|--------------------------------------------------|
| Nonvested as of May 31, 2007             | —     | —                                                |
| Granted                                  | 499   | \$40.60                                          |

**Non-compensatory employee benefit plan:** The Company offers an Employee Stock Purchase Plan to all employees under which the Company's common stock can be purchased through a payroll deduction with no discount to the market price and no look-back provision. All transactions occur directly through the Company's transfer agent and no brokerage fees are charged to employees, except for when stock is sold. The plan has been deemed non-compensatory and therefore, no stock-based compensation costs have been recognized for fiscal 2010, fiscal 2009, or fiscal 2008 related to this plan.

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

(In thousands, except per share amounts)

#### (2) Voluntary Reorganization Under Chapter 11 (in part)

On February 3, 2009, the Predecessor Company announced that it had reached agreements with certain noteholders, representing, in the aggregate, approximately 70% of the face value of the Company's then outstanding senior subordinated notes, to pursue a refinancing that, if implemented as proposed, would significantly reduce the Predecessor Company's outstanding debt. On the same day, the Debtors filed voluntary petitions under Chapter 11 of the Bankruptcy Code, in the Bankruptcy Court (the "Bankruptcy Filing") and filed with the Bankruptcy Court a proposed plan of reorganization (the "Proposed Plan") that detailed the Debtors' proposed terms for the refinancing. The Chapter 11 cases were jointly administered by the Bankruptcy Court as Case No. 09-50455 (the "Bankruptcy Cases").

The Bankruptcy Court entered a written order (the "Confirmation Order") on July 15, 2009 confirming the Proposed Plan (as so confirmed, the "Plan").

#### Plan Effective Date

On the Effective Date the Plan became effective, and the Debtors emerged from Chapter 11 of the Bankruptcy Code. Pursuant to and by operation of the Plan, on the Effective Date, all of Predecessor Company's existing equity securities, including the existing common stock and stock options, were extinguished and deemed cancelled. Spectrum Brands filed a certificate of incorporation authorizing new shares of common stock. Pursuant to and in accordance with the Plan, on the Effective Date, Successor Company issued a total of 27,030 shares of common stock and \$218,076 of 12% Senior Subordinated Toggle Notes due 2019 (the "12% Notes") to holders of allowed claims with respect to Predecessor Company's 8½% Senior Subordinated Notes due 2013 (the "8½ Notes"), 7⅞% Senior Subordinated Notes due 2015 (the "7⅞ Notes") and Variable Rate Toggle Senior Subordinated Notes due 2013 (the "Variable Rate Notes") (collectively, the "Senior Subordinated Notes"). (See also Note 7, Debt, for a more complete discussion of the 12% Notes.) Also on the Effective Date, Successor Company issued a total of 2,970 shares of common stock to supplemental and sub-supplemental debtor-in-possession facility participants in respect of the equity fee earned under the Debtors' debtor-in-possession credit facility.

*Fresh-Start Reporting (in part)*

The Company, in accordance with ASC 852, adopted fresh-start reporting as of the close of business on August 30, 2009 since the reorganization value of the assets of the Predecessor Company immediately before the date of confirmation of the Plan was less than the total of all post-petition liabilities and allowed claims, and the holders of the Predecessor Company's voting shares immediately before confirmation of the Plan received less than 50 percent of the voting shares of the emerging entity. The four-column consolidated statement of financial position as of August 30, 2009, included herein, applies effects of the Plan and fresh-start reporting to the carrying values and classifications of assets or liabilities that were necessary.

The Company analyzed the transactions that occurred during the two-day period from August 29, 2009, the day after the Effective Date, and August 30, 2009, the fresh-start reporting date, and concluded that such transactions were not material individually or in the aggregate as such transactions represented less than one-percent of the total net sales for the fiscal year ended September 30, 2009. As a result, the Company determined that August 30, 2009, would be an appropriate fresh-start reporting date to coincide with the Company's normal financial period close for the month of August 2009. Upon adoption of fresh-start reporting, the recorded amounts of assets and liabilities were adjusted to reflect their estimated fair values. Accordingly, the reported historical fi-

nancial statements of the Predecessor Company prior to the adoption of fresh-start reporting for periods ended on or prior to August 30, 2009 are not comparable to those of the Successor Company.

The four-column consolidated statement of financial position as of August 30, 2009 reflects the implementation of the Plan as if the Plan had been effective on August 30, 2009. Reorganization adjustments have been recorded within the consolidated statement of financial position as of August 30, 2009 to reflect effects of the Plan, including the discharge of Liabilities subject to compromise and the adoption of fresh-start reporting in accordance with ASC 852. The Bankruptcy Court confirmed the Plan based upon a reorganization value of the Company between \$2,200,000 and \$2,400,000, which was estimated using various valuation methods including: (i) publicly traded company analysis, (ii) discounted cash flow analysis; and (iii) a review and analysis of several recent transactions of companies in similar industries to the Company. These three valuation methods were equally weighted in determining the final range of reorganization value as confirmed by the Bankruptcy Court. Based upon the factors used in determining the range of reorganization value, the Company concluded that \$2,275,000 should be used for fresh-start reporting purposes as it most closely approximated fair value.

The following four-column consolidated statement of financial position table identifies the adjustments recorded to the Predecessor Company's August 30, 2009 consolidated statement of financial position as a result of implementing the Plan and applying fresh-start reporting:

*Effects of Plan Adjustments (in part)*

<sup>(j)</sup> Pursuant to the Plan, the debtor's common stock was canceled and new common stock of the reorganized debtors was issued. The adjustments eliminated Predecessor Company's common stock and additional paid-in capital of \$691 and \$677,007, respectively, and recorded Successor Company's common stock and additional paid-in capital of \$300 and \$724,796, respectively, which represents the fair value of the newly issued common stock. The fair value of the newly issued common stock was not separately valued. A fair value of \$725,096 was determined by subtracting the fair value of net debt (total debt less cash and cash equivalents), or \$1,549,904 from the enterprise value of \$2,275,000. The Company issued 30,000 shares at emergence, consisting of 27,030 shares to holders of the Senior Subordinated Notes allowed note holder claims and 2,970 shares in accordance with the terms of the Debtors' debtor-in-possession credit facility.

<sup>(k)</sup> As a result of the Plan, the adjustment to accumulated (deficit) equity recorded the elimination of the Predecessor Company's common stock, additional paid in capital and treasury stock in the amount of \$600,807 and recorded the pre-tax gain on the cancellation of debt in the amount of \$146,555. The elimination of the Predecessor Company's common stock, additional paid in capital and treasury stock was calculated as follows:

|                                                                                   |           |
|-----------------------------------------------------------------------------------|-----------|
| Elimination of Predecessor Company's common stock<br>(see note (j))               | \$ 691    |
| Elimination of Predecessor Company's additional paid in<br>capital (see note (j)) | 677,007   |
| Elimination of Predecessor Company's treasury stock<br>(see note (l))             | (76,891)  |
| Elimination of Predecessor Company's common stock                                 | \$600,807 |

The pre-tax gain on the cancellation of debt was calculated as follows:

|                                                                                        |             |
|----------------------------------------------------------------------------------------|-------------|
| Extinguishment of Predecessor Company senior<br>subordinated notes                     | \$1,049,885 |
| Extinguishment of Predecessor Company accrued interest<br>on senior subordinated notes | 40,497      |
| Issuance of Successor Company 12% Notes (fair value)                                   | (218,731)   |
| Issuance of Successor Company common stock                                             | (725,096)   |
| Pre-tax gain on the cancellation of debt                                               | \$ 146,555  |

<sup>(l)</sup> Pursuant to the Plan, the adjustment eliminates treasury stock of \$76,891 of the Predecessor Company.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)**

**14. Income Taxes (in part)**

During fiscal 2010, we recorded \$32.1 million charge to additional paid in capital related to the establishment of a \$26.1 million tax reserve to provide for the uncertainty relating to the tax treatment of the termination of the Lehman Brothers bond hedge, as well as \$6.0 million deferred tax liability for

related temporary tax return differences in the valuation of the convertible debt as a result of the transaction.

# NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

## Footnote 10

### Convertible Note Hedge and Warrant Transactions

In connection with the issuance of the Convertible Notes in March 2009, the Company entered into separate convertible note hedge transactions and warrant transactions with respect to the Company's common stock to minimize the impact of the potential dilution upon conversion of the Convertible Notes. The Company purchased call options in private transactions to cover 40.1 million shares of the Company's common stock at a strike price of \$8.61 per share, subject to adjustment in certain circumstances, for \$69.0 million. The call options generally allowed the Company to receive shares of the Company's common stock from counterparties equal to the number of shares of common stock payable to the holders of the Convertible Notes upon conversion. The Company also sold warrants permitting the purchasers to acquire up to 40.1 million shares of the Company's common stock at an exercise price of \$11.59 per share, subject to adjustment in certain circumstances, in private transactions for total proceeds of \$32.7 million. For each warrant that is exercised, the Company would deliver to the counterparties a number of shares of the Company's common stock equal to the amount by which the Company's stock price exceeds the exercise price, divided by the stock price. As of December 31, 2009, the estimated fair value of the call options and warrants was \$306.7 million and \$238.9 million, respectively.

The Company analyzed the convertible note hedge transactions and warrant transactions and determined that they met the criteria for classification as equity transactions. As a result, the Company recorded the purchase of the call options as a reduction in additional paid-in capital, net of tax, and the proceeds from the warrants as an increase to additional paid-in capital, and the Company did not recognize subsequent changes in the fair value of the instruments in its financial statements.

In September 2010, in connection with the Plan, the Company negotiated settlement of the convertible note hedge and warrants with the Company receiving \$369.5 million from the counterparties for the value of the convertible note hedge and paying the counterparties \$298.4 million for the warrants. As of December 31, 2010, the Company had completely settled the convertible note hedge and warrant transactions and recorded a net increase in additional paid-in capital of \$71.1 million representing the net value associated with the settlement of the convertible note hedge and warrant transactions.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### 12. Long-Term Debt (in part)

During 2009, LP issued and sold 375,000 Units consisting of (1) \$375 million principal amount at maturity of 13% Senior Secured Notes due 2017 and (2) warrants to purchase 18,395,963 shares of our common stock at an exercise price of \$1.39 per share, subject to adjustment in certain circumstances and to mandatory cashless exercise provisions. The units were issued at a discount to the principal amount at maturity of the notes included therein resulting in aggregate gross proceeds of \$281.3 million. The effective interest rate of this debt is 19.1% (or 19.7% including the warrants). Simultaneous with the closing of the unit sale, LP used a portion of the proceeds to retire \$126.6 million aggregate principal amount of our 8.875% Senior Notes due 2010 for \$126.0 million. Subsequently in 2009, LP redeemed 35% of the outstanding Senior Secured Notes (\$131.3 million principal amount at maturity) at a price of \$858.14 per \$1,000 principal amount at maturity or \$112.6 million with a portion of the proceeds from the issuance and sale of 20,700,000 shares of common stock through a public offering. In connection with this repurchase, LP recorded a loss on early debt extinguishment of \$21.1 million which included \$3.7 million associated with the write of the related financing costs.

### 14. Stockholders' Equity (in part)

#### Warrants

As part of the unit issuance described in Note 12 above, LP issued warrants to purchase 18,395,963 shares of LP common stock at an exercise price of \$1.39 per share subject to mandatory cashless exercise provisions. During the years ended December 31, 2010 and December 31, 2009, warrant exercises resulted in the issuances of 5,108,412 and 2,089,634 shares. At December 31, 2010, the remaining outstanding warrants were exercisable to purchase approximately 9,932,348 shares, at an exercise price of \$1.39 per share subject to mandatory cashless exercise provisions. The warrant was valued based upon Black-Scholes option pricing model using expected stock price volatility of 53%; no expected dividends; risk-free interest rate of 2.6%; and an expected life of 8 years which resulted in a fair value per share of \$0.72.

## COMMON STOCK

### DISCLOSURE

**5.22** Rule 5-02 of Regulation S-X requires stating on the face of the balance sheet the number of shares issued or outstanding, as appropriate, and the dollar amount. The number of shares authorized should be disclosed on the balance sheet or in the notes. As shown in Table 5-4, consistent with prior years, the majority of the survey entities show common stock at par value.

### 5.23

## PREFERRED STOCK

### PRESENTATION

**5.24** FASB ASC 505-10-50 requires that if preferred stock or other senior stock has a preference in involuntary liquidation, the entity should disclose the liquidation preference of the stock (the relationship between the preference in liquidation and the par or stated value of the shares). That disclosure should be made in the "Equity" section of the balance sheet in the aggregate, either parenthetically or in short.

**5.25** FASB ASC 480 requires that an issuer classify certain financial instruments with characteristics of both liabilities and equity as liabilities. Some issuances of stock, such as mandatorily redeemable preferred stock, impose unconditional obligations requiring the issuer to transfer assets or issue its equity shares. FASB ASC 480 requires an issuer to classify such financial instruments as liabilities.

## DISCLOSURE

**5.26** FASB ASC 505-10-50 requires disclosure of both of the following either on the face of the balance sheet or in the notes thereto:

- The aggregate or per-share amounts at which preferred stock may be called or is subject to redemption through sinking-fund operations or otherwise
- The aggregate and per-share amounts of arrearages in cumulative preferred dividends

Rule 5-02 of SEC Regulation S-X also calls for disclosure of the number of shares authorized and the number of shares issued or outstanding, as appropriate.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### Note 11—Capital Stock (in part)

At December 31, 2010, there were 300,000,000 shares of common stock and 30,000,000 shares of serial preferred stock authorized for issuance. Of the authorized serial preferred stock, 3,000,000 shares are designated as cumulative redeemable serial preferred and 1,000,000 shares are designated as convertible serial preferred stock. See Note 12. Effective April 21, 2010, the 2006 Equity and Performance Incentive Plan (2006 Employee Plan) was amended and restated to increase the number of shares that may be issued or transferred by 9,200,000 shares to 19,200,000 shares. See Note 13. An aggregate of 19,835,391, 13,381,449 and 14,884,028 shares of common stock at December 31, 2010, 2009 and 2008, respectively, were reserved for future grants of restricted stock and the exercise and future grants of option rights (see Note 13). Common shares outstanding shown in the following table included 475,628 shares of common stock held in a revocable trust at December 31, 2010, 2009 and 2008, respectively. The revocable trust is used to accumulate assets for the purpose of funding the ultimate obligation of certain non-qualified benefit plans. Transactions between the Company and the trust are accounted for in accordance with the Deferred Compensation—Rabbi Trusts Subtopic of the Compensation Topic of the ASC, which requires the assets held by the trust be consolidated with the Company's accounts.

### Note 12—Stock Purchase Plan and Preferred Stock

As of December 31, 2010, 24,624 employees contributed to the Company's ESOP, a voluntary defined contribution plan available to all eligible salaried employees. Participants are allowed to contribute, on a pretax or after-tax basis, up to the lesser of twenty percent of their annual compensation or the maximum dollar amount allowed under the Internal Revenue Code. Prior to July 1, 2009, the Company matched

one hundred percent of all contributions up to six percent of eligible employee contributions. Effective July 1, 2009, the ESOP was amended to change the Company match to one-hundred percent on the first three percent of eligible employee contributions and fifty percent on the next two percent of eligible contributions. Such participant contributions may be invested in a variety of mutual funds or a Company common stock fund and may be exchanged between investments as directed by the participant. Participants are permitted to diversify both future and prior Company matching contributions previously allocated to the Company common stock fund into a variety of mutual funds.

The Company made contributions to the ESOP on behalf of participating employees, representing amounts authorized by employees to be withheld from their earnings, of \$70,601, \$70,025 and \$72,812 in 2010, 2009 and 2008, respectively. The Company's matching contributions to the ESOP charged to operations were \$37,894, \$44,587 and \$54,001 for 2010, 2009 and 2008, respectively.

At December 31, 2010, there were 16,845,158 shares of the Company's common stock being held by the ESOP, representing 15.7 percent of the total number of voting shares outstanding. Shares of Company common stock credited to each member's account under the ESOP are voted by the trustee under instructions from each individual plan member. Shares for which no instructions are received are voted by the trustee in the same proportion as those for which instructions are received.

On August 1, 2006, the Company issued 500,000 shares of convertible serial preferred stock, no par value (Series 2 Preferred stock) with cumulative quarterly dividends of \$11.25 per share, for \$500,000 to the ESOP. The ESOP financed the acquisition of the Series 2 Preferred stock by borrowing \$500,000 from the Company at the rate of 5.5 percent per annum. This borrowing is payable over ten years in equal quarterly installments. Each share of Series 2 Preferred stock

is entitled to one vote upon all matters presented to the Company's shareholders and generally votes with the common stock together as one class. The Series 2 Preferred stock is held by the ESOP in an unallocated account. As the value of compensation expense related to contributions to the ESOP is earned, the Company has the option of funding the ESOP by redeeming a portion of the preferred stock or with cash. Contributions are credited to the members' accounts at the time of funding. The Series 2 Preferred stock is redeemable for cash or convertible into common stock or any combination thereof at the option of the ESOP based on the relative fair value of the Series 2 Preferred and common stock at the time of conversion. At December 31, 2010, 2009 and 2008, there were no allocated or committed-to-be released shares of Series 2 Preferred stock outstanding. In 2010 and 2009, the Company elected to fund the ESOP with cash. The Company redeemed 107,980 shares of the Series 2 Preferred stock for cash in 2008.

## DIVIDENDS

### PRESENTATION

**5.29** For public entities with respect to any dividends, Rule 3-04 of Regulation S-X requires the amount per share and in the aggregate for each class of shares to be stated. This may be stated on the financial statements or within the note disclosures. Further, Rule 4-08 of Regulation S-X requires disclosure of any restrictions that limit the payment of dividends.

**5.30** An entity may distribute certain stock purchase rights that enable the holders of such rights to purchase additional equity in an entity if an outside party acquires or tenders for a substantial minority interest in the subject entity. These are commonly referred to as "poison pill arrangements."

### 5.31

# NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

## 12. Stockholders' Equity (in part)

We initiated a quarterly cash dividend in July 2003. The dividend has been increased from time to time thereafter. In July 2010, the board of directors approved an increase in the quarterly dividend to \$0.20 per share. Cash dividends declared were \$298.8 million, \$288.7 million and \$168.9 million

for the years ended December 31, 2010, 2009 and 2008, respectively. As of December 31, 2010, we recorded a quarterly dividend payable of \$76.7 million to stockholders of record at the close of business on January 3, 2011.

The number of common shares outstanding, Common shares, Capital in excess of par value and Retained earnings have been restated to give effect to the two-for-one stock split. See Note 1 for additional information.

The notes on pages 24 to 52 are an integral part of the consolidated financial statements.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

##### Note 1. Summary of Significant Accounting Policies (in part)

###### General Information (in part)

On January 27, 2011, Eaton's Board of Directors announced a two-for-one stock split of the Company's common shares effective in the form of a 100% stock dividend. The record date for the stock split was February 7, 2011, and the additional shares will be distributed on February 28, 2011. Accordingly, all per share amounts, average shares outstanding, shares outstanding, shares repurchased and equity based compensation presented in the consolidated financial statements and notes have been adjusted retroactively to reflect the stock split. Shareholders' equity has been retroactively adjusted to give effect to the stock split for all periods presented by reclassifying the par value of the additional shares issued in connection with the stock split to Common shares from Retained earnings and Capital in excess of par value.

## STOCK SPLITS

### RECOGNITION AND MEASUREMENT

**5.34** The FASB ASC glossary defines a *stock split* as an issuance by a corporation of its own common shares to its common shareholders without consideration and under conditions indicating that such action is prompted mainly by a desire to increase the number of outstanding shares for the purpose of effecting a reduction in their unit market price and, thereby, of obtaining wider distribution and improved marketability of the shares. It is also sometimes called a stock split-up.

**5.35** FASB ASC 505-20 addresses the accounting for stock splits, as well as stock dividends, and provides guidance on determining whether a stock dividend or stock split should be accounted for according to its form or whether it should be accounted for differently.

**23. Subsequent Events (in part)**

**Two-for-One Stock Split**

On January 26, 2011, the company's board of directors declared a two-for-one split of Ball's common stock, increased the quarterly dividend to 7 cents per share (on a post-split basis) and authorized the repurchase of 20 million additional common shares (on a post-split basis). The stock split will be effective February 15, 2011, for all shareholders of record on February 4, 2011. As a result of the stock split, all amounts

related to shares, share prices and earnings per share have been retroactively restated throughout this Annual report on Form 10-K.

**Reverse Stock Split**

Presentation gives effect to the Reverse Stock Split, which occurred on January 4, 2011.

See accompanying notes to consolidated financial statements.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### 1. Summary of Significant Accounting Policies (in part)

#### Changes in Presentation (in part)

##### Reverse Stock Split and Name Change

On November 30, 2010, Motorola Solutions announced the timing and details regarding the Separation and the approval of a reverse stock split at a ratio of 1-for-7. Immediately following the Distribution of Motorola Mobility common stock, the Company completed a 1-for-7 reverse stock split ("the Reverse Stock Split") and changed its name to Motorola Solutions, Inc. All consolidated per share information presented gives effect to the Reverse Stock Split.

## CHANGES TO RETAINED EARNINGS

### RECOGNITION AND MEASUREMENT

**5.38** The retained earnings account is affected by direct charges and credits. The most frequent direct charges to retained earnings are net loss for the year, losses on treasury stock transactions, and cash or stock dividends. The most common direct credit to retained earnings is net income for the year.

### PRESENTATION

**5.39** In addition to direct charges and credits, the retained earnings account is also affected by opening balance adjustments. Reasons for which the opening balance of retained earnings is properly restated include certain changes in accounting principles, changes in the reporting entity, and corrections of an error in previously issued financial statements.

**5.40** FASB ASC 250, *Accounting Changes and Error Corrections*, requires, unless impracticable or otherwise specified by applicable authoritative guidance, retrospective application to prior periods' financial statements of a change in accounting principle. *Retrospective application* is the application of a different accounting principle to prior accounting periods as if that principle had always been used. More specifically, retrospective application involves the following:

- The cumulative effect of the change on periods prior to those presented should be reflected in the carrying amount of assets and liabilities as of the beginning of the first period presented.
- An offsetting adjustment, if any, shall be made to the opening balance of retained earnings or other appropriate component of equity or net assets in the statement of financial position for that period.
- Financial statements for each individual prior period presented should be adjusted to reflect the period-specific effects of applying the new accounting principle.

**5.41** FASB ASC 250 also requires any accounting error in the financial statements of a prior period discovered after the financial statements are issued or available to be issued to be reported as an error correction by restating the prior period financial statements. Restatement involves similar requirements as those specified for retrospective application of a change in accounting principle.

**5.42** SEC Staff Accounting Bulletin (SAB) No. 108 provides guidance on the consideration of the effects of prior year misstatements in quantifying current year misstatements for the purpose of assessing materiality. SAB No. 108 requires that registrant entities determine the quantitative effect of a financial statement misstatement by using both an income statement ("rollover") and a balance sheet ("iron curtain") approach and evaluate whether, under either approach, the error is material after considering all relevant quantitative and qualitative factors.

### 5.43

**TABLE 5-7: OTHER CHANGES IN RETAINED EARNINGS\***

Direct charges and credits—other than net loss, net income, dividends, and stock splits—are summarized in Table 5-7.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

##### Note B—Recent Accounting Guidance (in part)

###### Recently Adopted Accounting Guidance (in part)

On January 1, 2010, the Company adopted ASU 2009-17, "Consolidations (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities," which amended the consolidation guidance applicable to variable interest entities and required additional disclosures concerning an enterprise's continuing involvement with variable interest entities. The Company evaluated the impact of this guidance and determined that the adoption resulted in the consolidation of two additional joint ventures, an owner trust and an entity that was used to monetize accounts receivable. At January 1, 2010, \$793 million in assets (net of tax, including the impact on "Investment in nonconsolidated affiliates"), \$941 million in liabilities, \$100 million in noncontrolling interests and a cumulative effect adjustment to retained earnings of \$248 million were recorded as a result of the adoption of this guidance. See Note S for additional information about variable interest entities.

##### Note S—Variable Interest Entities

On January 1, 2010, the Company adopted ASU 2009-17, "Consolidations (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities." ASU 2009-17 amends the consolidation guidance applicable to variable interest entities ("VIEs") and requires additional disclosures concerning an enterprise's continuing involvement with VIEs. The Company evaluated the impact of this guidance and determined that the adoption resulted in the January 1, 2010 consolidation of two additional joint ventures, an owner trust and an entity that is used to monetize accounts receivable. The Company elected prospective application of this guidance at adoption.

The following table summarizes the carrying amount of the assets and liabilities of the two additional joint ventures and the owner trust entity included in the Company's consolidated balance sheet at January 1, 2010.

| Assets and Liabilities of Newly Consolidated VIEs Included in the Consolidated Balance Sheet |              |
|----------------------------------------------------------------------------------------------|--------------|
| (In millions)                                                                                | Jan. 1, 2010 |
| Current assets                                                                               | \$ 37        |
| Property                                                                                     | 209          |
| Other noncurrent assets                                                                      | 3            |
| Total assets                                                                                 | \$249        |
| Current liabilities                                                                          | \$76         |
| Long-term debt                                                                               | 346          |
| Total liabilities                                                                            | \$422        |

The carrying amounts of assets and liabilities pertaining to the entity used to monetize accounts receivable, included in the Company's consolidated balance sheet at January 1, 2010, were current assets of \$817 million (including \$436 million of restricted cash) and current liabilities of \$589 million.

##### Consolidated Variable Interest Entities

The Company holds a variable interest in five joint ventures for which the Company is the primary beneficiary. Three of the joint ventures are development stage enterprises, which will produce propylene oxide and hydrogen peroxide and provide terminal services in Thailand. The Company's variable interest in these joint ventures relates to cost-plus arrangements between the joint venture and the Company, involving the majority of the output on take-or-pay terms and ensuring a guaranteed return to the joint ventures.

Another joint venture will construct, own and operate a membrane chlor-alkali facility to be located at the Company's Freeport, Texas integrated manufacturing complex. The Company's variable interests in this joint venture relate to

equity options between the partners and a cost-plus off-take arrangement between the joint venture and the Company, involving proportional purchase commitments on take-or-pay terms and ensuring a guaranteed return to the joint venture. The Company will provide the joint venture with operation and maintenance services, utilities and raw materials; market the joint venture's co-products; and toll convert the other partner's proportional purchase commitments into ethylene dichloride. The joint venture is expected to begin operations in mid-2013.

The fifth joint venture was acquired through the acquisition of Rohm and Haas on April 1, 2009. This joint venture manufactures products in Japan for the semiconductor industry. Each joint venture partner holds several equivalent variable interests, with the exception of a royalty agreement held exclusively between the joint venture and the Company. In addition, the entire output of the joint venture is sold to the Company for resale to third-party customers.

The Company also holds a variable interest in an owner trust, for which the Company is the primary beneficiary. The owner trust leases an ethylene facility in The Netherlands to the Company, whereby substantially all of the rights and obligations of ownership are transferred to the Company. The Company's variable interest in the owner trust relates to a residual value guarantee provided to the owner trust. Upon expiration of the lease, which matures in 2014, the Company may purchase the facility for an amount based on a fair market value determination. At December 31, 2010, the Company had provided to the owner trust a residual value guarantee of \$363 million, which represents the Company's maximum exposure to loss under the lease.

As the primary beneficiary of these VIEs, the entities' assets, liabilities and results of operations are included in the Company's consolidated financial statements. The other equity holders' interests are reflected in "Net income attributable to noncontrolling interests" in the consolidated statements of income and "Noncontrolling interests" in the consolidated balance sheets. The following table summarizes the carrying amounts of the entities' assets and liabilities included in the Company's consolidated balance sheets at December 31, 2010 and December 31, 2009:

**Assets and Liabilities  
of Consolidated VIEs**

| (In millions)                                         | Dec. 31, 2010  | Dec. 31, 2009 |
|-------------------------------------------------------|----------------|---------------|
| Current assets (restricted 2010: \$228)               | \$ 228         | \$102         |
| Property (restricted 2010: \$1,388)                   | 1,388          | 455           |
| Other noncurrent assets (restricted 2010: \$122)      | 122            | 81            |
| <b>Total assets</b>                                   | <b>\$1,738</b> | <b>\$638</b>  |
| Current liabilities (nonrecourse 2010: \$190)         | \$ 837         | \$183         |
| Long-term debt (nonrecourse 2010: \$167)              | 513            | 125           |
| Other noncurrent liabilities (nonrecourse 2010: \$64) | 64             | 43            |
| <b>Total liabilities</b>                              | <b>\$1,414</b> | <b>\$351</b>  |

The Company holds a variable interest in an entity created in June 2010 to monetize accounts receivable of select European entities. The Company is the primary beneficiary of this entity as a result of holding subordinated notes while maintaining servicing responsibilities for the accounts receivable. The carrying amounts of assets and liabilities pertaining to this entity, included in the Company's consolidated balance sheet at December 31, 2010, were current assets of \$158 million (zero restricted) and current liabilities of \$1 million (\$1 million nonrecourse). Prior to the creation of this entity, the Company held a variable interest in another entity that was also used to monetize accounts receivable originated by several European subsidiaries. That arrangement was terminated in June 2010. No gain or loss was recognized as a result of terminating the arrangement.

Amounts presented in the consolidated balance sheets and the table above as restricted assets or nonrecourse obligations relating to consolidated VIEs at December 31, 2010 are adjusted for intercompany eliminations, parental guarantees and residual value guarantees.

In September 2001, Hobbes Capital S.A. ("Hobbes"), a former consolidated foreign subsidiary of the Company, issued \$500 million of preferred securities in the form of equity certificates. The certificates provided a floating rate of return (which could be reinvested) based on LIBOR. Under the accounting guidance for consolidation, Hobbes was a VIE and the Company was the primary beneficiary. During the third quarter of 2008, the other partner of Hobbes redeemed its \$674 million ownership in Hobbes. The minority ownership was redeemed in a non-cash transaction in exchange for a three-year note payable with a floating rate based on LIBOR, which was repaid in September 2009. Prior to redemption, the preferred return was included in "Net income attributable to noncontrolling interests" in the consolidated statements of income.

*Nonconsolidated Variable Interest Entity*

The Company holds a variable interest in a joint venture accounted for under the equity method of accounting, acquired through the acquisition of Rohm and Haas on April 1, 2009. The joint venture manufactures crude acrylic acid in the United States and Germany on behalf of the Company and the other joint venture partner. The variable interest relates to a cost-plus arrangement between the joint venture and each joint venture partner. The Company is not the primary beneficiary, as a majority of the joint venture's output is sold to the other joint venture partner, and therefore the entity is not consolidated. At December 31, 2010, the Company's investment in the joint venture was \$144 million, classified as "Investment in nonconsolidated affiliates" in the consolidated balance sheets, representing the Company's maximum exposure to loss.

# NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

## 3. Restatement of Prior Period Financial Statements

During the fourth quarter of fiscal 2010, we made the following adjustments to the historical consolidated financial statements.

- As discussed in Note 4, we recorded a liability for potential losses related to the unauthorized activities in Japan. We are restating prior period financial statements to record liabilities in the periods in which the unauthorized transactions occurred.

- During the fourth quarter of fiscal 2010, we completed a study to determine if historical tax transactions and balances had been recognized appropriately in accordance with ASC 740. We identified errors in tax-related accounts in prior periods.

Based on our analysis of these adjustments, we concluded that while the adjustments were not material to the operating results of fiscal years 2008 or 2009, there was an overstatement of stockholders' equity in the amount of \$101.3 million, which represented 4.9% of total stockholders' equity as of June 30, 2009. Accordingly, we restated the fiscal 2009 and 2008 consolidated financial statements included in this filing. Quarterly results have been restated and are included in Quarterly Financial Information (See Note 21). The restated financial statements did not impact segment reporting.

The effect of the restatement on the consolidated statements of operations for the years ended June 30, 2009 and 2008 follows (in thousands):

#### 4. Net Loss on Unauthorized Activities in Japan

As we previously reported, in April 2010, we launched an investigation into unauthorized activities in Japan. We learned that an individual working in Molex Japan's finance group obtained unauthorized loans from third party lenders, that included in at least one instance the attempted unauthorized pledge of Molex Japan facilities as security, in Molex Japan's name that were used to cover losses resulting from unauthorized trading, including margin trading, in Molex Japan's name. We also learned that the individual misappropriated funds from Molex Japan's accounts to cover losses from unauthorized trading. The individual admitted to forging documentation in arranging and concealing the transactions. We retained outside legal counsel, and they retained forensic accountants, to investigate the matter. The investigation is now substantially complete. Based on our consultation with legal counsel in Japan and the information learned from the substantially completed investigation, we intend to vigorously contest the enforceability of the outstanding unauthorized loans and any attempt by the lender to obtain payment.

At the end of the third quarter of fiscal 2010, we reported the outstanding unauthorized loans as a contingent liability of \$162.2 million. Based on the results of the substantially completed investigation, we recorded for accounting purposes an accrued liability for the effect of unauthorized activities pending the resolution of these matters. In particular, we recorded cumulative net losses of \$201.9 million, (\$128.7 million after-tax) due to these unauthorized activities (see Note 3), which were comprised of (1) the asserted unauthorized loans outstanding as of June 30, 2010 of ¥15.0 billion (\$169.7 million), (2) the payment of ¥1.0 billion (\$10.8 million) of unauthorized loans on April 5, 2010, (3) misappropriated funds of ¥1.9 billion (\$20.5 million), and (4) cumulative investigative costs through June 30, 2010 of \$4.8 million, offset by (5) an unauthorized investment account with a balance of ¥0.4 billion (\$3.9 million) as of June 30, 2010. We believe these unauthorized activities and related losses occurred from at least as early as 1988 through 2010, with approximately ¥15.4 billion (\$167.4 million) occurring prior to June 30, 2007. The accrued liability for these potential net losses was ¥14.7 billion (\$165.8 million) as of June 30, 2010.

To the extent we prevail in not having to pay all or any portion of the outstanding unauthorized loans, we would recognize a gain in that amount.

<sup>(1)</sup> Net of common shares delivered as payment for the exercise price or to satisfy the holders' withholding tax liability upon exercise of options.

<sup>(2)</sup> Represents open-market transactions of common shares by the trustee of Ryder's deferred compensation plans.

See accompanying notes to consolidated financial statements.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### 1. Summary of Significant Accounting Policies (in part)

#### Share Repurchases

Repurchases of shares of common stock are made periodically in open-market transactions and are subject to market conditions, legal requirements and other factors. The cost of share repurchases is allocated between common stock and retained earnings based on the amount of additional paid-in capital at the time of the share repurchase.

### 20. Share Repurchase Programs

In February 2010, our Board of Directors authorized a \$100 million discretionary share repurchase program over a period not to exceed two years. In 2010, we completed this program and repurchased and retired 2,420,390 shares at an aggregate cost of \$100 million.

In December 2009, our Board of Directors authorized a share repurchase program intended to mitigate the dilutive impact of shares issued under our various employee stock, stock option and employee stock purchase plans. Under the December 2009 program, management is authorized to repurchase shares of common stock in an amount not to exceed the number of shares issued to employees under the Company's various employee stock, stock option and employee stock purchase plans from December 1, 2009 through December 15, 2011. The December 2009 program limits aggregate share repurchases to no more than 2 million shares of Ryder common stock. Share repurchases of common stock

are made periodically in open-market transactions and are subject to market conditions, legal requirements and other factors. Management may establish a prearranged written plan under Rule 10b5-1 of the Securities Exchange Act of 1934 as part of the December 2009 program, which allow for share repurchases during Ryder's quarterly blackout periods as set forth in the trading plan. During 2010, we repurchased and retired 561,656 shares under this program at an aggregate cost of \$23 million. No shares were repurchased under this program during 2009.

In December 2007, our Board of Directors authorized a \$300 million discretionary share repurchase program over a period not to exceed two years. Additionally, our Board of Directors authorized a separate two-year anti-dilutive repurchase program. The anti-dilutive program limited aggregate share repurchases to no more than 2 million shares of our common stock. In 2009 and 2008, we repurchased and retired 2,348,909 shares and 2,615,000 shares, respectively, under the \$300 million program at an aggregate cost of \$100 million and \$170 million, respectively. In 2009 and 2008, we repurchased and retired 377,372 shares and 1,363,436 shares, respectively, under the anti-dilutive program at an aggregate cost of \$16 million and \$86 million, respectively.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)**

**Note 10—Equity (in part)**

**Preferred Stock Issued to Principal Stockholder's Family**

Of the 10,446,300 shares of Preferred Stock issued, the Company issued 5,250,000 shares to the Principal Stockholder's family together with Warrants to purchase up to an aggregate of approximately 87,500,175 shares of its common stock and received gross proceeds of \$525.0 million (\$523.7 million, net of transaction costs). The allocated carrying values of the Preferred Stock and Warrants on the date of issuance (based

on their relative fair values) were \$301.1 million and \$223.9 million, respectively. The Preferred Stock amount has been recorded as mezzanine equity on the accompanying consolidated balance sheet as the Principal Stockholder and his family have a greater than 50% ownership of the Company (when considering the impact of unexercised warrants and stock options) and therefore have the potential ability to require the Company to redeem their Preferred Stock beginning November 15, 2011.

As the Preferred Stock issued to the Principal Stockholder's family is being accounted for as redeemable at the option of the holder, the balance is being accreted to the redemption value of \$577.5 million over three years. As of December 31, 2010 and 2009, \$6.9 million of accumulated but undeclared dividends was recorded.

A summary of the Company's Preferred Stock issued its Principal Stockholder's family for the years ended December 31, 2010, 2009 and 2008, is presented below (in thousands, except number of shares):

|                                                                                             | Number of Shares | Amount    |

The accompanying notes are an integral part of these consolidated financial statements.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### 13. Stock Purchase and Award Plans (in part)

**Stock-Based Compensation Expense** Upon the adoption of the fair value recognition provisions of U.S. GAAP for accounting for stock-based compensation, the Company changed its method of recognition and now recognizes stock-based compensation expense based on the substantive vesting period for all new awards. As a result, compensation expense related to stock options granted prior to fiscal year 2007 is being recognized over the stated vesting term of the grant rather than being accelerated upon retirement eligibility.

The amount of stock-based compensation expense recognized during a period is based on the portion of the awards that are ultimately expected to vest. The Company estimates pre-vesting forfeitures at the time of grant by analyzing historical data and revises those estimates in subsequent periods if actual forfeitures differ from those estimates. Ultimately, the total expense recognized over the vesting period will equal the fair value of awards that actually vest.

The following table presents the components and classification of stock-based compensation expense, for options, restricted stock awards and ESPP shares recognized for fiscal years 2010, 2009 and 2008:

| (In millions)                                      | Fiscal Year |       |       |
|----------------------------------------------------|-------------|-------|-------|
|                                                    | 2010        | 2009  | 2008  |
| Stock options                                      | \$112       | \$140 | \$138 |
| Restricted stock awards                            | 98          | 82    | 63    |
| Employee stock purchase plan                       | 15          | 15    | 16    |
| Total stock-based compensation expense             | \$225       | \$237 | \$217 |
| Cost of products sold                              | \$26        | \$28  | \$24  |
| Research and development expense                   | 55          | 58    | 52    |
| Selling, general and administrative expense        | 144         | 151   | 141   |
| Total stock-based compensation expense             | \$225       | \$237 | \$217 |
| Income tax benefits                                | (67)        | (69)  | (64)  |
| Total stock-based compensation expense, net of tax | \$158       | \$168 | \$153 |

In connection with the acquisition of Kyphon in November 2007, the Company assumed Kyphon's unvested stock-based awards. These awards are amortized over 2.5 years, which was their remaining weighted average vesting period at the time of acquisition. For fiscal years 2010, 2009 and 2008 the Company recognized \$12 million, \$21 million and \$24 million respectively, of stock-based compensation expense associated with the assumed Kyphon awards, which is included in the amounts presented above.

## SPINOFFS

### RECOGNITION AND MEASUREMENT

**5.49** The distributions of nonmonetary assets that constitute a business to owners of an entity are commonly referred to as spinoffs. A *business* is defined as an integrated set of activities and assets that is capable of being conducted and managed for the purpose of providing a return in the form of dividends, lower costs, or other economic benefits directly to investors or other owners, members, or participants. Spinoffs are discussed in FASB ASC 505-60.

**5.50** The accounting for the distribution of nonmonetary assets to owners of an entity in a spinoff should be based on the recorded amount (after reduction, if appropriate, for an indicated impairment of value). An entity's distribution of the shares of a wholly owned or consolidated subsidiary to its shareholders should be recorded based on the carrying value of the subsidiary. Regardless of whether the spun-off operations will be sold immediately after the spinoff, the transaction should not be accounted for as a sale of the accounting spinnee followed by a distribution of the proceeds. In order to determine the required accounting and reporting in a spinoff transaction, an entity needs to determine which party is the accounting spinnor and which is the accounting spinnee. The accounting spinnee should be reported as a discontinued operation by the accounting spinnor if the spinnee is a component of an entity and meets the conditions for such reporting.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### Note 2—Discontinued Operations and Other Dispositions (in part)

#### CTM Media Holdings, Inc.

On September 14, 2009, the Company completed a pro rata distribution of the common stock of CTM Media Holdings, Inc. ("CTM Holdings") to the Company's stockholders of record as of the close of business on August 3, 2009 (the "CTM Spin-Off"). CTM Holdings' businesses at the time of the CTM Spin-Off included CTM Media Group, IDW Publishing and WMET 1160AM. CTM Holdings and subsidiaries met the criteria to be reported as discontinued operations and accordingly, their assets, liabilities, results of operations and cash flows are classified as discontinued operations for all periods presented. As of September 14, 2009, each of the Company's stockholders of record as of the close of business on the record date received: (i) one share of CTM Holdings Class A common stock for every three shares of the Company's common stock; (ii) one share of CTM Holdings Class B common stock for every three shares of the Company's Class B common stock; (iii) one share of CTM Holdings Class C common stock for every three shares of the Company's Class A common stock; and (iv) cash in lieu of a fractional share of all classes of CTM Holdings' common stock.

In September 2009, prior to the CTM Spin-Off, the Company funded CTM Holdings with an additional \$2.0 million in cash.

## TREASURY STOCK

### PRESENTATION

**5.52** Repurchased common stock is often referred to as treasury stock or treasury shares. FASB ASC 505-30 discusses the balance sheet presentation of treasury stock and states that if a corporation's stock is acquired for purposes other than retirement (formal or constructive), or if ultimate disposition has not yet been decided, the cost of acquired stock may be shown separately as a deduction from the total of capital stock, additional paid-in capital, and retained earnings or may be accorded the accounting treatment appropriate for retired stock.

**5.53** A repurchase of shares at a price significantly in excess of the current market price creates a presumption that the repurchase price includes amounts attributable to items other than the shares repurchased. A repurchase of shares at a price significantly in excess of the current market price may require an entity to allocate amounts to other elements of the transaction. As shown in Table 5-8, the prevalent balance sheet presentation of treasury stock is to show the cost of treasury stock as a reduction of stockholders' equity.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### A. Summary of Accounting Policies (in part)

**Common Stock and Equity (in part):** Equity transactions consist primarily of the repurchase of our common stock under our stock repurchase programs and the amortization of expense and issuance of common stock under our stock incentive plan. In fiscal 2010, we also issued shares upon conversion of convertible notes called for redemption, discussed in Note D. Under our stock repurchase programs we repurchase our common stock on the open market. The par value of the shares repurchased is charged to common stock with the excess of the purchase price over par first charged against any available additional paid-in capital ("APIC") and the balance charged to retained earnings. Due to the high volume of repurchases over the past several years, we have no remaining balance in APIC in any of the years presented. All shares repurchased have been retired.

### I. Capital Stock and Earnings Per Share (in part)

**Capital Stock (in part):** In December 2009, we completed a \$1 billion stock repurchase program which began in fiscal 2009 and initiated another multi-year \$1 billion stock repurchase program approved in September 2009. We repurchased and retired 27.0 million shares of our common stock at a cost of \$949.9 million during fiscal 2010. TJX reflects stock repurchases in its financial statements on a "settlement" basis. We had cash expenditures under our repurchase programs of \$944.8 million in fiscal 2010, \$751.1 million in fiscal 2009 and \$940.2 million in fiscal 2008, funded primarily by cash generated from operations. We repurchased 26.9 million shares in fiscal 2010, 24.3 million shares in fiscal 2009 and 33.0 million shares in fiscal 2008. As of January 30, 2010, on a "trade date" basis, we had repurchased 5.5 million shares of our common stock at a cost of \$205.0 million under the \$1 billion stock repurchase program authorized in September 2009. All shares repurchased under our stock repurchase programs have been retired.

In February 2010, TJX's Board of Directors approved a new stock repurchase program that authorizes the repurchase of up to an additional \$1 billion of TJX common stock from time to time.

## OTHER COMPONENTS OF STOCKHOLDERS' EQUITY

### PRESENTATION

**5.56** For public entities, Rule 3-04 of Regulation S-X requires that an analysis of the changes in each caption of stockholders' equity and noncontrolling interests presented in the balance sheets should be given in a note or separate statement. This analysis should be presented in the form of a reconciliation of

the beginning balance to the ending balance for each period for which an income statement is required to be filed, with all significant reconciling items described by appropriate captions and contributions from, and distributions to, owners shown separately.

**5.57** Many of the survey entities present accounts other than capital stock, additional paid-in capital, retained earnings, accumulated other comprehensive income, and treasury stock in the "Stockholders' Equity" section of the balance sheet. Other stockholders' equity accounts appearing on the balance sheets of the survey entities include, but are not limited to, guarantees of employee stock ownership plan debt, unearned or deferred compensation related to employee stock award plans, and amounts owed to an entity by employees for loans to buy company stock, in each instance pursuant to relevant FASB ASC requirements. Other items, such as foreign currency translation adjustments, unrealized gains and losses on certain investments in debt and equity securities, and defined benefit postretirement plan adjustments, are considered components of other comprehensive income. FASB ASC 220, *Comprehensive Income*, permits the presentation of components of other comprehensive income and total comprehensive income in a statement of changes in stockholders' equity.

## DISCLOSURE

**5.58** In addition, FASB ASC 220 allows disclosure of accumulated balances, by component, included in accumulated other comprehensive income in a statement of changes in stockholders' equity.

**5.59** FASB ASC 810, *Consolidation*, establishes accounting and reporting standards for the noncontrolling interest in a subsidiary. It clarifies that a *noncontrolling interest in a subsidiary* is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements but separate from the parent's equity, and clearly identified and labeled. In addition, FASB ASC 810 requires expanded disclosures in the consolidated financial statements that clearly identify and distinguish between the interests of the parent's owners and the interests of the noncontrolling owners of a subsidiary. Those expanded disclosures include a reconciliation of the beginning and ending balances of the equity attributable to the parent and noncontrolling owners and a schedule showing the effects of changes in a parent's ownership interest in a subsidiary on the equity attributable to the parent.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)**

**9. Employee Stock Ownership Plan (in part)**

(Dollars in millions except per share amounts)

Annual expense related to the leveraged ESOP, determined as interest incurred on the original notes, plus the higher of either principal payments or the historical cost of Preference stock allocated, less dividends received on the shares held by the ESOP and advances from the Company, was \$6 in 2010, \$22 in 2009 and \$7 in 2008. Unearned compensation, which is shown as a reduction in Shareholders' equity, is the amount of ESOP debt due to the Company.

**Deferred Compensation**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)**

(Dollars in thousands, except per share data)

**9. Equity-Based Compensation, Profit Sharing and Deferred Compensation Plans (in part)**

**Deferred Compensation Plans**

The Company has two deferred compensation plans ("Deferred Comp Plans"). The specific purpose of the Deferred Comp Plans is to i) establish a vehicle whereby named executive officers may defer the receipt of salary and bonus that otherwise would be nondeductible for Company tax purposes into a period where the Company would realize a tax deduction for the amounts paid, and ii) to enable certain of our employees who are subject to the Company's stock hold-

ing requirements to acquire shares of our common stock on a pre-tax basis in order to more quickly meet, and maintain compliance with those stock holding requirements. Amounts deferred into the Deferred Comp Plans are invested in NVR common stock, held in a rabbi trust account, and are paid out in a fixed number of shares upon expiration of the deferral period.

The rabbi trust account held 158,894 and 265,278 shares of NVR common stock as of December 31, 2010 and 2009, respectively. During 2010, 106,384 shares of NVR common stock were issued from the rabbi trust related to deferred compensation for which the deferral period ended. There were no shares of NVR common stock contributed to the rabbi trust in 2010, 2009 or 2008. Shares held by the Deferred Comp Plan are treated as outstanding shares in the Company's earnings per share calculation for each of the years ended December 31, 2010, 2009 and 2008.

| Balance at December 31, 2010                     | \$4,798.5                        | \$12,732.6           | \$(52.4)                   | 864                      | \$ 96.4 |

As of December 31, 2010, we have purchased \$2.58 billion of our announced \$3.0 billion share repurchase program. No shares were repurchased in 2010, 2009, or 2008.

We have 5 million authorized shares of preferred stock. As of December 31, 2010 and 2009, no preferred stock has been issued.

We have an employee benefit trust which held 50.0 million and 50.0 million shares of our common stock at December 31, 2010 and 2009, respectively, to provide a source of funds to assist us in meeting our obligations under various employee benefit plans. In February 2009, we contributed an additional 10 million shares to the employee benefit trust, which resulted in a reclassification within equity from additional paid-in capital of \$371.9 million and common stock of \$6.3 million to the employee benefit trust of \$378.2 million. The funding had no net impact on shareholders' equity as we consolidate the employee benefit trust. The cost basis of the shares held in the trust was \$3.01 billion and \$3.01 billion at December 31, 2010 and 2009, respectively, and is shown

as a reduction in shareholders' equity. Any dividend transactions between us and the trust are eliminated. Stock held by the trust is not considered outstanding in the computation of earnings per share. The assets of the trust were not used to fund any of our obligations under these employee benefit plans in 2010, 2009, or 2008.

We have an ESOP as a funding vehicle for the existing employee savings plan. The ESOP used the proceeds of a loan from us to purchase shares of common stock from the treasury. The ESOP issued third-party debt, repayment of which was guaranteed by us (see Note 8). The proceeds were used to purchase shares of our common stock on the open market. Shares of common stock held by the ESOP will be allocated to participating employees annually through 2017 as part of our savings plan contribution. The fair value of shares allocated each period is recognized as compensation expense.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### Note 18. Employee Benefit and Stock Plans (in part)

**Grantor Stock Ownership Trust.** On August 27, 1999, the Company established a grantor stock ownership trust (the "Trust") into which certain shares repurchased in 2000 and 1999 were transferred. The Trust, administered by a third-party trustee, holds and distributes the shares of common stock acquired to support certain employee compensation and employee benefit obligations of the Company under its existing stock option, the 401(k) Plan and other employee benefit plans. The existence of the Trust has no impact on the amount of benefits or compensation that is paid under these plans.

For financial reporting purposes, the Trust is consolidated with the Company. Any dividend transactions between the Company and the Trust are eliminated. Acquired shares held by the Trust remain valued at the market price at the date of purchase and are shown as a reduction to stockholders' equity in the consolidated balance sheets. The difference between the Trust share value and the market value on the date shares are released from the Trust is included in paid-in capital. Common stock held in the Trust is not considered outstanding in the computations of earnings (loss) per share. The Trust held 11,082,723 and 11,228,951 shares of common stock at November 30, 2010 and 2009, respectively. The trustee votes shares held by the Trust in accordance with voting directions from eligible employees, as specified in a trust agreement with the trustee.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)**

**14. Redeemable Preferred Stock**

During the first quarter of fiscal year 2009, the Company issued 425,000 shares of Series A 8% Redeemable, Convertible Exchangeable Participating Preferred Stock, \$0.01 par value per share ("Series A Preferred Stock") to affiliates of Leonard Green & Partners, L.P., for approximately \$413.1 million, net of approximately \$11.9 million in closing and issuance costs. The Series A Preferred Stock was classified as temporary shareholders' equity at September 27, 2009 since the shares were (i) redeemable at the option of the holder and (ii) had conditions for redemption which are not solely within the control of the Company. The holders of the Series A Preferred Stock were entitled to an 8% dividend, payable quarterly on the first day of each calendar quarter in cash. The Company paid cash dividends on the Series A Preferred

Stock totaling \$8.5 million and approximately \$19.8 million during fiscal years 2010 and 2009, respectively.

On October 23, 2009, the Company announced its intention to call all 425,000 outstanding shares of the Series A Preferred Stock for redemption on November 27, 2009 in accordance with the terms governing such Series A Preferred Stock. On November 26, 2009, the holders converted all 425,000 outstanding shares of the Series A Preferred Stock to common stock. The Series A Preferred Stock was converted to common stock based on the quotient of (i) the liquidation preference plus accrued dividends and (ii) 1,000, multiplied by the conversion rate of 68.9655. At the conversion date, the liquidation preference of the Series A Preferred Stock of \$425 million and accrued dividends of approximately \$5.2 million converted into approximately 29.7 million shares of common stock of the Company.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### 7. Noncontrolling Interest

#### Canadian Fertilizers Limited (CFL)

CFL is a variable interest entity that owns a nitrogen fertilizer complex in Medicine Hat, Alberta, Canada and supplies fertilizer products to CF Industries, Inc. and Viterro Inc. (Viterro). CF Industries, Inc. owns 49% of CFL's voting common shares and 66% of CFL's nonvoting preferred shares. Viterro owns 34% of the voting common stock and non-voting preferred stock of CFL. The remaining 17% of the voting common stock is owned by GROWMARK, Inc. and La Coop fédérée. CFL is a variable interest entity which we consolidate in our financial statements.

CFL's Medicine Hat complex is the largest nitrogen fertilizer complex in Canada, with two world-scale ammonia plants, a world-scale urea plant and on-site storage facilities for both ammonia and urea. CFL's net sales were \$454.0 million, \$429.2 million and \$710.9 million, for 2010, 2009 and 2008, respectively. CFL's assets and liabilities at December 31, 2010 were \$314.0 million and \$263.8 million, respectively, and at December 31, 2009 were \$356.6 million and \$309.0 million, respectively.

CF Industries, Inc. operates the Medicine Hat facility pursuant to a management agreement and purchases approximately 66% of the facility's ammonia and urea production pursuant to a product purchase agreement. Both the management agreement and the product purchase agreement can be terminated by either CF Industries, Inc. or CFL upon a twelve-month notice. Viterro has the right, but not the obligation, to purchase the remaining 34% of the facility's ammonia and urea production under a similar product purchase agreement. To the extent that Viterro does not purchase its 34% of the facility's production, CF Industries, Inc. is obligated to purchase any remaining amounts. However, since 1995, Viterro has purchased at least 34% of the facility's production each year.

Under the product purchase agreements, both CF Industries, Inc. and Viterro pay the greater of operating cost or market price for purchases. The product purchase agreements also provide that CFL will distribute its net earnings to CF Industries, Inc. and Viterro annually based on their respective quantities of product purchased from CFL. The distributions to Viterro are reported as financing activities in the consolidated statements of cash flows, as we consider these payments to be similar to dividends. While general creditors of CFL do not have direct recourse to the general credit of CF Industries, Inc., the product purchase agreement does require CF Industries, Inc. to advance funds to CFL in the event that CFL is unable to meet its debts as they become due. The amount of each advance would be at least 66% of the deficiency and would be more in any year in which CF

Industries, Inc. purchased more than 66% of Medicine Hat's production. A similar obligation also exists for Viterro. CF Industries, Inc. and Viterro currently manage CFL such that each party is responsible for its share of CFL's fixed costs and that CFL's production volume is managed to meet the parties' combined requirements. Based on the contractual arrangements, CF Industries, Inc. is the primary beneficiary of CFL as CF Industries, Inc. receives at least 66% of the economic risks and rewards of CFL.

In accordance with CFL's governing agreements, CFL's earnings are available for distribution to its members based on approval by CFL's shareholders. A portion of the amounts reported as noncontrolling interest in the consolidated statements of operations represent Viterro's 34% interest in the distributed and undistributed earnings of CFL. A portion of the amounts reported as noncontrolling interest on our consolidated balance sheets represent the interests of Viterro and the holders of 17% of CFL's common shares.

Because CFL's functional currency is the Canadian dollar, consolidation of CFL results in a cumulative foreign currency translation adjustment, which is reported in other comprehensive income (loss).

#### Terra Nitrogen Company L.P. (TNCLP)

TNCLP is a master limited partnership that owns a nitrogen manufacturing facility in Verdigris, Oklahoma. Through our acquisition of Terra in April 2010, we own an aggregate 75.3% of TNCLP through general and limited partnership interests. Outside investors own 24.7% of the limited partnership interests. For financial reporting purposes, the assets, liabilities and earnings of the partnership are consolidated into our financial statements. The outside investors' limited partnership interests in the partnership have been recorded as part of noncontrolling interest in our consolidated financial statements. The noncontrolling interest on the consolidated balance sheets represents the noncontrolling unitholders' interest in the partners' capital of TNCLP.

TNCLP makes cash distributions to the general and limited partners based upon formulas defined within the Agreement of Limited Partnership. Cash available for distribution is defined in the agreement generally as all cash receipts less all cash disbursements, adjusted for changes in certain reserves established as the general partner determines in its reasonable discretion to be necessary. Cash distributions to the limited partners and general partner vary depending on the extent to which the cumulative distributions exceed certain target threshold levels set forth in the Agreement of Limited Partnership.

In each of the applicable quarters of 2010, the minimum quarterly distributions were satisfied, which entitled us to receive increased earnings as provided for in the Agreement of Limited Partnership. The earnings attributed to our general partnership interest in excess of the threshold levels were \$49.0 million during 2010.

A reconciliation of the beginning and ending balances of noncontrolling interest and distributions payable to noncontrolling interests on our consolidated balance sheets is provided below.

## Section 6: Statement of Cash Flows

### GENERAL

#### PRESENTATION

**6.01** Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 230, *Statement of Cash Flows*, requires entities to present a statement of cash flows that classifies cash receipts and payments by operating, investing, and financing activities. The information provided in a statement of cash flows, if used with related disclosures and information in the other financial statements, should help investors, creditors, and others do the following:

- Assess the entity's ability to generate positive future net cash flows
- Assess the entity's ability to meet its obligations, its ability to pay dividends, and its needs for external financing
- Assess the reasons for differences between net income and associated cash receipts and payments
- Assess the effects on an entity's financial position of both its cash and noncash investing and financing transactions during the period

**6.02** Paragraphs 4–6 of FASB ASC 230-10-45 provide that the statement of cash flows explains the change in cash and cash equivalents during a period. *Cash equivalents* are defined by the FASB ASC glossary to be short-term, highly liquid investments that have both of the following characteristics:

- Readily convertible to known amounts of cash
- So near their maturity that they present an insignificant risk of changes in value because of changes in interest rates

Generally, only investments with original maturities of three months or less qualify under that definition. *Original maturity* means original maturity to the entity holding the investment.

**6.03** FASB ASC 230-10-45 states that the amount of cash and cash equivalents at the beginning and end of the period reported on a statement of cash flows should agree with the amount of cash and cash equivalents reported on a statement of financial position. Because not all investments that qualify are required to be treated as cash equivalents, an entity should establish a policy concerning which short-term, highly liquid investments that satisfy the definition of *cash equivalents* are treated as such.

**6.04** Paragraphs 7–9 of FASB ASC 230-10-45 explain that generally, cash receipts and payments should be reported separately and not netted. For certain items, the turnover is quick, the amounts are large, and the maturities are short. For certain other items, such as demand deposits of a bank and customer accounts payable of a broker-dealer, the entity is substantively holding or disbursing cash on behalf of its customers. Only the net changes during the period in assets and liabilities with those characteristics need be reported because knowledge of the gross cash receipts and payments related to them may not be necessary to understand the entity's operating, investing, and financing activities. Specifically, provided that the original maturity of the asset or liability is three months or less, cash receipts and payments pertaining to investments (other than cash equivalents),

loans receivable, and debt qualify for net reporting based on this rationale.

**6.05** FASB ASC 830-230-45-1 specifies that the effect of exchange rate changes on cash balances held in foreign currencies be reported as a separate part of the reconciliation of the change in cash and cash equivalents during the period in the statement of cash flows. Further, a statement of cash flows of an entity with foreign exchange transactions or foreign operations should report the reporting currency equivalent of foreign currency cash flows using the exchange rates in effect at the time of the cash flows. An appropriately weighted average exchange rate for the period may be used for translation if the result is substantially the same as if the rates at the dates of the cash flows were used.

#### DISCLOSURE

**6.06** FASB ASC 230-10-50-1 explains that an entity should disclose its policy regarding cash equivalent classification, and any change to that policy is a change in accounting principle that should be affected by restating financial statements for earlier years presented for comparative purposes. If the indirect method is used, amounts of interest (net of capitalized amounts) and income tax payments during the period are required to be disclosed.

**6.07** Paragraphs 3–6 of FASB ASC 230-10-50 require the disclosure of information about noncash investing and financing activities. Examples of noncash investing and financing transactions include converting debt to equity; acquiring assets by assuming directly-related liabilities, such as purchasing a building by incurring a mortgage to the seller; obtaining an asset by entering into a capital lease; obtaining a building or investment asset by receiving a gift; and exchanging noncash assets or liabilities for other noncash assets or liabilities. If only a few noncash transactions exist, it may be convenient to include them on the same page as the statement of cash flows. Otherwise, the transactions may be reported elsewhere in the financial statements and clearly referenced to the statement of cash flow.

*NOTES TO CONSOLIDATED FINANCIAL  
STATEMENTS (in part)**[1] Summary of Significant Accounting Policies (in part)**(j) Cash, Cash Equivalents and Restricted Cash*

Cash equivalents include short-term, highly liquid investments with original maturities of three months or less when acquired.

Cash and cash equivalents as reported in the accompanying Consolidated Balance Sheets consist of amounts held by the Company that are available for general corporate purposes and the Company's proportionate share of amounts held by construction joint ventures that are available only for joint venture-related uses. Joint venture cash and cash equivalents are not restricted to specific uses within those entities; however, the terms of the joint venture agreements limit the ability to distribute those funds and use them for corporate purposes. Cash held by construction joint ventures is distributed from time to time to the Company and to the other joint venture participants in accordance with their percentage interest after the joint venture partners determine that a cash distribution is prudent. Cash distributions received by the Company from its construction joint ventures are then available for general corporate purposes.

At December 31, 2010 and 2009, cash and cash equivalents consisted of the following (in thousands):

|                                                                                                                                                 | 2010             | 2009        |
|-------------------------------------------------------------------------------------------------------------------------------------------------|------------------|-------------|
| Corporate cash and cash equivalents<br>(available for general corporate purposes)                                                               | \$455,464        | \$323,867   |
| Company's share of joint venture cash and<br>cash equivalents (available only for joint<br>venture purposes, including future<br>distributions) | 15,914           | 24,442      |
|                                                                                                                                                 | \$471,378        | \$348,309   |
| <b>Restricted Cash</b>                                                                                                                          | <b>\$ 23,550</b> | <b>\$ —</b> |

Restricted cash is held to secure insurance-related contingent obligations, such as insurance claim deductibles, in lieu of utilizing letters of credit.

The accompanying Notes to Consolidated Financial Statements are an integral part of these statements.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### Note 18—Supplemental Cash Flow Information (in part)

During 2010, IAC received a dividend from Meetic, which the Company deemed to be a partial return of its investment. Accordingly, the dividend is reflected as a cash flow from an investing activity in the accompanying consolidated statement of cash flows.

### Supplemental Disclosure of Non-Cash Transactions for 2010

On December 1, 2010, in accordance with the Company's stock exchange agreement with Liberty, IAC exchanged \$217.9 million in cash and all the outstanding shares of Celebrate Interactive, Inc., a wholly owned subsidiary of IAC that held all the equity interests of Evite, Inc., Giftco, Inc. and IAC Advertising, LLC, for substantially all of Liberty's shares of IAC common stock and all of its shares of Class B common stock, which were valued at \$364.2 million based on the closing price of IAC common stock on December 1, 2010.

On March 10, 2010, Match and Meetic completed a transaction in which Match contributed its Latin American business ("Match Latam") and Meetic contributed Parperfeito to a newly formed venture. These contributions, along with a \$3.0 million payment from Match to Meetic, resulted in each party owning a 50% equity interest in the newly formed venture, which was valued at \$72 million. Match controls the venture through its voting interests. Accordingly, this transaction was accounted for as an acquisition of Parperfeito and a decrease in ownership of Match Latam. No gain or loss was recognized on this transaction as the fair value of the consideration received by Match equaled the fair value of the assets exchanged.

### Supplemental Disclosure of Non-Cash Transactions for 2009

The Company recorded a \$4.1 million reduction to the Spin-Off distribution. This reflects a reduction in the Company's income tax liability and a corresponding increase in the income tax liability of the Spincos as of the date of the Spin-Off. This reduced tax liability is primarily due to elections made by the Company pursuant to the tax sharing agreement executed in connection with the Spin-Off. The amount is included in the consolidated statement of shareholders' equity as an increase to additional paid-in-capital.

On June 5, 2009, IAC completed the sale of Match Europe to Meetic. In exchange for Match Europe, IAC received a 27% stake in Meetic (approximately 6.1 million shares of Meetic common stock), valued at \$154.8 million, plus a promissory note valued at \$6.2 million. The promissory note was subsequently paid in the fourth quarter of 2009.

On January 31, 2009, IAC completed the sale of ReserveAmerica to The Active Network, Inc. ("Active"). In exchange for ReserveAmerica, IAC received approximately 3.5 million shares of Active convertible preferred stock, valued at \$33.3 million. No gain or loss was recognized on the sale of ReserveAmerica as the fair value of the Active convertible preferred stock received was equivalent to the carrying value of ReserveAmerica.

### Supplemental Disclosure of Non-Cash Transactions for 2008

During the year ended December 31, 2008, \$12.3 million in aggregate principal amount of Convertible Notes was con-

verted by the holders. Upon conversion, 0.2 million shares of IAC common stock and 0.2 million shares of Expedia common stock were issued to the holders.

After the close of trading on August 20, 2008, IAC completed the Spin-Off. The net assets of the Spincos, net of cash of \$728.0 million, of \$3.2 billion is included in the accompanying consolidated statement of shareholders' equity as a reduction to additional paid-in capital and retained earnings.

Immediately prior to and in connection with the Spin-Off, the Company exchanged \$277.4 million of the Senior Notes for debt of ILG.

## CASH FLOWS FROM OPERATING ACTIVITIES

### PRESENTATION

**6.13** FASB ASC 230-10-45 defines those transactions and events that constitute operating cash receipts and payments. Cash inflows from operating activities include the following:

- Cash receipts from sales of goods or services, including receipts from the collection or sale of accounts and both short- and long-term notes receivable from customers arising from those sales. Goods include certain loans and other debt and equity instruments of other entities that are acquired specifically for resale.
- Cash receipts from returns on loans, other debt instruments of other entities, and equity securities—interest and dividends.
- All other cash receipts that do not stem from transactions defined as investing or financing activities, such as amounts received to settle lawsuits; proceeds of insurance settlements, except for those that are directly related to investing or financing activities, such as destruction of a building; and refunds from suppliers.

Cash outflows from operating activities include the following:

- Cash payments to acquire materials for manufacture or goods for resale, including principal payments on accounts and both short- and long-term notes payable to suppliers for those materials or goods. Goods include certain loans and other debt and equity instruments of other entities that are acquired specifically for resale.
- Cash payments to other suppliers and employees for other goods or services.
- Cash payments to governments for taxes, duties, fines, and other fees or penalties and the cash that would have been paid for income taxes if increases in the value of equity instruments issued under share-based payment arrangements that are not included in the cost of goods or services recognizable for financial reporting purposes also had not been deductible in determining taxable income.
- Cash payments to lenders and other creditors for interest.
- Cash payment made to settle an asset retirement obligation.
- All other cash payments that do not stem from transactions defined as investing or financing activities, such as payments to settle lawsuits, cash contributions to charities, and cash refunds to customers.

**6.14** FASB ASC 230-10-45 recommends that the direct method be used to report net cash flow from operating activities, which includes reporting major classes or gross cash receipts and payments and their arithmetic sum. Entities that choose not to provide information about major classes of operating cash receipts and payments by the direct method should determine and report the same amount for net cash flow from operating activities indirectly by adjusting net income of a business entity to reconcile it to net cash flow from operating activities (the indirect or reconciliation method). Regardless of whether the direct or indirect method is used, a reconciliation of net income to net cash flow from operating activities is required to be presented.

**6.15** FASB ASC 230-10-45-28 also notes that when reconciling net income to net cash flow from operating activities, a business entity should adjust net income to remove past operating cash receipts and payments and accruals of expected future operating cash receipts and payments, including changes during the period in inventory and receivables and payables pertaining to operating activities. Additionally, all items that are included in net income, such as depreciation and amortization expense, that do not affect net cash provided from, or used for, operating activities should be adjusted for.

## 6.16

## CASH FLOWS FROM INVESTING ACTIVITIES

### PRESENTATION

**6.30** FASB ASC 230 defines those transactions and events that constitute investing cash receipts and payments. Investing activities include making and collecting loans and acquiring and disposing of debt or equity instruments and property, plant, and equipment (PPE) and other productive assets. Investing activities exclude acquiring and disposing of certain loans or other debt or equity instruments that are acquired specifically for resale. Cash flows from purchases, sales, and maturities of available-for-sale securities should be classified as cash flows from investing activities and reported gross in the statement of cash flows. The following are considered cash receipts and payments from investing activities:

- Receipts from collections or sales of loans made by the entity and of other entities' debt instruments, other than cash equivalents and certain debt instruments that are acquired specifically for resale, that were purchased by the entity.
- Receipts from sales of equity instruments of other entities, other than certain equity instruments carried in a trading account, and from returns of investment in those instruments.
- Receipts from sales of PPE and other productive assets.
- Receipts from sales of loans that were not specifically acquired for resale. If loans were acquired as investments,

cash receipts from sales of those loans shall be classified as investing cash inflows, regardless of a change in the purpose for holding those loans.

- Disbursements for loans made by the entity and payments to acquire debt instruments of other entities, other than cash equivalents and certain debt instruments that are acquired specifically for resale.
- Payments to acquire equity instruments of other entities, other than certain equity instruments carried in a trading account.
- Payments at the time of purchase or soon before or after purchase to acquire PPE and other productive assets, including interest capitalized as part of the cost of those assets. Generally, only advance payments, the down payment, or other amounts paid at the time of purchase or soon before or after the purchase of PPE and other productive assets are investing cash outflows. However, incurring directly-related debt to the seller is a financing transaction; thus, subsequent payments of principal on that debt are financing cash outflows.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### Note 10. Property and Equipment

The principal components of property and equipment are shown in the table below (dollars in millions):

|                                           | December 31 |          |
|-------------------------------------------|-------------|----------|
|                                           | 2010        | 2009     |
| Land                                      | \$ 352      | \$ 341   |
| Buildings and improvements                | 3,984       | 3,883    |
| Construction in progress                  | 205         | 264      |
| Equipment                                 | 2,863       | 2,795    |
|                                           | 7,404       | 7,283    |
| Accumulated depreciation and amortization | (3,100)     | (2,970)  |
| Net property and equipment                | \$ 4,304    | \$ 4,313 |

Property and equipment is stated at cost, less accumulated depreciation and amortization and impairment write-downs related to assets held and used. At December 31, 2010 and 2009, we had \$91 million and \$66 million, respectively, of property and equipment purchases accrued for items received but not yet paid. Of these amounts, \$87 million and \$61 million, respectively, were included in accounts payable.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### Note 1—Description of Business and Summary of Significant Accounting Policies (in part)

#### Marketable Securities

We categorize our marketable securities as either “trading” or “available-for-sale.” These investments are recorded at fair value and are classified as short-term investments in the accompanying consolidated balance sheets. Investments are made based on the Company’s investment policy and restrictions contained in our credit facility, which specifies eligible investments and credit quality requirements.

Trading securities are investments held in trust to satisfy obligations under our deferred compensation plans. The changes in fair values on trading securities are recorded as a component of net income in other income (expense), net.

Available-for-sale securities consist of mutual funds, U.S. government and agency obligations, corporate notes and bonds, foreign government and foreign government guaranteed securities, and certificates of deposit at major banks. The changes in fair values, net of applicable taxes, on available-for-sale securities are recorded as unrealized gains (losses) as a component of accumulated other comprehensive income (loss) in stockholders’ equity. When fair value of an investment decreases below its cost or amortized cost and in management’s opinion that decline is “other-than-temporary,” the investment’s cost or amortized cost is written down to its fair value and the amount written down is recorded in the statement of operations in other income (expense), net. Management considers a decline “other than temporary” if, among other relevant factors, the fair value is significantly below cost for a period of time. The amount of any write-down is determined by the difference between cost or amortized cost of the investment and its fair value at the time management makes the other-than-temporary determination. During the fiscal year ended August 31, 2010, no other-than-temporary impairment was recognized.

**Note 2 – Cash, Cash Equivalents and Short-Term Investments (in part)**

At August 31, 2010, the components of our cash, cash equivalents, and short-term investments were as follows (in thousands):

|                                                                 | Cost Basis         | Unrealized Gain | Unrealized (Loss) | Recorded Basis     | Balance Sheet Classification |                        |
|-----------------------------------------------------------------|--------------------|-----------------|-------------------|--------------------|------------------------------|------------------------|
|                                                                 |                    |                 |                   |                    | Cash and Cash Equivalents    | Short-Term Investments |
| Cash                                                            | \$ 401,277         | \$ —            | \$ —              | \$ 401,277         | \$401,277                    | \$ —                   |

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

###### Note 3—Acquisitions (in part)

On October 1, 2010, the Company completed its acquisition of National Starch, a global provider of specialty starches, from Akzo Nobel N.V., a global coatings and specialty chemicals company, headquartered in The Netherlands. The Company acquired 100 percent of National Starch through asset purchases in certain countries and stock purchases in certain countries. The purchase price was \$1.354 billion in cash, subject to certain post-closing adjustments and other finalizations to the valuation. The funding of the purchase price was provided principally from borrowings. See Note 6 for information regarding the Company's borrowing activity. The Company incurred \$35 million of acquisition costs and a \$20 million charge for bridge loan financing costs related to the acquisition in 2010. The results of National Starch are included in the Company's consolidated results from October 1, 2010 forward.

The acquisition positions the Company with a broader portfolio of products, enhanced geographic reach, and the ability to offer customers a broad range of value-added ingredient solutions for a variety of their evolving needs. National Starch had sales of \$1.2 billion in 2009 and provides the Company with, among other things, 11 additional manufacturing facilities in 8 countries, across 5 continents. The acquisition also provides additional sales and technical offices around

the world. With the acquisition, the Company now employs approximately 10,700 people in North America, South America, Asia/Africa and Europe. It operates 37 manufacturing facilities in 15 countries; has sales offices in 29 countries, and has research and ingredient development centers in key global markets.

The allocation of the preliminary purchase price to the tangible and identifiable intangible assets acquired and liabilities assumed, based on their fair values as of October 1, 2010, is provided below. Goodwill represents the amount by which the purchase price exceeds the fair value of the net assets acquired. It is estimated that approximately 15 percent of the goodwill associated with this acquisition is deductible for tax purposes.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

##### Note D—Discontinued Operations

On February 19, 2010, the Company completed the disposition of its Mining business, which was previously part of the former Materials Processing & Mining segment, to Bucyrus and received approximately \$1 billion in cash and approximately 5.8 million shares of Bucyrus common stock. Following this transaction the Company is investing in its current businesses and focusing on products and services where it can maintain and build a strong market presence. The products divested by the Company in the transaction included

hydraulic mining excavators, high capacity surface mining trucks, track and rotary blasthole drills, drill tools and high-wall mining equipment, as well as the related parts and after-market service businesses, including the Company-owned distribution locations. The Company recorded a gain on the sale of its Mining business of approximately \$606 million, net of tax for the year ended December 31, 2010. The Company is involved in a dispute with Bucyrus regarding the calculation of the value of the net assets of the Mining business.

Bucyrus has provided the Company with their calculation of the net asset value of the Mining business, which seeks a payment of approximately \$149 million from the Company to Bucyrus. The Company believes that the Bucyrus calculation of the net asset value is incorrect and not in accordance with the terms of the definitive agreement. The Company has objected to Bucyrus' calculation and has provided Bucyrus with its calculation of the net asset value, which does not require any payment from the Company to Bucyrus. The Company initiated a court proceeding on October 29, 2010 in the Supreme Court of the State of New York, County of New York, to enforce and protect its rights under the definitive agreement. While the Company believes Bucyrus' position is without merit and it is vigorously opposing it, no assurance can be given as to the final resolution of this dispute or that the Company will not ultimately be required to make a substantial payment to Bucyrus.

The Company accounts for the shares of Bucyrus common stock received as "available for sale" securities as defined in ASC 320, "Investments—Debt and Equity Securities." As such, the carrying value of the Bucyrus common stock will be adjusted on a quarterly basis based on changes in fair value of the stock with the corresponding entry for unrealized gains and losses recorded in Accumulated other comprehensive income. This stock is traded in an active market and measured under the Level 1 fair value category as defined in Note J—"Fair Value Measurements."

On December 31, 2009, the Company completed the sale of substantially all of the assets used in its construction trailer operations, which was formerly part of the AWP segment. The total purchase price received at closing was \$3.1 million, comprised of \$0.1 million in cash and \$3.0 million of promissory notes. The promissory notes are secured by a security agreement and a mortgage on the real estate sold in the transaction.

In March 2010, the Company sold the assets of its Powertain gears business and pumps business, which were formerly part of the Construction segment. Total proceeds on the sale of these businesses were approximately \$2 million.

On March 10, 2010, the Company entered into an agreement to sell its Atlas businesses to Atlas Maschinen. Fil Filipov, a former Terex executive and the father of Steve Filipov, the Company's President, Developing Markets and Strategic Accounts, is the Chairman of Atlas Maschinen. The Atlas product lines divested in the transaction include crawler, wheel and rail excavators, knuckle-boom truck loader cranes and Terex® Atlas branded material handlers. The transaction also includes the Terex Atlas UK distribution business for truck loader cranes in the United Kingdom and the Terex minority ownership position in an Atlas Chinese joint venture. The Atlas business was previously reported in the Construction segment, with the exception of the knuckle-boom truck loader cranes business, which was reported in the Cranes segment. On April 15, 2010, the Company completed the portion of this transaction related to the Atlas operations in Germany and completed the portion of the transaction related to the operations in the United Kingdom on August 11, 2010. The Company recorded a loss on the sale of Atlas of approximately \$17 million, net of tax, for the year ended December 31, 2010.

The following amounts related to the discontinued operations were derived from historical financial information and have been segregated from continuing operations and reported as discontinued operations in the Consolidated Statement of Income (in millions):

|                                                                  | Year Ended December 31 |           |           |
|------------------------------------------------------------------|------------------------|-----------|-----------|
|                                                                  | 2010                   | 2009      | 2008      |

| Other assets                                    | —           | 71.6    |
| Long-term assets—discontinued operations        | \$—         | \$209.6 |
| Trade accounts payable                          | \$—         | \$104.8 |
| Accrued compensation and benefits               | —           | 23.3    |
| Accrued warranties and product liability        | —           | 38.8    |
| Customer advances                               | —           | 7.6     |
| Other current liabilities                       | —           | 83.0    |
| Current liabilities—discontinued operations     | \$—         | \$257.5 |
| Non-current liabilities—discontinued operations | \$—         | \$143.8 |

The following table provides the amounts of cash and cash equivalents presented in the Consolidated Statement of Cash Flows as of December 31:

|                                                   | 2010    | 2009    | 2008    |
|---------------------------------------------------|---------|---------|---------|
| Cash and cash equivalents:                        |         |         |         |
| Cash and cash equivalents—continuing operations   | \$894.2 | \$929.5 | \$450.4 |
| Cash and cash equivalents—discontinued operations | —       | 41.7    | 34.0    |
| Total cash and cash equivalents                   | \$894.2 | \$971.2 | \$484.4 |

As a condition of the sale of the Company's Mining business to Bucyrus and the Atlas business to Atlas Maschinen, the parties have entered into transition services agreements. The agreements require Terex to provide the respective counterparties to the transactions with certain general and administrative functions and the use of certain business related assets for a period of time after the close of the sale in exchange for a fee.

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

(In thousands, except share and per share data)

#### 6. Notes Receivable

Notes receivable consists of the following:

|                                                                   | November 27,<br>2010 | November 28,<br>2009 |
|-------------------------------------------------------------------|----------------------|----------------------|
| Notes receivable                                                  | \$14,914             | \$19,411             |
| Allowance for doubtful accounts and discounts on notes receivable | (6,748)              | (8,950)              |
| Notes receivable, net                                             | 8,166                | 10,461               |
| Less: current portion of notes receivable                         | (658)                | (2,152)              |
| Long term notes receivable                                        | \$ 7,508             | \$ 8,309             |

Our notes receivable, which bear interest at rates ranging from 2% to 6%, consist primarily of amounts due from our licensees from loans made by the Company to help licensees fund their operations. Approximately 61% and 64% of our notes receivable represent conversions of past due accounts receivable at November 27, 2010 and November 28, 2009, respectively. The net carrying value of notes receivable that are considered to be on non-accrual status for the recognition of interest at November 27, 2010 and November 28, 2009 was \$2,277 and \$3,083, respectively.

Activity in the allowance for doubtful accounts and discounts was as follows:

|                                | 2010     | 2009     |
|--------------------------------|----------|----------|
| Balance, beginning of the year | \$ 8,950 | \$ 6,596 |
| Additions charged to expense   | 1,896    | 6,297    |
| Write-offs                     | (4,027)  | (3,813)  |
| Amortization of discounts      | (71)     | (130)    |
| Balance, end of the year       | \$ 6,748 | \$ 8,950 |

We amortize the related note discount over the contractual term of the note and cease amortizing the discount to interest income when the present value of expected future cash flows is less than the carrying value of the note. Interest income on the notes, which is included in other loss, net, was \$463, \$681 and \$705 for fiscal 2010, 2009, and 2008, respectively.

During fiscal 2009 we converted past due trade accounts receivable and refinanced an existing note receivable of three licensees. As part of the improvement plans with one of our licensees, we converted \$1,100 of past due trade accounts receivable and refinanced an existing note with a remaining balance of \$224 into a \$1,324 long-term note bearing interest at 4.75%. This note requires interest only payments through 2011 and interest and principal payments due monthly through its maturity on December 31, 2016. Additionally, we converted \$550 and \$250 of past due trade accounts receivable for two licensees to 4.75% long-term interest bearing notes. The \$550 note requires interest only payments through March 16, 2012, and principal and interest payments due monthly through its maturity date of March 16, 2015. The \$250 note requires interest only payments through March 16, 2011, with the remaining interest and principal due on April 16, 2011.

The initial carrying value of the notes is determined using present value techniques which consider the fair market rate of interest based on the licensee's risk profile and estimated cash flows to be received. We considered the stated interest rates to be below market due to the overall lack of availability of credit in the financial markets. The following table presents summary fair value information at the inception of these notes:

| Face Value of Note<br>Receivable | Discount Rate | Fair Value |
|----------------------------------|---------------|------------|
| \$1,324                          | 19.50%        | \$672      |
| 550                              | 5.25%         | 539        |
| 250                              | 19.61%        | 187        |

The estimated fair value of our notes receivable portfolio was \$8,212 at November 27, 2010 and \$10,208 at November 28, 2009. The inputs into these fair value calculations reflect our market assumptions and are not observable. Consequently, the inputs are considered to be Level 3 as specified in the fair value hierarchy in ASC Topic 820, *Fair Value Measurements and Disclosures*. See Note 8.

On a quarterly basis we examine these notes for evidence of impairment, considering factors such as licensee capitalization, projected operating performance, the viability of the market in which the licensee operates and the licensee's operating history, including our cash receipts from the licensee, licensee sales and any underlying collateral. After considering these factors, should we believe that all or a portion of the expected cash flows attributable to the note receivable

will not be received, we record an impairment charge on the note by estimating future cash flows and discounting them at the effective interest rate. Any difference between the estimated discounted cash flows and the carrying value of the note is recorded as an increase to the allowance for doubtful accounts.

These notes, as well as our accounts receivable, are generally secured by the filing of security statements in accordance with the Uniform Commercial Code and/or real estate owned by the maker of the note and in some cases, personal guarantees by our licensees.

Computer Software Developed or Obtained for Internal Use, Including Web Site Development Costs: The Company capitalizes qualifying computer software costs incurred during the “application development stage.” For financial reporting purposes, capitalized software costs are amortized by the straight-line method over 2 to 3 years. The amount of costs capitalized within any period is dependent on the nature of software development activities and projects in each period.

##### *Note 1—Summary of Significant Accounting Policies (in part)*

##### *Restricted Cash and Investments*

As more fully discussed in Note 17—Contingencies, various litigation matters in Brazil require us to make cash deposits as a condition of continuing the litigation. In addition, several of our secured financing arrangements and other contracts require us to post cash collateral or maintain minimum cash balances in escrow. These cash amounts are classified in our Consolidated Balance Sheets based on when the cash will be contractually or judicially released (refer to Note 10—Supplementary Financial Information for classification of amounts).

Restricted cash amounts at December 31, 2010 and 2009 were as follows:

|                                                         | 2010  | 2009  |
|---------------------------------------------------------|-------|-------|
| Tax and labor litigation deposits in Brazil             | \$276 | \$240 |
| Escrow and cash collections related to receivable sales | 88    | 29    |
| Other restricted cash                                   | 7     | 20    |
| Total Restricted Cash and Investments                   | \$371 | \$289 |

#### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

#### Note 18. Regulation and Contingencies (in part)

##### Insurance Recoveries

In July 2009 (fiscal 2010), a fire occurred at the primary manufacturing facility of our subsidiary, Patrick Cudahy, Incorporated (Patrick Cudahy), in Cudahy, WI. The fire damaged a portion of the facility's production space and required the temporary cessation of operations, but did not consume the entire facility. Shortly after the fire, we resumed production activities in undamaged portions of the plant, including the distribution center, and took steps to address the supply needs for Patrick Cudahy products by shifting production to other Company and third party facilities.

The products produced at the facility include precooked and traditional bacon, dry sausage, ham and sliced meats. Patrick Cudahy's operating results are reported in the Pork segment. Annual revenues for Patrick Cudahy's packaged meats business have exceeded \$450 million in recent years.

We maintain comprehensive general liability and property insurance, including business interruption insurance, with loss limits that we believe will provide substantial and broad coverage for the currently foreseeable losses arising from this accident. We are working with our insurance carrier to determine the extent of loss. We have received advances totaling

\$70.0 million toward the ultimate settlement in fiscal 2010. The magnitude and timing of the ultimate settlement is currently unknown. However, we expect the level of insurance proceeds to fully cover the costs and losses incurred from the fire.

We have also been working with a third-party specialist to determine the amount of business interruption losses incurred. Based on an evaluation of business interruption losses incurred, we recognized \$31.8 million of the insurance proceeds in cost of sales to offset these previously recorded losses. Additionally, \$ 33.0 million of the insurance proceeds was recorded to offset the asset write-offs and other costs incurred. The remaining \$5.2 million has been deferred in accrued expenses and other current liabilities to offset future business interruption losses and other reimbursable costs associated with the fire.

Of the \$70.0 million in insurance proceeds received during fiscal 2010, \$9.9 million has been classified in net cash flows from investing activities in the consolidated condensed statements of cash flows, which represents the portion of proceeds related to destruction of the plant. The remainder of the proceeds was recorded in net cash flows from operating activities in the consolidated condensed statements of cash flows and was attributed to business interruption recoveries and reimbursable costs covered under our insurance policy.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

#### 20. Business Combinations and Divestitures

Certain businesses were acquired for \$1,269 million in cash and \$52 million of liabilities assumed during 2010. These acquisitions were accounted for by the purchase method and, accordingly, results of operations have been included in the financial statements from their respective dates of acquisition.

The 2010 acquisitions included: Acclarent, Inc., a privately held medical technology company dedicated to designing, developing and commercializing devices that address conditions affecting the ear, nose and throat (ENT); RespiVert Ltd., a privately held drug discovery company focused on developing small-molecule, inhaled therapies for the treatment of pulmonary diseases and Micrus Endovascular Corporation, a global developer and manufacturer of minimally invasive devices for hemorrhagic and ischemic stroke.

The excess of purchase price over the estimated fair value of tangible assets acquired amounted to \$1,185 million and has been assigned to identifiable intangible assets, with any residual recorded to goodwill. Of this amount, approximately \$213 million has been identified as the value of IPR&D associated with the acquisitions of Acclarent, Inc., RespiVert Ltd. and Micrus Endovascular Corporation.

The IPR&D related to the acquisition of Acclarent, Inc. was \$75 million and is associated with novel, endoscopic, catheter-based devices to meet the needs of ENT patients. The value of the IPR&D was calculated using cash flow projections discounted for the risk inherent in such projects. Probability of success factors ranging from 50–53% were used to reflect inherent clinical and regulatory risk. The discount rate applied was 16%.

The IPR&D related to the acquisition of RespiVert Ltd., was \$100 million and is associated with narrow spectrum kinase inhibitors with a unique profile of anti-inflammatory activities as treatments for moderate to severe asthma, Chronic Obstructive Pulmonary Disease (COPD) and Cystic Fibrosis (CF). The value of the IPR&D was calculated using cash flow projections discounted for the risk inherent in such projects. Probability of success factors ranging from 10–12% were used to reflect inherent clinical and regulatory risk. The discount rate applied was 17%.

The IPR&D related to the acquisition of Micrus Endovascular Corporation was \$38 million and is associated with ischemic and flow diverter technologies. The value of the IPR&D was calculated using cash flow projections discounted for the risk inherent in such projects. Probability of success factors ranging from 50–75% were used to reflect inherent clinical and regulatory risk. The discount rate applied was 14%.

During 2010, the Company announced an agreement to acquire all outstanding equity of Crucell N.V. that it does not already own for approximately \$2.3 billion in a cash tender offer. As of January 2, 2011 the Company held approximately 18% of Crucell's outstanding ordinary shares. Crucell is a global biopharmaceutical company focused on the research & development, production and marketing of vaccines and antibodies against infectious disease worldwide. On February 22, 2011, the Company announced that the tender offer for Crucell has been completed and has declared the offer unconditional.

Certain businesses were acquired for \$2,470 million in cash and \$875 million of liabilities assumed and non-controlling interests during 2009. These acquisitions were accounted for by the purchase method and, accordingly, results of operations have been included in the financial statements from their respective dates of acquisition.

The 2009 acquisitions included: Mentor Corporation, a leading supplier of medical products for the global aesthetics market; Cougar Biotechnology, Inc., a development stage biopharmaceutical company with a specific focus on oncology; Finsbury Orthopaedics Limited, a privately held UK-based manufacturer and global distributor of orthopaedic implants; Gloster Europe, a privately held developer of innovative disinfection processes and technologies to prevent healthcare-acquired infections and substantially all of the assets and rights of Elan's Alzheimer's Immunotherapy Program through a newly formed company, of which the Company owns 50.1% and Elan owns 49.9%.

The excess of purchase price over the estimated fair value of tangible assets acquired amounted to \$2,940 million and has been assigned to identifiable intangible assets, with any residual recorded to goodwill. Of this amount, approximately \$1,737 million has been identified as the value of IPR&D primarily associated with the acquisitions of Cougar Biotechnology, Inc. and substantially all of the assets and rights of Elan's Alzheimer's Immunotherapy Program. Additionally, approximately \$1,107 million has been identified as the value of other intangible assets, including patents & technology and customer relationships primarily associated with the acquisition of Mentor Corporation.

The IPR&D related to the acquisition of Cougar Biotechnology, Inc. was \$971 million and is associated with abiraterone acetate, a late stage, first-in-class compound for the treatment of prostate cancer. The value of the IPR&D was calculated using cash flow projections discounted for the risk inherent in such projects. Probability of success factors

ranging from 60–85% were used to reflect inherent clinical and regulatory risk. The discount rate applied was 23.5%.

During 2009, the Company acquired substantially all of the assets and rights of Elan's Alzheimer's Immunotherapy Program through a newly formed company, Janssen Alzheimer Immunotherapy (JAI), of which the Company owns 50.1% and Elan owns 49.9%. In addition, the Company purchased approximately 107 million newly issued American Depositary Receipts (ADRs) of Elan, representing 18.4% of Elan's outstanding ordinary shares. As part of this transaction, the Company paid \$885 million to Elan and committed to fund up to \$250 million of Elan's share of research and development spending by JAI. Of this total consideration of \$1,135 million, \$793 million represents the fair value of the 18.4% investment in Elan based on Elan's share price in an actively traded market as of the date of this transaction. The IPR&D related to this transaction was \$679 million and is associated with bapineuzumab, a potential first-in-class treatment that is being evaluated for slowing the progression of Alzheimer's Disease. The value of the IPR&D was calculated using cash flow projections discounted for the risk inherent in such projects. Probability of success factors ranging from 40–50% were used to reflect inherent clinical and regulatory risk. The discount rate applied was 26%. The non-controlling interest related to this transaction was \$590 million, which the Company has recorded in other non-current liabilities.

Certain businesses were acquired for \$1,214 million in cash and \$114 million of liabilities assumed during 2008. These acquisitions were accounted for by the purchase method and, accordingly, results of operations have been included in the financial statements from their respective dates of acquisition.

The 2008 acquisitions included: Amic AB, a privately held Swedish developer of in vitro diagnostic technologies for use in point-of-care and near-patient settings; Beijing Dabao Cosmetics Co., Ltd., a company that sells personal care brands in China; SurgRx, Inc., a privately held developer of the advanced bipolar tissue sealing system used in the ENSEAL® family of devices; HealthMedia, Inc., a privately held company that creates web-based behavior change interventions; LGE Performance Systems, Inc., a privately held company known as Human Performance Institute™, which develops science-based training programs to improve employee engagement and productivity and Omrix Biopharmaceuticals, Inc., a fully integrated biopharmaceutical company that develops and markets biosurgical and immunotherapy products.

The excess of purchase price over the estimated fair value of tangible assets acquired amounted to \$891 million and has been assigned to identifiable intangible assets, with any residual recorded to goodwill. Approximately \$181 million has been identified as the value of IPR&D associated with the acquisitions of Omrix Biopharmaceuticals, Inc., Amic AB, SurgRx, Inc. and HealthMedia, Inc.

The IPR&D charge related to the acquisition of Omrix Biopharmaceuticals, Inc. was \$127 million and is associated with stand-alone and combination biosurgical technologies used to achieve hemostasis. The value of the IPR&D was calculated using cash flow projections discounted for the risk inherent in such projects. Probability of success factors ranging from 60–90% were used to reflect inherent clinical and regulatory risk. The discount rate applied was 14%.

The IPR&D charge related to the acquisition of Amic AB was \$40 million and is associated with point-of-care device and 4CAST Chip technologies. The value of the IPR&D was

calculated using cash flow projections discounted for the risk inherent in such projects. The discount rate applied was 20%.

The IPR&D charge related to the acquisition of SurgRx, Inc. was \$7 million and is associated with vessel cutting and sealing surgical devices. The value of the IPR&D was calculated using cash flow projections discounted for the risk inherent in such projects. Probability of success factors ranging from 90–95% were used to reflect inherent clinical and regulatory risk. The discount rate applied was 18%.

The IPR&D charge related to the acquisition of HealthMedia, Inc. was \$7 million and is associated primarily with process enhancements to software technology. The value of the IPR&D was calculated using cash flow projections discounted for the risk inherent in such projects. A probability of success factor of 90% was used to reflect inherent risk. The discount rate applied was 14%.

Supplemental pro forma information for 2010, 2009 and 2008 in accordance with U.S. GAAP standards related to business combinations, and goodwill and other intangible assets, is not provided, as the impact of the aforementioned acquisitions did not have a material effect on the Company's results of operations, cash flows or financial position.

With the exception of the divestiture of the Breast Care Business of Ethicon Endo-Surgery Inc., for which the gain is recorded in other (income) expense in 2010, and the divestiture of the Professional Wound Care business of Ethicon, Inc., which resulted in a gain of \$536 million before tax, and is recorded in other (income) expense, net, in 2008, divestitures in 2010, 2009 and 2008 did not have a material effect on the Company's results of operations, cash flows or financial position.

## CASH FLOWS FROM FINANCING ACTIVITIES

### PRESENTATION

**6.40** FASB ASC 230-10-45 defines those transactions and events that constitute financing cash receipts and payments. The following are considered cash receipts and payments from financing activities:

- Proceeds from issuing equity instruments.
- Proceeds from issuing bonds, mortgages, and notes and from other short- or long-term borrowing.
- Receipts from contributions and investment income that, by donor stipulation, are restricted for the purposes of acquiring, constructing, or improving PPE or other long-lived assets or establishing or increasing a permanent or term endowment.
- Proceeds received from derivative instruments that include financing elements at inception, regardless of whether the proceeds were received at inception or over the term of the derivative instrument, other than a financing element inherently included in an at-the-market derivative instrument with no prepayments.
- Cash that is recognizable for financial reporting purposes because it is retained as a result of the tax deductibility of increases in the value of equity instruments issued under share-based payment arrangements that are not included in the cost of goods or services. For this purpose, excess

tax benefits should be determined on an individual award (or portion thereof) basis.

- Payments of dividends or other distributions to owners, including outlays to reacquire the entity's equity instruments.
- Repayments of borrowed amounts.
- Other principal payments to creditors who have extended long-term credit.
- Distributions to counterparties of derivative instruments that include financing elements at inception, other than a financing element inherently included in an at-the-market derivative instrument with no prepayments. The distributions may be either at inception or over the term of the derivative instrument.
- Payments for debt issue costs.

#### ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (in part)

#### Financing and Other Funding Transactions (in part)

In September 2010, we issued \$300 million of unsecured medium-term notes maturing in March 2016. If the notes are downgraded following, and as a result of, a change of control, the note holder can require us to repurchase all or a portion of the notes at a purchase price equal to 101% of the principal amount plus accrued and unpaid interest. The medium-term notes were issued to take advantage of his-

torically low interest rates and fund capital expenditures and debt maturities.

The following table shows the movements in our debt balance:

|                                                                     | Years Ended December 31 |           |
|---------------------------------------------------------------------|-------------------------|-----------|
| (In thousands)                                                      | 2010                    | 2009      |

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### Note 19. Stock Repurchase Program

On September 8, 2008, the Company announced that its Board of Directors had authorized the repurchase of up to \$250 million of Company common stock from the public market or in private purchases, using the Company's available

cash. While the repurchase program does not have a defined termination date, it may be suspended or discontinued at any time.

The Company temporarily suspended repurchases under the program during the December 2008 quarter. Subsequently on February 2, 2010, the Board of Directors authorized the resumption of the repurchase program. Repurchases were expected to be made only in the amounts necessary to offset dilution resulting from the Company's equity compensation plans.

Repurchases under the repurchase program were as follows during the periods indicated (in thousands, except per-share data):

| Period                                | Total Number of Shares Repurchased | Total Cost of Repurchase | Average Price Paid Per Share | Amount Available Under Repurchase Program |
|---------------------------------------|------------------------------------|--------------------------|------------------------------|-------------------------------------------|
| (In thousands, except per share data) |                                    |                          |                              |                                           |
| Quarter ended September 27, 2009      | —                                  | \$ —                     | \$ —                         | \$226,942                                 |
| Quarter ended December 27, 2009       | —                                  | \$ —                     | \$ —                         | \$226,942                                 |
| Quarter ended March 28, 2010          | 2,000                              | \$68,674                 | \$34.34                      | \$158,268                                 |
| Quarter ended June 27, 2010           | 697                                | \$27,575                 | \$39.56                      | \$130,693                                 |

In addition to shares repurchased under Board authorized repurchase programs shown above, during the twelve months ended June 27, 2010 the Company withheld 285,000 shares through net share settlements to cover tax withholding obligations upon the vesting of restricted stock unit awards under the Company's equity compensation plans.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### 6. Stock-Based Compensation Plans

The Texas Industries, Inc. 2004 Omnibus Equity Compensation Plan (the "2004 Plan") provides that, in addition to other types of awards, non-qualified and incentive stock options to purchase Common Stock may be granted to employees and

non-employee directors at market prices at date of grant. In addition, non-qualified and incentive stock options remain outstanding under our 1993 Stock Option Plan.

Options become exercisable in installments beginning one year after the date of grant and expire ten years after the date of grant. The fair value of each option grant was estimated on the date of grant using the Black-Scholes option pricing model. Options with graded vesting are valued as single awards and the compensation cost recognized using a

straight-line attribution method over the shorter of the vesting period or required service period adjusted for estimated forfeitures. The following table sets forth the information about the weighted-average grant date fair value of options granted during the three years ended May 31, 2010 and the weighted-average assumptions used for such grants.

|                                        | 2010    | 2009   | 2008    |
|----------------------------------------|---------|--------|---------|
| Weighted average grant date fair value | \$16.83 | \$9.26 | \$17.59 |
| Weighted average assumptions used:     |         |        |         |
| Expected volatility                    | .469    | .398   | .317    |
| Expected lives                         | 6.5     | 6.5    | 6.1     |
| Risk-free interest rates               | 3.20%   | 1.60%  | 3.21%   |
| Expected dividend yields               | .83%    | 1.21%  | .59%    |

Expected volatility is based on an analysis of historical volatility of our common stock. Expected lives of options is determined based on the historical share option exercise experience of our optionees. Risk-free interest rates are determined using the implied yield currently available for zero coupon U.S. treasury issues with a remaining term equal to the expected life of the options. Expected dividend yields are based on the approved annual dividend rate in effect and the market price of our common stock at the time of grant.

A summary of option transactions for the three years ended May 31, 2010, follows:

|                             | Shares Under Option | Weighted-Average Option Price |
|-----------------------------|---------------------|-------------------------------|
| Outstanding at May 31, 2007 | 1,483,035           | 36.31                         |
| Granted                     | 212,850             | 50.63                         |

| Weighted-average remaining life in years | 3.47                     | 4.47            | 6.09            |
| Weighted-average exercise price          | \$ 20.20                 | \$ 44.92        | \$ 57.47        |

Outstanding options expire on various dates to January 13, 2020. Shares reserved for future awards under the 2004 Plan totaled 939,815 at May 31, 2010.

As of May 31, 2010, the aggregate intrinsic value (the difference in the closing market price of our common stock of \$36.30 and the exercise price to be paid by the optionee) of stock options outstanding was \$9.8 million. The aggregate intrinsic value of exercisable stock options at that date was \$6.3 million. The total intrinsic value for options exercised (the difference in the market price of our common stock on the exercise date and the price paid by the optionee to exercise the option) was \$1.5 million in 2010, \$2.4 million in 2009 and \$6.9 million in 2008.

We have provided additional stock-based compensation to employees and directors under stock appreciation rights contracts, deferred compensation agreements, restricted

stock payments and a former stock awards program. At May 31, 2010, outstanding stock appreciation rights totaled 133,315 shares, deferred compensation agreements to be settled in cash totaled 100,757 shares, deferred compensation agreements to be settled in common stock totaled 2,070 shares, unvested restricted stock payments totaled 14,667 shares and stock awards totaled 3,499 shares. Other credits included \$6.0 million at both May 31, 2010 and May 31, 2009 representing accrued compensation which is expected to be settled in cash. Common stock totaling 2.7 million shares at May 31, 2010 and 2.9 million shares at May 31, 2009 have been reserved for the settlement of stock-based compensation.

Total stock-based compensation included in selling, general and administrative expense (credit) was \$5.1 million in 2010, \$(4.4) million in 2009 and \$2.4 million in 2008. The

impact of changes in our company's stock price on stock-based awards accounted for as liabilities increased stock-based compensation \$0.5 million in 2010 and reduced stock-based compensation \$8.4 million in 2009 and \$2.6 million in 2008. The total tax expense or benefit recognized in our statements of operations for stock-based compensation was a benefit of \$1.0 million in 2010 and an expense of \$2.4 million in 2009 and less than \$0.1 million in 2008. The total tax benefit realized for stock-based compensation was \$0.7 million in 2010, \$2.0 million in 2009 and \$3.7 million in 2008.

As of May 31, 2010, \$10.5 million of total unrecognized compensation cost related to stock options, restricted stock payments and stock awards is expected to be recognized. We currently expect to recognize approximately \$3.9 million of this stock-based compensation expense in 2011, \$2.9 million in 2012, \$1.9 million in 2013, \$1.3 million in 2014 and \$0.5 million in 2015.

##### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

#### Note 33. Special Cash Dividend

On November 23, 2010 our Board of Directors declared a special cash dividend in the amount of \$13.74 per share, or \$803.3 million in the aggregate. The special cash dividend, \$798.6 million, was paid on December 10, 2010 to shareholders of record as of December 3, 2010. The unpaid portion of the dividend, \$4.7 million, is reflected in other long term liabilities and will be paid when the underlying employee shares vest. The dividend was funded in part by the proceeds of the new term loans remaining after repayment of previous debt and in part with existing cash.

| Other, net                                                  | (2)                    | 1       | (1)   |
| Net cash (used in) provided by financing activities         | (543)                  | 184     | 230   |

During 2010, 2009 and 2008, the amount of capital expenditures in accounts payable increased (decreased) by \$48, \$(13) and \$9, respectively. The value of share awards that vested during 2010, 2009 and 2008 was \$18, \$12 and \$13, respectively. In connection with our June 23, 2009 acquisition of Baroda, \$5 of payables from us to MCIL were forgiven. Beginning July 1, 2010, we began consolidating Arabian Amines Company, our ethyleneamines manufacturing joint venture in Jubail, Saudi Arabia. For more information, see "Note 7. Variable Interest Entities."

During 2010, 2009 and 2008, capital expenditures of \$236, \$189 and \$418, respectively, were reimbursed in part by \$34, nil and nil, respectively, from insurance settlement proceeds. During 2010 we received \$110 from the settlement of our insurance claims related to the 2006 fire at our Port Arthur Texas plant, \$34 of which was considered as a reimbursement of capital expenditures.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)**

**2. Summary of Significant Accounting Policies (in part)**

**Other Noncurrent Assets**

Other noncurrent assets consist primarily of spare parts, deferred debt issuance costs, the overfunded portion related to defined benefit plans for employees and capitalized turnaround costs. Debt issuance costs are amortized using the interest method over the term of the related debt.

**9. Other Noncurrent Assets**

Other noncurrent assets consisted of the following (dollars in millions):

|                              | December 31 |       |
|------------------------------|-------------|-------|
|                              | 2010        | 2009  |
| Pension assets               | \$ 75       | \$ 31 |
| Debt issuance costs          | 33          | 16    |
| Capitalized turnaround costs | 164         | 98    |
| Spare parts inventory        | 81          | 82    |
| Catalyst assets              | 21          | 18    |
| Deposits                     | 55          | 56    |
| Other noncurrent assets      | 66          | 54    |
| Total                        | \$495       | \$355 |

Amortization expense of catalyst assets for the years ended December 31, 2010, 2009 and 2008 was \$12 million, \$14 million and \$12 million, respectively.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)**

**C. Acquisitions & Dispositions (in part)**

In October 2009, the Company acquired all noncontrolling interests in two majority-owned entities that indirectly engage in diamond sourcing and polishing operations through majority-owned subsidiaries in South Africa and Botswana, respectively, for total consideration of \$18,000,000, of which \$11,000,000 was paid upon closing of the transaction and the remaining \$7,000,000 will be paid on or before August 1, 2010. This acquisition is accounted for as an equity transaction since the Company maintained control of the two entities prior to the acquisition. Therefore, the Company recorded a decrease to additional paid-in capital of \$20,453,000 in 2009 related to this transaction. In addition, the Company paid \$4,000,000 to terminate a third-party management agreement. Management determined that this transaction was separate from the acquisition of the remaining noncontrolling interests; accordingly, the termination fee was recorded within SG&A expenses.

## Section 7: Independent Auditors' Report

### PRESENTATION IN ANNUAL REPORT

#### PRESENTATION

**7.01** This section reviews the format and content of independent auditors' reports appearing in the annual reports of the 500 survey entities. AU section 508, *Reports on Audited Financial Statements* (AICPA, *Professional Standards*), applies to auditors' reports issued in connection with audits of historical financial statements that are intended to present the financial position, results of operations, and cash flows in conformity with generally accepted accounting principles (GAAP). AICPA Professional Standards apply to audits of non-issuers. PCAOB Auditing Standards apply to audits of issuers.

**7.02** Section 103(a) of the Sarbanes-Oxley Act of 2002 authorized the Public Company Accounting Oversight Board (PCAOB) to establish auditing and related professional practice standards to be used by public accounting firms registered with the PCAOB. PCAOB Rule 3100, *Compliance With Auditing and Related Professional Practice Standards* (AICPA, *PCAOB Standards and Related Rules*, Select Rules of the Board), requires auditors to comply with all applicable auditing and related professional practice standards of the PCAOB. On an initial, transitional basis, the PCAOB adopted, as interim standards, the generally accepted auditing standards described in AU section 150, *Generally Accepted Auditing Standards* (AICPA, *Professional Standards*), in existence on April 16, 2003, to the extent not superseded or amended by the PCAOB.

### TITLE AND ADDRESSEE

#### PRESENTATION

##### **Author's Note**

Unless otherwise indicated, the auditing standards referred to in the following paragraphs apply to both issuers and non-issuers. Refer to paragraphs 7.01 and 7.02 for further information on AICPA auditing standards and PCAOB auditing standards.

**7.03** Paragraph .08(a) of AU section 508 states that the title of an auditor's report should include the word *independent*.

**7.04** Paragraph .09 of AU section 508 states the following:

The report may be addressed to the company whose financial statements are being audited or to its board of directors or stockholders. A report on the financial statements of an unincorporated entity should be addressed

as circumstances dictate, for example, to the partners, to the general partner, or to the proprietor. Occasionally, an auditor is retained to audit the financial statements of a company that is not a client; in such a case, the report is customarily addressed to the client and not to the directors or stockholders of the company whose financial statements are being audited.

### AUDITORS' REPORTS

#### PRESENTATION

##### **Author's Note**

Unless otherwise indicated, the auditing standards referred to in the following paragraphs apply to both issuers and non-issuers. Refer to paragraphs 7.01 and 7.02 for further information on AICPA auditing standards and PCAOB auditing standards.

**7.05** Paragraph 8 of AU section 508 presents examples of auditors' standard reports for single-year financial statements and comparative two-year financial statements. The examples presented in paragraph .08 of AU section 508 follows:

##### *INDEPENDENT AUDITORS' REPORT (single year)*

We have audited the accompanying balance sheet of X Company as of December 31, 20XX, and the related statements of income, retained earnings, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above, present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

[Signature]

[Date]

*INDEPENDENT AUDITORS' REPORT (comparative)*

We have audited the accompanying balance sheets of X Company as of December 31, 20X2 and 20X1, and the related statements of income, retained earnings, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above, present fairly, in all material respects, the financial position of X Company as of [at] December 31, 20X2 and 20X1, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

[Signature]

[Date]

When performing an integrated audit of financial statements and internal control over financial reporting, if the auditor issues separate reports on the company's financial statements and on internal control over financial reporting, the following paragraph should be added to the auditor's report on the company's financial statements:

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of X Company's internal control over financial reporting as of December 31, 20x3, based on [identify control criteria] and our report dated [date of report, which should be the same as the date of the report on the financial statements] expressed [include nature of opinions].

**7.06** Most of the survey entities present a balance sheet for two years and the other basic financial statements for three years. Footnote 8 to paragraph 8 of AU section 508 explains that if statements of income, retained earnings, and cash flows are presented on a comparative basis for one of more periods, but the balance sheet(s) as of the end of one or more of the prior period(s) is not presented, the phrase "for the years then ended" should be changed to indicate that the auditor's opinion applies to each period for which statements of income, retained earnings, and cash flows are presented, such as "for each of the three years in the period ended [date of latest balance sheet]."

**7.07** For audits of public entities (that is, issuers, as defined by the Sarbanes-Oxley Act of 2002, and other entities, when prescribed by the rules of the Securities and Exchange Commission [SEC]), PCAOB Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board* (AICPA, *PCAOB Standards and Related Rules*, Auditing Standards), directs auditors to state that the

engagement was conducted in accordance with "the standards of the Public Company Accounting Oversight Board (United States)" whenever the auditor has performed the engagement in accordance with the PCAOB's standards. An example of a standard independent registered auditor's report presented in the appendix, "Illustrative Reports," of Auditing Standard No. 1 follows:

*REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM*

We have audited the accompanying balance sheets of X Company as of December 31, 20X3 and 20X2, and the related statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 20X3. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the company as of [at] December 31, 20X3 and 20X2, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 20X3, in conformity with U.S. generally accepted accounting principles.

[City and State or Country]

[Date]

**7.08** Financial Accounting Standards Board (FASB) *Accounting Standards Codification* (ASC) 220, *Comprehensive Income*, permits entities to report components of comprehensive income in either a separate financial statement or a combined statement of income and comprehensive income. Alternatively, FASB ASC 220 allows components of comprehensive income to be reported in a statement of stockholders' equity. Although an entity may include the term *comprehensive income* in the title of the statement in which it is presented, FASB ASC 220 does not require the use of the term in an entity's financial statements. FASB ASC 220 acknowledges the use of equivalent terms.

**7.09** FASB ASC 505-10-50-2 allows for changes in the separate accounts comprising stockholders' equity to be presented either on the face of the basic financial statements or in the form of a separate statement, such as a statement of changes in stockholders' equity.

## PRESENTATION AND DISCLOSURE EXCERPTS

### PricewaterhouseCoopers LLP Auditors' Report

#### *Author's Note*

Although most audit reports use the exact format and order of paragraphs, PricewaterhouseCoopers uses a variation of the standard auditor's report that rearranges the standard elements into one paragraph for use in their unqualified opinions only.

## 7.11

### EASTMAN CHEMICAL COMPANY (DEC)

#### *REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM*

To the Board of Directors and Stockholders of Eastman Chemical Company

In our opinion, the consolidated financial statements listed in the index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of Eastman Chemical Company and its subsidiaries at December 31, 2010 and 2009, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2010 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations

of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## Statement of Operations and Comprehensive Income

### 7.12

#### TESORO CORPORATION (DEC)

##### *REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM*

To the Board of Directors and Stockholders of  
Tesoro Corporation

We have audited the accompanying consolidated balance sheets of Tesoro Corporation as of December 31, 2010 and 2009, and the related consolidated statements of operations, comprehensive income (loss) and stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2010. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Tesoro Corporation at December 31, 2010 and 2009, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2010, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Tesoro Corporation's internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 1, 2011 expressed an unqualified opinion thereon.

## Statement of Changes in Shareholders' Equity

### 7.13

#### DEL MONTE FOODS COMPANY (APR)

##### *REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM*

The Board of Directors and Stockholders  
Del Monte Foods Company

We have audited the accompanying consolidated balance sheets of Del Monte Foods Company and subsidiaries as of May 2, 2010 and May 3, 2009, and the related consolidated statements of income, stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended May 2, 2010. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Del Monte Foods Company and subsidiaries as of May 2, 2010 and May 3, 2009, and the results of their operations and their cash flows for each of the years in the three-year period ended May 2, 2010, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Del Monte Foods Company and subsidiaries' internal control over financial reporting as of May 2, 2010, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated June 29, 2010 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

## REFERENCE TO THE REPORT OF OTHER AUDITORS

### PRESENTATION

#### *Author's Note*

Unless otherwise indicated, the auditing standards referred to in the following paragraphs apply to both issuers and non-issuers. Refer to paragraphs 7.01 and 7.02 for further information on AICPA auditing standards and PCAOB auditing standards.

**7.14** When the opinion of a principal auditor is based in part on the report of another auditor, AU section 543, *Part of Audit Performed by Other Independent Auditors* (AICPA, *Professional Standards*), provides guidance to the principal auditor. Paragraph .07 of AU section 543 states the following:

When the principal auditor decides that he will make reference to the audit of the other auditor, his report should indicate clearly, in both the introductory, scope and opinion paragraphs, the division of responsibility as between that portion of the financial statements covered by his own audit and that covered by the audit of the other auditor. The report should disclose the magnitude of the portion of the financial statements audited by the other auditor. This may be done by stating the dollar amounts or percentages of one or more of the following: total assets, total revenues, or other appropriate criteria, whichever most clearly reveals the portion of the financial statements audited by the other auditor. The other auditor may be named but only with his express permission and provided his report is presented together with that of the principal auditor.

**7.15** Paragraphs .12–.13 of AU section 508 reaffirm the requirements of AU section 543. Paragraph .13 of AU section 508 and paragraph .09 of AU section 543 present examples of auditors' reports referring to the report of other auditors.

**7.16** The auditor's report for 2 survey entities made reference to the report of other auditors. The reference to other auditors in both of these reports is related to investments in unconsolidated affiliates.

### PRESENTATION AND DISCLOSURE EXCERPTS

#### Reference to Other Auditors

##### 7.17

##### EL PASO CORPORATION (DEC)

#### *REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM*

The Board of Directors and Stockholders of  
El Paso Corporation

We have audited the accompanying consolidated balance sheets of El Paso Corporation (the Company) as of December

31, 2010 and 2009, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the three years in the period ended December 31, 2010. Our audits also included the financial statement schedule listed in the Index at Item 15(a). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits. The financial statements of Citrus Corp. and Subsidiaries (a corporation in which the Company has a 50% interest) as of December 31, 2010 and 2009 and for each of the three years in the period ended December 31, 2010 and Four Star Oil & Gas Company (a corporation in which the Company has approximately a 49% interest) for the year ended December 31, 2008 have been audited by other auditors whose reports have been furnished to us, and our opinion on the consolidated financial statements, insofar as it relates to the amounts included from Citrus Corp. and Subsidiaries and Four Star Oil & Gas Company as of the years and for the periods herein referred to, is based solely on the reports of the other auditors. In the consolidated financial statements, the Company's investments in unconsolidated affiliates includes approximately \$866 million and \$674 million from Citrus Corp. and Subsidiaries as of December 31, 2010 and 2009, respectively, and the Company's earnings from unconsolidated affiliates includes approximately \$90 million and \$65 million for the years ended December 31, 2010 and 2009, respectively, from Citrus Corp. and Subsidiaries and approximately \$147 million for the year ended December 31, 2008, from Citrus Corp. and Subsidiaries and Four Star Oil & Gas Company combined, all of which were audited by other auditors.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the reports of other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of El Paso Corporation at December 31, 2010 and 2009, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2010 in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

As discussed in Note 1 to the consolidated financial statements, effective December 31, 2009 the Company changed its reserve estimates and related disclosures as a result of adopting new oil and gas reserve estimation and disclosure requirements.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), El Paso Corporation's internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control-Integrated Framework issued by

the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 28, 2011 expressed an unqualified opinion thereon.

## UNCERTAINTIES

### PRESENTATION

#### *Author's Note*

Unless otherwise indicated, the auditing standards referred to in the following paragraphs apply to both issuers and non-issuers. Refer to paragraphs 7.01 and 7.02 for further information on AICPA auditing standards and PCAOB auditing standards.

**7.18** Paragraph .30 of AU section 508 does not require an explanatory paragraph for *uncertainties*, as defined in paragraph .29 of AU section 508. This does not apply to uncertainties related to going concern situations, for which AU section 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern* (AICPA, *Professional Standards*), provides guidance.

#### 7.19

**TABLE 7-2: REFERENCES TO UNCERTAINTIES IN AUDITORS' REPORTS**

Table 7-2 summarizes the nature of uncertainties for which an explanatory paragraph was included in an auditors' report.

### PRESENTATION AND DISCLOSURE EXCERPTS

#### Going Concern

##### 7.20

W. R. GRACE & CO. (DEC)

#### *REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM*

To the Shareholders and Board of Directors of  
W. R. Grace & Co

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of W. R. Grace & Co. and its subsidiaries (the "Company") at December 31, 2010 and December 31, 2009, and the results of their operations and their cash flows for each

of the three years in the period ended December 31, 2010 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010 based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report On Internal Control Over Financial Reporting. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the consolidated financial statements, on April 2, 2001, the Company and substantially all of its domestic subsidiaries voluntarily filed for protection under Chapter 11 of the United States Bankruptcy Code, which raises substantial doubt about the Company's ability to continue as a going concern in its present form. Management's intentions with respect to this matter are described in Note 2. The accompanying consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted account-

ing principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## Fresh-Start Accounting

### 7.21

#### SPECTRUM BRANDS HOLDINGS, INC. (SEP)

##### *REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM*

The Board of Directors and Stockholders  
Spectrum Brands, Inc.

We have audited the accompanying consolidated statements of financial position of Spectrum Brands, Inc. and subsidiaries (the Company) as of September 30, 2010 and September 30, 2009 (Successor Company), and the related consolidated statements of operations, shareholders' equity (deficit) and comprehensive income (loss), and cash flows for the year ended September 30, 2010, the period August 31, 2009 to September 30, 2009 (Successor Company), the period October 1, 2008 to August 30, 2009 and the year ended September 30, 2008 (Predecessor Company). In connection with our audit of the consolidated financial statements, we have also audited the financial statement schedule II. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial

statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Spectrum Brands, Inc. and subsidiaries as of September 30, 2010 and September 30, 2009 (Successor Company), and the results of their operations and their cash flows for the year ended September 30, 2010, the period August 31, 2009 to September 30, 2009 (Successor Company), the period October 1, 2008 to August 30, 2009 and the year ended September 30, 2008 (Predecessor Company) in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

As discussed in Note 2 to the consolidated financial statements, the Predecessor Company filed a petition for reorganization under Chapter 11 of the United States Bankruptcy Code on February 3, 2009. The Company's plan of reorganization became effective and the Company emerged from bankruptcy protection on August 28, 2009. In connection with their emergence from bankruptcy, the Successor Company Spectrum Brands, Inc. adopted fresh-start reporting in conformity with ASC Topic 852, "Reorganizations" formerly American Institute of Certified Public Accountants Statement of Position 90-7, "Financial Reporting by Entities in Reorganization under the Bankruptcy Code", effective as of August 30, 2009. Accordingly, the Successor Company's consolidated financial statements prior to August 30, 2009 are not comparable to its consolidated financial statements for periods on or after August 30, 2009.

As discussed in Note 10 to the consolidated financial statements, effective September 30, 2009, the Successor Company adopted the measurement date provision of ASC 715, "Compensation-Retirement Benefits" formerly FAS 158, "Employers' Accounting for Defined Benefit Pension and other Postretirement Plans".

#### *NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)*

##### *Fresh-Start Reporting*

The Company, in accordance with ASC 852, adopted fresh-start reporting as of the close of business on August 30, 2009 since the reorganization value of the assets of the Predecessor Company immediately before the date of confirmation of the Plan was less than the total of all post-petition liabilities and allowed claims, and the holders of the Predecessor Company's voting shares immediately before confirmation of the Plan received less than 50 percent of the voting shares of the emerging entity. The four-column consolidated statement of financial position as of August 30, 2009, included herein, applies effects of the Plan and fresh-start reporting to the carrying values and classifications of assets or liabilities that were necessary.

The Company analyzed the transactions that occurred during the two-day period from August 29, 2009, the day after the Effective Date, and August 30, 2009, the fresh-start reporting date, and concluded that such transactions were not material individually or in the aggregate as such transactions represented less than one-percent of the total net sales for the fiscal year ended September 30, 2009. As a result, the Company determined that August 30, 2009, would be an

appropriate fresh-start reporting date to coincide with the Company's normal financial period close for the month of August 2009. Upon adoption of fresh-start reporting, the recorded amounts of assets and liabilities were adjusted to reflect their estimated fair values. Accordingly, the reported historical financial statements of the Predecessor Company prior to the adoption of fresh-start reporting for periods ended on or prior to August 30, 2009 are not comparable to those of the Successor Company.

The four-column consolidated statement of financial position as of August 30, 2009 reflects the implementation of the Plan as if the Plan had been effective on August 30, 2009. Reorganization adjustments have been recorded within the consolidated statement of financial position as of August 30, 2009 to reflect effects of the Plan, including the discharge of Liabilities subject to compromise and the adoption of fresh-start reporting in accordance with ASC 852. The Bankruptcy Court confirmed the Plan based upon a reorganization value of the Company between \$2,200,000 and \$2,400,000, which was estimated using various valuation methods including: (i) publicly traded company analysis, (ii) discounted cash flow analysis; and (iii) a review and analysis of several recent transactions of companies in similar industries to the Company. These three valuation methods were equally weighted in determining the final range of reorganization value as confirmed by the Bankruptcy Court. Based upon the factors used in determining the range of reorganization value, the Company concluded that \$2,275,000 should be used for fresh-start reporting purposes as it most closely approximated fair value.

The basis of the discounted cash flow analysis used in developing the reorganization value was based on Company prepared projections which included a variety of estimates and assumptions. While the Company considers such estimates and assumptions reasonable, they are inherently subject to significant business, economic and competitive uncertainties, many of which are beyond the Company's control and, therefore, may not be realized. Changes in these estimates and assumptions may have had a significant effect on the determination of the Company's reorganization value. The assumptions used in the calculations for the discounted cash flow analysis included projected revenue, costs, and cash flows, for the fiscal years ending September 30, 2009, 2010, 2011, 2012 and 2013 and represented the Company's best estimates at the time the analysis was prepared. The Company's estimates implicit in the cash flow analysis included net sales growth of approximately 1.5% for the fiscal year ending September 30, 2010 and 4.0% per year for each of the fiscal years ending September 30, 2011, 2012 and 2013. In addition, selling, general and administrative expenses, excluding depreciation and amortization, were projected to grow at rates relative to net sales, however, certain expense categories for each of the fiscal years ending September 30, 2010, 2011, 2012 and 2013 were reduced for the projected impact of various cost reduction initiatives implemented by the Company during Fiscal 2009 which included lower trade spending, salary freezes, reduced marketing expenses, furloughs, suspension of the Company's match to its 401(k) and reductions in salaries of certain members of management. The analysis also included anticipated levels of reinvestment in the Company's operations through capital expenditures of approximately \$25,000 per year. The Company did not include in its estimates the potential effects of litigation, either on the Company or the industry. The foregoing estimates and assumptions are inherently subject to uncertainties and contingencies beyond the control of the

Company. Accordingly, there can be no assurance that the estimates, assumptions, and values reflected in the valuations will be realized, and actual results could vary materially.

The publicly traded company analysis identified a group of comparable companies giving consideration to lines of business, business risk, scale and capitalization and leverage. This analysis involved the selection of the appropriate earnings before interest, taxes, depreciation and amortization ("EBITDA") market multiples by segment deemed to be the most relevant when analyzing the peer group. A range of valuation multiples was then identified and applied to the Company's Fiscal 2009 and Fiscal 2010 projections by segment to determine an estimate of reorganization values. The market multiple ranges used by segment were as follows: (i) Global Batteries and Personal Care used a range of 7.0x–8.0x for Fiscal 2009 and 6.5x–7.5x for Fiscal 2010; (ii) Global Pet Supplies used a range of 7.5x–8.5x for Fiscal 2009 and 7.0x–8.0x for Fiscal 2010; and (iii) the Home and Garden Business used a range of 9.0x–10.0x for Fiscal 2009 and 8.0x–9.0x for Fiscal 2010. These multiples were based on estimated EBITDA adjusted for certain non-recurring initiatives, as mentioned above.

The recent transactions of companies in similar industries analysis identified transactions of similar companies giving consideration to lines of business, business risk, scale and capitalization and leverage. The analysis considered the business, financial and market environment for which the transactions took place, circumstances surrounding the transaction including the financial position of the buyers and the perceived synergies and benefits that the buyers could obtain from the transaction. This analysis involved the determination of historical acquisition EBITDA multiples by examining public merger and acquisition transactions. A range of valuation multiples was then identified and applied to historical EBITDA by segment to determine an estimate of reorganization values. The multiple ranges used by segment were as follows: (i) Global Batteries and Personal Care used a range of 6.5x–7.5x; (ii) Global Pet Supplies used a range of 9.5x–10.5x; and (iii) the Home and Garden Business used a range of 8.0x–9.0x. These multiples were based on Fiscal 2009 estimated EBITDA adjusted for certain non-recurring initiatives, as mentioned above.

Fresh-start adjustments reflect the allocation of fair value to the Successor Company's long-lived assets and the present value of liabilities to be paid as calculated by the Company.

In applying fresh-start reporting, the Company followed these principles:

- The reorganization value of the entity was allocated to the entity's assets in conformity with the procedures specified by SFAS No. 141, "*Business Combinations*" ("SFAS 141"). The reorganization value exceeded the sum of the amounts assigned to assets and liabilities. This excess was recorded as Successor Company goodwill as of August 30, 2009.
- Each liability existing as of the fresh-start reporting date, other than deferred taxes, has been stated at the present value of the amounts to be paid, determined at appropriate risk adjusted interest rates.
- Deferred taxes were reported in conformity with applicable income tax accounting standards, principally ASC Topic 740: "*Income Taxes*," formerly SFAS No. 109, "*Accounting for Income Taxes*" ("ASC 740"). Deferred tax assets and liabilities have been recognized for differences between the assigned values and the tax basis of the recognized assets and liabilities.

- Adjustment of all of the property, plant and equipment assets to fair value and eliminating all of the accumulated depreciation.
- Adjustment of the Company's pension plans projected benefit obligation by recognition of all previously unamortized actuarial gains and losses.

The following four-column consolidated statement of financial position table identifies the adjustments recorded to the Predecessor Company's August 30, 2009 consolidated statement of financial position as a result of implementing the Plan and applying fresh-start reporting:

|                                                      | Predecessor<br>Company |                            |                           | Successor<br>Company |

| Total Uses                                                                         | \$135,551  |
| Net Cash Uses                                                                      | \$(25,551) |

<sup>(b)</sup> The Company incurred \$8,949 of debt issuance costs under the exit facility. These debt issuance costs are classified as long-term assets and are amortized over the life of the exit facility.

<sup>(c)</sup> The adjustment to current maturities of long-term debt reflects the \$20,005 payment of the Predecessor Company's un-reimbursed letters of credit, the \$45,000 repayment of the Predecessor Company's supplemental loan, and the \$3,440 payment of certain amounts under the term loan agreement. The adjustment to current maturities of long-term debt also reflects the \$65,000 funding from the exit facility. The adjustment to the current maturities of long-term debt are:

|                                                                             |           |
|-----------------------------------------------------------------------------|-----------|
| Repayment of unreimbursed letters of credit                                 | \$ 20,005 |
| Repayment of supplemental loan                                              | 45,000    |
| Repayment of certain amounts under the term loan agreement, current portion | 3,440     |
| Amounts borrowed under the exit facility                                    | (65,000)  |
|                                                                             | \$ 3,445  |

<sup>(d)</sup> Reflects payment of \$204 related to pre-petition foreign exchange derivative contracts.

<sup>(e)</sup> Total adjustment of \$59,581 reflects term lender cure payments of \$33,995, terminated interest rate swap derivative contract payments of \$12,068 and other accrued interest of \$2,003. Additionally, this adjustment includes \$11,515 of accrued default interest as provided in the August 2009 amendment of the Senior Term Credit Facility, which was assumed by the Successor Company and included in the principal balance of the loans at emergence (See Note 7, Debt, for additional information).

<sup>(f)</sup> Reflects the payment of professional fees related to the reorganization in the amount of \$6,447 offset by the reclassification of \$15,580 related to rejected lease obligations previously recorded as liabilities subject to compromise (see note(i)). These rejected lease obligations were paid by the Successor Company in subsequent periods. As of September 30, 2009, the Company's rejected lease obligation was reduced to \$6,181.

(continued)

- (g) The adjustment to long-term debt represents the issuance of the 12% Notes at a fair value of \$218,731 (face value of \$218,076) used, in part, to extinguish the Senior Subordinated Notes of the debtors that were recorded in liabilities subject to compromise (see note (i)), the issuance of the new supplemental loan in the amount of \$45,000, offset by the payment of the non-current portion of the term loan in the amount of \$3,440 (see note (a)). The excess of fair value over face value of the 12% Notes is recorded in long-term debt and will be accreted as a reduction to interest expense over the life of the note.

|                                                                                    |                  |
|------------------------------------------------------------------------------------|------------------|
| Issuance of the 12% Notes (fair value)                                             | \$218,731        |
| Amounts borrowed under the new supplemental loan agreement                         | 45,000           |
| Accrued default interest                                                           | 11,515           |
| Repayment of certain amounts under the term loan agreement, net of current portion | (3,440)          |
|                                                                                    | <u>\$271,806</u> |

- (h) Gain on the cancellation of debt from the extinguishment of the senior subordinated notes as well as the modification of the senior term credit facility, for tax purposes, resulted in a \$124,054 reduction in the U.S. net deferred tax asset, exclusive of indefinite-lived intangibles. Due to the Company's full valuation allowance position as of August 30, 2009 on the U.S. net deferred tax asset, exclusive of indefinite-lived intangibles, the tax effect of these items is offset by a corresponding adjustment to the valuation allowance of \$124,054. Due to changes in the relative current versus non-current deferred tax asset balances and the corresponding allocation of the domestic valuation allowance, a net \$1,707 deferred tax balance reclassification occurred between current and non-current as a result of the effects of the Plan.
- (i) The adjustment to liabilities subject to compromise relates to the extinguishment of the Senior Subordinated Notes balance of \$1,049,885 and the accrued interest of \$40,497 associated with the Senior Subordinated Notes. Additionally, rejected lease obligations of \$15,580 were reclassified to other current liabilities (see note (f)).
- (j) Pursuant to the Plan, the debtor's common stock was canceled and new common stock of the reorganized debtors was issued. The adjustments eliminated Predecessor Company's common stock and additional paid-in capital of \$691 and \$677,007, respectively, and recorded Successor Company's common stock and additional paid-in capital of \$300 and \$724,796, respectively, which represents the fair value of the newly issued common stock. The fair value of the newly issued common stock was not separately valued. A fair value of \$725,096 was determined by subtracting the fair value of net debt (total debt less cash and cash equivalents), or \$1,549,904 from the enterprise value of \$2,275,000. The Company issued 30,000 shares at emergence, consisting of 27,030 shares to holders of the Senior Subordinated Notes allowed note holder claims and 2,970 shares in accordance with the terms of the Debtors' debtor-in-possession credit facility.
- (k) As a result of the Plan, the adjustment to accumulated (deficit) equity recorded the elimination of the Predecessor Company's common stock, additional paid in capital and treasury stock in the amount of \$600,807 and recorded the pre-tax gain on the cancellation of debt in the amount of \$146,555. The elimination of the Predecessor Company's common stock, additional paid in capital and treasury stock was calculated as follows:

|                                                                                |                  |
|--------------------------------------------------------------------------------|------------------|
| Elimination of Predecessor Company's common stock (see note (j))               | \$ 691           |
| Elimination of Predecessor Company's additional paid in capital (see note (j)) | 677,007          |
| Elimination of Predecessor Company's treasury stock (see note (l))             | (76,891)         |
| Elimination of Predecessor Company's common stock                              | <u>\$600,807</u> |

The pre-tax gain on the cancellation of debt was calculated as follows:

|                                                                                     |                   |
|-------------------------------------------------------------------------------------|-------------------|
| Extinguishment of Predecessor Company senior subordinated notes                     | \$1,049,885       |
| Extinguishment of Predecessor Company accrued interest on senior subordinated notes | 40,497            |
| Issuance of Successor Company 12% Notes (fair value)                                | (218,731)         |
| Issuance of Successor Company common stock                                          | (725,096)         |
| Pre-tax gain on the cancellation of debt                                            | <u>\$ 146,555</u> |

- (l) Pursuant to the Plan, the adjustment eliminates treasury stock of \$76,891 of the Predecessor Company.

#### *Fresh-Start Valuation Adjustments*

- (m) Reflects the adjustment of assets and liabilities to estimated fair value, or other measurement specified by SFAS 141, in conjunction with the adoption of fresh-start reporting. Significant adjustments are summarized as followed:

- *Inventories*—An adjustment of \$48,762 was recorded to adjust inventory to fair value. Raw materials were valued at current replacement cost, work-in-process was valued at estimated selling prices of finished goods less the sum of costs to complete, cost of disposal and a reasonable profit allowance for completing and selling effort based on profit for similar finished goods. Finished goods were valued at estimated selling prices less the sum of costs of disposal and a reasonable profit allowance for the selling effort.
- *Property, plant and equipment, net*—An adjustment of \$34,699 was recorded to adjust the net book value of property, plant and equipment to fair value giving consideration to their highest and best use. Key assumptions used in the valuation of the Company's property, plant and equipment were based on a combination of the cost or market approach, depending on whether market data was available.
- *Current maturities of long-term debt and Long-term debt, net of current maturities*—An adjustment of \$79,658 (\$4,329 to Current maturities of long-term debt and \$75,329 to Long-term debt, net of current maturities) was recorded to adjust the book value of debt to fair value. This adjustment included a decrease of \$84,001 which was based on quoted market prices of certain debt instruments as of the Effective Date, offset by an increase of \$4,343 related to debt instruments not traded which was calculated giving consideration to the terms of the underlying agreements, using a risk adjusted interest rate of 12%.
- *Employee benefit obligations, net of current portion*—An adjustment of \$18,712 was recorded to measure the employee benefit obligations as of the Effective Date. This adjustment primarily reflects the difference between the expected return on plan assets as compared to the fair value of the plan assets as of the Effective Date and the change in the duration weighted discount rate associated with the payment of the benefit obligations from the prior measurement date and the Effective Date. The weighted average discount rate changed from 6.75% at September 30, 2008 to 5.75% at August 30, 2009.

(continued)

- (n) Reflects the tax effects of the fresh-start adjustments at statutory tax rates applicable to such adjustments, net of adjustments to the valuation allowance.
- (o) Adjustment eliminated the balance of goodwill and other unamortized intangible assets of the Predecessor Company and records Successor Company intangible assets, including reorganization value in excess of amounts allocated to identified tangible and intangible assets, also referred to as Successor Company goodwill. (See Note 6, Goodwill and Intangible Assets, for additional information regarding the Company's goodwill and other intangible assets). The Successor Company's August 30, 2009 statement of financial position reflects the allocation of the business enterprise value to assets and liabilities immediately following emergence as follows:

|                                                                                                                                         |              |
|-----------------------------------------------------------------------------------------------------------------------------------------|--------------|
| Business enterprise value                                                                                                               | \$ 2,275,000 |
| Add: Fair value of non-interest bearing liabilities (non-debt liabilities)                                                              | 744,071      |
| Less: Fair value of tangible assets, excluding cash                                                                                     | (1,031,511)  |
| Less: Fair value of identified intangible assets                                                                                        | (1,459,500)  |
| Reorganization value of assets in excess of amounts allocated to identified tangible and intangible assets (Successor Company goodwill) | \$ 528,060   |

The following represent the methodologies and significant assumptions used in determining the fair value of intangible assets, other than goodwill.

Certain indefinite-lived intangible assets which include trade names, trademarks and technology, were valued using a relief from royalty methodology. Customer relationships were valued using a multi-period excess earnings method. Certain intangible assets are subject to sensitive business factors of which only a portion are within control of the Company's management. A summary of the key inputs used in the valuation of these assets are as follows:

- The Company valued customer relationships using the income approach, specifically the multi-period excess earnings method. In determining the fair value of the customer relationship, the multi-period excess earnings approach values the intangible asset at the present value of the incremental after-tax cash flows attributable only to the customer relationship after deducting contributory asset charges. The incremental after-tax cash flows attributable to the subject intangible asset are then discounted to their present value. Only expected sales from current customers were used which included an expected growth rate of 3%. The Company assumed a customer retention rate of 95% which was supported by historical retention rates. Income taxes were estimated at a rate of 35% and amounts were discounted using rates between 12%-14%. The customer relationships were valued at \$708,000 under this approach.
  - The Company valued trade names and trademarks using the income approach, specifically the relief from royalty method. Under this method, the asset values were determined by estimating the hypothetical royalties that would have to be paid if the trade name was not owned. Royalty rates were selected based on consideration of several factors, including consumer product industry practices, the existence of licensing agreements (licensing in and licensing out), and importance of the trademark and trade name and profit levels, among other considerations. Royalty rates used in the determination of the fair values of trade names and trademarks ranged from 1% to 5% of expected net sales related to the respective trade names and trademarks. The Company anticipates using the majority of the trade names and trademarks for an indefinite period. In estimating the fair value of the trademarks and trade names, net sales were estimated to grow at a rate of (7)%-10% annually with a terminal year growth rate of 2%-6%. Income taxes were estimated at a rate of 35% and amounts were discounted using rates between 12%-14%. Trade name and trademarks were valued at \$688,000 under this approach.
  - The Company valued technology using the income approach, specifically the relief from royalty method. Under this method, the asset value was determined by estimating the hypothetical royalties that would have to be paid if the technology was not owned. Royalty rates were selected based on consideration of several factors including industry practices, the existence of licensing agreements (licensing in and licensing out), and importance of the technology and profit levels, among other considerations. Royalty rates used in the determination of the fair values of technologies ranged from 7%-8% of expected net sales related to the respective technology. The Company anticipates using these technologies through the legal life of the underlying patent and therefore the expected life of these technologies was equal to the remaining legal life of the underlying patents ranging from 8 to 17 years. In estimating the fair value of the technologies, net sales were estimated to grow at a rate of 0%-14% annually. Income taxes were estimated at 35% and amounts were discounted using rates between 12%-13%. The technology assets were valued at \$63,500 under this approach.
- (p) The fresh-start adjustment of \$17,957 eliminates the debt issuance costs related to assumed debt, that is, the (senior secured term credit facility).
- (q) The Predecessor Company's accumulated deficit and accumulated other comprehensive income is eliminated in conjunction with the adoption of fresh-start reporting. The Predecessor Company recognized a gain of \$1,087,566 related to the fresh-start reporting adjustments as follows:

|                                                              | Gain on<br>Fresh-Start<br>Reporting<br>Adjustments |
|--------------------------------------------------------------|----------------------------------------------------|
| Establishment of Successor Company's goodwill                | \$ 528,060                                         |
| Elimination of Predecessor Company's goodwill                | (238,905)                                          |
| Establishment of Successor Company's other intangible assets | 1,459,500                                          |
| Elimination of Predecessor Company's other intangible assets | (677,050)                                          |
| Debt fair value adjustments                                  | 79,658                                             |
| Elimination of debt issuance costs                           | (17,957)                                           |
| Property, plant and equipment fair value adjustment          | 34,699                                             |
| Deferred tax adjustment                                      | (104,881)                                          |
| Inventory fair value adjustment                              | 48,762                                             |
| Employee benefit obligations fair value adjustment           | (18,712)                                           |
| Other fair value adjustments                                 | (5,608)                                            |
|                                                              | <u>\$1,087,566</u>                                 |

## LACK OF CONSISTENCY

### PRESENTATION

#### *Author's Note*

Unless otherwise indicated, the auditing standards referred to in the following paragraphs apply to both issuers and non-issuers. Refer to paragraphs 7.01 and 7.02 for further information on AICPA auditing standards and PCAOB auditing standards.

**7.22** As required by paragraphs .16–.18 of AU section 508, if there has been a change in accounting principles or the method of their application that has a material effect on the comparability of the company's financial statements, the auditor should refer to the change in an explanatory paragraph of the report. Such paragraph should follow the opinion paragraph and identify the nature of the change and refer the reader to the note in the financial statements that discusses the change in detail.

### 7.23

**TABLE 7-3: REFERENCES TO LACK OF CONSISTENCY IN AUDITORS' REPORTS**

Table 7-3 summarizes the accounting changes for which auditors expressed unqualified opinions, but included explanatory language (following the opinion paragraph) in their reports.

CSP INC. (SEP)

#### *REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM*

To the Board of Directors and Shareholders  
CSP Inc.

We have audited the accompanying consolidated balance sheets of CSP, Inc. and subsidiaries as of September 30, 2010 and 2009, and the related consolidated statements of operations, shareholders' equity and comprehensive income (loss), and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of CSP, Inc. and subsidiaries as of September 30, 2010 and 2009, and the results of their operations and their cash flows for the years then ended in conformity with U.S. generally accepted accounting principles.

As discussed in Note 1 to the financial statements, CSP, Inc. and subsidiaries has changed its method of recognizing certain revenues in 2010 due to the adoption of Accounting Standards Update ("ASU") 2009-13—*Multiple-Deliverable Revenue Arrangements—a Consensus of the FASB Emerging Issues Task Force* and ASU 2009-14—*Certain Revenue Arrangements that Contain Software Elements*.

#### *NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)*

#### *1. Summary of Significant Accounting Policies (in part)*

##### *Revenue Recognition (in part)*

In October 2009, the FASB issued Accounting Standards Update ("ASU") 2009-13 "Multiple-Deliverable Revenue Arrangements—a Consensus of the FASB Emerging

Issues Task Force" ("ASU 2009-13") and ASU 2009-14—"Certain Revenue Arrangements that Contain Software Elements." ("ASU 2009-14"). ASU 2009-13 amends existing revenue recognition accounting principles regarding multiple-deliverable revenue arrangements. The consensus provides accounting principles and application guidance on whether multiple deliverables exist, how the arrangement should be separated, and how the consideration should be allocated. This guidance eliminates the requirement to establish verifiable, objective evidence of the fair value of undelivered products and services and also eliminates the residual method of allocating arrangement consideration. The new guidance provides for separate revenue recognition based upon management's estimate of the selling price for an undelivered item when there is no other means to determine the fair value of that undelivered item. Under the previous guidance, if the fair value of all of the elements in the arrangement was not determinable, then revenue was deferred until all of the items were delivered or fair value was determined. This pronouncement is effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010, with early adoption permitted.

ASU 2009-14 removes the sale of tangible products containing software components and non-software components that function together to deliver the tangible product's essential functionality from the scope of software revenue recognition guidance.

Adoption of the new revenue recognition guidance has had an impact on the pattern and timing of revenue recognition. In some cases, revenue that would have been deferred pursuant to the previously existing multiple-element revenue recognition guidance, has been recognized pursuant to the newly issued guidance. This is because in some cases we are not able to determine VSOE or third-party evidence of the service element in our arrangements. Under the new guidance, because the requirement to determine fair value of undelivered elements has been eliminated, and we may use estimated selling price to allocate revenue to elements in an arrangement, we are now more likely to be able to separate arrangements into separate units of accounting, and thereby recognize the delivered elements (typically product revenue) without having delivered the other elements in the arrangements (typically services). The impact of adopting this new accounting guidance on revenue for year ended September 30, 2010 was that \$3.5 million in additional revenue was recognized under the newly adopted guidance that wouldn't have been recognized had we not adopted the new standards. The impact of adopting this new accounting guidance on net income and EPS was an increase to net income of \$284 thousand for the year ended September 30, 2010, and an increase of \$0.08, to both basic and fully diluted earnings per share for the year ended September 30, 2010.

The Company has adopted these standards as of October 1, 2009.

GREIF, INC. (OCT)

#### *REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM*

The Board of Directors and Shareholders of  
Greif, Inc.

We have audited the accompanying consolidated balance sheets of Greif, Inc. and subsidiaries as of October 31, 2010 and 2009, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years in the period ended October 31, 2010. Our audits also included the financial statement schedule listed in the Index at Item 15(a)(2). These consolidated financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Greif, Inc. and subsidiaries at October 31, 2010 and 2009, and the consolidated results of their operations and their cash flows for each of the three years in the period ended October 31, 2010, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

As discussed in Note 4 to the consolidated financial statements, the Company changed its method of accounting for inventory in 2010 to the FIFO method of inventory valuation for all locations.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Greif, Inc.'s internal control over financial reporting as of October 31, 2010, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated December 22, 2010 expressed an unqualified opinion thereon.

#### *NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)*

##### *Note 4—Inventories*

On November 1, 2009, the Company elected to adopt the FIFO method of inventory valuation for all locations, whereas

in all prior years inventory for certain U.S. locations was valued using the LIFO method. The Company believes that the FIFO method of inventory valuation is preferable because (i) the change conforms to a single method of accounting for all of the Company's inventories on a U.S. and global basis, (ii) the change simplifies financial disclosures, (iii) financial statement comparability and analysis for investors and analysts is improved, and (iv) the majority of the Company's key competitors use FIFO. The comparative consolidated financial statements of prior periods presented have been adjusted to apply the new accounting method retrospectively. The change in accounting principle is reported through retrospective application as described in ASC 250, "Accounting Changes and Error Corrections."

The following consolidated statement of operations line items for the years ending October 31, 2009 and October 31, 2008 were affected by the change in accounting principle (Dollars in thousands):

|                                        | For the Year Ended October 31, 2009 |             |             | For the Year Ended October 31, 2008 |             |             |
|----------------------------------------|-------------------------------------|-------------|-------------|-------------------------------------|-------------|-------------|
|                                        | As Originally Reported              | Adjustments | As Adjusted | As Originally Reported              | Adjustments | As Adjusted |
| Cost of products sold                  | \$2,257,141                         | \$ 35,432   | \$2,292,573 | \$3,097,760                         | \$(12,025)  | \$3,085,735 |
| Gross profit                           | 535,076                             | (35,432)    | 499,644     | 692,771                             | 12,025      | 704,796     |
| Operating profit                       | 235,329                             | (35,432)    | 199,897     | 370,286                             | 12,025      | 382,311     |
| Income tax expense                     | 37,706                              | (13,645)    | 24,061      | 73,610                              | 4,631       | 78,241      |
| Net income attributable to Greif, Inc. | \$ 132,433                          | \$(21,787)  | \$ 110,646  | \$ 234,354                          | \$ 7,394    | \$ 241,748  |

The following consolidated balance sheet line items at October 31, 2009 were affected by the change in accounting principle (Dollars in thousands):

|                                            | As Originally Reported | Adjustments | As Adjusted |
|--------------------------------------------|------------------------|-------------|-------------|
| Inventory                                  | \$ 227,432             | \$11,419    | \$ 238,851  |
| Total assets                               | \$2,812,510            | \$11,419    | \$2,823,929 |
| Deferred tax liabilities                   | \$ 156,755             | \$ 4,397    | \$ 161,152  |
| Total liabilities                          | \$1,712,940            | \$ 4,397    | \$1,717,337 |
| Retained earnings                          | \$1,199,592            | \$ 7,022    | \$1,206,614 |
| Total liabilities and shareholders' equity | \$2,812,510            | \$11,419    | \$2,823,929 |

The inventories are comprised as follows at October 31 for the year indicated (Dollars in thousands):

|                                   | 2010      | 2009      |
|-----------------------------------|-----------|-----------|
| Finished goods                    | \$ 92,469 | \$ 57,304 |
| Raw materials and work-in process | 304,103   | 181,547   |
|                                   | \$396,572 | \$238,851 |

## Business Combinations

### 7.26

#### HEWLETT-PACKARD COMPANY (OCT)

#### REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of  
Hewlett-Packard Company

We have audited the accompanying consolidated balance sheets of Hewlett-Packard Company and subsidiaries as of October 31, 2010 and 2009, and the related consolidated statements of earnings, stockholders' equity, and cash flows for each of the three years in the period ended October 31, 2010. Our audits also included the financial statement schedule listed in the Index at Item 15(a)(2). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We

believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Hewlett-Packard Company and subsidiaries at October 31, 2010 and 2009, and the consolidated results of their operations and their cash flows for each of the three years in the period ended October 31, 2010, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

As discussed in Note 1 to the consolidated financial statements, in fiscal year 2010, Hewlett-Packard Company and subsidiaries changed their method of accounting for business combinations with the adoption of Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 805, *Business Combinations*, and their method of accounting for noncontrolling interests with the adoption of the amendments to FASB ASC 810, *Consolidation*, both effective November 1, 2009. In fiscal year 2009, Hewlett-Packard Company and subsidiaries changed their method of accounting for revenue recognition with the adoption of amendments to the FASB ASC resulting from Accounting Standards Update No. 2009-13, *Multiple-Deliverable Revenue Arrangements*, and Accounting Standards Update No. 2009-14, *Certain Revenue Arrangements That Include Software Elements*, both adopted effective November 1, 2008 and their method of accounting for the measurement date provisions for their defined benefit postretirement plans in accordance with the guidance provided in FASB Statement No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—An Amendment of FASB No. 87, 88, 106 and 132(R)* (codified primarily in FASB ASC Topic 715, *Compensation—Retirement Benefits*).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Hewlett-Packard Company's internal control over financial reporting as of October 31, 2010, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated December 15, 2010, expressed an unqualified opinion thereon.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)

### Note 1. Summary of Significant Accounting Policies (in part)

#### Business Combinations

HP has adopted the new accounting standard related to business combinations. HP has included the results of operations of the businesses that it acquired in fiscal 2010 in HP's consolidated results as of the respective dates of acquisition. HP allocates the purchase price of its acquisitions to the tangible assets, liabilities and intangible assets acquired, including in-process research and development ("IPR&D"), based on their estimated fair values. The excess of the purchase price over those fair values is recorded as goodwill. IPR&D is initially capitalized at fair value as an intangible asset with an indefinite life and assessed for impairment thereafter. When the IPR&D project is complete, it is reclassified as an amortizable purchased intangible asset and is amortized over its estimated useful life. If an IPR&D project is abandoned, HP will

record a charge for the value of the related intangible asset to HP's Consolidated Statement of Earnings in the period it is abandoned. Acquisition-related expenses and restructuring costs are recognized separately from the business combination and are expensed as incurred.

## Consolidation

### 7.27

#### JOHNSON CONTROLS, INC. (SEP)

#### REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Johnson Controls, Inc.

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of Johnson Controls, Inc. and its subsidiaries at September 30, 2010 and 2009, and the results of their operations and their cash flows for each of the three years in the period ended September 30, 2010 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of September 30, 2010, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we

considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As discussed in Note 18 to the consolidated financial statements, the Company adopted guidance included in Accounting Standards Codification (ASC) 740, "Income Taxes," prescribing how a company should recognize, measure, present, and disclose uncertain tax positions effective October 1, 2007.

As discussed in Note 14 to the consolidated financial statements, the Company adopted guidance included in Accounting Standards Codification (ASC) 810, "Consolidation," prescribing how a company should account for noncontrolling interests effective October 1, 2009.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

#### **NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)**

##### **1. Summary of Significant Accounting Policies (in part)**

###### **Principles of Consolidation**

The consolidated financial statements include the accounts of Johnson Controls, Inc. and its domestic and non-U.S. subsidiaries that are consolidated in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP). All significant intercompany transactions have been eliminated. Investments in partially-owned affiliates are accounted for by the equity method when the Company's interest exceeds 20% and the Company does not have a controlling interest. The financial results for the year ended September 30, 2009 include an out of period adjustment of \$62 million made in the first and second quarters of fiscal 2009 to correct an error related to the power solutions segment. The correction of the error, which reduces segment income, primarily originated in fiscal 2007 and 2008 and resulted in the overstatement of inventory and understatement of cost of sales in prior periods. The Company determined that the impact of the error on the originating periods was immaterial, and accordingly a restatement of prior period amounts was not considered necessary. The Company also

determined the impact of correcting the error in fiscal 2009 was not material.

Under certain criteria as provided for in Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 810, "Consolidation," the Company may consolidate a partially-owned affiliate when it has less than a 50% ownership. In order to determine whether to consolidate a partially-owned affiliate when the Company has less than a 50% ownership, the Company first determines if the entity is a variable interest entity (VIE). An entity is considered to be a VIE if it has one of the following characteristics: 1) the entity is thinly capitalized; 2) residual equity holders do not control the entity; 3) equity holders are shielded from economic losses or do not participate fully in the entity's residual economics; or 4) the entity was established with non-substantive voting. If the entity meets one of these characteristics, the Company then determines if it is the primary beneficiary of the VIE. The party exposed to the majority of the risks and rewards associated with the VIE is the VIE's primary beneficiary and must consolidate the entity.

Based upon the criteria set forth in ASC 810, the Company has determined that for the reporting periods ended September 30, 2010 and 2009 it was the primary beneficiary in two VIE's in which it holds less than 50% ownership as the Company funds the entities' short-term liquidity needs. Both entities are consolidated within the automotive experience North America segment. The Company did not have a significant variable interest in any unconsolidated VIE's for the presented reporting periods. The carrying amounts and classification of assets and liabilities included in the Company's consolidated statements of financial position for consolidated VIE's are as follows (in millions):

|                          | <b>September 30</b> |              |
|--------------------------|---------------------|--------------|
|                          | <b>2010</b>         | <b>2009</b>  |
| Current assets           | \$215               | \$146        |
| Noncurrent assets        | 69                  | 101          |
| <b>Total assets</b>      | <b>\$284</b>        | <b>\$247</b> |
| Current liabilities      | \$174               | \$103        |
| Noncurrent liabilities   | —                   | —            |
| <b>Total liabilities</b> | <b>\$174</b>        | <b>\$103</b> |

## **Variable Interest Entities**

### **7.28**

#### **TIME WARNER INC. (DEC)**

#### **REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

The Board of Directors and Shareholders of Time Warner Inc.

We have audited the accompanying consolidated balance sheets of Time Warner Inc. ("Time Warner") as of December 31, 2010 and 2009, and the related consolidated statements of operations, cash flows and equity for each of the three years in the period ended December 31, 2010. Our

audits also included the Supplementary Information and Financial Statement Schedule II listed in the index at Item 15(a). These financial statements, supplementary information and schedule are the responsibility of Time Warner's management. Our responsibility is to express an opinion on these financial statements, supplementary information and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Time Warner at December 31, 2010 and 2009, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2010, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related Supplementary Information and Financial Statement Schedule, when considered in relation to the basic financial statements taken as a whole, present fairly in all material respects the information set forth therein.

As discussed in Note 1 to the accompanying consolidated financial statements, on January 1, 2009 Time Warner retrospectively adopted accounting guidance for non-controlling interests, and accounting guidance which requires that all outstanding unvested share-based payment awards that contain rights to non-forfeitable dividends or dividend equivalents be considered participating securities.

As discussed in Note 1 to the accompanying consolidated financial statements, on January 1, 2010 Time Warner retrospectively adopted the amendments to the accounting guidance pertaining to the accounting for transfers of financial assets and variable interest entities.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Time Warner's internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 18, 2011 expressed an unqualified opinion thereon.

#### **NOTES TO CONSOLIDATED FINANCIAL STATEMENTS** (in part)

##### **1. Description of Business, Basis of Presentation and Summary of Significant Accounting Policies** (in part)

###### **Accounting Guidance Adopted in 2010** (in part)

###### **Amendments to Accounting for Transfers of Financial Assets and VIEs**

On January 1, 2010, the Company adopted guidance on a retrospective basis that (i) eliminated the concept of a qualifying special-purpose entity ("SPE"), (ii) eliminated the exception from applying existing accounting guidance related

to variable interest entities ("VIEs") that were previously considered qualifying SPEs, (iii) changed the approach for determining the primary beneficiary of a VIE from a quantitative risk and reward model to a qualitative model based on control and (iv) requires the Company to assess each reporting period whether any of the Company's variable interests give it a controlling financial interest in the applicable VIE.

The Company's investments in entities determined to be VIEs principally consist of certain investments at its Networks segment, primarily HBO Asia, HBO South Asia and certain entities that comprise HBO Latin America Group ("HBO LAG"), which operate multi-channel pay and basic cable television services. As of December 31, 2010, the Company held an 80% economic interest in HBO Asia, a 75% economic interest in HBO South Asia and an approximate 80% economic interest in HBO LAG. The Company previously consolidated these entities; however, as a result of adopting this guidance, because voting control is shared with the other partners in each of the three entities, the Company determined that it is no longer the primary beneficiary of these entities and, effective January 1, 2010, accounts for these investments using the equity method. As of December 31, 2010 and December 31, 2009, the Company's aggregate investment in these three entities was \$597 million and \$362 million, respectively, and was recorded in investments, including available-for-sale securities, in the consolidated balance sheet.

These investments are intended to enable the Company to more broadly leverage its programming and digital strategy in the territories served and to capitalize on the growing multi-channel television market in such territories. The Company provides programming as well as certain services, including distribution, licensing, technological and administrative support, to HBO Asia, HBO South Asia and HBO LAG. These entities are financed through cash flows from their operations, and the Company is not obligated to provide them with any additional financial support. In addition, the assets of these entities are not available to settle the Company's obligations.

The adoption of this guidance with respect to these entities resulted in an increase (decrease) to revenues, operating income and net income attributable to Time Warner Inc. shareholders of \$(397) million, \$(75) million and \$9 million, respectively, for the year ended December 31, 2009 and an increase (decrease) of \$(82) million, \$(16) million and \$4 million, respectively, for the year ended December 31, 2008. The impact on the consolidated balance sheet as of December 31, 2009 and consolidated statement of cash flows for the years ended December 31, 2009 and 2008 was not material.

The Company also held variable interests in two wholly owned SPEs through which the activities of its accounts receivable securitization facilities were conducted. The Company determined it was the primary beneficiary of these entities because of its ability to direct the key activities of the SPEs that most significantly impact their economic performance. Accordingly, as a result of adopting this guidance, the Company consolidated these SPEs, which resulted in an increase to securitized receivables and non-recourse debt of \$805 million as of December 31, 2009. In addition, for the year ended December 31, 2008, cash provided by operations increased by \$231 million, with an offsetting decrease to cash used by financing activities. There was no change to cash provided by operations for the year ended December 31, 2009. The impact on the consolidated statement of operations for the years ended December 31, 2009 and 2008 was not material. During the first quarter of 2010, the Company repaid the \$805 million that was outstanding under these

facilities and terminated the two facilities on March 19, 2010 and March 24, 2010, respectively.

## Transfer of Financial Assets

#### AGCO CORPORATION (DEC)

##### *REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM*

The Board of Directors and Stockholders  
AGCO Corporation

We have audited the accompanying consolidated balance sheets of AGCO Corporation and subsidiaries as of December 31, 2010 and 2009, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2010. In connection with our audits of the consolidated financial statements, we also have audited the financial statement schedule as listed in Item 15(a)(2). These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of AGCO Corporation and subsidiaries as of December 31, 2010 and 2009, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2010, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

As discussed in Note 1 to the consolidated financial statements, the Company changed its methods of accounting for transfers of financial assets and consolidation of variable interest entities in 2010 due to the adoption of Accounting Standards Updates 2009-16, "Transfers and Servicing

(Topic 860): Accounting for Transfers of Financial Assets" and 2009-17, "Consolidations (Topic 810): Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities".

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), AGCO Corporation's internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 25, 2011 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

##### *NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)*

##### *1. Operations and Summary of Significant Accounting Policies (in part)*

##### *Accounts and Notes Receivable (in part)*

The Company transfers certain accounts receivable to various financial institutions primarily under its accounts receivable securitization facility in Europe and its accounts receivable sales agreements with its retail finance joint ventures (Note 4). The Company records such transfers as sales of accounts receivable when it is considered to have surrendered control of such receivables under the provisions of ASU 2009-16, "Transfers and Servicing (Topic 860): Accounting for Transfers of Financial Assets" ("ASU 2009-16"). Cash payments are made to the Company's U.S. and Canadian retail finance joint ventures for sales incentive discounts provided to dealers related to outstanding accounts receivables sold. The balance of such sales discount reserves that are classified in "Accrued expenses" as of December 31, 2010 and 2009 were approximately \$87.4 million and \$94.5 million, respectively.

##### *Recent Accounting Pronouncements (in part)*

In December 2009, the FASB issued ASU 2009-16. ASU 2009-16 eliminated the concept of a qualifying special-purpose entity ("QSPE"), changed the requirements for derecognizing financial assets, and added requirements for additional disclosures in order to enhance information reported to users of financial statements by providing greater transparency about transfers of financial assets, including securitization transactions, and an entity's continuing involvement in and exposure to the risks related to transferred financial assets. ASU 2009-16 was effective for fiscal years and interim periods beginning after November 15, 2009. On January 1, 2010, the Company adopted the provisions of ASU 2009-16, and, in accordance with the standard, the Company recognized approximately \$113.9 million of accounts receivable sold through its European securitization facilities within the Company's Condensed Consolidated Balance Sheets as of September 30, 2010, with a corresponding liability equivalent to the funded balance of the facility (Note 4).

## Convertible Instruments

### 7.30

#### SMITHFIELD FOODS, INC. (APR)

##### *REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON CONSOLIDATED FINANCIAL STATEMENTS*

The Board of Directors and Shareholders of  
Smithfield Foods, Inc.

We have audited the accompanying consolidated balance sheets of Smithfield Foods, Inc. and subsidiaries as of May 2, 2010 and May 3, 2009, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years in the period ended May 2, 2010. Our audits also included the financial statement schedule listed in the Index at Item 15. These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Smithfield Foods, Inc. and subsidiaries at May 2, 2010 and May 3, 2009, and the consolidated results of their operations and their cash flows for each of the three years in the period ended May 2, 2010, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

As discussed in Note 2 to the consolidated financial statements, in fiscal 2010 the Company changed its method for accounting for convertible debt instruments with the adoption of the guidance originally issued in the accounting provisions of Financial Accounting Standards Board (FASB) Staff Position ABP 14-1, *Accounting for Convertible Debt Instruments That May be Settled in Cash upon Conversion* (codified in FASB ASC Topic 470, *Debt*) effective January 1, 2009.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Smithfield Foods, Inc. and subsidiaries' internal control over financial reporting as of May 2, 2010, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated June 18, 2010 expressed an unqualified opinion thereon.

## *NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)*

### *Note 2. Accounting Changes and New Accounting Guidance (in part)*

In May 2008, the FASB issued new accounting guidance for convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement). Under the new guidance, issuers of such instruments should separately account for the liability and equity components in a manner that will reflect the entity's nonconvertible debt borrowing rate when interest cost is recognized in subsequent periods. The amount allocated to the equity component represents a discount to the debt, which is amortized into interest expense using the effective interest method over the life of the debt. We adopted the new accounting guidance in the first quarter of fiscal 2010 and applied it retrospectively to all periods presented. Refer to Note 10—Debt for further discussion of the impact of this new accounting guidance on our consolidated financial statements.

### *Note 10. Debt (in part)*

#### *Convertible Notes*

In July 2008 (fiscal 2009), we issued \$400.0 million aggregate principal amount of 4% convertible senior notes due June 30, 2013 (the Convertible Notes) in a registered offering. The Convertible Notes are senior unsecured obligations. The Convertible Notes are payable with cash and, at certain times, are convertible into shares of our common stock based on an initial conversion rate, subject to adjustment, of 44.082 shares per \$1,000 principal amount of Convertible Notes (which represents an initial conversion price of approximately \$22.68 per share). Upon conversion, a holder will receive cash up to the principal amount of the Convertible Notes and shares of our common stock for the remainder, if any, of the conversion obligation.

Prior to April 1, 2013, holders may convert their notes into cash and shares of our common stock, if any, at the applicable conversion rate under the following circumstances:

- During any fiscal quarter if the last reported sale price of our common stock is greater than or equal to 120% of the applicable conversion price for at least 20 trading days during the period of 30 consecutive trading days ending on the last trading day of the preceding fiscal quarter;
- During the five business-day period after any ten consecutive trading-day period in which the trading price per \$1,000 principal amount of notes was less than 98% of the last reported sale price of our common stock multiplied by the applicable conversion rate; or
- Upon the occurrence of specified corporate transactions.

On or after April 1, 2013, holders may convert their Convertible Notes at any time prior to the close of business on the third scheduled trading day immediately preceding the maturity date, regardless of the foregoing circumstances.

The Convertible Notes were originally accounted for as a combined debt instrument as the conversion feature did not meet the requirements to be accounted for separately as a derivative financial instrument. In May 2008, the FASB issued new accounting guidance specifying that issuers of convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement) should separately

account for the liability and equity components in a manner that will reflect the entity's nonconvertible debt borrowing rate when interest cost is recognized in subsequent periods. The amount allocated to the equity component represents a discount to the debt recorded. This discount represents the amount of additional interest expense to be recognized using the effective interest method over the life of the debt, to accrete the debt to the principal amount due at maturity. We adopted the new accounting guidance beginning in the first quarter of fiscal 2010 (beginning May 4, 2009).

In connection with the issuance of the Convertible Notes, we entered into separate convertible note hedge transactions with respect to our common stock to reduce potential economic dilution upon conversion of the Convertible Notes, and separate warrant transactions (collectively referred to as the Call Spread Transactions). We purchased call options that permit us to acquire up to approximately 17.6 million shares of our common stock, subject to adjustment, which is the number of shares initially issuable upon conversion of the Convertible Notes. In addition, we sold warrants permitting the purchasers to acquire up to approximately 17.6 million shares of our common stock, subject to adjustment. See Note 15—Equity for more information on the Call Spread Transactions.

We incurred fees and expenses associated with the issuance of the Convertible Notes totaling \$11.4 million, substantially all of which were capitalized and are being amortized to interest expense over the life of the Convertible Notes.

On the date of issuance of the Convertible Notes, our nonconvertible debt borrowing rate was determined to be 10.2%. Based on that rate of interest, the liability component and equity component of the Convertible Notes were determined to be \$304.2 million and \$95.8 million, respectively.

The following table presents the effects of the retrospective application of the new accounting guidance on our consolidated condensed balance sheet as of May 3, 2009:

| (In millions)                                                                             | As<br>Originally<br>Presented<br>May 3, 2009 | Adjustments | As<br>Adjusted<br>May 3, 2009 |

| Total liabilities and equity                                                              | 7,202.5                                      | (2.3)       | 7,200.2                       |

The following table presents the effects of the retrospective application of the new accounting guidance on our consolidated income statement for fiscal 2009:

| (In millions, except per share data)                | As<br>Originally<br>Presented<br>Fiscal<br>2009 | Adjustments | As<br>Adjusted<br>Fiscal<br>2009 |
|-----------------------------------------------------|-------------------------------------------------|-------------|----------------------------------|
| Interest expense                                    | \$209.1                                         | \$12.7      | \$221.8                          |
| Loss from continuing operations before income taxes | (369.5)                                         | (12.7)      | (382.2)                          |
| Income tax benefit                                  | (126.7)                                         | (4.6)       | (131.3)                          |
| Loss from continuing operations                     | (242.8)                                         | (8.1)       | (250.9)                          |
| Net loss                                            | (190.3)                                         | (8.1)       | (198.4)                          |
| Loss per basic and diluted share:                   |                                                 |             |                                  |
| Continuing operations                               | \$ (1.72)                                       | \$ (.06)    | \$ (1.78)                        |
| Net loss                                            | (1.35)                                          | (.06)       | (1.41)                           |

The adoption of the new accounting guidance impacted our results for fiscal 2010 as follows:

| (In millions, except per share data)                | Fiscal<br>2010 |
|-----------------------------------------------------|----------------|
| Interest expense                                    | \$16.7         |
| Loss from continuing operations before income taxes | (16.7)         |
| Income tax benefit                                  | (6.1)          |
| Loss from continuing operations                     | (10.6)         |
| Net loss                                            | (10.6)         |
| Loss per basic and diluted share:                   |                |
| Continuing operations                               | \$ (.07)       |
| Net loss                                            | (.07)          |

*Note 15. Equity (in part)**New Accounting Guidance for Convertible Notes*

As more fully described in Note 10—Debt, the FASB issued new accounting guidance in the first quarter of fiscal 2010, which required us to separately account for the conversion feature of the Convertible Notes as a component of equity, thereby increasing additional paid-in capital by \$59.1 million.

**Earnings per Share****7.31****CABOT CORPORATION (SEP)***REPORT OF INDEPENDENT REGISTERED  
PUBLIC ACCOUNTING FIRM*

To the Board of Directors and Stockholders of  
Cabot Corporation  
Boston, Massachusetts

We have audited the accompanying consolidated balance sheets of Cabot Corporation and subsidiaries (the “Company”) as of September 30, 2010 and 2009, and the related consolidated statements of operations, changes in stockholders’ equity, and cash flows for each of the three years in the period ended September 30, 2010. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Cabot Corporation and subsidiaries as of September 30, 2010 and 2009, and the results of their operations and their cash flows for each of the three years in the period ended September 30, 2010, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note B, in 2010 the Company changed (i) its method of accounting for earnings per share; and (ii) its presentation of non-controlling interests. These changes have been applied to all periods presented.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company’s internal control over financial reporting as of September 30, 2010, based on the criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated November 29, 2010 expressed an unqualified opinion on the Company’s internal control over financial reporting.

*NOTES TO CONSOLIDATED FINANCIAL  
STATEMENTS (in part)**Note B. Accounting Pronouncements (in part)**New and Adopted (in part)*

Cabot adopted new accounting guidance relative to earnings per share on October 1, 2009. This methodology, and the impact on prior periods, is described in Note Q.

*Note Q. Earnings Per Share*

On October 1, 2009 Cabot began applying the two-class method for calculating earnings per share. Under this method, unvested restricted stock and stock unit awards that receive non-forfeitable rights to dividends or dividend equivalents are treated as a separate class of participating securities. The two-class method calculates earnings per share for common shareholders and participating securities based on the proportionate participation rights of each award type in the Company’s undistributed earnings. Diluted earnings per share is calculated using the more dilutive of the treasury stock method or the two-class method. This guidance has been applied to all periods presented herein. The retrospective application of this authoritative guidance increased the Company’s basic and diluted net loss per share from \$(1.23) to \$(1.25) for fiscal 2009 and decreased the Company’s basic and diluted net income per share from \$1.37 and \$1.34, respectively, to \$1.32 for both basic and diluted net income per share for fiscal 2008.

The following tables summarize the components of the basic and diluted earnings per common share computations:

| (In millions, except per share amounts)                                           | Years Ended September 30 |           |        |
|-----------------------------------------------------------------------------------|--------------------------|-----------|--------|
|                                                                                   | 2010                     | 2009      | 2008   |
| <b>Basic EPS:</b>                                                                 |                          |           |        |
| Net income (loss) attributable to Cabot Corporation                               | \$ 154                   | \$ (77)   | \$ 86  |
| Less: Dividends and dividend equivalents to participating securities              | 1                        | 2         | 2      |
| Less: Undistributed earnings allocated to participating securities <sup>(1)</sup> | 2                        | —         | 1      |
| Earnings (loss) allocated to common shareholders (numerator)                      | \$ 151                   | \$ (79)   | \$ 83  |
| Weighted average common shares and participating securities outstanding           | 65                       | 65        | 65     |
| Less: Participating securities <sup>(2)</sup>                                     | 1                        | 2         | 2      |
| Adjusted weighted average common shares (denominator)                             | 64                       | 63        | 63     |
| Income (loss) from continuing operations attributable to Cabot Corporation        | \$2.37                   | \$ (1.24) | \$1.32 |
| Loss from discontinued operations                                                 | —                        | (0.01)    | —      |
| Net income (loss) attributable to Cabot Corporation                               | \$2.37                   | \$ (1.25) | \$1.32 |
| <b>Diluted EPS:</b>                                                               |                          |           |        |

| Loss from discontinued operations                                                 | —                        | (0.01)    | —      |
| Net income (loss) attributable to Cabot Corporation                               | \$2.35                   | \$ (1.25) | \$1.32 |

<sup>(1)</sup> Undistributed earnings are the earnings which remain after dividends declared during the period are assumed to be distributed to the common and participating shareholders. Undistributed earnings are allocated to common and participating shareholders on the same basis as dividend distributions. In fiscal 2009, undistributed earnings were not allocated to participating securities due to the Company's net loss position. The calculation of undistributed earnings is as follows:

| (Dollars in millions)                                          | Years Ended September 30 |          |      |
|----------------------------------------------------------------|--------------------------|----------|------|
|                                                                | 2010                     | 2009     | 2008 |
| Calculation of undistributed earnings:                         |                          |          |      |
| Net income (loss) attributable to Cabot Corporation            | \$154                    | \$ (77)  | \$86 |
| Less: Dividends declared on common stock                       | 46                       | 46       | 45   |
| Less: Dividends declared on participating securities           | 1                        | 2        | 2    |
| Undistributed earnings                                         | \$107                    | \$ (125) | \$39 |
| Allocation of undistributed earnings:                          |                          |          |      |
| Undistributed earnings allocated to common shareholders        | \$105                    | \$ (125) | \$38 |
| Undistributed earnings allocated to participating shareholders | 2                        | —        | 1    |
| Undistributed earnings                                         | \$107                    | \$ (125) | \$39 |

<sup>(2)</sup> Participating securities for fiscal 2010, 2009 and 2008 amounted to approximately 1 million, 2 million and 2 million shares (or other equity awards), respectively, issued under Cabot's equity incentive plans. For fiscal 2010, 2009 and 2008, participating securities consisted of shares of unvested restricted stock and vested restricted stock awards held by employees in which Cabot has a security interest. For fiscal 2010, participating securities also included unvested time-based restricted stock units.

<sup>(3)</sup> Undistributed earnings are adjusted for the assumed distribution of dividends to the dilutive securities and then reallocated to participating securities.

<sup>(4)</sup> Represents incremental shares of common stock from the (i) assumed exercise of stock options issued under Cabot's equity incentive plan; (ii) assumed issuance of shares to employees pursuant to the Company's Supplemental Retirement Savings Plan; and (iii) assumed issuance of shares under outstanding performance-based stock unit awards issued under Cabot's equity incentive plans. For fiscal 2010, 193,000 incremental shares of common stock were not included in the calculation of diluted earnings per share because those shares' exercise prices were greater than the average market price of Cabot common stock for that period. For fiscal 2009, 3,833,000 incremental shares of common stock were excluded from the calculation of diluted earnings per share as those shares would have been antidilutive due to the Company's net loss position. For fiscal 2008, 408,000 incremental shares of common stock were excluded from the calculation of diluted earnings per share because those shares' exercise prices were greater than the average market price of Cabot common stock for that period.

## Multiple Element Revenue Transactions

### 7.32

#### ADOBE SYSTEMS INCORPORATED (NOV)

##### *REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM*

The Board of Directors and Stockholders  
Adobe Systems Incorporated

We have audited the accompanying consolidated balance sheets of Adobe Systems Incorporated and subsidiaries as of December 3, 2010 and November 27, 2009, and the related consolidated statements of income, stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 3, 2010. We also have audited Adobe Systems Incorporated's internal control over financial reporting as of December 3, 2010, based on criteria established in Internal Control—Integrated Framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Adobe System Incorporated's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted account-

ing principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Adobe Systems Incorporated and subsidiaries as of December 3, 2010 and November 27, 2009, and the results of their operations and their cash flows for each of the years in the three-year period ended December 3, 2010, in conformity with U.S. generally accepted accounting principles. Also in our opinion, Adobe Systems Incorporated maintained, in all material respects, effective internal control over financial reporting as of December 3, 2010, based on criteria established in Internal Control—Integrated Framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

As discussed in notes 1 and 10 to the consolidated financial statements, the Company changed its method of accounting for multiple element revenue transactions in fiscal 2010 and its method for accounting for uncertainty in income taxes in fiscal 2008, resulting from the adoption of new accounting pronouncements.

##### *NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)*

##### *Note 1. Basis of Presentation and Significant Accounting Policies (in part)*

##### *Significant Accounting Policies (in part)*

##### *Multiple Element Arrangements*

We enter into multiple element revenue arrangements in which a customer may purchase a combination of software, upgrades, maintenance and support, hosting services, and consulting.

For our software and software related multiple element arrangements, we must: (1) determine whether and when each element has been delivered; (2) determine whether undelivered products or services are essential to the functionality of the delivered products and services; (3) determine the fair value of each element using vendor-specific objective evidence ("VSOE"), and (4) allocate the total price among the various elements. VSOE of fair value is used to allocate a portion of the price to the undelivered elements and the residual method is used to allocate the remaining portion to the delivered elements.

Absent VSOE, revenue is deferred until the earlier of the point at which VSOE of fair value exists for any undelivered element or until all elements of the arrangement have been delivered. However, if the only undelivered element is maintenance and support, the entire arrangement fee is recognized ratably over the performance period. Changes in assumptions or judgments or changes to the elements in a software

arrangement could cause a material increase or decrease in the amount of revenue that we report in a particular period.

In October 2009, the Financial Accounting Standards Board ("FASB") amended the accounting standards for certain multiple deliverable revenue arrangements to:

- provide updated guidance on whether multiple deliverables exist, how the deliverables in an arrangement should be separated, and how the consideration should be allocated;
- require an entity to allocate revenue in an arrangement using the best estimated selling price ("BESP") of deliverables if a vendor does not have VSOE of selling price or third-party evidence ("TPE") of selling price; and
- eliminate the use of the residual method and require an entity to allocate revenue using the relative selling price method.

We elected to early adopt this accounting guidance at the beginning of our fiscal quarter of 2010 on a prospective basis for applicable transactions originating or materially modified after November 27, 2009. Our revenue from sales containing non-software related hosting services, custom hosting development and consulting services, and related technical support and training are those impacted.

For multiple element arrangements containing our non-software services, we must: (1) determine whether and when each element has been delivered; (2) determine fair value of each element using the selling price hierarchy of VSOE of fair value, TPE or BESP, as applicable and (3) allocate the total price among the various elements based on the relative selling price method.

This guidance does not generally change the units of accounting for our revenue transactions. For multiple-element arrangements that contain software and non-software elements such as our hosted offerings, we allocate revenue to software or software related elements as a group and any non-software element separately based on the selling price hierarchy. We determine the selling price for each deliverable using VSOE of fair value of selling price, if it exists, or TPE of selling price. If neither VSOE nor TPE of selling price exist for a deliverable, we use its BESP for that deliverable. Revenue allocated to each element is then recognized when the basic revenue recognition criteria are met for each element. Once revenue is allocated to software or software related elements as a group, it follows historic software accounting guidance.

Consistent with our methodology under previous accounting guidance, we determine VSOE for each element based on historical stand-alone sales to third-parties or from the stated renewal rate for the elements contained in the initial arrangement. In determining VSOE, we require that a substantial majority of the selling prices for a product or service fall within a reasonably narrow pricing range.

In certain instances, we are not able to establish VSOE for all deliverables in an arrangement with multiple elements. This may be due to infrequently selling each element separately, not pricing products or services within a narrow range, or only having a limited sales history. When VSOE cannot be established, we attempt to establish the selling price of each element based on TPE. TPE is determined based on competitor prices for similar deliverables when sold separately. Generally, our offerings contain significant differentiation such that the comparable pricing of products with similar functionality cannot be obtained. Furthermore, we are unable to reliably determine what similar competitor products' selling prices are on a stand-alone basis. Therefore, we typically are not able to obtain TPE of selling price.

When we are unable to establish selling prices using VSOE or TPE, we use BESP in our allocation of arrangement consideration. The objective of BESP is to determine the price at which we would transact a sale if the product or service were sold on a stand-alone basis. BESP is generally used for offerings that are not typically sold on a stand-alone basis or for new or highly customized offerings.

We determine BESP for a product or service by considering multiple factors including, but not limited to, major product groupings, geographies, market conditions, competitive landscape, internal costs, gross margin objectives and pricing practices. Significant pricing practices taken into consideration include historic contractually stated prices, volume discounts where applicable and our price lists. The most common fact pattern that emerged through analyzing these factors supports a BESP closely tied to Adobe's list prices. The determination of BESP is made through consultation with and formal approval by our management, taking into consideration our go-to-market strategy.

We regularly review VSOE and have established a review process for TPE and BESP and maintain internal controls over the establishment and updates of these estimates. There was no material impact to revenue during the year ended December 3, 2010 resulting from changes in VSOE, TPE or BESP, nor do we expect a material impact from such changes in the near term.

We have established VSOE for our software maintenance and support services, custom software development services, consulting services and training. We have established BESP for all other offerings, including software products, non-software related hosting services, custom hosting development and consulting services, and technical support and training for hosting services.

Given the nature of our transactions, which are primarily software and software-related, our go-to-market strategies and our pricing practices, total net revenue as reported during the year ended December 3, 2010 is materially consistent with total net revenue that would have been reported if the transactions entered into or materially modified after November 27, 2009 were subject to previous accounting guidance. Additionally, the new accounting standards for revenue recognition, if applied in the same manner to the year ended November 27, 2009, would not have had a material impact on total net revenues for that fiscal year.

## Noncontrolling Interest

### 7.33

#### HORMEL FOODS CORPORATION (OCT)

##### *REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM*

To the Board of Directors and Shareholders  
Hormel Foods Corporation  
Austin, Minnesota

We have audited the accompanying consolidated statements of financial position of Hormel Foods Corporation as of October 31, 2010, and October 25, 2009, and the related consolidated statements of operations, changes in shareholders'

investment, and cash flows for each of the three years in the period ended October 31, 2010. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Hormel Foods Corporation at October 31, 2010, and October 25, 2009, and the consolidated results of its operations and its cash flows for each of the three years in the period ended October 31, 2010, in conformity with U.S. generally accepted accounting principles.

As discussed in Note H of the Notes to Consolidated Financial Statements, effective October 27, 2008, the Company adopted the measurement provisions of Statement of Financial Accounting Standard No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106 and 132(R)" (codified primarily in FASB ASC 715). As discussed in Note A of the Notes to Consolidated Financial Statements, effective October 26, 2009, the Company adopted new rules regarding the accounting for noncontrolling interests (codified primarily in FASB ASC 810).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Hormel Foods Corporation's internal control over financial reporting as of October 31, 2010, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated December 21, 2010, expressed an unqualified opinion thereon.

#### **NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (in part)**

##### **Note A—Summary of Significant Accounting Policies (in part)**

##### **Accounting Changes and Recent Accounting Pronouncements (in part)**

In December 2007, the FASB also updated the guidance within ASC 810, *Consolidation* (ASC 810). The update establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. It also amends the requirements for certain consolidation procedures for consistency with the requirements of ASC 805. The updated guidance is effective for fiscal years beginning on or after December 15, 2008, and interim periods within those fiscal years. The Company adopted the provisions of ASC 810 at the beginning of fiscal 2010. Adoption did not have a material impact on the consolidated financial statements, but resulted in the following changes in presentation and disclosure: 1) noncontrolling interests were reclass-

sified from other long-term liabilities or accumulated other comprehensive loss (foreign currency translation) to a separate component of shareholders' investment in the Consolidated Statements of Financial Position; 2) consolidated net earnings on the Consolidated Statements of Operations now include the net earnings attributable to both the Company and its noncontrolling interests; 3) the Consolidated Statement of Changes in Shareholders' Investment now identifies the components of shareholders' investment and comprehensive income attributable to the Company's noncontrolling interests; and 4) the Consolidated Statements of Cash Flows now begin with consolidated net earnings attributable to both the Company and its noncontrolling interests, with the net earnings of the noncontrolling interests no longer included within changes in operating assets and liabilities and any distributions to the noncontrolling interests included in financing activities. As required, the prior year consolidated financial statements have also been reclassified to comply with the current year's presentation and disclosure requirements.

## **EMPHASIS OF A MATTER**

### **PRESENTATION**

#### **Author's Note**

Unless otherwise indicated, the auditing standards referred to in the following paragraphs apply to both issuers and non-issuers. Refer to paragraphs 7.01 and 7.02 for further information on AICPA auditing standards and PCAOB auditing standards.

#### **7.34** Paragraph .19 of AU section 508 states the following:

In any report on financial statements, the auditor may emphasize a matter regarding the financial statements. Such explanatory information should be presented in a separate paragraph of the auditors' report. Phrases such as "with the foregoing [following] explanation" should not be used in the opinion paragraph if an emphasis paragraph is included in the auditors' report. Emphasis paragraphs are never required; they may be added solely at the auditors' discretion. Examples of matters the auditor may wish to emphasize are—

- That the entity is a component of a larger business enterprise.
- That the entity has had significant transactions with related parties.
- Unusually important subsequent events.
- Accounting matters, other than those involving a change or changes in accounting principles, affecting the comparability of the financial statements with those of the preceding period.

The auditors' reports for 31 survey entities included explanatory information emphasizing a matter regarding the financial statements.

## PRESENTATION AND DISCLOSURE EXCERPTS

### Emphasis of a Matter

7.35

MOLEX INCORPORATED (JUN)

#### *REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM*

The Board of Directors and Stockholders of  
Molex Incorporated

We have audited the accompanying consolidated balance sheets of Molex Incorporated as of June 30, 2010 and 2009, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended June 30, 2010. Our audits also included the financial statement schedule listed in the Index of Part IV, Item 15. These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Molex Incorporated at June 30, 2010 and 2009, and the consolidated results of its operations and its cash flows for each of the three years in the period ended June 30, 2010, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

As discussed in Note 3 to the consolidated financial statements, the Company has restated its financial statements as of June 30, 2009 and for each of the two years in the period then ended relating to a fraud matter in Japan and accounting for income taxes.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Molex Incorporated's internal control over financial reporting as of June 30, 2010, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated August 3, 2010 expressed an unqualified opinion thereon.

## DEPARTURES FROM UNQUALIFIED OPINIONS

### PRESENTATION

#### *Author's Note*

Unless otherwise indicated, the auditing standards referred to in the following paragraphs apply to both issuers and non-issuers. Refer to paragraphs 7.01 and 7.02 for further information on AICPA auditing standards and PCAOB auditing standards.

**7.36** AU section 508 does not require auditors to express qualified opinions about the effects of uncertainties or lack of consistency. Under AU section 508, departures from unqualified opinions include opinions qualified because of a scope limitation or departure from GAAP, including inadequate disclosures; adverse opinions; and disclaimers of opinion. Paragraphs .20–.63 of AU section 508 discuss these departures. None of the auditors' reports issued in connection with the financial statements of the survey entities contained a *departure*, as defined by AU section 508.

## REPORTS ON COMPARATIVE FINANCIAL STATEMENTS

### PRESENTATION

#### *Author's Note*

Unless otherwise indicated, the auditing standards referred to in the following paragraphs apply to both issuers and non-issuers. Refer to paragraphs 7.01 and 7.02 for further information on AICPA auditing standards and PCAOB auditing standards.

**7.37** Paragraphs .65–.74 of AU section 508 discuss reports on comparative financial statements. None of the auditors' reports for the survey entities expressed an opinion on prior-year financial statements that differed from the opinion originally expressed and none of the auditor reports indicated that a change in auditors had occurred in the current year.

## OPINION EXPRESSED ON SUPPLEMENTARY FINANCIAL INFORMATION

### PRESENTATION

**7.38** Annual reports to security holders may be combined with the required information of SEC Form 10-K and are suitable for filing with the SEC if certain conditions are satisfied. Accordingly, many survey entities prepare an integrated annual report or simply provide to stockholders a copy of Form 10-K

in lieu of the annual report. Form 10-K requires inclusion of certain supplementary financial information, including schedules (Article 12 of Regulation S-X), that must be audited. The report on the audit of schedules may be a separate report or combined with the report on the audit of the basic financial statements.

## PRESENTATION AND DISCLOSURE EXCERPTS

### Supplementary Financial Information

#### 7.39

ALLERGAN, INC. (DEC)

#### *REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM*

The Board of Directors and Stockholders of  
Allergan, Inc.

We have audited the accompanying consolidated balance sheets of Allergan, Inc. as of December 31, 2010 and 2009, and the related consolidated statements of earnings, equity, and cash flows for each of the three years in the period ended December 31, 2010. Our audits also included the financial statement schedule listed in the Index at Item 15(a)2. These financial statements and the financial statement schedule are

the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Allergan, Inc. at December 31, 2010 and 2009, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2010, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Allergan, Inc.'s internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 28, 2011 expressed an unqualified opinion thereon.

## DATING OF REPORT

### PRESENTATION

#### *Author's Note*

Unless otherwise indicated, the auditing standards referred to in the following paragraphs apply to both issuers and non-issuers. Refer to paragraphs 7.01 and 7.02 for further information on AICPA auditing standards and PCAOB auditing standards.

**7.40** For non-issuers, AU section 530, *Dating of the Independent Auditor's Report* (AICPA, *Professional Standards*), discusses dating of the independent auditor's report. Paragraphs .01 and .05 of AU section 530 state the following:

**.01** The auditor's report should not be dated earlier than the date on which the auditor has obtained sufficient appropriate audit evidence to support the opinion. Paragraph .05 describes the procedure to be followed when a subsequent event occurring after the date of the auditor's report is disclosed in the financial statements.

**.05** The independent auditor has two methods available for dating the report when a subsequent event disclosed in the financial statements occurs after the original date of the auditor's report but before the issuance of the related financial statements. The auditor may use "dual dating," for example, "February 16, 20\_\_\_\_, except for Note\_\_\_\_, as to which the date is March 1, 20\_\_\_\_," or may date the report as of the later date. In the former instance, the responsibility for events occurring subsequent to the original report date is limited to the specific event referred to in the note (or otherwise disclosed). In the latter instance, the independent auditor's responsibility for subsequent events extends to the date of the report and, accordingly, the procedures outlined in section 560.12 generally should be extended to that date.

Footnote 1 of paragraph .01 of AU section 530 explains that among other things, sufficient appropriate audit evidence includes evidence that the audit documentation has been reviewed and that the entity's financial statements, including disclosures, have been prepared and that management has asserted that they have taken responsibility for them.

For issuers, amendments were made to the preceding paragraphs in order to conform terminology to the PCAOB's risk assessment standards (Auditing Standard No. 8, *Audit Risk* [AICPA, *PCAOB Standards and Related Rules*, Auditing Standards] through Auditing Standard No. 15, *Audit Evidence* [AICPA, *PCAOB Standards and Related Rules*, Auditing Standards]) and update references to auditing standards that are being superseded or amended. The risk assessment standards are effective for audits of fiscal years beginning on or after December 15, 2010. Paragraphs .01 and .05 of AU section 530 for issuers state the following:

**.01** The auditor should date the audit report no earlier than the date on which the auditor has obtained sufficient appropriate evidence to support the auditor's opinion. Paragraph .05 describes the procedure to be followed when a subsequent event occurring after the report date is disclosed in the financial statements.

Note: When performing an integrated audit of financial statements and internal control over financial report-

ing, the auditor's reports on the company's financial statements and on internal control over financial reporting should be dated the same date.

Note: If the auditor concludes that a scope limitation will prevent the auditor from obtaining the reasonable assurance necessary to express an opinion on the financial statements, then the auditor's report date is the date that the auditor has obtained sufficient appropriate evidence to support the representations in the auditor's report.

**.05** The independent auditor has two methods for dating the report when a subsequent event disclosed in the financial statements occurs after the auditor has obtained sufficient appropriate evidence on which to base his or her opinion, but before the issuance of the related financial statements. The auditor may use "dual dating," for example, "February 16, 20\_\_\_\_, except for Note\_\_\_\_, as to which the date is March 1, 20\_\_\_\_," or may date the report as of the later date. In the former instance, the responsibility for events occurring subsequent to the original report date is limited to the specific event referred to in the note (or otherwise disclosed). In the latter instance, the independent auditor's responsibility for subsequent events extends to the later report date and, accordingly, the procedures outlined in section 560.12 generally should be extended to that date.

**7.41** None of the survey entities' auditors' reports used dual dating.

## AUDITORS' REPORTS ON INTERNAL CONTROL OVER FINANCIAL REPORTING

### PRESENTATION

**7.42** Section 404(a) of the Sarbanes-Oxley Act of 2002 requires that management of a public entity assess the effectiveness of the entity's internal control over financial reporting as of the end of the entity's most recent fiscal year and include in the entity's annual report management's conclusions about the effectiveness of the entity's internal control structure and procedures. Management is required to state a direct conclusion about whether the entity's internal control over financial reporting is effective. Management's report on internal control over financial reporting is required to include the following:

- A statement of management's responsibility for establishing and maintaining adequate internal control over financial reporting for the entity
- A statement identifying the framework used by management to conduct the required assessment of the effectiveness of the entity's internal control over financial reporting
- An assessment of the effectiveness of the entity's internal control over financial reporting as of the end of the entity's most recent fiscal year, including an explicit statement about whether that internal control over financial reporting is effective
- A statement that the registered public accounting firm that audited the financial statements included in the annual report has issued an attestation report on management's assessment of the entity's internal control over financial reporting

**7.43** Under Section 404(b) of the Sarbanes-Oxley Act of 2002, the auditor who audits the public entity's financial statements included in the annual report is required to audit the entity's internal control over financial reporting. In addition, the auditor is required to audit and report on management's assessment of the effectiveness of internal control over financial reporting. Under PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with an Audit of Financial Statements* (AICPA, *PCAOB Standards and Related Rules*, Auditing Standards), the auditor's objective in an audit of internal control over financial reporting is to express an opinion on the effectiveness of the entity's internal control over financial reporting. The audit of internal control over financial reporting should be integrated with the audit of the financial statements. Accordingly, independent auditors engaged to audit the financial statements of such entities also are required to audit and report on the entity's internal control over financial reporting as of the end of such fiscal year. Further, if the auditor determines that elements of management's annual report on internal control over financial reporting are incomplete or improperly presented, the auditor should modify the report to include an explanatory paragraph describing the reasons for this determination and identify and fairly describe any material weakness. Paragraph 86 of Auditing Standard No. 5 allows the auditor to issue a combined report (that is, one report containing both an opinion on the financial statements and an opinion on internal control over financial reporting) or separate reports on the entity's financial statements and internal control over financial reporting.

**7.44** In September 2010, the SEC approved a final rule related to the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act). The Dodd-Frank Act provides that Section 404(b) of the Sarbanes-Oxley Act of 2002 shall not apply with respect to any audit report prepared for an issuer that is neither an accelerated filer nor a large accelerated filer. Prior to the Dodd-Frank Act, a nonaccelerated filer would have been required, under existing SEC rules, to include an attestation report of its registered public accounting firm on internal control over financial reporting in the filer's annual report filed with the SEC for fiscal years ending on or after June 15, 2010. During 2010, all 500 of the entities surveyed presented a management's report on internal control over financial reporting. 498 presented an auditor's report on internal control over financial reporting. 226 of those entities had the auditor's report on internal control over financial reporting combined with the auditor's report on financial statements. The auditor's report on internal control over financial reporting for 2 of the entities surveyed indicated internal control was not effective.

## PRESENTATION AND DISCLOSURE EXCERPTS

### Separate Report on Internal Control

#### 7.45

#### IRON MOUNTAIN INCORPORATED (DEC)

##### *MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING*

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) of the Exchange Act. Under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework in *Internal Control—Integrated Framework*, our management concluded that our internal control over financial reporting was effective as of December 31, 2010.

The effectiveness of our internal control over financial reporting has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report which is included herein.

##### *REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM*

To the Board of Directors and Stockholders of Iron Mountain Incorporated

We have audited the internal control over financial reporting of Iron Mountain Incorporated and subsidiaries (the "Company") as of December 31, 2010, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or

persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on the criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2010 of the Company and our report dated February 28, 2011 expressed an unqualified opinion on those financial statements.

#### **REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Board of Directors and Stockholders of  
Iron Mountain Incorporated

We have audited the accompanying consolidated balance sheets of Iron Mountain Incorporated and subsidiaries (the "Company") as of December 31, 2010 and 2009, and the related consolidated statements of operations, equity, comprehensive income (loss), and cash flows for each of the three years in the period ended December 31, 2010. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An

audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Iron Mountain Incorporated and subsidiaries as of December 31, 2010 and 2009, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2010, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2010, based on the criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 28, 2011 expressed an unqualified opinion on the Company's internal control over financial reporting.

## **Combined Report on Financial Statements and Internal Control**

### **7.46**

TIFFANY & CO. (JAN)

#### **REPORT OF MANAGEMENT**

*Management's Responsibility for Financial Information.* The Company's consolidated financial statements were prepared by management, who are responsible for their integrity and objectivity. The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and, as such, include amounts based on management's best estimates and judgments.

Management is further responsible for maintaining a system of internal accounting control designed to provide reasonable assurance that the Company's assets are adequately safeguarded, and that the accounting records reflect transactions executed in accordance with management's authorization. The system of internal control is continually reviewed and is augmented by written policies and procedures, the careful selection and training of qualified personnel and a program of internal audit.

The consolidated financial statements have been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm. Their report is shown on page K-44. The Audit Committee of the Board of Directors, which is composed solely of independent directors, meets regularly with financial management and the independent registered public accounting firm to discuss specific accounting, financial reporting and internal control matters. Both the independent registered public accounting firm and the internal auditors have full and free access to the Audit Committee. Each year the Audit Committee selects the firm that is to perform audit services for the Company.

*Management's Report on Internal Control over Financial Reporting.* Management is responsible for establishing and

maintaining adequate internal control over financial reporting, as defined in Exchange Act Rule 13a–15(f). Management conducted an evaluation of the effectiveness of internal control over financial reporting based on the framework in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”). Based on this evaluation, management concluded that internal control over financial reporting was effective as of January 31, 2010 based on criteria in Internal Control—Integrated Framework issued by the COSO. The effectiveness of the Company’s internal control over financial reporting as of January 31, 2010 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which is shown on page K-44.

#### **REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Shareholders and Board of Directors of  
Tiffany & Co.

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of earnings, of stockholders’ equity and comprehensive earnings, and of cash flows present fairly, in all material respects, the financial position of Tiffany & Co. and its subsidiaries (the “Company”) at January 31, 2010 and 2009, and the results of their operations and their cash flows for each of the three years in the period ended January 31, 2010 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of January 31, 2010, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company’s management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management’s Report on Internal Control over Financial Reporting under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company’s internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial

reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## **GENERAL MANAGEMENT AND SPECIAL-PURPOSE COMMITTEE REPORTS**

### **PRESENTATION**

**7.47** There were 35 survey entities that presented a report of management on financial statements. These reports may include the following:

- Description of management’s responsibility for preparing the financial statements
- Identification of independent auditors
- Statement about management’s representations to the independent auditors
- Statement about financial records and related data made available to the independent auditors
- Description of special-purpose committees of the board of directors
- General description of the entity’s system of internal control
- Description of the entity’s code of conduct

Occasionally, survey entities presented a report of a special-purpose committee, such as the audit committee or compensation committee.

## PRESENTATION AND DISCLOSURE EXCERPTS

### Report of Management on Financial Statements

7.48

MACY'S, INC. (JAN)

#### *REPORT OF MANAGEMENT*

To the Shareholders of  
Macy's, Inc.

The integrity and consistency of the Consolidated Financial Statements of Macy's, Inc. and subsidiaries, which were prepared in accordance with accounting principles generally accepted in the United States of America, are the responsibility of management and properly include some amounts that are based upon estimates and judgments.

The Company maintains a system of internal accounting controls, which is supported by a program of internal audits with appropriate management follow-up action, to provide reasonable assurance, at appropriate cost, that the Company's assets are protected and transactions are properly recorded. Additionally, the integrity of the financial accounting system is based on careful selection and training of qualified personnel, organizational arrangements which provide for appropriate division of responsibilities and communication of established written policies and procedures.

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Exchange Act Rule 13a-15(f) and has issued Management's Report on Internal Control over Financial Reporting.

The Consolidated Financial Statements of the Company have been audited by KPMG LLP. Their report expresses their opinion as to the fair presentation, in all material respects, of the financial statements and is based upon their independent audits.

The Audit Committee, composed solely of outside directors, meets periodically with KPMG LLP, the internal auditors and representatives of management to discuss auditing and financial reporting matters. In addition, KPMG LLP and the Company's internal auditors meet periodically with the Audit Committee without management representatives present and have free access to the Audit Committee at any time. The Audit Committee is responsible for recommending to the

Board of Directors the engagement of the independent registered public accounting firm, which is subject to shareholder approval, and the general oversight review of management's discharge of its responsibilities with respect to the matters referred to above.

### Report of the Audit Committee

7.49

HARLEY-DAVIDSON, INC. (DEC)

#### *REPORT OF THE AUDIT COMMITTEE*

The Audit Committee of the Board of Directors reviews the Company's financial reporting process and the audit process. All of the Audit Committee members are independent in accordance with the Audit Committee requirements of the New York Stock Exchange, Inc.

The Audit Committee of the Board of Directors has reviewed and discussed with management its assessment of the effectiveness of the Company's internal control system over financial reporting as of December 31, 2010. Management has concluded that the internal control system was effective. Additionally, the Company's internal control over financial reporting as of December 31, 2010 was audited by Ernst & Young LLP, the Company's independent registered public accounting firm for the 2010 fiscal year. The audited financial statements of the Company for the 2010 fiscal year were also reviewed and discussed with management as well as with representatives of Ernst & Young LLP. The Audit Committee has also discussed with Ernst & Young LLP, the matters required to be discussed by AU Section 380 of the Public Company Accounting Oversight Board (PCAOB) Auditing Standards, other professional standards and regulatory requirements currently in effect. The Audit Committee has received the written disclosures and the letter from the independent registered public accounting firm required by Rule 3526 of the PCAOB, as currently in effect, and has discussed with representatives of Ernst & Young LLP the independence of Ernst & Young LLP. Based on the review and discussions referred to above, the Audit Committee has recommended to the Board of Directors that the audited financial statements for the 2010 fiscal year be included in the Company's Annual Report on Form 10-K for the 2010 fiscal year.

## Appendix of 500 Entities

### List of 500 Survey Entities and Where in the Text Excerpts From Their Annual Reports Can Be Found

The following table lists the 500 entities surveyed in this edition of *Accounting Trends & Techniques (Trends)* in alphabetical order, as well as where in the text their annual reports are excerpted.

| <i>Company Name</i>                   | <i>Month of Fiscal Year End</i> | <i>Accounting Technique Illustration</i> |
|---------------------------------------|---------------------------------|------------------------------------------|
| 3M Company                            | December                        |                                          |
| A. O. Smith Corporation               | December                        |                                          |
| A. Schulman, Inc.                     | August                          | 5.12                                     |
| Abbott Laboratories                   | December                        |                                          |
| ABM Industries Incorporated           | October                         |                                          |
| Acuity Brands, Inc.                   | August                          |                                          |
| ADC Telecommunications, Inc.          | September                       |                                          |

## Introducing **eXacct: Financial Reporting Tools & Techniques**.

We appreciate your business and would like to take this opportunity to tell you about **eXacct**, an online tool from the AICPA that builds on our flagship publication *Accounting Trends & Techniques*. For more than 60 years, *Accounting Trends & Techniques* has provided guidance on satisfying U.S. GAAP presentation and disclosure requirements, as well as statistical reporting trends and actual reporting examples from the AICPA's survey of annual reports from 500 of the country's top public companies. **eXacct** adds to this content for a fuller picture of current financial reporting practices and makes it interactive — ready to be searched, filtered, downloaded and used exactly as you need it.

This tool not only provides all available annual report XBRL data files submitted to the SEC by our 500 survey companies, it allows you to search them for specific attributes and disclosures, providing full tag information and highlighting company extensions with the click of a button. **eXacct** allows you to search and view all 500 annual reports in our survey for many of the common disclosures you need. It can sort content by industry, giving you crucial insight into presentation and disclosure methods across a wide variety of industries. With companies from virtually every non-regulated sector represented, you'll get a rich diversity of financial statement disclosure examples that will save you hours of financial reporting time.

Please visit **CPA2Biz.com/tryeXacct** for more information on **eXacct** and what it can do for you.

Thank you for your continued support.
